Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not available. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than 500 thousand kwh. <sup>4</sup>Less than \$500 thousand. <sup>5</sup>Less than 500 hp.

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

<sup>1</sup>Shipments in pounds not available; reported as 36,029,000 square yards.<sup>2</sup>Code 2292031, Barmen laces, and code 2292071, bobbinets, have been combined with code 2292098, all other laces and nets.<sup>3</sup>Does not include sales by textile mills of "original" mill waste such as card strips, noils, and sweepings.<sup>4</sup>Pyroxylin-coated paper is included in product code 2641531, special coated paper (see Bulletin MC-26B, Converted Paper and Board Products).<sup>5</sup>In thousands of square yards.<sup>6</sup>Code 2295331, oilcloth, included with code 2295398, other impregnated and coated fabrics.<sup>7</sup>Includes rope and cable.<sup>8</sup>Primarily novelty weaving and knitting yarns, plied or otherwise prepared from purchased yarns (not spun or thrown in the reporting establishment); and non-woven fabrics.<sup>9</sup>Code 2295311, varnished insulating fabrics combined with code 2295398, other impregnated and coated fabrics.

Table 6B.--VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

NOTE: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 22952, Rhode Island, Indiana, Michigan, Wisconsin, and California; 22981, Massachusetts, New Jersey, Pennsylvania, Ohio, Illinois, Missouri, Louisiana, and California; 22982, Rhode Island, Illinois, and California; 22983, Massachusetts, Illinois, Indiana, Georgia, Kentucky, Tennessee, Alabama, and Texas.

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

<sup>1</sup>This class includes data for establishments with less than 50% specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Major Group 23.—Apparel and Related Products

This major group of industries, generally known as the "cutting-up and needle trades," includes establishments producing clothing and fabricated textile products by cutting and sewing purchased woven or knit textile fabrics and related materials such as leather, rubberized fabrics, plastics and furs. Excluded from this group are knitting mills primarily engaged in manufacturing apparel from yarns knitted in the same establishment; such plants are included in Group 225, Knitting Mills. Furthermore, establishments primarily engaged in manufacturing felt and straw hats, except millinery, are included in Group 228, Hats, Except Cloth and Millinery; those producing leather shoes and gloves in Major Group 31, Leather and Leather Products; and rubber footwear in Industry 3021, Rubber Footwear. Custom tailors and dressmakers, who manufacture and sell apparel in the same retail establishment, are classified as nonmanufacturing. Similarly, establishments which are primarily wholesalers or dealers in that they purchase and resell finished garments but do not perform the functions of the apparel jobbers described below are classified in Wholesale Trade.

There are three types of establishments which operate in the apparel industries included in Major Group 23: (1) the regular factories or "manufacturers;" (2) the apparel "jobbers;" and (3) the contract factories or "contractors." The "manufacturers" purchase fabric, employ production workers in their own plants to cut and sew the materials into apparel, and sell the final product; in effect, such establishments perform all of the usual manufacturing functions within their own establishments. The "jobbers," on the other hand, primarily perform the entrepreneurial functions of a manufacturing company such as buying raw materials, designing and preparing samples, arranging for the manufacture of the garments from their materials, and selling of the finished apparel. The actual processing (cutting, sewing, etc.) is performed on contract by the apparel contractors, although many jobbers perform the cutting operation in their own establishments. The 1954 edition of the Standard Industrial Classification has been amended by the Bureau of the Budget by the transfer of apparel jobbers from Wholesale Trade to Manufacturing. Apparel jobbers were included in manufacturing in earlier censuses and the data are therefore comparable for all years.

In reporting on the Census of Manufactures questionnaires, the manufacturers show figures on employment, cost of raw materials, and value of products made and sold. The apparel "jobbers" report data comparable to the manufacturers on the cost of raw materials and the value of products, but very little employment at their establishments. The labor costs incurred in producing their garments are included by the

"jobbers" in cost of contract work. The value added by manufacture shown for apparel "jobbers," as for all other manufacturing industries, exclude the cost of contract work as well as the cost of materials. The "contractors," on the other hand, report their employment and receipts for contract work rather than the value of products. These contract plants do not report the cost of materials which they process but only the cost of their own operating supplies. As a result, for "contractors," the ratio of wages and salaries to value added by manufacture is substantially higher than the ratio for "manufacturers," which, in turn, is substantially greater than for "jobbers."

In order to point up these significant differences in the relationship between wages and salaries paid, the cost of materials, the value of products, and value added by manufacture for the three types of establishment, plants were classified by their primary method of operations as "manufacturer," "jobber," or "contractor."

The table below provides comparative data for each of the three types of establishments included in the industries covered by this report. In this connection it should be noted that establishments in these industries may also employ more than one method of operating. For example, some establishments will act as both "manufacturer" and "jobber," or as "manufacturer" and "contractor." In assigning the primary method of operation classification to manufacturer-jobber plants, their relationship between wages and salaries paid to the cost of contract work was used. If wage and salary payments, exceeded contract payments, the plant was classified as a "manufacturer;" if the contract payments exceeded the wages and salary payments, the plant was classified as a "jobber." Similarly for manufacturer-contractor plants, the relationship between the value of products made for their own account was compared with the receipts for work done on materials owned by other establishments to determine the plants' primary method of operation. In the case of some multi-unit companies, it was necessary to treat stitching plants at separate locations as contract plants because of the record-keeping practices of the companies. This somewhat inflates the amount of contract payments and receipts as they are usually described in the trade, which thinks of contractors in terms of independently owned establishments.

Although similar data by type of operation for 1947 are not readily available, it is believed that there has not been any substantial shift between 1947 and 1954 in the relative importance of each type of operation; data for 1939 and earlier years are shown in Volume II, Part I, of the 1939 Census of Manufactures.

<sup>1</sup>The totals include 14 establishments with 2,810 employees; \$23,069 thousand value of shipments; and \$14,326 value added by manufacture, which are not included in the separate totals for manufacturers, jobbers, and contractors. <sup>2</sup>The totals include 24 establishments with 3,242 employees; \$70,317 thousand value of shipments; and \$18,506 thousand value added by manufacture, which are not included in the separate totals for manufacturers, jobbers, or contractors. <sup>3</sup>Separate data by type of establishment are not available. Establishments operating in these industries are practically all manufacturers. <sup>4</sup>The totals include 10 establishments with 1,264 employees; \$11,070 thousand value of shipments; and \$4,699 thousand value added by manufacture, which are not included in the separate totals for manufacturers, jobbers, or contractors. <sup>5</sup>Represents primarily receipts for contract and commission work on materials owned by others.

## MANUFACTURES--INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE INDUSTRY GROUP: 1954 AND EARLIER YEARS

1899.....	12,679			337,934		123,092	309,057	

NA Not available.

<sup>1</sup>In addition to data for operating establishments, manufacturers' central administrative offices and auxiliary units reported 5,928 employees with a payroll of \$35,132 thousand in 1954. Similar data are shown for the years 1949-1953 in the Annual Survey of Manufactures volumes. Data for these units are not available for the years prior to 1949.

<sup>2</sup>The figures for 1939 through 1954 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>3</sup>Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1899-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

<sup>4</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period.

<sup>5</sup>The figures for all years except 1939 and 1937 include data for establishments that cut and stitch products from knit cloth made in separate mills or of integrated companies. The 1939 and 1957 data for these establishments are included in the figures for the textile mill products industries.

## APPAREL AND RELATED PRODUCTS

23-3

Table 2.—GENERAL STATISTICS FOR INDUSTRY GROUPS BY REGIONS AND STATES: 1954 AND 1947

NOTE: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>Each producing state not shown separately has been withheld either (a) to avoid disclosing figures for individual companies; or (b) because the state had less than 100 employees in the industry group. Such state figures are included, however, in the appropriate regional and United States totals.<sup>2</sup>Less than \$500 thousand.<sup>3</sup>This industry sub-group consists of a single four-digit industry. Detailed data by state are included in the four-digit industry tables.

Table 3.—DETAILED STATISTICS FOR THE INDUSTRY GROUP: 1954

(For explanation of line captions see Introduction)

Item	Major industry group 23	Item	Major industry group 23

## Men's and Boys' Suits, Coats, and Overcoats

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

<u>Code</u>	<u>Title</u>
2311	Men's and Boys' Suits and Coats
2312	Suit and Coat Findings

**2311 - Men's and Boys' Suits and Coats** (Full Standard Industrial Classification title: Men's, Youths', and Boys' Suits, Coats, and Overcoats)

This industry comprises establishments primarily engaged in manufacturing men's, youths', boys' suits, coats, and overcoats. Establishments primarily engaged in manufacturing uniforms (military, policemen's, firemen's, etc.) and tailored dress and sport coats, including sport and leisure jackets, are also included in this industry. Establishments primarily engaged in manufacturing men's work and sport garments (such as lumber-jackets, ski suits, and riding garments) are classified in Group 232, Men's and Boys' Furnishings, Work Clothing and Allied Garments. For a detailed list of primary products of Industry 2311, refer to Table 6A, product codes 2311111 to 2311375.

The value of products of Industry 2311, Men's and Boys' Suits and Coats, in 1954 totaled \$1,141 million. This included the production of primary products (men's and boys' suits and coats) valued at \$894 million, production of secondary products valued at \$92 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$155 million.

Industry 2311 output of men's and boys' suits and coats in 1954 represented 91 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 92 percent. Secondary products made by Industry 2311 in 1954 consisted mainly of men's and boys' separate trousers, except work, \$59 million, and men's and boys' apparel, n.e.c. \$11 million.

Industry 2311 output of men's and boys' suits and coats in 1954 represented 96 percent of these products valued at \$927 million, made by all industries. This coverage ratio in 1947 was 97.

The Bureau of the Census publishes current monthly data on the cuttings of men's suits, coats, trousers, and furnishings in Facts for Industry Series M67B, *Men's Apparel*. Annual figures covering the production of boys' apparel and additional items of men's apparel are also published in the annual summaries of

this series. Differences between the 1954 Census production figures shown in Table 6A and the twelve monthly estimates for 1954 shown in the Facts for Industry reports for men's suits and outer coats are due primarily to inconsistent and inadequate reporting by the same respondent manufacturer on the monthly questionnaire and on the 1954 Census questionnaire (see footnote to Table 6A), and to a much lesser extent to the effect of sampling variations in the current monthly estimates. In addition, some of the discrepancy can be attributed to the conceptual differences between the 1954 monthly estimates which are based on reports from the "cutter" of the material (irrespective of ownership) and the 1954 Census figures which are based on reports from the owners of the materials and the finished garments.

### 2312 - Suit and Coat Findings

This industry comprises establishments primarily engaged in manufacturing suit and coat findings such as coat fronts, interlinings, collar linings, trouser waistbands, and shoulder pads, or in making buttonholes for men's, youths', and boys' coats and suits.

The value of products of Industry 2312, Suit and Coat Findings, in 1954 totaled \$28 million. This included the production of primary products (suits and coat findings) valued at \$26 million, negligible output of secondary products, and miscellaneous receipts (mainly contract work on materials owned by others) of \$2 million.

Industry 2312 output of coats and suit findings in 1954 represented 98 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 99 percent.

Industry 2312 output of coat and suit findings in 1954 represented 95 percent of these products, valued at \$27 million, made by all industries. This coverage ratio in 1947 was 99. In this connection it should be noted that the output of coat and suit findings made and used in establishments which are primarily engaged in the manufacture of completed apparel items are not included in the figures shown for this industry.

Separate 1954 Census figures for the Coat and Suit Findings Industry, by type of establishment ("Manufacturers," "Jobbers," and "Contractors") are not shown in the detailed tables of this report since most establishments classified in Industry 2312 operate as "manufacturers."

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments <sup>3</sup> (\$1,000)

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ending nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1947 and 1954, value of products made; for all other years, value of shipments. See Introduction, "Value Added by Manufacture."

<sup>4</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>5</sup>No comparable figures are available for prior years.

## MEN'S AND BOYS' SUITS, COATS, AND OVERCOATS

Note: Detailed figures may not add to the totals because of independent rounding.

<sup>1</sup> D Withheld to avoid disclosing figures for individual companies.<sup>2</sup> General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2311, Men's and Boy's Suits and Coats: New England—New Hampshire, 1 (20-99); Rhode Island, 2 (20-99); Connecticut, 5 (100-249); South and West—Delaware, 1 (100-249); North Carolina, 1 (1-19); South Carolina, 2 (100-249); Georgia, 6 (1,000-2,499); Florida, 4 (20-99); Kentucky, 9 (2,500-4,999); Alabama, 1 (100-249); Mississippi, 1 (250-499); Oklahoma, 1 (20-99); Texas, 10 (500-999); Colorado, 2 (20-99); Utah, 2 (100-249); Washington, 5 (100-249); Oregon, 1 (20-99); California, 67 (2,500-4,999).

S.I.C. 2311-A, Manufacturers: New England—Massachusetts, 52 (2,500-4,999); Connecticut, 1 (20-99); East North Central—Indiana, 1 (250-499); Michigan, 3 (20-99); Wisconsin, 3 (100-249); West North Central—Minnesota, 12 (500-999); Missouri, 15 (1,000-2,499); South Atlantic—Virginia, 4 (1,000-2,499); North Carolina, 1 (1-19); South Carolina, 1 (1-19); Florida, 2 (20-99); East South Central—Kentucky, 7 (2,500-4,999); Tennessee, 4 (1,000-2,499); West South Central—Louisiana, 6 (1,000-2,499); Oklahoma, 1 (20-99); West—Colorado, 1 (1-19); Utah, 2 (100-249); Pacific—Washington, 3 (100-249).

S.I.C. 2311-B, Jobbers: New England—Massachusetts, 15 (20-99); Rhode Island, 1 (1-19); Middle Atlantic—New Jersey, 4 (20-99); Pennsylvania, 43 (1,000-2,499); North Central—Illinois, 14 (100-249); Missouri, 1 (250-499); South—Georgia, 1 (20-99); Texas, 1 (1-19); Pacific—Washington, 1 (1-19); California, 7 (20-99).

S.I.C. 2311-C, Contractors: New England—New Hampshire, 1 (20-99); Rhode Island, 1 (20-99); Connecticut, 4 (100-249); North Central, South and West—Indiana, 3 (1,000-2,499); Michigan, 2 (1-19); Wisconsin, 4 (100-249); Minnesota, 1 (1-19); Missouri, 3 (20-99); Delaware, 1 (100-249); Maryland, 45 (2,500-4,999); Virginia, 3 (500-999); South Carolina, 1 (100-249); Georgia, 1 (500-999); Florida, 2 (20-99); Kentucky, 2 (500-999); Tennessee, 2 (100-249); Alabama, 1 (100-249); Mississippi, 1 (250-499); Louisiana, 1 (20-99); Texas, 3 (20-99); Colorado, 1 (20-99); Washington, 1 (1-19).

S.I.C. 2312, Suit and Coat Findings: New England—Massachusetts, 5 (100-249); Connecticut, 1 (1-19); Middle Atlantic—New Jersey, 4 (20-99); East North Central—Ohio, 6 (20-99); South and West—Georgia, 1 (20-99); Kentucky, 1 (20-99); Tennessee, 1 (20-99); Texas, 1 (20-99); Oregon, 1 (1-19); California, 2 (20-99).

<sup>3</sup> For these industries, the figures represent value of products made.<sup>4</sup> Includes 14 establishments with 2,810 employees, \$23,069 thousand value of shipments and \$14,326 thousand value added by manufacture which are not included in the separate totals for manufacturers, jobbers, or contractors.

## MEN'S AND BOYS' SUITS, COATS, AND OVERCOATS

23A-5

Table 3.—DETAILED STATISTICS FOR THE UNITED STATES: 1954

(For explanation of line captions see Introduction)

Note: Data for establishments with 90% or more specialization are not shown for Industry 2311 as a whole since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of those establishments as a whole.

xxx Not applicable.

NA Not available.

<sup>1</sup>Includes 14 establishments with 2,810 employees, \$23,069 thousand value of shipments and \$14,326 thousand value added by manufacture which are not included in the separate totals for manufacturers, jobbers, or contractors.

<sup>2</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>3</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>4</sup>Less than \$500 thousand.

<sup>5</sup>Detail on consumption by type of fuel was not collected for these industries.

<sup>6</sup>Information on the amount of electric energy generated and/or sold was not collected for these industries.

## MANUFACTURES - INDUSTRY STATISTICS

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4 digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MEN'S AND BOYS' SUITS, COATS, AND OVERCOATS

23A-7

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading, the value of shipments divided among men's and boys' suits, coats and overcoats, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry.)

2311000	Suits and coats, not specified by kind.....	xxx	23,731	xxx	xxx	xxx	xxx	21,919
2312---	Suit and coat findings, total.....	xxx	27,098	xxx	xxx	xxx	xxx	37,314
2312011	Men's and boys' coat, suit, and trouser findings.....	xxx	27,098	xxx	xxx	xxx	xxx	37,314

xxx Not applicable.

<sup>1</sup>Includes the output of small number of establishments in industries which were not sub-classified into manufacturer, jobber, and contractor categories. See also footnote 3, table 2 for other exclusions from these categories.<sup>2</sup>Cuttings of garments on contract accounting for contract receipts of about \$12.0 million were not specified by kind of product.<sup>3</sup>The detailed quantity and value figures shown for 1954 are somewhat understated since nearly \$32.0 million value of products were not specified by kind of product. It is estimated that this value of products represents the following quantities: men's suits, 645 thousand; boys' suits, 90 thousand; men's overcoats and topcoats, 165 thousand; men's tailored dress and sport coats and jackets, .275 thousand; boys' tailored dress and sport coats and jackets, 110 thousand.<sup>4</sup>Includes product codes 2311111 and 2311121.<sup>5</sup>Includes product codes 2311115 and 2311125.<sup>6</sup>Excludes uniforms made from government-owned materials except for quantities shown for cuttings of garments on contract.<sup>7</sup>Includes sizes 32-38 only.<sup>8</sup>Included with "Jobbers" to avoid disclosing operations of individual firms.<sup>9</sup>Includes sizes 8-16 only.<sup>10</sup>Includes junior boys' size 3.<sup>11</sup>Less than 1 thousand.<sup>12</sup>In addition to the figures shown above for military garments, the following cuttings were reported as cut on contract for the United States Government (all figures are in thousands): Uniform suits, 59; uniform separate coats, 1,247; and uniform overcoats, 634. The census figures do not include the value of these garments nor the value of the piece goods used in the garments.<sup>13</sup>Included with manufacturers to avoid disclosing figures for individual companies.<sup>14</sup>Represent students' sizes 10-24 only.<sup>15</sup>Represent junior boys' sizes 4-14.

## MANUFACTURES - INDUSTRY STATISTICS

Table 6B.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

Product class, region, and State <sup>1</sup>	Value of shipments	Product class, region, and State <sup>1</sup>	Value of shipments	Product class, region, and State <sup>1</sup>	Value of shipments

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 23111, Indiana, Virginia, Alabama, Missouri, Massachusetts, Tennessee, and Texas; 23112, Massachusetts, Minnesota, and Kentucky; 23113, Minnesota.

<sup>2</sup>In addition to the value shown by product class for Industry 2311, Men's and Boys' Suits and Coats, not specified by kind, in the value of \$21,919 thousand were reported for 1947 and of \$23,731 thousand for 1954. For the intervening years only combined totals are available for product classes 23111, 23112, and 23113: 1953, \$1,073,433 thousand; 1952, \$1,000,404 thousand; 1951, \$1,075,645 thousand; and 1950, \$1,021,469 thousand.

TABLE 7 NOT APPLICABLE TO THIS BULLETIN

## MEN'S AND BOYS' SUITS, COATS, AND OVERCOATS

23A-11

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

	Establishments with:									
	90% or more specialization.....	14	201	812	123	141	278	1,584	6,388	7,972

Note: Plant specialization data are not shown for Industry 2311 as a whole since specialization ratios for contractors were not completed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is production on own account from materials owned by them, and might not be representative of the activity of the establishments as a whole.

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry. Miscellaneous small statistical adjustments are also included.

## Men's and Boys' Furnishings, Work Clothing, and Allied Garments

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2321--Men's	Dress Shirts and Nightwear
2322--Men's and Boys'	Underwear
2323--Men's and Boys'	Neckwear
2325--Men's and Boys'	Cloth Hats
2326--Hat and Cap Materials	
2327--Separate Trousers	
2328--Work Shirts	
2329--Men's and Boys'	Clothing, Not Elsewhere Classified

Establishments classified in these industries are primarily engaged in the manufacture of men's and boys' furnishings, work clothing and allied garments on a cut-and-sew basis from woven materials or from fabrics knit in other establishments. Establishments primarily engaged in manufacturing men's and boys' knitted apparel items from fabrics knit in the same establishments are classified in Industry group 225, Knitting Mills. Therefore, some of the primary products of Industry group 232 are also primary to Industry group 225. Because knit products are classified in two or more industries, a somewhat lower than usual coverage ratio exists for these industries (the coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry).

**2321--Men's Dress Shirts and Nightwear** (Full Standard Industrial Classification Title: Men's Youths', and Boys' Shirts (Except Work Shirts), Collars, and Nightwear)

This industry comprises establishments primarily engaged in manufacturing men's, youth's, and boys' shirts, collars, and nightwear cut and sewed from purchased woven or knit fabric. Establishments primarily engaged in manufacturing knit outerwear sport shirts, including polo, tennis, basque, and T-shirts, from purchased knit fabric are also classified in Industry 2321. Establishments primarily engaged in manufacturing work shirts are classified in Industry 2328, Work Shirts. Knitting mills primarily engaged in manufacturing nightwear are classified in Industry 2254, Knit Underwear Mills, and knit sport shirts in Industry 2253, Knit Outerwear Mills. For a detailed list of primary products of Industry 2321, refer to Table 6A, product codes 2321111 to 2321271 and 2253211 to 2253227.

The value of products of Industry 2321, Men's Dress Shirts and Nightwear, in 1954 totaled \$894 million. This included output of primary products (men's dress shirts and nightwear and knit outerwear sport shirts) valued at \$700 million, production of secondary products valued at \$73 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$121 million.

Industry 2321 output of primary products in 1954 represented 90 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 94 percent. Secondary products made by Industry 2321 in 1954 consisted mainly of men's and boys' separate trousers, except work, \$9 million, men's and boys' work shirts, \$9 million; and men's and boys' heavy outerwear coats and jackets, \$15 million.

Industry 2321 production of primary products in 1954 represented 85 percent of these products, valued at \$827 million, made by all industries. This coverage ratio in 1947 was 87 percent. Industry 2321 accounted for 94 percent of the men's and boys' woven dress and sport shirts and nightwear, valued at \$710 million, and 27 percent of the men's and boys' knit outerwear sport shirts, valued at \$110 million made by all industries in 1954. As indicated above, men's and boys' knit outerwear sport shirts

are also classified in Industry 2253, Knit Outerwear Mills. This accounts for the relatively low coverage ratio for the output of this product by Industry 2321.

**2322--Men's and Boys' Underwear** (Full Standard Industrial Classification Title: Men's, Youths', and Boys' Underwear)

This industry comprises establishments primarily engaged in manufacturing men's, youths', and boys' underwear cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing underwear are classified in Industry 2254, Knit Underwear Mills. For a detailed list of primary products of Industry 2322, refer to Table 6A, product codes 2322011 to 2322071.

The value of products of Industry 2322, Men's and Boys' Underwear, in 1954 totaled \$74 million. This included output of primary products (men's and boys' underwear) valued at \$60 million, production of secondary products valued at \$8 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$6 million.

Industry 2322 output of men's and boys' underwear in 1954 represented 88 percent of its total products (primary and secondary). In 1947, the primary product specialization ratio was 95 percent. Secondary products made by Industry 2322 in 1954 consisted principally of men's dress shirts and nightwear, \$3 million and knit outerwear sport shirts, \$2 million. The men's and boys' underwear produced by Industry 2322 was made principally of woven fabrics.

Industry 2322 production of men's and boys' underwear in 1954 represented 28 percent of these products, valued at \$214 million, made by all industries. This coverage ratio in 1947 was 21 percent. Other industries making men's and boys' underwear consisted mainly of Industry 2254, Knit Underwear Mills, \$133 million; Industry 2253, Knit Outerwear Mills, \$7 million; and Industry 2321, Men's Dress Shirts and Nightwear, \$6 million. As indicated above, men's and boys' knit underwear are also classified in Industry 2254, Knit Underwear Mills. This accounts for the relatively low coverage ratio for the output of this product by Industry 2322.

**2323--Men's and Boys' Neckwear** (Full Standard Industrial Classification Title: Men's, Youths', and Boys' Neckwear)

This industry comprises establishments primarily engaged in manufacturing men's, youths', and boys' neckties, scarfs, and mufflers cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing neckties, scarfs, and mufflers are classified in Industry 2253, Knit Outerwear Mills. For a detailed list of primary products of Industry 2323, refer to Table 6A, product codes 2323011 to 2323019.

The value of products of Industry 2323, Men's and Boys' Neckwear, in 1954 totaled \$100 million. This included output of primary products (men's and boys' neckwear) valued at \$93 million, production of secondary products valued at \$2 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$5 million.

Industry 2323 output of men's and boys' neckwear in 1954 represented 98 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 97 percent.

Industry 2323 production of men's and boys' neckwear in 1954 represented 92 percent of these products, valued at \$101 million, made by all industries. This coverage ratio in 1947 was 91 percent. The principal other industry making men's and boys' neckwear in 1954 was Industry 2253, Knit Outerwear Mill, \$2 million.

**2325—Men's and Boys' Cloth Hats** (Full Standard Industrial Classification Title: Men's, Youths', and Boys' Cloth Hats and Caps)

This industry comprises establishments primarily engaged in manufacturing men's, youths', and boys' hats and caps from purchased knit or woven fabric, such as baseball and other cloth sport hats; chauffeurs', policemen's, and other uniform hats (including women's civilian and military uniform hats and caps) and miscellaneous cloth hats and caps. Establishments primarily engaged in manufacturing fur-felt hats are classified in Industry 2281, Fur-Felt Hats and Hat Bodies; wool-felt hats in Industry 2282, Wool-Felt Hats and Hats Bodies; and straw hats in Industry 2283, Straw Hats. Knitting mills primarily engaged in manufacturing caps are classified in Industry 2253, Knit Outerwear Mills. For a detailed list of primary products of Industry 2325, refer to Table 6A, product codes 2325011 to 2325035.

The value of shipments of Industry 2325, Men's and Boys' Cloth Hats, in 1954 totaled \$58 million. This included shipments of primary products (men's and boys' cloth hats) valued at \$55 million, shipments of secondary products valued at \$1 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$2 million.

Industry 2325 shipments of men's and boys' cloth hats in 1954 represented 97 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 96 percent.

Industry 2325 shipments of men's and boys' cloth hats in 1954 represented 87 percent of these products, valued at \$63 million, shipped by all industries. This coverage ratio in 1947 was 82 percent. The principal other industry shipping men's and boys' cloth hats in 1954 was Industry 2253, Knit Outerwear Mills, \$5 million.

Separate 1954 Census figures for the Men's and Boys' Cloth Hats Industry, by type of establishment ("Manufacturers," "Jobbers," and "Contractors") are not shown in the detailed tables of this report since practically all establishments classified in Industry 2325 operate as "manufacturers."

#### **2326—Hat and Cap Materials**

This industry comprises establishments primarily engaged in manufacturing hat and cap findings such as cap visors, sweatbands, and trimmings from purchased materials. Establishments primarily engaged in tip printing or stamping are also included in this industry. Establishments primarily engaged in manufacturing hatters' fur are classified in Industry 2284, Hatters' Fur.

The value of shipments of Industry 2326, Hat and Cap Materials, in 1954 totaled \$10 million. This included shipments of primary products (hat and cap materials) valued at \$9 million, a negligible amount of secondary products, and miscellaneous receipts (mainly contract work or materials owned by others) of \$1 million.

Industry 2326 shipments of hat and cap materials in 1954 represented 99 percent of its total product shipments (primary and secondary). In 1947, the primary product specialization ratio was 97 percent.

Industry 2326 shipments of hat and cap materials in 1954 represented 94 percent of these products, valued at \$10 million, shipped by all industries. This coverage ratio in 1947 was 99 percent. In this connection it should be noted that the output of hat and cap materials made and used in establishments which are primarily engaged in the manufacture of completed hats and caps are not included in the figures shown for this industry.

Separate 1954 Census figures for the Hat and Cap Materials Industry, by type of establishment ("Manufactures," "Jobbers," and "Contractors") are not shown in the detailed tables of this report since practically all establishments classified in Industry 2326 operate as "manufacturers."

**2327—Separate Trousers** (Full Standard Industrial Classification Title: Men's, Youths', and Boys' Separate Trousers)

This industry comprises establishments primarily engaged in manufacturing men's, youths', and boys' separate trousers. Establishments primarily engaged in manufacturing trousers as a part of complete suits are classified in Industry 2311, Men's and Boys' Suits and Coats, and work pants and washable service slacks in Industry 2329, Men's and Boys' Clothing, Not Elsewhere Classified. For a detailed list of products of Industry 2327, refer to Table 6A, product codes 2327011 to 2327065.

The value of products of Industry 2327, Separate Trousers, in 1954 totaled \$398 million. This included output of primary products (separate trousers) valued at \$275 million, production of secondary products valued at \$32 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$90 million.

Industry 2327 output of separate trousers in 1954 represented 89 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 86 percent. Secondary products made by this industry in 1954 consisted mainly of men's and boys' work, sport and other apparel, \$12 million, and men's and boys' suits, coats and overcoats, \$12 million.

Industry 2327 production of separate trousers in 1954 represented 74 percent of these products, valued at \$369 million, made by all industries. This coverage ratio in 1947 was 70 percent. Other industries making separate trousers consisted mainly of Industry 2311, Men's and Boys' Suits and Coats, \$59 million; Industry 2321, Men's Dress Shirts and Nightwear, \$9 million; and Industry 2329, Men's and Boys' Clothing, \$16 million.

#### **2328—Work Shirts**

This industry comprises establishments primarily engaged in manufacturing work shirts. Establishments primarily engaged in manufacturing men's, youths', and boys' dress and sport shirts from purchased fabric are classified in Industry 2321, Men's Dress Shirts and Nightwear. Knitting mills primarily engaged in manufacturing knit sport shirts (polo, T-shirts, etc.) are classified in Industry 2253, Knit Outerwear Mills. For a detailed list of primary products of Industry 2328, refer to Table 6A, product codes 2328011 and 2328051.

The value of products of Industry 2328, Work Shirts, in 1954 totaled \$38 million. This included output of primary products (work shirts) valued at \$32 million, production of secondary products valued at \$1 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$6 million.

Industry 2328 output of work shirts in 1954 represented 97 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 77 percent. This increase of 20 percentage points in the specialization ratio reflects the shift to other industries of a number of establishments which had produced a multi-line of men's furnishings in 1947. In 1954, their primary production was other than work shirts and they were classified in other industries, principally Industry 2329, Men's and Boys' Clothing, N.E.C. The plants included in Industry 2328 for 1954 for the most part make only work shirts.

Industry 2328 production of work shirts in 1954 represented 35 percent of these products valued at \$90 million, made by all industries. This coverage ratio in 1947 was 67 percent. Other industries making work shirts in 1954 consisted mainly of Industry 2321, Men's Dress Shirts and Nightwear, \$9 million, and Industry 2329, Men's and Boys' Clothing, \$47 million.

Separate 1954 Census figures for the Work Shirt Industry, by type of establishment ("Manufacturers," "Jobbers," and "Contractors") are not shown in the detailed tables of this report except for Table 3. This was done to prevent disclosing the operations of individual companies. It should be noted, however, that there is a significant amount of contract operations in this industry, as well as the usual type of manufacturing establishment.

**2329—Men's and Boys' Clothing, Not Elsewhere Classified** (Full Standard Industrial Classification Title: Men's, Youths', and Boys' Work, Sport, and Other Clothing, Not Elsewhere Classified)

This industry comprises establishments primarily engaged in manufacturing men's, youths', and boys' work, sport, and other clothing not elsewhere classified. Important products of this industry include overalls, work pants, industrial garments, washable service apparel, oiled-fabric work garments, mackinaws, lumberjackets, blanket-lined coats, ski and snow suits, and hunting and riding garments. Establishments primarily engaged in manufacturing separate trousers are classified in Industry 2327, Separate Trousers, and leather and sheep-lined garments in Industry 2386, Leather and Sheep-Lined Clothing. Knitting mills primarily engaged in manufacturing outerwear are classified in Industry 2253, Knit Outerwear Mills. For a detailed list of products of Industry 2329, refer to Table 6A, product codes 2329111 to 2329371, 2253111 to 2253127, and 2253311 to 2253325.

The value of products of Industry 2329, Men's and Boys' Clothing, Not Elsewhere Classified, in 1954 totaled \$793 million. This included output of primary products (men's and boys' clothing, not elsewhere classified, including sweaters and swimwear and athletic shorts) valued at \$564 million, production of secondary products valued at \$153 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$76 million.

Industry 2329 output of men's and boys' clothing, not elsewhere classified, in 1954 represented 79 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 82 percent. Secondary products made by this industry in 1954 consisted mainly of work shirts, \$47 million; men's and boys' woven dress and sport shirts, \$19 million; children's outerwear, n.e.c., \$17 million; men's and boys' separate trousers, except work, \$16 million; and women's, misses', and juniors' outerwear, n.e.c., \$16 million.

Industry 2329 production of primary products (men's and boys' clothing, not elsewhere classified, including sweaters and swimwear and athletic trunks) in 1954 represented 78 percent of these products, valued at \$721 million, made by all industries.

This coverage ratio in 1947 was 76 percent. Other industries shipping men's and boys' clothing, not elsewhere classified, in 1954 consisted mainly of Industry 2311, Men's and Boys' Suits and Coats, \$12 million; Industry 2321, Men's Dress Shirts and Nightwear, \$25 million; and Industry 2327, Separate Trousers, \$14 million.

#### Relationship of Census of Manufactures and Facts For Industry Data

The Bureau of the Census publishes current monthly data on the cuttings of men's selected woven furnishings, work clothing items and sweaters in the Facts For Industry Series M67B, Men's Apparel, and quarterly figures on the output of men's and boys' knit cotton and wool underwear and nightwear in Facts For Industry Series M67C, Knit Underwear and Nightwear. Annual figures covering the production of boys' apparel and additional items of men's apparel are also published in the annual summaries of these series. The 1954 Census figures shown in Table 6A may differ from the sum of the twelve monthly or four quarterly estimates shown in the Facts For Industry reports primarily due to differences in reporting by the same respondents on the current and census questionnaires, and to some extent to the effect of sampling variations in the current estimates. In addition, some of the discrepancy in figures for men's woven furnishings and work clothing can be attributed to the conceptual differences between the 1954 monthly estimates which are based on reports from the "cutter" of the material (irrespective of ownership) and the 1954 Census figures which are based on reports from the owners of the materials and the finished garments. Regarding the differences in reporting by the same respondents, it should be noted that some manufacturers in reporting for the 1954 Census did not adequately describe the specific garments which they made or reported value only. The value of such output is shown in Table 6A under the several categories for "Not specified by kind". The 1954 Census statistics on number of garments cut do not, of course, include the output represented by such values.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MANUFACTURES—INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. <sup>3</sup> (\$1,000)	Value of shipments <sup>4</sup> (\$1,000)

## MEN'S AND BOYS' FURNISHINGS, WORK CLOTHING, AND ALLIED GARMENTS

23B-5

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS—Continued

(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. <sup>3</sup> (\$1,000)	Value of shipments <sup>4</sup> (\$1,000)
		Number <sup>1</sup>	Payroll (\$1,000)	Number <sup>1</sup>	Wages (\$1,000)			
Men's and boys' clothing, nec.—Continued:								
1950 <sup>5</sup> .....	(NA)	97,601	195,688	88,250	160,133	309,254	538,092	847,346
1949 <sup>5</sup> .....	(NA)	84,983	168,443	77,581	128,941	258,479	437,660	696,139
1947.....	1,007	74,833	131,600	68,698	106,089	219,195	338,280	557,475
1939 <sup>13</sup> .....	779	(NA)	(NA)	60,704	39,848	77,524	119,961	197,485

NA Not available.

<sup>1</sup>The number of "All employees" and the number of "production and related workers" were obtained as follows: For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>Figures for years prior to 1935 do not include cost of contract work, except in the case of "Men's dress shirts and nightwear."

<sup>4</sup>For 1929 and 1949-1953, value of shipments; for all other years, value of production. See Introduction, "Value of Shipments."

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>The figures for "Men's dress shirts and nightwear" prior to 1933 are not sufficiently comparable with those for later years to be shown in this table because they include data for work shirts and exclude data for men's and boys' nightwear.

<sup>7</sup>"Men's and boys' underwear" was not shown as a separate industry prior to 1935, but was included with the former industry "Furnishing goods, men's n.e.c."

<sup>8</sup>"Men's and boys' neckwear" was formerly included with the discontinued industry "Furnishing goods, n.e.c." Separate figures are, therefore, not available prior to 1937.

<sup>9</sup>Coverage of "Men's and boys' cloth hats and caps" was incomplete in 1937.

<sup>10</sup>The figures for "Men's and boys' cloth hats and caps" for 1899 are not sufficiently comparable with those for later years to be shown in this table because they include data for straw hats.

<sup>11</sup>The figures for "Hats and cap materials" prior to 1937 are not sufficiently comparable with those for later years to be shown in this table because they include data for hatters fur.

<sup>12</sup>This industry contain a large number of very small establishments some of which may have been misclassified into other industries. This would not affect the statistics other than the number of establishments.

<sup>13</sup>No comparable figures available for earlier years.

<sup>14</sup>"Work shirts" was formerly a part of the discontinued industry "Work clothing (including work shirts)." Separate figures prior to 1937 are not available.

## MANUFACTURES—INDUSTRY STATISTICS

Note: Detailed figures may not add to the totals because of independent rounding. Data for industries 2321, 2327, 2328, and 2329 include a total of 24 establishments with 3,242 employees, \$70,317 thousand, value of shipments and \$18,506 thousand value added by manufacture which are not included in the separate totals for manufacturers, jobbers, or contractors.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2321, Men's Dress Shirts and Nightwear: New England—Maine, 4 (500-999); Vermont, 1 (20-99); East North Central—Indiana, 4 (1,325); Michigan, 3 (1-19); Wisconsin, 2 (100-249); West North Central—Nebraska, 4 (100-249); Kansas, 2 (100-249); South Atlantic—Delaware, 4 (500-999); West Virginia, 1 (20-99); West South Central—Louisiana, 1 (100-249); Texas, 13 (500-999); Mountain—Colorado, 2 (250-499); Arizona, 3 (20-99); Pacific—Washington, 1 (1-19); Oregon, 1 (250-499); California, 103 (5,000-9,999).

Footnotes continued on next page

S.I.C. 2321, Pt. A, Manufacturers: New England—Maine, 1 (20-99); Massachusetts, 11 (500-999); East North Central—Ohio, 10 (500-999); Indiana, 2 (500-999); Illinois, 14 (500-999); Michigan, 3 (1-19); Wisconsin, 1 (20-99); West North Central—Minnesota, 4 (250-499); Nebraska, 1 (20-99); Kansas, 1 (1-19); South Atlantic—Delaware, 2 (500-999); North Carolina, 10 (1,000-2,499); East South Central—Kentucky, 5 (500-999); Mississippi, 3 (1,000-2,499); West South Central—Arkansas, 3 (500-999); Louisiana, 1 (100-249); West—Colorado, 2 (250-499); Arizona, 2 (20-99); Washington, 1 (1-19); Oregon, 1 (250-499).

S.I.C. 2321, Pt. B, Jobbers: New England—Maine, 1 (250-499); Massachusetts, 2 (500-999); Connecticut, 2 (1-19); Middle Atlantic—New Jersey, 1 (500-999); Pennsylvania, 11 (250-499); North Central—Ohio, 2 (500-999); Illinois, 1 (1-19); Missouri, 1 (20-99); Nebraska, 1 (20-99); South—Maryland, 1 (1-19); Virginia, 1 (100-249); North Carolina, 1 (100-249); South Carolina, 2 (20-99); Georgia, 3 (100-249); Mississippi, 2 (250-499).

S.I.C. 2321, Pt. C, Contractors: New England—Maine, 2 (250-499); Vermont, 1 (20-99); Connecticut, 10 (1,000-2,499); Middle Atlantic—New Jersey, 25 (1,000-2,499); Pennsylvania, 75 (5,000-9,999); North Central—Indiana, 2 (500-999); Wisconsin, 1 (20-99); Minnesota, 1 (100-249); Missouri, 5 (250-499); Nebraska, 2 (100-249); Kansas, 1 (100-249); South—Delaware, 2 (250-499); Maryland, 15 (1,000-2,499); Virginia, 10 (1,000-2,499); West Virginia, 1 (20-99); South Carolina, 27 (2,500-4,999); Georgia, 22 (4,027); Kentucky, 4 (500-999); Arkansas, 3 (250-499); Texas, 4 (20-99); West—Arizona, 1 (1-19); California, 30 (1,000-2,499).

S.I.C. 2322, Men's and Boys' Underwear: Northeast—Massachusetts, 1 (20-99); New York, 19 (500-999); New Jersey, 4 (20-99); East North Central—Indiana, 3 (250-499); Illinois, 2 (100-249); West North Central—Minnesota, 2 (250-449); Missouri, 1 (20-99); Nebraska, 1 (20-99); South and West—Maryland, 3 (100-249); Virginia, 2 (100-249); Georgia, 4 (500-999); Tennessee, 3 (250-499); Alabama, 3 (250-499); Mississippi, 2 (250-499); Oklahoma, 1 (100-249); California, 1 (1-19).

S.I.C. 2322, Pt. A, Manufacturers: Northeast—Massachusetts, 1 (20-99); New York, 13 (500-999); New Jersey, 2 (20-99); Pennsylvania, 5 (20-99); All Other Regions—Indiana, 2 (100-249); Illinois, 2 (100-249); Minnesota, 2 (250-499); Missouri, 1 (20-99); Maryland, 2 (20-99); North Carolina, 4 (500-999); South Carolina, 2 (500-999); Georgia, 2 (500-999); Kentucky, 3 (1,000-2,499); Tennessee, 2 (250-499); Alabama, 2 (100-249); Mississippi, 2 (250-499); Oklahoma, 1 (100-249); California, 1 (1-19).

S.I.C. 2322, Pt. B, Jobbers: All Other States—New York, 2 (20-99); New Jersey, 1 (1-19); Pennsylvania, 3 (100-249); South Atlantic—South Carolina, 1 (100-249).

S.I.C. 2322, Pt. C, Contractors: All Other States—New York, 4 (100-249); New Jersey, 1 (1-19); Indiana, 1 (100-249); West North Central—Nebraska, 1 (20-99); Maryland, 1 (20-99); Virginia, 2 (100-249); North Carolina, 2 (250-499); South Carolina, 2 (20-99); Georgia, 2 (100-249); Kentucky, 2 (250-499); Tennessee, 1 (20-99); Alabama, 1 (100-249).

S.I.C. 2323, Men's and Boys' Neckwear: New England—Maine, 1 (1-19); New Hampshire, 1 (1-19); Vermont, 1 (1-19); Rhode Island, 2 (1-19); East North Central—Illinois, 22 (250-499); Michigan, 3 (20-99); West North Central—Minnesota, 2 (20-99); Missouri, 6 (250-499); Nebraska, 1 (1-19); South—North Carolina, 3 (100-249); South Carolina, 1 (1-19); Kentucky, 3 (100-249); Arkansas, 1 (1-19); Louisiana, 2 (500-999); Texas, 3 (20-99); Mountain—Colorado, 2 (1-19); New Mexico, 2 (1-19); Arizona, 1 (1-19); Utah, 1 (1-19); Pacific—Washington, 2 (20-99); Oregon, 1 (1-19); California, 32 (250-499).

S.I.C. 2323, Pt. A, Manufacturers: New England—Maine, 1 (1-19); Vermont, 1 (1-19); Massachusetts, 19 (250-499); Rhode Island, 2 (1-19); Connecticut, 5 (250-499); North Central—Ohio, 9 (250-499); Illinois, 21 (250-499); Michigan, 3 (20-99); Minnesota, 2 (20-99); Nebraska, 1 (1-19); South and West—Maryland, 10 (100-249); North Carolina, 2 (20-99); South Carolina, 1 (1-19); Kentucky, 2 (100-249); Arkansas, 1 (1-19); Louisiana, 2 (500-999); Texas, 3 (20-99); Colorado, 2 (1-19); New Mexico, 2 (1-19); Arizona, 1 (1-19); Utah, 1 (1-19); Washington, 2 (20-99); Oregon, 1 (1-19).

S.I.C. 2323, Pt. B, Jobbers: Middle Atlantic—New Jersey, 22 (100-249); Pennsylvania, 1 (1-19); All Other Divisions—Ohio, 1 (1-19); Missouri, 2 (20-99); California, 1 (1-19).

S.I.C. 2323, Pt. C, Contractors: New England—New Hampshire, 1 (1-19); Massachusetts, 2 (20-99); Connecticut, 3 (20-99); Middle Atlantic—New York, 40 (250-499); New Jersey, 13 (250-499); All Other Divisions—Illinois, 1 (1-19); Maryland, 1 (1-19); North Carolina, 1 (100-249); Kentucky, 1 (1-19); California, 5 (1-19).

S.I.C. 2325, Men's and Boys' Cloth Hats: Northeast—Maine, 2 (1-19); Massachusetts, 24 (100-249); Connecticut, 6 (20-99); New Jersey, 17 (250-499); East North Central—Indiana, 2 (20-99); Michigan, 4 (20-99); Wisconsin, 8 (100-249); West North Central—Minnesota, 9 (100-249); Iowa, 3 (20-99); South and West—Virginia, 2 (20-99); North Carolina, 1 (1-19); Georgia, 1 (20-99); Florida, 7 (100-249); Tennessee, 3 (20-99); Alabama, 3 (100-249); Colorado, 3 (100-249); Washington, 1 (1-19); Oregon, 1 (1-19).

S.I.C. 2326, Hat and Cap Materials: All Other States—New Jersey, 1 (1-19); Illinois, 3 (20-99); Missouri, 2 (1-19).

S.I.C. 2327, Separate Trousers: West North Central—Minnesota, 4 (100-249); Iowa, 1 (1-19); Nebraska, 1 (1-19); South Atlantic—West Virginia, 2 (100-249); North Carolina, 2 (250-499); South Carolina, 1 (20-99); West South Central—Arkansas, 3 (500-999); Oklahoma, 2 (100-249); West—Colorado, 2 (100-249); Washington, 6 (500-999).

S.I.C. 2327, Pt. A, Manufacturers: New England—Maine, 1 (1-19); Massachusetts, 14 (500-999); Connecticut, 2 (20-99); East North Central—Indiana, 6 (500-999); Michigan, 5 (100-249); Wisconsin, 2 (100-249); West North Central—Missouri, 10 (1,000-2,499); Nebraska, 1 (1-19); South Atlantic—Virginia, 2 (1,000-2,499); West Virginia, 1 (100-249); South Carolina, 1 (20-99); Florida, 3 (100-249); East South Central—Kentucky, 2 (250-499); Mississippi, 2 (1,000-2,499); West South Central—Arkansas, 1 (20-74); Louisiana, 6 (500-999); Oklahoma, 1 (1-19); West—Colorado, 2 (100-249); Washington, 3 (250-499).

S.I.C. 2327, Pt. B, Jobbers: New England—Maine, 1 (1-19); Connecticut, 3 (1-19); Middle Atlantic—New Jersey, 5 (1-19); East North Central—Ohio, 2 (1-19); Indiana, 1 (100-249); Illinois, 6 (20-99); South—Maryland, 10 (100-249); Georgia, 1 (1-19); Alabama, 1 (250-499); Mississippi, 3 (1-19); West South Central—Arkansas, 1 (250-499); Louisiana, 1 (20-99); Pacific—Washington, 1 (20-99); California, 6 (20-99).

S.I.C. 2327, Pt. C, Contractors: New England—Maine, 3 (100-249); Massachusetts, 12 (250-499); East North Central—Ohio, 9 (250-499); Indiana, 2 (100-249); Illinois, 35 (500-999); Michigan, 2 (20-99); Wisconsin, 3 (100-249); West North Central—Minnesota, 1 (1-19); Iowa, 1 (1-19); Missouri, 16 (1,000-2,499); South—Maryland, 22 (500-999); Virginia, 3 (500-999); West Virginia, 1 (100-249); North Carolina, 2 (250-499); Georgia, 14 (1,000-2,499); Florida, 1 (1-19); Kentucky, 3 (250-499); Alabama, 6 (500-999); Arkansas, 1 (100-249); Louisiana, 3 (100-249); Oklahoma, 1 (100-249); Pacific—Washington, 2 (1-19); California, 28 (250-499).

S.I.C. 2328, Work Shirts: Northeast and North Central—New York, 2 (20-99); Indiana, 1 (250-499); Missouri, 2 (250-499); South Atlantic—Maryland, 2 (20-99); Virginia, 1 (20-99); North Carolina, 7 (250-499); Georgia, 1 (20-99); East South Central—Kentucky, 2 (500-999); Alabama, 2 (100-249); Mississippi, 10 (1,000-2,499); West South Central—Arkansas, 1 (20-99); Louisiana, 1 (20-99); Texas, 1 (20-99).

S.I.C. 2329, Men's and Boys' Clothing, N.E.C.: New England—New Hampshire, 4 (100-249); Vermont, 5 (20-99); Rhode Island, 3 (250-499); West North Central—Iowa, 17 (1,013); Nebraska, 1 (20-99); Kansas, 5 (500-999); South Atlantic—Delaware, 1 (20-99); West Virginia, 3 (100-249); South Carolina, 2 (20-99); Florida, 10 (500-999); West South Central—Louisiana, 5 (1,151); Oklahoma, 8 (500-999); Mountain—Wyoming, 1 (1-19); Colorado, 1 (250-499); Arizona, 2 (20-99); Utah, 1 (100-249); Pacific—Washington, 11 (250-499); Oregon, 2 (250-499).

S.I.C. 2329, Pt. A, Manufacturers: New England—New Hampshire, 3 (100-249); Vermont, 3 (20-99); Rhode Island, 3 (250-499); Connecticut, 5 (100-249); East North Central—Ohio, 17 (1,000-2,499); Indiana, 33 (2,500-4,999); West North Central—Minnesota, 13 (1,000-2,499); Iowa, 11 (500-999); Nebraska, 1 (20-99); Kansas, 4 (500-999); South Atlantic—Delaware, 1 (20-99); West Virginia, 2 (100-249); South Carolina, 1 (1-19); Florida, 7 (500-999); West South Central—Arkansas, 3 (500-999); Louisiana, 4 (1,000-2,499); Oklahoma, 7 (250-499); Mountain—Wyoming, 1 (1-19); Colorado, 1 (250-499); Arizona, 2 (20-99); Utah, 1 (100-249); Pacific—Washington, 10 (250-499); Oregon, 2 (250-499); California, 52 (1,000-2,499).

S.I.C. 2329, Pt. B, Jobbers: New England—Massachusetts, 5 (20-99); Connecticut, 1 (1-19); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 13 (100-249); North Central—Ohio, 2 (100-249); Illinois, 1 (1-19); Missouri, 4 (100-249); South—Maryland, 2 (20-99); Virginia, 2 (1,000-2,499); South Carolina, 1 (1-19); Georgia, 2 (1-19); Tennessee, 2 (500-999); Alabama, 2 (250-499); Mississippi, 1 (250-499); Texas, 4 (100-249).

S.I.C. 2329, Pt. C, Contractors: New England—New Hampshire, 1 (20-99); Massachusetts, 17 (500-999); Connecticut, 1 (1-19); Middle Atlantic—New Jersey, 21 (1,000-2,499); Pennsylvania, 54 (2,500-4,999); North Central—Ohio, 4 (20-99); Indiana, 1 (20-99); Illinois, 14 (500-999); Minnesota, 2 (20-99); Iowa, 6 (1,078); Nebraska, 1 (1,078); Kansas, 1 (1-19); South—Maryland, 14 (500-999); Virginia, 9 (1,000-2,499); West Virginia, 1 (1-19); Georgia, 7 (1,000-2,499); Florida, 3 (20-99); Tennessee, 9 (1,000-2,499); Alabama, 5 (250-499); Mississippi, 4 (250-499); Arkansas, 5 (1,000-2,400); Louisiana, 1 (100-249); Oklahoma, 1 (20-99); Texas, 11 (2,140); Pacific—Washington, 1 (20-99); California, 23 (500-999).

Note: Detailed figures may not add to the totals because of independent rounding.

xxx Not applicable.

NA Not available.

<sup>1</sup>Industries 2321, 2327, 2328 and 2329 include a total of 24 establishments with 3,242 employees, \$70,317 thousand value of shipments and \$18,506 thousand value added by manufacture which are not included in the separate totals for "manufacturers", "jobbers" or "contractors".<sup>2</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90% such as Industries 2322, 2327 and 2329. In these cases, however, the columns are shown for manufacturers and jobbers only, since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of these establishments as a whole.<sup>3</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.<sup>4</sup>Less than \$500 thousand.<sup>5</sup>Less than 500 thousand kwh.<sup>6</sup>Includes one jobber to avoid disclosure of individual company figures.

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MANUFACTURES--INDUSTRY STATISTICS

Table 5B.—INDUSTRY-PRODUCT ANALYSIS--SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

<sup>1</sup>For some products, the total quantity shown includes a small volume which is not included in the separate figures for "Manufacturers," "Jobbers," and "Contractors."<sup>2</sup>Product codes 2321111 and 2321115 also include product code 2321155.<sup>3</sup>Excludes garments made from government-owned materials except for quantities shown for cuttings of garments on contract.<sup>4</sup>Product code 2321265 combined with 2322071, and product code 2321271 combined with 2322061.<sup>5</sup>The 1947 figures represent quantity and value of shipments, including interplant shipments.<sup>6</sup>Figures shown are dollar value (in thousands) of contract receipts by establishments not specifying the kind of garments cut on contract.<sup>7</sup>Includes product code 232038.<sup>8</sup>Figures represent quantity and value of production.<sup>9</sup>Product code 2325017 combined with product code 2325000.<sup>10</sup>Product code 2329241 combined with product code 2329231.<sup>11</sup>Product code 2329245 combined with product code 2329235.<sup>12</sup>Product codes 2329311, 2329331, 2329351 and 2329300 included in product code 2329000.

## MEN'S AND BOYS' FURNISHINGS, WORK CLOTHING, AND ALLIED GARMENTS

23B-27

Table 6B.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 23211, Rhode Island, Connecticut, Wisconsin, Delaware, Florida, Louisiana, Texas, and Colorado; 23212, Indiana, Kentucky, Tennessee, and Mississippi; 23220, New Hampshire, Ohio, Illinois, Minnesota, Oklahoma, and Texas; 23230, Kentucky; 23270, Arkansas, and Washington; 23280, Pennsylvania, Kentucky, Alabama, and Arkansas; 23291, Minnesota, Kansas, Colorado, Washington, and Oregon; 23292, Rhode Island, Nebraska, Mississippi, Arkansas, and Oklahoma.

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

	All establishments specializing in product class.	10	112	358	86	109	151	1,038	2,957	3,995
	Establishments with:									
	90% or more specialization.....	5	31	104	23	53	59	289	1,366	1,656

Note: Plant specialization data are not shown for industries 2321, 2322, 2327, and 2329 since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of these establishments as a whole.

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and miscellaneous small statistical adjustments.

<sup>2</sup>Represents establishments specializing in the production of knit outerwear sport shirts from purchased knit fabric.

<sup>3</sup>Represents establishments specializing in the production of swimwear and athletic shorts from purchased fabrics.

## Women's and Misses' Outerwear

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2331--	Blouses
2333--	Dresses, Unit Price
2334--	Dresses, Dozen Price
2337--	Women's Suits, Coats and Skirts
2338--	Women's Neckwear and Scarfs
2339--	Women's Outerwear, Not Elsewhere Classified

2331--Blouses (Full Standard Industrial Classification Title: Women's and Misses' Blouses and Waists)

This industry comprises establishments primarily engaged in manufacturing women's, misses', and juniors' blouses, waists, and shirts. Establishments engaged in the manufacture of women's, misses', and juniors' knit outerwear sport shirts (polo, tennis, basque, etc.) from yarns knit in the same establishment are classified in Industry 2253, Knit Outerwear Mills; knit outerwear sport shirts made from purchased knit fabric are classified in Industry 2339, Women's Outerwear, N.E.C.

The value of production of Industry 2331, Blouses, in 1954 totaled \$375 million. This included output of primary products (blouses) valued at \$269 million, production of secondary products valued at \$19 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$88 million.

Industry 2331 value of output of blouses in 1954, as in 1947, represented 93 percent of its total products (primary and secondary). Secondary products made by Industry 2331 in 1954 consisted mainly of women's and misses' skirts, \$8 million, and girls' and children's dresses and blouses \$3 million.

Industry 2331 production of blouses in 1954 represented 85 percent of the blouses, valued at \$317 million, made by all industries. This coverage ratio in 1947 was 88 percent. Other industries making blouses consisted mainly of Industry 2337, Women's Suits, Coats, and Skirts, \$23 million, and Industry 2333, Dresses, Unit Price, \$11 million.

2333--Dresses, Unit Price (Full Standard Industrial Classification Title: Women's and Misses' Dresses)

This industry comprises establishments primarily engaged in manufacturing women's and misses' dresses, including ensemble dresses. The garments manufactured by establishments classified in this industry are usually sold by the piece. Establishments primarily engaged in manufacturing aprons, smocks, hoovers, and house dresses, usually sold by the dozen, are classified in Industry 2334. Knitting mills primarily engaged in manufacturing women's, misses' and juniors' knit dresses and suits are classified in Industry 2253, Knit Outerwear Mills.

The value of production of Industry 2333, Dresses, Unit Price, in 1954 totaled \$1,455 million. This included output of primary products (dresses, unit price) valued at \$1,148 million, production of secondary products valued at \$54 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$253 million.

Industry 2333 value of output of dresses, unit price in 1954 represented 96 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 95 percent. Secondary products made by Industry 2333 in 1954 consisted mainly of women's, misses', and juniors' blouses, \$11 million; women's, misses', and juniors' suits, \$16 million; and women's, misses', and juniors' skirts, \$15 million.

Industry 2333 production of unit-priced dresses, in 1954 represented 95 percent of these products, valued at \$1,208 million, made by all industries. This coverage ratio in 1947 was 97 percent. Other industries making unit-priced dresses consisted mainly of Industry 2253, Knit Outerwear Mills, \$37

million and Industry 2337, Women's Suits, Coats, and Skirts, \$15 million.

2334--Dresses, Dozen Price (Full Standard Industrial Classification Title: Household Apparel)

This industry comprises establishments primarily engaged in manufacturing women's and misses' household apparel, chiefly of washable fabrics. The garments manufactured by establishments classified in this industry are usually sold by the dozen, and include such articles as aprons, smocks, hoovers, house dresses, and nurses' and maids' uniforms. Establishments primarily engaged in manufacturing aprons, smocks, hoovers, etc., of plastic or rubberized fabrics are classified in Industry 2385, Waterproof Outergarments; aprons, smocks, hoovers, etc., of rubber in Industry 3099, Rubber Industries, N.E.C. For a detailed list of primary products of Industry 2334, refer to Table 6A, product codes 2334111 to 2334237.

The value of production of Industry 2334, Dresses, Dozen Price, in 1954 totaled \$435 million. This included output of primary products (women's, misses', and juniors' dozen-priced dresses, and washable service apparel) valued at \$354 million, production of secondary products valued at \$22 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$59 million.

Industry 2334 value of output of primary products in 1954 represented 94 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 89 percent. Secondary products made by this industry in 1954 consisted mainly of men's and boys' work clothing except work shirts, \$5 million, and women's, misses' and juniors' skirts, \$3 million.

Industry 2334 production of primary products (women's, misses', and juniors' dozen-priced dresses and washable service apparel) in 1954 represented 96 percent of these products, valued at \$367 million, made by all industries. This coverage ratio in 1947 was also 96 percent. Other industries making women's, misses', and juniors' dozen-priced dresses and washable service apparel in 1954 consisted mainly of Industry 2329, Men's and Boys' Clothing, N.E.C., \$6 million, and Industry 2337, Women's Suits, Coats, and Skirts, \$2 million.

2337--Women's Suits, Coats and Skirts (Full Standard Industrial Classification Title: Women's and Misses' Suits, Coats (Except Fur Coats), and Skirts)

This industry comprises establishments primarily engaged in manufacturing women's and misses' suits, ensemble suits, skirts, and coats other than fur. Establishments primarily engaged in manufacturing women's and misses' jackets (except leather), fur-trimmed coats and uniform coats, suits, and jackets are also included in Industry 2337. Establishments primarily engaged in manufacturing fur garments are classified in Industry 2371, Fur Goods; and knitting mills primarily engaged in manufacturing outerwear in Industry 2253, Knit Outerwear Mills. Establishments primarily engaged in manufacturing women's and misses' ski, snow, and slack suits, play garments, slacks, and work jackets are classified in Industry 2339, Women's Outerwear, N.E.C. For a detailed list of products of Industry 2337, refer to Table 6A, product codes 2337111 to 2337411.

The value of products of Industry 2337, Women's Suits, Coats, and Skirts, in 1954 totaled \$1,261 million. This included output of primary products (women's, misses', and juniors' suits, coats, and skirts) valued at \$1,026 million, production of secondary products valued at \$64 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$171 million.

Industry 2337 value of output of primary products in 1954 represented 94 percent of its total product made (primary and secondary). In 1947, this primary product specialization ratio

was 95 percent. Secondary products made by Industry 2337 in 1954 consisted mainly of women's, misses', and juniors' blouses and waists, \$23 million; women's, misses', and juniors' dresses, unit price, \$15 million; and women's, misses', and juniors' outerwear, n.e.c., \$12 million.

Industry 2337 production of primary products in 1954 represented 93 percent of these products, valued at \$1,096 million, made by all industries. This coverage ratio in 1947 was 93 percent. Other industries making women's, misses', and juniors' suits, coats, and skirts in 1954 consisted mainly of Industry 2333, Dresses, Unit Price, \$35 million; Industry 2331, Blouses, \$9 million; and Industry 2339, Women's Outerwear, N.E.C., \$10 million.

In the 1947 Census of Manufactures, the statistics for Industry 2337 were published as two separate subindustries, "Women's Suits and Coats," and "Women's Skirts." For the 1954 Census, the figures are shown for the industry as a whole in Tables 1-5. In Table 8A, however, statistics similar to those shown in Table 1 are presented separately for "manufacturers" and "jobbers" by product class (i.e. coats, suits, skirts, and jackets). Thus it is possible to recompile the 1954 figures on a basis closely comparable to the 1947 information previously shown for the two subindustries.

#### 2338--Women's Neckwear and Scarfs

This industry comprises establishments primarily engaged in manufacturing women's neckwear, scarfs, and dummies cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing neckwear or scarfs are classified in Industry 2253, Knit Outerwear Mills.

The value of production of Industry 2338, Women's Neckwear and Scarfs, in 1954 totaled \$26 million. This included output of primary products (women's neckwear and scarfs) valued at \$23 million, production of secondary products valued at \$1 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$2 million.

Industry 2338 value of output of women's neckwear and scarfs in 1954 represented 95 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 96 percent. The principal secondary product made by Industry 2338 in 1954 consisted of children's outerwear, n.e.c.

Industry 2338 production of women's neckwear and scarfs in 1954 represented 75 percent of the women's neckwear and scarfs, valued at \$31 million, made by all industries. This coverage ratio in 1947 was 96 percent. Other industries making women's neckwear and scarfs in 1954 consisted mainly of Industry 2253, Knit Outerwear Mills, \$5 million, and Industry 2331, Blouses, \$1 million. The change in the coverage ratio reflects increased production of these products by plants classified in other industries.

#### 2339--Women's Outerwear, N.E.C. (Full Standard Industrial Classification Title: Women's and Misses' Outerwear, Not Elsewhere Classified)

This industry comprises establishments primarily engaged in manufacturing women's and misses' outerwear, not elsewhere classified, such as bathing suits, beachwear, slacks, riding habits, ski suits, swimwear, sweaters, and outerwear sport shirts, cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing outerwear are classified in Industry 2253, Knit Outerwear Mills. For a detailed list of products of Industry 2339 refer to Table 6A, product codes 2339011 to 2339061, 2253131 to 2253147, 2253231 and 2253331 to 2253335.

The value of production of Industry 2339, Women's Outerwear, N.E.C., in 1954 totaled \$252 million. This included output of primary products (women's outerwear, n.e.c., including sweaters, knit outerwear sport shirts, and swimwear) valued at \$175 million, output of secondary products valued at \$38 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$39 million.

Industry 2339 value of output of primary products in 1954 represented 82 percent of its total products (primary and secondary). In 1947, this primary specialization ratio was 70 percent. This increase of 12 percentage points in the specialization ratio between the two years reflects the relatively large increase in the output of the primary products of this industry whereas the output of the secondary products remained about the same. Secondary products made by Industry 2339 in 1954 consisted mainly of misses' and juniors' blouses, \$4 million; women's, misses', and juniors' jackets, \$5 million; and women's, misses', and juniors' skirts \$5 million.

Industry 2339 production of primary products in 1954 represented 44 percent of these products, valued at \$395 million, made by all industries. This coverage ratio in 1947 was 33 percent. Other industries making women's outerwear, n.e.c., including sweaters, knit outerwear sport shirts, and swimwear consisted mainly of Industry 2253, Knit Outerwear Mills, \$173 million; Industry 2329, Men's and Boys' Clothing, N.E.C., \$16 million; Industry 2337, Women's Suits, Coats, and Skirts, \$14 million.

#### Relationship of Census of Manufactures and Facts For Industry Data

In addition to the Census of Manufactures data for the industries covered by this report, the Bureau of the Census publishes current monthly statistics on four of these industries in the Facts For Industry series M67H, "Women's, Misses', and Juniors' Apparel." 1954 data were shown on the monthly cuttings of the principal outerwear garments (i.e. blouses, unit and dozen-price dresses, coats, suits, skirts, and sweaters) and on the value of shipments of the Blouse, Unit-Price Dress, Dozen-Price Dress, Coat, Suit, and Skirt Industries. The 1954 Census figures shown in Table 6A may differ from the sum of the twelve monthly estimates shown in the Facts For Industry reports primarily due to differences in reporting by the same respondents on the current and census questionnaires, and to some extent to the effect of sampling variations in the current estimates. In addition, it should be noted that some manufacturers in reporting for the 1954 Census did not adequately describe the specific garments which they made. The value of such output is shown in Table 6A under the several categories for "Not specified by kind," or "quantities not reported." The 1954 Census statistics on number of garments cut do not, of course, include the output represented by such values.

Regarding the current estimates shown in the Facts For Industry reports on the value of shipments by industry, it should be noted that these data do not include the receipts for contract and commission work. The 1954 Census figures on the value of shipments by industry, however, include such receipts. The monthly estimates, therefore, are more closely comparable to the data shown in Table 5B on the value of shipments of primary and secondary products for each of the industries. In addition, the monthly estimates show separate figures for the Coat and Suit Industry and for the Skirt Industry, whereas the 1954 Census combines these establishments in one industry. Table 8 of this report, however, shows figures which will yield comparable information to that shown in the Facts For Industry for these sub-industry classifications.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments <sup>3</sup> (\$1,000)
		Number <sup>1</sup>	Payroll (\$1,000)	Number <sup>1</sup>	Wages (\$1,000)

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1935-1947 and 1954, value of production; for 1949-1953, value of shipments. See Introduction, "Value of Shipments."

<sup>4</sup>For all years, value of production. See Introduction, "Value of Shipments."

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>"Blouses" was not shown as a separate industry prior to 1935, but was included with the industry formerly designated "Clothing, women's, n.e.c." Prior to 1937, "Dresses, unit price" and "Dresses, dozen price" were not shown as separate industries, but were combined in the two classifications, "Dresses-regular factories" and "Dresses-contract factories."

<sup>7</sup>"Women's neckwear and scarfs" and "Women's outerwear, n.e.c." were not shown as separate industries prior to 1937, but were included with the industries formerly designated "Clothing, n.e.c.--regular factories" and "Clothing, n.e.c.--contract factories."

<sup>8</sup>The figures for 1939 are not entirely comparable with those for 1937. Value added by manufacture for 1939, on a basis comparable with 1937 was \$17.1 million.

## MANUFACTURES—INDUSTRY STATISTICS

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2331, Blouses: New England—New Hampshire, 1 (20-99); Massachusetts, 40 (1,000-2,499); East North Central—Indiana, 1 (1-19); Illinois, 22 (500-999); Wisconsin, 2 (20-99); West North Central—Missouri, 8 (100-249); Nebraska, 1 (20-99); Kansas, 1 (20-99); South—Delaware, 3 (100-246); West Virginia, 4 (250-499); South Carolina, 2 (20-99); Georgia, 2 (100-249); Florida, 5 (20-99); Tennessee, 1 (20-99); Arkansas, 1 (100-249); Oklahoma, 1 (20-99); West—Colorado, 1 (1-19); New Mexico, 1 (1-19); Arizona, 1 (20-99); Utah, 1 (20-99); Washington, 2 (20-99); Oregon, 1 (1-19); California, 132 (2,500-4,999).

S.I.C. 2331, Pt. A, "Manufacturers": New England—Massachusetts, 11 (250-499); Connecticut, 2 (20-99); Middle Atlantic—New Jersey, 5 (100-249); Pennsylvania, 31 (1,000-2,499); North Central—Indiana, 1 (1-19); Illinois, 17 (500-999); Wisconsin, 2 (20-99); Missouri, 5 (100-249); Nebraska, 1 (20-99); Kansas, 1 (20-99); South—Delaware, 1 (100-249); Maryland, 3 (250-499); North Carolina, 1 (100-249); Georgia, 1 (20-99); Florida, 5 (20-99); Tennessee, 1 (20-99); Arkansas, 1 (100-249); Oklahoma, 1 (20-99); Texas, 15 (250-499); West—Colorado, 1 (1-19); New Mexico, 1 (1-19); Arizona, 1 (20-99); Washington, 2 (20-99); Oregon, 1 (1-19); California, 46 (1,342).

S.I.C. 2331, Pt. B, "Jobbers": New England—Massachusetts, 4 (20-99); Connecticut, 2 (1-19); Middle Atlantic—New Jersey, 1 (20-99); Pennsylvania, 3 (500-999); South and West—North Carolina, 2 (1-19); South Carolina, 1 (1-19); Texas, 1 (1-19); California, 4 (100-249).

S.I.C. 2331, Pt. C, "Contractors": New England—New Hampshire, 1 (20-99); Massachusetts, 25 (500-999); North Central—Illinois, 5 (100-249); Missouri, 3 (20-99); South and West—Delaware, 2 (20-99); Maryland, 5 (250-499); West Virginia, 4 (250-499); South Carolina, 1 (20-99); Georgia, 1 (20-99); Texas, 2 (100-249); Utah, 1 (100-249); California, 71 (1,535).

S.I.C. 2333, Dresses, Unit Price: New England—Maine, 4 (100-249); New Hampshire, 2 (20-99); Vermont, 6 (500-999); East North Central—Indiana, 2 (250-499); Michigan, 5 (20-99); West North Central—Minnesota, 11 (500-999); South Dakota, 1 (1-19); Kansas, 1 (20-99); South Atlantic—Delaware, 1 (20-99); Virginia, 3 (100-249); North Carolina, 7 (100-249); South Carolina, 6 (500-999); East South Central—Kentucky, 1 (1-19); Tennessee, 2 (100-249); Alabama, 3 (20-99); West South Central—Louisiana, 1 (1-19); Oklahoma, 1 (20-99); Texas, 40 (2,500-4,999); Mountain—Colorado, 4 (20-99); Utah, 1 (20-99); Nevada, 1 (1-19); Pacific—Washington, 4 (1-19).

S.I.C. 2333, Pt. A, "Manufacturers": New England—Vermont, 1 (250-499); Massachusetts, 30 (1,000-2,499); Connecticut, 11 (250-499); East North Central—Indiana, 1 (250-499); Michigan, 5 (20-99); Wisconsin, 2 (250-499); West North Central—Minnesota, 10 (500-999); Missouri, 39 (2,500-4,999); South Dakota, 1 (1-19); Kansas, 1 (20-99); South—Maryland, 1 (1-19); Virginia, 3 (100-249); North Carolina, 3 (20-99); South Carolina, 4 (500-999); Georgia, 4 (100-249); Kentucky, 1 (1-19); Tennessee, 2 (100-249); Alabama, 2 (1-19); Louisiana, 1 (1-19); Texas, 32 (2,747); Mountain—Colorado, 4 (20-99); Utah, 1 (20-99); Nevada, 1 (1-19); Pacific—Washington, 3 (1-19); California, 158 (2,500-4,999).

S.I.C. 2333, Pt. B, "Jobbers": New England—Massachusetts, 19 (250-499); Connecticut, 1 (20-99); East North Central—Illinois, 3 (1-99); Wisconsin, 2 (250-499); South Atlantic—Delaware, 1 (20-99); Maryland, 1 (100-249); North Carolina, 1 (1-19); Florida, 2 (20-99).

S.I.C. 2333, Pt. C, "Contractors": New England—Maine, 4 (100-249); New Hampshire, 2 (20-99); Vermont, 5 (250-499); East North Central—Ohio, 4 (100-249); Indiana, 1 (20-99); Illinois, 46 (1,000-2,499); West North Central—Minnesota, 1 (20-99); Missouri, 13 (250-499); South—Maryland, 4 (100-249); North Carolina, 3 (100-249); South Carolina, 2 (100-249); Georgia, 3 (100-249); Florida, 4 (100-249); Alabama, 1 (20-99); Louisiana, 1 (20-99); Oklahoma, 1 (20-99); Texas, 8 (250-499); Pacific—Washington, 1 (1-19); California, 92 (1,000-2,499).

S.I.C. 2334, Dresses, Dozen Price: New England—Maine, 1 (20-99); New Hampshire, 1 (20-99); Vermont, 1 (20-99); Rhode Island, 2 (20-99); Connecticut, 9 (250-499); West North Central—Iowa, 3 (250-499); Nebraska, 2 (20-99); South Atlantic—Delaware, 4 (100-249); District of Columbia, 1 (1-19); West Virginia, 8 (1,339); East South Central—Kentucky, 4 (100-249); Mississippi, 2 (500-999); West South Central—Arkansas, 5 (500-999); Oklahoma, 3 (1-19); West—New Mexico, 1 (1-19); Arizona, 3 (20-99); Utah, 4 (250-499); Nevada, 1 (1-19); Washington, 3 (20-99); Oregon, 3 (1-19).

S.I.C. 2334, Pt. A, "Manufacturers": New England—Rhode Island, 1 (20-99); Connecticut, 4 (20-99); East North Central—Ohio, 18 (1,000-2,499); Wisconsin, 9 (250-499); West North Central—Missouri, 29 (2,500-4,999); Nebraska, 2 (20-99); South and West—District of Columbia, 1 (1-19); Virginia, 2 (250-499); West Virginia, 4 (500-999); North Carolina, 4 (100-249); Georgia, 5 (100-249); Florida, 10 (500-999); Kentucky, 4 (100-249); Tennessee, 5 (500-999); Alabama, 3 (100-249); Mississippi, 1 (250-499); Arkansas, 2 (500-999); Oklahoma, 3 (1-19); Texas, 11 (500-999); New Mexico, 1 (1-19); Arizona, 3 (20-99); Utah, 4 (250-499); Nevada, 1 (1-19); Washington, 3 (20-99); Oregon, 3 (1-19).

## MANUFACTURES--INDUSTRY STATISTICS

Footnotes for Table 2--MC-23C

- S.I.C. 2334, Pt. B, "Jobbers:" Northeast—Massachusetts, 3 (100-249); New Jersey, 3 (20-99); North Central—Illinois, 3 (500-999); Missouri, 3 (500-999); South and West—Virginia, 1 (250-499); Texas, 1 (20-99); California, 1 (1-19).
- S.I.C. 2334, Pt. C, "Contractors:" Northeast—Maine, 1 (20-99); New Hampshire, 1 (20-99); Vermont, 1 (20-99); Massachusetts, 22 (1,484); Rhode Island, 1 (20-99); Connecticut, 5 (100-249); New Jersey, 35 (1,444); North Central—Ohio, 1 (1-19); Illinois, 39 (3,208); Wisconsin, 1 (1-19); Iowa, 3 (250-499); South and West—Delaware, 4 (100-249); Virginia, 9 (1,720); West Virginia, 4 (500-999); North Carolina, 2 (100-249); Georgia, 2 (20-99); Florida, 2 (20-99); Tennessee, 3 (500-999); Alabama, 1 (20-99); Mississippi, 1 (20-99); Arkansas, 3 (250-499); Texas, 4 (100-249); California, 20 (250-499).
- S.I.C. 2337, Women's Suits, Coats, and Skirts: New England—Rhode Island, 2 (20-99); Connecticut, 39 (1,000-2,499); West North Central—Minnesota, 12 (500-999); Nebraska, 2 (250-499); Kansas, 2 (20-99); South Atlantic—Virginia, 1 (20-99); West Virginia, 2 (20-99); North Carolina, 1 (20-99); South Carolina, 5 (500-999); East South Central—Kentucky, 5 (1,000-2,499); Tennessee, 4 (250-499); Mississippi, 2 (1-19); Mountain—Colorado, 1 (20-99); New Mexico, 2 (1-19); Arizona, 1 (1-19); Pacific—Washington, 13 (100-249); Oregon, 12 (250-499).
- S.I.C. 2337 Pt. A, "Manufacturers:" New England—Massachusetts, 54 (1,000-2,499); Connecticut, 14 (500-999); East North Central—Indiana, 1 (20-99); Wisconsin, 3 (100-249); West North Central—Minnesota, 11 (500-999); Missouri, 33 (2,500-4,999); Nebraska, 2 (250-499); Kansas, 2 (20-99); South—Virginia, 1 (20-99); West Virginia, 1 (1-19); North Carolina, 1 (20-99); South Carolina, 3 (500-999); Georgia, 7 (100-249); Florida, 12 (100-249); Kentucky, 4 (1,000-2,499); Tennessee, 3 (250-499); Mississippi, 1 (1-19); West—Colorado, 1 (20-99); New Mexico, 1 (1-19); Arizona, 1 (1-19); Washington, 8 (100-249); Oregon, 10 (250-499).
- S.I.C. 2337, Pt. B, "Jobbers:" New England—Massachusetts, 32 (500-999); Connecticut, 1 (1-19); Middle Atlantic—Pennsylvania, 4 (1-19); East North Central—Illinois, 13 (20-99); Wisconsin, 1 (20-99); South—Maryland, 2 (100-249); Tennessee, 1 (1-19); Texas, 1 (1-19); West—New Mexico, 1 (1-19); Washington, 2 (1-19); Oregon, 1 (1-19).
- S.I.C. 2337, Pt. C, "Contractors:" New England—Rhode Island, 2 (20-99); Connecticut, 24 (1,000-2,499); East North Central—Ohio, 5 (20-99); Indiana, 3 (100-249); Illinois, 18 (250-499); Wisconsin, 5 (100-249); West North Central—Minnesota, 1 (1-19); Missouri, 7 (250-499); South—Maryland, 8 (500-999); West Virginia, 1 (20-99); South Carolina, 2 (250-499); Georgia, 3 (20-99); Florida, 1 (1-19); Kentucky, 1 (100-249); Mississippi, 1 (1-19); Texas, 7 (100-249); Pacific—Washington, 3 (20-99); Oregon, 1 (20-99).
- S.I.C. 2338, Women's Neckwear and Scarfs: Northeast and North Central—Massachusetts, 1 (1-19); Connecticut, 1 (1-19); New Jersey, 5 (100-249); Pennsylvania, 6 (20-99); Ohio, 1 (1-19); Illinois, 2 (1-19); South—Florida, 2 (1-19); Kentucky, 1 (20-99); Tennessee, 3 (20-99); Texas, 1 (1-19); Pacific—Washington, 1 (1-19); California, 7 (20-99).
- S.I.C. 2338, Pt. A, "Manufacturers:" Pacific—Washington, 1 (1-19); California, 7 (20-99); All Other States—Massachusetts, 1 (1-19); Connecticut, 1 (1-19); New York, 53 (500-999); New Jersey, 3 (100-249); Pennsylvania, 4 (1-19); Ohio, 1 (1-19); Illinois, 2 (1-19); Florida, 2 (1-19); Kentucky, 1 (20-99); Tennessee, 2 (20-99); Texas, 1 (1-19).
- S.I.C. 2338, Pt. B, "Jobbers:" All Other States—Pennsylvania, 1 (1-19); Alabama, 1 (1-19).
- S.I.C. 2338, Pt. C, "Contractors:" Middle Atlantic—New York, 29 (250-499); New Jersey, 2 (20-99); Pennsylvania, 1 (1-19).
- S.I.C. 2339, Women's Outerwear, N.E.C.: Northeast and North Central—New Hampshire, 3 (20-99); Rhode Island, 1 (20-99); New Jersey, 45 (1,000-2,499); Ohio, 4 (500-999); Indiana, 2 (100-249); Michigan, 2 (100-249); Michigan, 2 (1-19); Wisconsin, 1 (20-99); Minnesota, 3 (20-99); Iowa, 3 (250-499); Missouri, 11 (250-499); Nebraska, 1 (1-19); Kansas, 2 (100-249); South Atlantic—Delaware, 1 (1-19); Virginia, 3 (100-249); South Carolina, 3 (100-249); Georgia, 6 (100-249); East South Central—Tennessee, 1 (100-249); Alabama, 1 (1-19); Mississippi, 3 (500-999); West South Central—Louisiana, 2 (20-99); Oklahoma, 1 (1-19); Mountain—Colorado, 2 (20-99); New Mexico, 1 (1-19); Arizona, 3 (20-99); Utah, 1 (1-19); Pacific—Washington, 6 (500-999); Oregon, 3 (250-499).
- S.I.C. 2339, Pt. A, "Manufacturers:" Northeast and North Central—New Hampshire, 1 (20-99); New Jersey, 11 (250-499); Ohio, 4 (500-999); Indiana, 2 (100-249); Michigan, 2 (1-19); Wisconsin, 1 (20-99); Iowa, 3 (250-499); Missouri, 3 (20-99); Nebraska, 1 (1-19); Kansas, 1 (20-99); South—Maryland, 3 (100-249); Virginia, 1 (100-249); North Carolina, 4 (500-999); South Carolina, 1 (20-99); Georgia, 3 (20-99); Florida, 13 (500-999); Alabama, 1 (1-19); Louisiana, 1 (20-99); Oklahoma, 1 (1-19); Texas, 9 (500-999); Mountain—Colorado, 2 (20-99); New Mexico, 1 (1-19); Arizona, 3 (20-99); Utah, 1 (1-19); Pacific—Washington, 5 (500-999); California, 52 (3,321).
- S.I.C. 2339, Pt. B, "Jobbers:" Northeast and North Central—Massachusetts, 3 (1-19); New Jersey, 6 (20-99); Pennsylvania, 6 (100-249); Illinois, 4 (20-99); Minnesota, 1 (1-19); Missouri, 3 (20-99); South and West—Maryland, 1 (250-499); Virginia, 1 (1-19); Oregon, 1 (250-499); California, 11 (100-249).
- S.I.C. 2339, Pt. C, "Contractors:" Northeast and North Central—New Hampshire, 2 (20-99); Massachusetts, 32 (1,065); Rhode Island, 1 (20-99); New Jersey, 28 (500-999); Pennsylvania, 25 (1,552); Illinois, 3 (100-249); Minnesota, 2 (20-99); Missouri, 5 (100-249); Kansas, 1 (20-99); South and West—Delaware, 1 (1-19); Maryland, 2 (20-99); Virginia, 1 (20-99); North Carolina, 1 (20-99); South Carolina, 2 (20-99); Georgia, 3 (100-249); Florida, 2 (20-99); Tennessee, 1 (100-249); Mississippi, 3 (500-999); Texas, 6 (100-249); Washington, 1 (20-99); Oregon, 2 (20-99).

Note: Detailed figures may not add to the totals because of independent rounding.

xxx Not applicable.

NA Not available.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%; for this group of industries, Industry 2339 is the only such industry. However, plant specialization data are shown only for "manufacturers" and "jobbers" in Industry 2339 and not for the industry as a whole because specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of the establishments as a whole.

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>Less than \$500 thousand.

<sup>4</sup>Less than 500 thousand kwh.

<sup>5</sup>Less than \$500.

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

Ind. code	Industry and item	Total, all establishments	Establishments with an average of—

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Includes women's outerwear, n.e.c., made in knitting mills.

## WOMEN'S AND MISSES' OUTERWEAR

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows, for the industry listed in the column heading, the value of shipments divided among women's and misses' outerwear, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. However, parts of product classes 22531, 22532, and 22533 are also primary to Industry 2339. All other product classes in a column represent products secondary to the specified industry.)

Prod. class code	Class products and miscellaneous receipts	Blouses (S.I.C. 2331)	Dresses unit price (S.I.C. 2333)	Dresses, dozen price (S.I.C. 2334)	Women's suits, coats, and skirts (S.I.C. 2337)	Women's neckwear and scarfs (S.I.C. 2338)	Women's outerwear, n.e.c. xxx Not applicable.

NA Not available.

<sup>1</sup>The quantities shown exclude cuttings not reported by kind. For such quantities, contract receipts of establishments in each of the following industries amounted to: Industry 2331: \$2,669 thousand; Industry 2333: \$12,098 thousand; Industry 2334: \$2,002 thousand; Industry 2337: \$12,944 thousand; Industry 2338: \$240 thousand; Industry 2339: \$2,431 thousand.

<sup>2</sup>Excludes polo, tennis, basque, T, and other knit outerwear shirts.

<sup>3</sup>Excludes production of knit outerwear for which the type of garment was not specified; see Industry 2253, Knit Outerwear Mills, for the value of this production.

<sup>4</sup>Included with product code 2339000.

## MANUFACTURES—INDUSTRY STATISTICS

Table 6C.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 23310, Connecticut and Delaware; 23330, Vermont, Indiana, Minnesota, Maryland, and Tennessee; 23341, Massachusetts, Minnesota, Kansas, Virginia, West Virginia, North Carolina, Mississippi, Arkansas, Texas, and Utah; 23371, Connecticut, Minnesota, and Kentucky; 23372, Connecticut, Missouri, Maryland, South Carolina, and Kentucky; 23374, Missouri, Nebraska, and Texas.

<sup>2</sup>Excludes value of women's, misses', and juniors' knitted dresses and suits, classified in Industry 2253 in 1950-1953.

TABLE 7 NOT APPLICABLE TO THIS BULLETIN

## MANUFACTURES—INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

	Establishments with:									
	90% or more specialization.....	116	1,767	7,785	1,069	2,068	4,134	21,613	66,754	88,367
	75-89% specialization.....	17	229	1,094	133	194	465	3,094	7,866	10,960
	50-74% specialization.....	28	567	2,297	344	641	1,090	4,995	18,900	23,896
	Less than 50% specialization.....	15	648	3,161	324	648	1,075	6,508	17,072	23,580

Note: Plant specialization data are not shown for these industries as a whole since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of these establishments as a whole.

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and miscellaneous small statistical adjustments.

## Women's and Children's Undergarments; Millinery; Children's Outerwear; Fur Goods

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

<u>Code</u>	<u>Title</u>
2341--	Women's and Children's Underwear
2342--	Corsets and Allied Garments
2351--	Millinery
2361--	Children's Dresses
2363--	Children's Coats
2369--	Children's Outerwear, Not Elsewhere Classified
2371--	Fur Goods

2341--Women's and Children's Underwear (Full Standard Industrial Classification Title: Women's, Misses', Children's, and Infants' Underwear and Nightwear)

This industry comprises establishments primarily engaged in manufacturing women's, misses', children's, and infants' underwear and nightwear cut and sewed from purchased woven or knit fabric. Knitting mills primarily engaged in manufacturing underwear and nightwear are classified in Industry 2254, Knit Underwear Mills. For a detailed list of primary products of Industry 2341, refer to Table 6A, product codes 2341111 to 2341289.

The value of production of Industry 2341, Women's and Children's Underwear, in 1954 totaled \$770 million. This included output of primary products (women's and children's underwear and nightwear) valued at \$675 million, production of secondary products valued at \$37 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$58 million.

Industry 2341 output of women's and children's underwear and nightwear in 1954 represented 95 percent of its total products, (primary and secondary), which was the same as the 1947 primary product specialization ratio. Secondary products made by this industry in 1954 consisted mainly of children's underwear, n.e.c., \$8 million; men's and boys' underwear, \$4 million; men's and boys' nightwear, \$3 million; and brassieres, \$4 million.

Industry 2341 production of women's and children's underwear and nightwear in 1954 represented 85 percent of these products valued at \$799 million, made by all industries. This coverage ratio was 78 percent in 1947. The principal other industry making women's and children's underwear and nightwear was Industry 2254, Knit Underwear Mills, \$84 million.

The Bureau of the Census publishes current quarterly data on the production and shipments of women's and children's knit cotton and wool underwear and nightwear and annual figures on the production of knit underwear and nightwear made from other yarns in Facts For Industry, series M67C, Knit Underwear and Nightwear. Information on the production of women's and children's woven underwear and nightwear is published in Facts For Industry, series M67J, Women's and Children's Woven Fabric Underwear and Nightwear. In addition, monthly cutting figures on women's slips and half slips are shown in Facts For Industry, series M67H, Women's, Misses', and Juniors' Apparel. The 1954 Census production figures shown in Table 6A may differ from the sum of the current estimates shown in the Facts For Industry reports (M67C and M67H) due to differences in reporting by the same respondents on the current and the census questionnaires, and to some extent to the effect of sampling variations in the current estimates. In addition, it should be noted that some manufacturers in reporting for the 1954 Census did not adequately describe the specific garments which they made or reported value only. The value of such output is shown in Table 6A under the several categories for "Not specified by kind." The 1954 Census statistics on number of garments cut do not, of course, include the output represented by such values.

### 2342--Corsets and Allied Garments

This industry comprises establishments primarily engaged in manufacturing corsets and corset accessories, brassieres,

girdles, foundation garments, and similar body supporting garments. Establishments engaged in manufacturing surgical and orthopedic appliances are classified in Industry 3842, Surgical Appliances and Supplies. For a detailed list of primary products of Industry 2342, refer to Table 6A, product codes 2342111 to 2342351.

The value of production of Industry 2342, Corsets and Allied Garments, in 1954 totaled \$395 million. This included output of primary products (brassieres, corsets and allied garments) valued at \$335 million, production of secondary products valued at \$15 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$44 million.

Industry 2342 output of corsets and allied garments in 1954 represented 96 percent of its total products (primary and secondary). In 1947, this primary product specialization ratio was 94 percent. Secondary products made by this industry in 1954 consisted mainly of swimwear, \$2 million, and women's and children's underwear, \$2 million.

Industry 2342 shipments of corsets and allied garments in 1954 represented 95 percent of these products, valued at \$351 million, shipped by all industries. This coverage ratio was 97 percent in 1947.

### 2351--Millinery

This industry comprises establishments primarily engaged in manufacturing women's, misses', children's, and infants' trimmed hats from felt or straw hat bodies and purchased millinery materials. Establishments primarily engaged in manufacturing fur-felt and wool-felt hat bodies and finished hats made from hat bodies manufactured in the same establishment are classified in Group 228, Hats, Except Cloth and millinery; women's uniform hats and caps in Industry 2325, Men's and Boys' Cloth Hats; and millinery braid and trimming in Industry 2396, Trimmings and Art Goods. Establishments producing millinery primarily for direct sale to household consumers through a retail store on the premises of the establishment are classified in Retail Trade. For a detailed list of primary products of Industry 2351, refer to Table 6A, product codes 2351011 to 2351098.

The value of shipments of Industry 2351, Millinery, totaled \$173 million. This included shipments of primary products (millinery) valued at \$168 million, shipments of secondary products valued at \$1 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$4 million.

Industry 2351 shipments of millinery in 1954 represented 99 percent of its total product shipments (primary and secondary), which was the same as the 1947 primary product specialization ratio.

Industry 2351 shipments of millinery in 1954 represented 98 percent of the millinery, valued at \$170 million, shipped by all industries. This coverage ratio was also 98 percent in 1947.

Separate 1954 Census figures for the Millinery Industry by type of establishment ("manufacturers," "jobbers," and "contractors") were not tabulated, since practically all establishments classified in Industry 2351 operate as "manufacturers." In this connection, it should be noted that the cost of contract work as well as receipts for contract and commission work reported for this industry (see Tables 3 and 5B) are relatively small.

2361--Children's Dresses (Full Standard Industrial Classification Title: Children's and Infants' Dresses)

This industry comprises establishments primarily engaged in manufacturing children's and infants' dresses cut and sewed from purchased woven or knit fabric. Other products included in this industry are: children's blouses, blousesettes, waists, and shirts. In addition, establishments primarily engaged in manufacturing these garments in teen-age girls' and girls'

sizes are also included in this industry. Knitting mills primarily engaged in manufacturing dresses are classified in Industry 2253, Knit Outerwear Mills. For a detailed list of primary products of Industry 2361, refer to Table 6A, product codes 2361011 to 2361051.

The value of production of Industry 2361, Children's Dresses, in 1954 totaled \$291 million. This included output of primary products (girls' and children's dresses and blouses) valued at \$234 million, production of secondary products valued at \$13 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$44 million.

Industry 2361 output of girls' and children's dresses and blouses in 1954 represented 95 percent of its total products, (primary and secondary). In 1947, this primary product specialization ratio was 93 percent. Secondary products made by this industry in 1954 consisted principally of children's outerwear, n.e.c., \$8 million.

Industry 2361 production of girls' and children's dresses and blouses in 1954 represented 93 percent of these products, valued at \$251 million, made by all industries. This coverage ratio was 91 percent in 1947. The principal other industry making girls' and children's dresses and blouses in 1954 was Industry 2369, Children's Outerwear, N.E.C., \$9 million.

The Bureau of the Census publishes annual information covering the output of Industry 2361 in Facts For Industry, series MA67K, Girls', Children's, and Infants' Outerwear. Data on the cuttings of garments shown in Table 6A of this report are comparable with those shown in the Facts For Industry reports for earlier years. The value of shipment figures shown by industry in the Facts For Industry reports, however, exclude receipts for contract work whereas such receipts are included in the value of shipment figures by industry shown in this report. The Facts For Industry shipment figures therefore are more closely comparable to the data shown in Table 5B for the value of shipments of primary and secondary products for each of the industries.

2363--Children's Coats (Full Standard Industrial Classification Title: Children's and Infants' Coats)

This industry comprises establishments primarily engaged in manufacturing children's and infants' coats, coat-and-legging sets, and snow suits cut and sewed from purchased woven or knit fabric. Also included in this industry are establishments primarily engaged in manufacturing these garments in teen-age girls' and girls' sizes. Knitting mills primarily engaged in manufacturing outerwear are classified in Industry 2253, Knit Outerwear Mills. The 1947 Census of Manufactures data for Industry 2363 have been revised to exclude establishments primarily engaged in making girls' and children's skirts. For the 1954 Census such establishments are included in Industry 2369, children's outerwear, N.E.C. For a detailed list of primary products of Industry 2363, refer to Table 6A, product codes 2363011 to 2363075.

The value of production of Industry 2363, Children's Coats, in 1954 totaled \$172 million. This included output of primary products (girls', children's and infants' coats) valued at \$136 million, production of secondary products valued at \$14 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$22 million.

Industry 2363 output of girls', children's and infants' coats, including suits and jackets in 1954 represented 91 percent of its total product made (primary and secondary) which was the same as the 1947 primary product specialization ratio. Secondary products made by this industry in 1954 consisted mainly of children's outerwear, n.e.c., \$4 million.

Industry 2363 shipments of girls', children's and infants' coats, including suits, and jackets represented 81 percent of these products, valued at \$167 million, made by all industries. This coverage ratio was 87 percent in 1947. Other industries making girls', children's and infants' coats, including suits, and jackets in 1954 consisted mainly of Industry 2337, Women's Suits, Coats, and Skirts, \$6 million, and Industry 2369, Children's Outerwear N.E.C., \$16 million.

The Bureau of the Census publishes annual information covering the output of Industry 2363 in Facts For Industry, series MA67K, Girls', Children's, and Infants' Outerwear. For

a statement on the comparability of the figures shown in this report and those shown for earlier years in the Facts For Industry reports refer to Industry 2361.

2369--Children's Outerwear, N.E.C. (Full Standard Industrial Classification Title: Children's and Infants' Outerwear, Not Elsewhere Classified)

This industry comprises establishments primarily engaged in manufacturing children's and infants' outerwear not elsewhere classified, such as house coats, middies, slacks, beachwear, rompers, sun suits, play suits, bathrobes, and headwear cut and sewed from purchased woven or knit fabric. Also included in this industry are establishments primarily engaged in manufacturing these garments (except millinery) in teen-age girls' and girls' sizes. Knitting mills primarily engaged in manufacturing outerwear are classified in Industry 2253, Knit Outerwear Mills. The 1947 Census of manufacturers data for Industry 2369 have been revised to include establishments primarily engaged in making girls' and children's skirts. For the 1954 Census, such establishments were excluded from Industry 2363, Children's Coats. For a detailed list of primary products of Industry 2369, refer to Table 6A, product codes 2253151 to 2253177, 2253241 to 2253251, 2253341 to 2253355, and 2369015 to 2369098.

The value of production of Industry 2369, Children's Outerwear, N.E.C., in 1954 totaled \$278 million. This included output of primary products (children's outerwear, n.e.c.) valued at \$195 million, production of secondary products valued at \$54 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$30 million.

Industry 2369 output of children's outerwear, n.e.c. in 1954 represented 78 percent of its total products (primary and secondary). For 1947 this primary product specialization ratio is not available. Secondary products shipped by this industry in 1954 consisted mainly of girls', children's and infants' coats, \$16 million, and girls' and children's dresses and blouses, \$9 million.

Industry 2369 production of children's outerwear, n.e.c. in 1954 represented 62 percent of these products valued at \$313 million, made by all industries. For 1947 this coverage ratio is not available. Other industries making children's outerwear, n.e.c. in 1954 consisted mainly of Industry 2253, Knit Outerwear Mills, \$10 million; Industry 2329, Men's and Boys' Clothing, N.E.C., \$17 million; Industry 2339, Women's Outerwear, N.E.C. \$6 million; Industry 2341, Women's and Children's Underwear, \$8 million; and Industry 2361, Children's Dresses, \$8 million.

The Bureau of the Census publishes annual information covering the output of Industry 2369 in Facts For Industry, series MA67K, Girls', Children's, and Infants' Outerwear. For a statement on the comparability of the figures shown in this report and those shown for earlier years in the Facts For Industry reports, refer to statement for Industry 2361.

2371--Fur Goods

This industry comprises establishments primarily engaged in manufacturing fur coats; and other garments, accessories, and trimmings made of fur. Establishments primarily engaged in manufacturing sheep-lined clothing are classified in Industry 2386, Leather and Sheep-Lined Clothing, and those engaged in the dyeing and dressing of furs in Industry 3992, Furs; Dressed and Dyed. Establishments primarily engaged in making and reconditioning fur garments to individual order of the household consumer are classified in Retail Trade.

The value of shipments of Industry 2371, Fur Goods, in 1954 totaled \$228 million. This included shipments of primary products (fur goods) valued at \$215 million, shipments of secondary products valued at \$1 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$11 million. Industry 2371 shipments of fur goods in 1954 represented 99 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 100 percent.

Industry 2371 shipments of fur goods in 1954 accounted for all the fur goods valued at \$216 million shipped by all manufacturing industries. In 1947, this primary product specialization ratio was also 100 percent.

Separate 1954 Census figures for the Fur Goods Industry, by type of establishment ("Manufacturers," "Jobbers," and "Contractors") were not tabulated, since practically all establishments classified in Industry 2371 operate as "manufac-

turers." In this connection, it should be noted that the cost of contract work as well as receipts for contract and commission work reported for this industry are relatively small, see Tables 3 and 5B.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MANUFACTURES--INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. <sup>3</sup> (\$1,000)	Value of shipments <sup>4</sup> (\$1,000)

\* Revised.

NA Not available.

<sup>1</sup>For the period 1949-1954, employment figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. (However in the case of the "Fur goods" industry, a different method was used for 1954: All employees represent the average of 12 monthly figures, and production workers were calculated by subtracting from the all employees total the average number of nonproduction employees for March, May, August and November.) For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture." For the "Women's and children's underwear" and "Fur goods" industries, 1947 value added by manufacture does not equal the published value of shipments less cost of materials, etc., because an estimated value of production was used in the calculation in place of value of shipments. Since the 1949-1952 estimates were derived from 1947 base totals, the same inequality may exist for these years.

<sup>3</sup>Figures for years prior to 1935 do not include cost of contract work.

<sup>4</sup>For 1954, the figures represent value of production except in the case of "Fur goods" for 1947 where they represent value of shipments. For 1929 and 1947-1953, the figures represent value of shipments except in the case of "Women's and children's underwear," "Children's dresses," "Children's coats" and "Children's outerwear, n.e.c." for 1947 where they represent value of production. For all other years, the figures represent value of production. See Introduction, "Value of Shipments."

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>The figures for 1939 are not entirely comparable with those for earlier years. Value added by manufacture for 1939 on a basis comparable with earlier years was \$56.6 million for "Women's and children's underwear," and \$57.4 million for "Millinery."

<sup>7</sup>"Women's and children's woven underwear" was formerly a part of the discontinued classification "Clothing, women's, n.e.c." Separate figures for years prior to 1935 are, therefore, not available.

<sup>8</sup>For "Millinery" in 1933 and 1937 and for "Fur goods" in 1937, coverage was incomplete.

<sup>9</sup>"Millinery" was formerly a part of the discontinued classification "Millinery and lace goods, n.e.c." Separate figures are, therefore, not available for years prior to 1927.

<sup>10</sup>No comparable figures are available for earlier years.

<sup>11</sup>The figures for 1927 and earlier years are not entirely comparable with those for later years because they include data for sheep-lined coats. For 1927, the value of sheep-lined coats produced was \$11.4 million.

## MANUFACTURES--INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1964 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2341, Women's and Children's Underwear: New England—Maine, 2 (20-99); New Hampshire, 1 (1-19); Massachusetts, 1 (500-4,999); Rhode Island, 4 (500-999); East North Central—Ohio, 1 (100-249); Indiana, 1 (100-249); Wisconsin, 5 (100-249); Minnesota, 1 (500-999); Iowa, 2 (100-249); Missouri, 1 (100-249); South—Delaware, 2 (100-249); Maryland, 6 (500-999); Virginia, 10 (1,000-2,499); West Virginia, 1 (100-249); North Carolina, 37 (2,500-4,999); South Carolina, 4 (1,000-2,499); Louisiana, 7 (500-999); Oklahoma, 3 (500-999); Colorado, 1 (20-99); Arizona, 2 (100-249); Utah, 3 (100-249); Washington, 2 (1-19).

S.I.C. 2341, Pt. A, Manufacturers: New England—Maine, 1 (1-19); New Hampshire, 1 (1-19); Vermont, 3 (100-249); Rhode Island, 2 (500-999); East North Central—Ohio, 4 (20-99); Indiana, 5 (250-499); Wisconsin, 4 (100-249); West North Central—Minnesota, 7 (500-999); Iowa, 2 (100-249); Missouri, 5 (500-999); South and West—Delaware, 1 (100-249); Maryland, 1 (100-249); Virginia, 2 (100-249); North Carolina, 25 (3,271); South Carolina, 2 (1,000-2,499); Alabama, 10 (2,500-4,999); Mississippi, 4 (500-999); Louisiana, 5 (500-999); Oklahoma, 3 (500-999); Texas, 22 (500-999); Colorado, 1 (20-99); Arizona, 2 (100-249); Utah, 2 (20-99); Washington, 2 (1-19); California, 38 (1,000-2,499).

S.I.C. 2341, Pt. B, Jobbers: New England—Vermont, 1 (100-249); Massachusetts, 3 (20-99); Connecticut, 3 (20-99); North Central—Illinois, 1 (1-19); Missouri, 1 (500-999); South and West—Maryland, 1 (20-99); South Carolina, 1 (1-19); Louisiana, 1 (1-19); California, 1 (1-19).

S.I.C. 2341, Pt. C, Contractors: New England—Maine, 1 (20-99); Vermont, 5 (250-499); Massachusetts, 13 (1,000-2,499); Rhode Island, 2 (20-99); Connecticut, 11 (500-999); North Central—Ohio, 1 (100-249); Indiana, 1 (1-19); Illinois, 4 (20-99); Wisconsin, 21 (500-999); Missouri, 8 (500-999); South and West—Delaware, 1 (20-99); Maryland, 4 (250-499); Virginia, 8 (1,095); West Virginia, 1 (100-249); North Carolina, 12 (1,000-2,499); South Carolina, 6 (250-499); Alabama, 1 (20-99); Mississippi, 2 (250-499); Louisiana, 1 (1-19); Oklahoma, 1 (100-249); Texas, 1 (1-19); Utah, 1 (100-249).

S.I.C. 2342, Corsets and Allied Garments: New England—Massachusetts, 13 (1,000-2,499); Rhode Island, 2 (1-19); East North Central—Ohio, 2 (20-99); Indiana, 4 (500-999); Wisconsin, 1 (100-249); West North Central—Minnesota, 2 (100-249); Missouri, 2 (20-99); Kansas, 1 (100-249); South—Delaware, 1 (500-999); Maryland, 1 (20-99); District of Columbia, 2 (20-99); Virginia, 1 (100-249); West Virginia, 6 (1,000-2,499); North Carolina, 2 (20-99); South Carolina, 2 (250-499); Kentucky, 1 (20-99); Alabama, 3 (100-249); Arkansas, 1 (100-249); Louisiana, 1 (20-99); Texas, 8 (500-999); West—Utah, 1 (100-249); California, 49 (1,000-2,499).

S.I.C. 2342, Pt. A, Manufacturers: New England—Massachusetts, 10 (1,000-2,499); Rhode Island, 2 (1-19); North Central—Ohio, 2 (20-99); Indiana, 1 (250-499); Michigan, 5 (500-999); Wisconsin, 1 (100-249); Minnesota, 2 (100-249); Missouri, 1 (1-19); South and West—Delaware, 1 (500-999); Maryland, 1 (20-99); District of Columbia, 1 (1-19); West Virginia, 1 (20-99); North Carolina, 2 (20-99); Georgia, 6 (1,000-2,499); Kentucky, 1 (20-99); Texas, 4 (250-499); California, 43 (1,752).

S.I.C. 2342, Pt. B, Jobbers: All Other States—Connecticut, 3 (100-249); New Jersey, 4 (1,549); Illinois, 1 (1-19); California, 2 (100-249).

S.I.C. 2342, Pt. C, Contractors: All Other States—Massachusetts, 3 (100-249); Connecticut, 5 (250-499); New Jersey, 19 (1,382); Indiana, 3 (100-249); Illinois, 9 (1,000-2,499); Michigan, 2 (100-249); Missouri, 1 (20-99); Kansas, 1 (100-249); District of Columbia, 1 (20-99); Virginia, 1 (100-249); West Virginia, 5 (1,350); South Carolina, 2 (250-499); Georgia, 2 (250-499); Alabama, 3 (100-249); Arkansas, 1 (100-249); Louisiana, 1 (20-99); Texas, 4 (250-499); Utah, 1 (100-249); California, 4 (100-249).

S.I.C. 2351, Millinery: New England—Massachusetts, 32 (2,392); Rhode Island, 1 (1-19); Connecticut, 6 (100-249); East North Central—Michigan, 3 (20-99); Wisconsin, 2 (250-499); West North Central—Missouri, 18 (250-499); Kansas, 1 (1-19); South—Virginia, 3 (100-249); Georgia, 3 (100-249); Alabama, 1 (20-99); Texas, 21 (250-499); West—Colorado, 1 (1-19); Washington, 1 (20-99); California, 39 (500-999).

S.I.C. 2361, Children's Dresses: New England—Maine, 2 (20-99); Vermont, 5 (200-249); Connecticut, 5 (250-499); East North Central—Ohio, 2 (100-249); Indiana, 2 (100-249); Illinois, 7 (100-249); Michigan, 4 (20-99); Wisconsin, 5 (20-99); West North Central—Minnesota, 2 (1-19); Iowa, 1 (1-19); Missouri, 7 (100-249); Nebraska, 1 (1-19); Kansas, 1 (1-19); South—Delaware, 2 (20-99); West Virginia, 1 (20-99); North Carolina, 7 (250-499); South Carolina, 4 (500-999); Georgia, 3 (20-99); Florida, 7 (20-99); Kentucky, 1 (100-249); Alabama, 2 (100-249); Arkansas, 2 (1-19); Louisiana, 1 (1-19); Oklahoma, 3 (20-99); Texas, 39 (1,000-2,499); Mountain—Colorado, 1 (1-19); New Mexico, 1 (1-19); Arizona, 2 (1-19); Utah, 2 (1-19); Washington, 2 (1-19); Oregon, 1 (20-99).

## Footnotes for Table 2—MC-23D

- S.I.C. 2361, Pt. A, Manufacturers: New England—Maine, 1 (20-99); Massachusetts, 7 (250-499); Connecticut, 2 (20-99); North Central—Indiana, 1 (20-99); Illinois, 7 (100-249); Michigan, 3 (20-99); Wisconsin, 3 (20-99); Minnesota, 1 (1-19); Iowa, 1 (1-19); Missouri, 6 (100-249); Nebraska, 1 (1-19); Kansas, 1 (1-19); South—Virginia, 1 (20-99); North Carolina, 3 (20-99); South Carolina, 2 (250-499); Georgia, 3 (20-99); Florida, 7 (20-99); Alabama, 1 (100-249); Arkansas, 2 (1-19); Louisiana, 1 (1-19); Oklahoma, 3 (20-99); Texas, 26 (1,033); West—Colorado, 1 (1-19); New Mexico, 1 (1-19); Arizona, 2 (1-19); Utah, 2 (1-19); Washington, 2 (1-19); Oregon, 1 (20-99).
- S.I.C. 2361, Pt. B, Jobbers: All Other Divisions: Ohio, 2 (100-249); Wisconsin, 1 (1-19); North Carolina, 1 (1-19); Texas, 2 (20-99); California, 4 (20-99).
- S.I.C. 2361, Pt. C, Contractors: New England—Maine, 1 (1-19); Vermont, 5 (100-249); Massachusetts, 6 (100-249); Connecticut, 3 (100-249); All Other Divisions—Indiana, 1 (20-99); Michigan, 1 (1-19); Wisconsin, 1 (1-19); Minnesota, 1 (1-19); Missouri, 1 (20-99); Delaware, 2 (20-99); Virginia, 7 (500-999); West Virginia, 1 (20-99); North Carolina, 3 (250-499); South Carolina, 2 (250-499); Kentucky, 1 (100-249); Alabama, 1 (20-99); Texas, 11 (500-999); California, 13 (100-249).
- S.I.C. 2363, Children's Coats: New England—Maine, 2 (20-99); Vermont, 1 (100-249); Connecticut, 3 (250-499); East North Central—Indiana, 1 (20-99); Illinois, 2 (1-19); Michigan, 3 (250-499); West North Central—Minnesota, 4 (250-499); Missouri, 2 (100-249); South—Virginia, 1 (1-19); North Carolina, 1 (100-249); Georgia, 3 (250-499); Florida, 1 (1-19); West South Central—Louisiana, 1 (1-19); Texas, 1 (20-99); Pacific—Washington, 1 (20-99); California, 21 (250-499).
- S.I.C. 2363, Pt. A, Manufacturers: New England—Maine, 1 (1-19); Vermont, 1 (100-249); Massachusetts, 3 (100-249); Connecticut, 1 (20-99); North Central—Indiana, 1 (20-99); Michigan, 2 (250-499); Minnesota, 4 (250-499); Missouri, 1 (100-249); South and West—Virginia, 1 (1-19); Georgia, 2 (100-249); Florida, 1 (1-19); Louisiana, 1 (1-19); Texas, 1 (20-99); California, 14 (100-249).
- S.I.C. 2363, Pt. B, Jobbers: Northeast—Massachusetts, 2 (20-99); Pennsylvania, 4 (20-99); All Other Regions—Illinois, 2 (1-19); California, 3 (1-19).
- S.I.C. 2363, Pt. C, Contractors: Northeast—Maine, 1 (20-99); Connecticut, 2 (250-499); Pennsylvania, 18 (1,148); All Other Regions—Michigan, 1 (20-99); Missouri, 1 (20-99); North Carolina, 1 (100-249); Georgia, 1 (20-99); Washington, 1 (20-99); California, 4 (20-99).
- S.I.C. 2369, Children's Outerwear, n.e.c.: New England—Maine, 3 (100-249); Vermont, 4 (20-99); East North Central—Ohio, 1 (20-99); Indiana, 4 (100-249); Michigan, 8 (500-999); Wisconsin, 4 (100-249); West North Central—Minnesota, 7 (500-999); Iowa, 6 (250-499); Nebraska, 1 (100-249); Kansas, 5 (100-249); South—Delaware, 2 (100-249); Virginia, 7 (500-999); West Virginia, 1 (250-499); South Carolina, 4 (250-499); Georgia, 8 (250-499); Kentucky, 1 (250-499); Tennessee, 1 (1-19); Alabama, 7 (100-249); Arkansas, 3 (20-99); Louisiana, 2 (100-249); Oklahoma, 2 (20-99); West—Colorado, 1 (1-19); Utah, 2 (20-99); Washington, 3 (20-99); California, 51 (1,213).
- S.I.C. 2369, Pt. A, Manufacturers: New England—Maine, 1 (1-19); Rhode Island, 3 (500-999); Connecticut, 3 (100-249); East North Central—Indiana, 3 (100-249); Michigan, 4 (20-99); Wisconsin, 3 (100-249); West North Central—Minnesota, 5 (500-999); Iowa, 5 (250-499); Missouri, 6 (250-499); Kansas, 4 (100-249); South—Delaware, 1 (20-99); Maryland, 3 (20-99); Virginia, 1 (100-249); West Virginia, 1 (250-499); South Carolina, 3 (250-499); Georgia, 6 (250-499); Florida, 7 (100-249); Kentucky, 1 (250-499); Tennessee, 1 (1-19); Alabama, 5 (20-99); Mississippi, 2 (250-499); Arkansas, 2 (1-19); Louisiana, 2 (100-249); Oklahoma, 2 (20-99); West—Colorado, 1 (1-19); Utah, 2 (20-99); Washington, 3 (20-99); California, 40 (500-999).
- S.I.C. 2369, Pt. B, Jobbers: New England—Vermont, 1 (1-19); Massachusetts, 4 (100-249); Connecticut, 1 (20-99); Middle Atlantic—New Jersey, 2 (1-19); Pennsylvania, 2 (1-19); Other Divisions—Illinois, 2 (1-19); Michigan, 1 (100-249); Minnesota, 1 (20-99); Missouri, 2 (20-99); Georgia, 1 (1-19); California, 1 (1-19).
- S.I.C. 2369, Pt. C, Contractors: New England—Maine, 2 (100-249); Vermont, 3 (20-99); Massachusetts, 9 (250-499); Rhode Island, 1 (1-19); Connecticut, 2 (250-499); Middle Atlantic—New Jersey, 25 (500-999); Pennsylvania, 29 (1,000-2,499); Other Divisions—Ohio, 1 (20-99); Indiana, 1 (20-99); Illinois, 2 (20-99); Michigan, 3 (100-249); Wisconsin, 1 (20-99); Minnesota, 1 (20-99); Iowa, 1 (20-99); Missouri, 1 (1-19); Nebraska, 1 (100-249); Kansas, 1 (20-99); Delaware, 1 (20-99); Maryland, 2 (100-249); Virginia, 6 (500-999); South Carolina, 1 (1-19); Georgia, 1 (20-99); Florida, 1 (1-19); Alabama, 2 (20-99); Mississippi, 2 (20-99); Arkansas, 1 (1-19); Texas, 1 (1-19); California, 10 (100-249).
- S.I.C. 2371, Fur Goods: New England—New Hampshire, 2 (1-19); Massachusetts, 8 (20-99); Connecticut, 7 (20-99); Middle Atlantic—New Jersey, 13 (20-99); Pennsylvania, 22 (20-99); East North Central—Ohio, 6 (20-99); Michigan, 3 (20-99); Wisconsin, 12 (20-99); West North Central—Minnesota, 10 (20-99); Missouri, 5 (20-99); North Dakota, 1 (1-19); Nebraska, 1 (1-19); South—Maryland, 3 (1-19); Florida, 2 (1-19); Texas, 1 (1-19); West—Nevada, 1 (1-19); Washington, 1 (1-19); Oregon, 1 (1-19); California, 58 (100-249).

## MANUFACTURES—INDUSTRY STATISTICS

Table 3.—DETAILED STATISTICS FOR THE UNITED STATES: 1954

Note: Detailed figures may not add to the totals because of independent rounding.

xxx Not applicable.

NA Not available.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A). Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. Plant specialization data are not shown for Industry 2369 as a whole since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of these establishments as a whole.

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>Less than \$500 thousand.

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A.)<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

Table 5B.--INDUSTRY-PRODUCT ANALYSIS--SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

Table 6C.--VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 23411, Vermont, Minnesota, Iowa, South Carolina, Louisiana, Oklahoma, Arizona, and California; 23412, Vermont, Maryland, Tennessee, Mississippi, and Louisiana; 23421, Massachusetts, Connecticut, Michigan, North Carolina, and Texas; and 23422, Indiana, Minnesota, Delaware, and North Carolina.

TABLE 7 NOT APPLICABLE TO THIS BULLETIN

## MANUFACTURES—INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

	Establishments with:									
	90% or more specialization.....	258	7,548	18,305	6,794	12,397	14,644	29,882	33,831	63,713
	75-89% specialization.....	45	3,714	9,814	3,397	6,412	7,857	17,384	19,106	36,490
	50-74% specialization.....	80	4,819	11,456	4,406	7,946	9,175	19,042	25,928	44,971
	All other <sup>1</sup> .....	24	2,070	4,697	1,886	3,354	3,787	7,694	10,886	18,580
2369 Pt.B	CHILDREN'S OUTERWEAR, N.E.C., "JOBBER" (all establishments).....	123	2,475	8,806	1,668	2,877	4,209	22,009	64,283	86,292
	Establishments with:									
	90% or more specialization.....	72	1,051	3,825	660	1,101	1,621	10,300	27,830	38,130
	75-89% specialization.....	11	231	819	168	271	451	2,086	6,559	8,645
	50-74% specialization.....	31	1,015	3,487	722	1,280	1,764	7,287	22,056	29,344
	All other <sup>1</sup> .....	9	176	674	117	223	371	2,334	7,837	10,172

Note: Plant specialization data are not shown for these industries as a whole since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of the establishments as a whole.

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and miscellaneous small statistical adjustments.

Virtually all jobbers have specialization ratios of 90% or more.

## Miscellaneous Apparel and Accessories

This report presents 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2381	- Fabric Dress Gloves
2382	- Fabric Work Gloves
2383	- Suspenders and Garters
2384	- Robes and Dressing Gowns
2385	- Waterproof Outer Garments
2386	- Leather and Sheep-lined Clothing
2387	- Belts
2388	- Handkerchiefs
2389	- Apparel, Not Elsewhere Classified

2381 - Fabric Dress Gloves (Full Standard Industrial Classification title: Dress and Semidress Gloves and Mittens, Fabric, Fabric and Leather Combined)

This industry comprises establishments primarily engaged in manufacturing dress and semidress gloves and mittens, cut and sewed from purchased woven or knit fabric, or these materials combined with leather. Knitting mills primarily engaged in manufacturing gloves and mittens are classified in Industry 2255, Knit Glove Mills; establishments primarily engaged in manufacturing fabric work gloves in Industry 2382, Fabric Work Gloves; leather gloves in Group 315 Leather Gloves; and rubber gloves in Industry 3099, Rubber Industries, Not Elsewhere Classified. For a detailed list of products of Industry 2381, refer to Table 6A, product codes 2381011 to 2381098.

The value of shipments of Industry 2381, Fabric Dress Gloves, in 1954 totaled \$39 million. This included shipments of primary products (fabric dress gloves) valued at \$35 million, shipments of secondary products valued at \$2 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$2 million.

Industry 2381 shipments of fabric dress gloves in 1954 represented 94 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 89 percent.

Industry 2381 shipments of fabric dress gloves in 1954 represented 72 percent of the fabric dress gloves, valued at \$49 million shipped by all industries. This coverage ratio in 1947 was 47 percent. This change of 25 percentage points reflects the relative increase in the output of fabric dress gloves in the cut-and-sew shops as compared with the knit glove mills. The principal other industry shipping fabric dress gloves in 1954 was Industry 2255, Knit Glove Mills, with a value of \$8 million.

The Bureau of the Census publishes annual information covering the output of Industry 2381 in Facts for Industry Series M67D, Gloves and Mittens. The quantity figures shown in the Facts for Industry reports for earlier years represent production whereas the quantity figures shown in Table 6A of this report for 1954 and 1947 represent shipments. However, it is believed that these data are comparable because for most types of gloves and mittens there is no appreciable difference between production and shipments on an annual basis.

2382 - Fabric Work Gloves (Full Standard Industrial Classification Title: Work Gloves and Mittens, Fabric, Fabric and Leather Combined)

This industry comprises establishments primarily engaged in manufacturing work gloves and mittens, cut and sewed from purchased woven or knit fabric, or these materials combined with leather. Knitting mills primarily engaged in manufacturing gloves and mittens are classified in Industry 2255, Knit Glove Mills; establishments primarily engaged in manufacturing dress

and semidress gloves and mittens are classified in Industry 2381, Fabric Dress Gloves; leather gloves in Group 315, Leather Gloves; rubber gloves in Industry 3099, Rubber Industries, Not Elsewhere Classified; sport and athletic gloves in Industry 3949, Sporting and Athletic Goods; and asbestos gloves in Industry 3292, Asbestos Products. For a detailed list of products of Industry 2382, refer to Table 6A, product codes 2382011 to 2382098.

The value of shipments of Industry 2382, Fabric Work Gloves, in 1954 totaled \$66 million. This included shipments of primary products (fabric work gloves) valued at \$62 million, shipments of secondary products valued at \$3 million, and a negligible amount of miscellaneous receipts. Secondary products shipped by Industry 2382 in 1954 consisted mainly of leather work gloves.

Industry 2382 shipments of fabric work gloves in 1954 represented 95 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 94 percent.

Industry 2382 shipments of fabric work gloves in 1954 represented 93 percent of the fabric work gloves valued at \$67 million shipped by all industries. This coverage ratio in 1947 was 96 percent.

Separate 1954 Census figures for the Fabric Work Gloves Industry, by type of establishment ("Manufacturers," "Jobbers," and "Contractor") are not shown in the detailed tables of this report since most establishments classified in Industry 2382 operate as "manufacturers."

The Bureau of the Census publishes annual information covering the output of Industry 2382 in Facts for Industry, Series M67D, Gloves and Mittens. For a statement on the comparability of the figures shown in this report and those shown for earlier years in the Facts for Industry reports, please refer to Industry 2381.

2383-Suspenders and Garters (Full Standard Industrial Classification title: Suspenders, Garters, and Related Products)

This industry comprises establishments primarily engaged in manufacturing suspenders, arm bands, garters, hose supporters, and related products. Establishments primarily engaged in manufacturing corsets and allied garments are classified in Industry 2342, Corsets and Allied Garments. For a detailed list of products of Industry 2383, refer to Table 6A, product codes 2383011 to 2383051.

The value of products of Industry 2383, Suspenders and Garters, in 1954 totaled \$10 million. This included output of primary products (suspenders and garters) valued at \$8 million, production of secondary products valued at \$2 million, and a negligible amount of miscellaneous receipts.

Industry 2383 output of suspenders and garters in 1954 represented 78 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 74 percent. Industry 2383 production of suspenders and garters in 1954 represented 60 percent of the suspenders and garters valued at \$13 million made by all industries. The comparable coverage ratio in 1947 was 54 percent. The other principal industries making suspenders and garters were Industry 2387, Belts, and Industry 2342, Corsets and Allied Garments.

Separate 1954 Census figures for the Suspenders and Garters Industry by type of establishment ("Manufacturers," "Jobbers," and "Contractors") are not shown in the detailed tables of this report since most establishments classified in Industry 2383 operate as "manufacturers."

2384-Robes and Dressing Gowns

This industry comprises establishments primarily engaged in manufacturing men's and women's bathrobes, lounging robes, dressing gowns, breakfast coats, brunch coats, housecoats, and lounging pajamas. Establishments primarily engaged in manufacturing negligees and bed jackets from purchased fabric are classified in Industry 2341, Women's and Children's Underwear; and children's and infants' robes, dressing gowns, and kimonos from purchased fabric in Industry 2369, Children's Outerwear, Not Elsewhere Classified. For a detailed list of products of Industry 2384, refer to Table 6A, product codes 2384111 to 2384251.

The value of products of Industry 2384, Robes and Dressing Gowns, in 1954 totaled \$108 million. This included output of primary products (robes and dressing gowns) valued at \$87 million, production of secondary products valued at \$7 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$14 million.

Industry 2384 output of robes and dressing gowns in 1954 represented 93 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 89 percent. Secondary products produced by this industry in 1954 consisted mainly of miscellaneous apparel items.

Industry 2384 output of robes and dressing gowns in 1954 represented 84 percent of the robes and dressing gowns, valued at \$103 million made by all industries. This comparable coverage ratio in 1947 was 82 percent. The principal other industry making robes and dressing gowns in 1954 was Industry 2341, Women's and Children's Underwear.

2385 - Waterproof Outer Garments (Full Standard Industrial Classification title: Raincoats and Other Waterproof Outer Garments)

This industry comprises establishments primarily engaged in manufacturing raincoats from purchased rubberized fabrics and other waterproof and water repellant fabrics, and other waterproof outer garments made from such material as pofilm and cellophane. Establishments primarily engaged in manufacturing waterproof outer garments from plastic, including baby pants, aprons, bibs, and bathing and shower caps, are also included in Industry 2385. Establishments primarily engaged in manufacturing oiled-fabric work garments are classified in Industry 2329, Men's and Boys' Clothing, Not Elsewhere Classified, and those manufacturing rubber garments and garments made from rubberized fabrics produced in the same establishment are classified in Industry 3099, Rubber Industries, Not Elsewhere Classified. For a detailed list of products of Industry 2385, refer to Table 6A, product codes 2385011 to 2385081.

The value of products of Industry 2385, Waterproof Outer Garments, in 1954 totaled \$120 million. This included output of primary products (waterproof outer garments) valued at \$94 million, production of secondary products valued at \$12 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$13 million.

Industry 2385 output of waterproof outer garments in 1954 represented 89 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 85 percent.

Industry 2385 production of waterproof outer garments in 1954 represented 81 percent of the waterproof outer garments, valued at \$117 million made by all industries. This coverage ratio in 1947 was 73 percent. The principal other industry making waterproof outer garments in 1954 was Industry 3099, Rubber Industries, Not Elsewhere Classified, \$10 million.

2386 - Leather and Sheep-Lined Clothing

This industry comprises establishments primarily engaged in manufacturing leather and sheep-lined garments. Establishments primarily engaged in manufacturing leather gloves and mittens are classified in Group 315, Leather Gloves, and fur garments in Industry 2371, Fur Goods. For a detailed list of products of Industry 2386, refer to Table 6A, product codes 2386011 to 2386098.

The value of products of Industry 2386, Leather and Sheep-lined Clothing, in 1954 totaled \$56 million. This included output of primary products (leather and sheep-lined clothing) valued at \$46 million, production of secondary products valued at \$8 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$3 million.

Industry 2386 output of leather and sheep-lined clothing (primary products) in 1954 represented 85 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 79 percent. Secondary products made by this Industry 2386 in 1954 consisted mainly of men's and boys' work, sport, and other apparel, not elsewhere classified.

Industry 2386 production of leather and sheep-lined clothing in 1954 represented 80 percent of the leather and sheep-lined clothing, valued at \$57 million, made by all industries. This coverage ratio in 1947 was also 80 percent. The principal other industry making leather and sheep-lined clothing in 1954 was Industry 2329, Men's and Boys' Clothing, Not Elsewhere Classified, \$8 million.

2387 - Belts

This industry comprises establishments primarily engaged in manufacturing men's and women's apparel belts, regardless of material. For a detailed list of products of Industry 2387, refer to Table 6A, product codes 2387111 to 2387251.

The value of products of Industry 2387, Belts, in 1954 totaled \$106 million. This included output of primary products (belts) valued at \$89 million, production of secondary products valued at \$8 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$9 million.

Industry 2387 output of belts in 1954 represented 92 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 90 percent. Secondary products made by this industry in 1954 consisted principally of suspenders and garters, \$3 million.

Industry 2387 production of belts (primary products) in 1954 represented 94 percent of the belts, valued at \$95 million, made by all industries. This coverage ratio in 1947 was 95 percent.

2388 - Handkerchiefs

This industry comprises establishments primarily engaged in manufacturing handkerchiefs, except embroidered. Establishments primarily engaged in manufacturing Schiffli-machine embroidered handkerchiefs are classified in Industry 2397, Schiffli-Machine Embroideries; and embroidered handkerchiefs, except Schiffli-machine, in Industry 2398, Embroideries, Except Schiffli. For a detailed list of products of Industry 2388, refer to Table 6A, product codes 2388011 to 2388055.

The value of products of Industry 2388, Handkerchiefs, in 1954 totaled \$40 million. This included output of primary products (handkerchiefs, except embroidered) valued at \$36 million, production of secondary products valued at \$1 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$3 million. Industry 2388 output of handkerchiefs, except embroidered in 1954, represented 98 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio also 98 percent.

Industry 2388 production of handkerchiefs, except embroidered in 1954 represented 98 percent of the handkerchiefs, except embroidered, valued at \$37 million, made by all industries. This coverage ratio in 1947 was 95 percent.

2389 - Apparel, Not Elsewhere Classified

This industry comprises establishments primarily engaged in manufacturing apparel, not elsewhere classified, such as academic caps and gowns, vestments, and theatrical costumes.

The value of products of Industry 2389, Apparel, Not Elsewhere Classified, in 1954 totaled \$27 million. This included output of primary products (apparel, not elsewhere classified) valued at \$22 million, production of secondary products valued

at \$3 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$2 million.

Industry 2389 production of apparel, not elsewhere classified, in 1954 represented 90 percent of its total products made (primary and secondary). In 1947, this primary product specialization ratio was 96 percent.

Industry 2389 production of apparel, not elsewhere classified, in 1954 represented 91 percent of the apparel, not elsewhere

classified, valued at \$25 million, made by all industries. This coverage ratio in 1947 was 86 percent.

Separate 1954 Census figures for the Apparel, N.E.C. Industry, by type of establishment ("Manufacturer," "Jobber," and "Contractor") are not shown in the detailed tables of this report since most establishments classified in Industry 2389 operate as "manufacturers."

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. <sup>3</sup> (\$1,000)	Value of shipments <sup>4</sup> (\$1,000)

\* Revised.

NA Not available.

<sup>1</sup>The number of "All employees" and the number of "production and related workers" were obtained as follows: For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture." For the "Fabric dress gloves" and "Fabric work gloves" industries, 1947 value added by manufacture does not equal the published value of shipments less cost of materials, etc. because an estimated value of production was used in the calculation in place of value of shipments. Since the 1949-1952 estimates were derived from 1947 base totals, the same inequality may exist for these years.

<sup>3</sup>Figures for years prior to 1935 do not include cost of contract work, except in the case of "Handkerchiefs."

<sup>4</sup>The figures represent value of production for all years except in the case of "Fabric dress gloves" and "Fabric work gloves" in 1947-1954 and "Suspenders and garters" in 1929 where they represent value of shipments. See Introduction, "Value of Shipments."

<sup>5</sup>"Fabric dress gloves" and "Fabric work gloves" were formerly classified in one industry. The separate industry figures shown for 1937-1947, and 1954 have been combined in order that statistics can be shown for the period 1919-1935.

<sup>6</sup>The figures for 1950-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>7</sup>The figures for 1919-1923 do not include data for gloves and mittens of fabric and leather combined.

<sup>8</sup>Prior to 1919, this industry was included in "Furnishing goods, men's." Separate figures are, therefore, not available for earlier years.

<sup>9</sup>Because of a change in classification the figures for "Suspenders and garters" for years prior to 1923 are not sufficiently comparable to be shown here.

<sup>10</sup>No comparable figures are available for earlier years.

<sup>11</sup>"Handkerchiefs" was not shown as a separate industry prior to 1927, but was included with the industries formerly designated "Millinery and lace goods" and "Furnishing goods, men's, n.e.c."

## MISCELLANEOUS APPAREL AND ACCESSORIES

23E-5

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Industry, region, and State <sup>1</sup>	1954										1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2381, Fabric Dress Gloves: New England—Vermont, 1 (100-249); Massachusetts, 1 (20-99); Connecticut, 1 (20-99); Middle Atlantic—New Jersey, 3 (20-99); Pennsylvania, 8 (250-499); All Other Divisions—Ohio, 1 (1-19); Indiana, 1 (1-19); Illinois, 3 (250-499); Michigan, 1 (20-99); Wisconsin, 4 (250-499); Minnesota, 1 (1-19); Iowa, 2 (20-99); Tennessee, 1 (100-249).

S.I.C. 2381, Pt. A, Manufacturers: Northeast—Vermont, 1 (100-249); Connecticut, 1 (20-99); New Jersey, 2 (1-19); Pennsylvania, 3 (100-249); All Other Divisions—Ohio, 1 (1-19); Indiana, 1 (1-19); Illinois, 3 (250-499); Michigan, 1 (20-99); Wisconsin, 4 (250-499); Minnesota, 1 (1-19); Iowa, 2 (20-99); Tennessee, 1 (100-249).

S.I.C. 2381, Pt. B, Jobbers: Middle Atlantic—New York, 11 (250-499); Pennsylvania, 1 (100-249).

S.I.C. 2381, Pt. C, Contractors: Northeast—Massachusetts, 1 (20-99); New York, 14 (250-499); New Jersey, 1 (20-99); Pennsylvania, 2 (20-99).

S.I.C. 2382, Fabric Work Gloves: Northeast—Maine, 1 (1-19); Connecticut, 2 (20-99); New York, 11 (100-249); East North Central—Wisconsin, 4 (20-99);

West North Central—Minnesota, 2 (20-99); Iowa, 6 (250-499); Kansas, 1 (100-249); South Atlantic—North Carolina, 4 (1,000-2,499); South Carolina, 1 (1-19); Georgia, 1 (100-249); East South Central—Kentucky, 2 (20-99); Tennessee, 3 (250-499); Alabama, 1 (500-999); Mississippi, 5 (500-999);

West South Central—Arkansas, 2 (100-249); Oklahoma, 1 (1-19); Texas, 5 (250-499); West—Colorado, 1 (100-249); Oregon, 1 (20-99); California, 4 (20-99).

S.I.C. 2383, Suspenders and Garters: New England—Massachusetts, 4 (20-99); Connecticut, 4 (20-99); Middle Atlantic—New York, 28 (500-999);

Pennsylvania, 1 (1-19); All Other Divisions—Ohio, 2 (1-19); Illinois, 1 (1-19); Wisconsin, 1 (1-19); Minnesota, 1 (1-19); Iowa, 1 (1-19); North Carolina, 2 (100-249); Texas, 1 (1-19); California, 1 (1-19).

S.I.C. 2384, Robes and Dressing Gowns: New England—Maine, 1 (100-249); Rhode Island, 2 (100-249); Connecticut, 8 (250-499); West North Central—Missouri, 5 (100-249); Nebraska, 1 (20-99); South—South Carolina, 4 (100-249); Florida, 1 (1-19); Alabama, 2 (100-249); Mississippi, 1 (20-99);

West—Arizona, 1 (1-19); California, 6 (100-249).

S.I.C. 2384, Pt. A, Manufacturers: New England—Maine, 1 (100-249); Massachusetts, 4 (100-249); Connecticut, 2 (100-249); Middle Atlantic—New Jersey, 2 (100-249); Pennsylvania, 4 (250-499); North Central and South—Illinois, 9 (250-499); Missouri, 4 (100-249); Nebraska, 1 (20-99); South Carolina, 2 (100-249); Georgia, 9 (500-999); Florida, 1 (1-19); Alabama, 1 (100-249); Mississippi, 1 (20-99); West—Arizona, 1 (1-19); California, 6 (100-249).

S.I.C. 2384, Pt. B, Jobbers: Northeast—Massachusetts, 1 (1-19); Connecticut, 1 (1-19); New Jersey, 2 (20-99); Pennsylvania, 1 (100-249); North Central and South—Illinois, 2 (20-99); Missouri, 1 (20-99); South Carolina, 1 (1-19).

S.I.C. 2384, Pt. C, Contractors: Northeast—Rhode Island, 2 (100-249); Connecticut, 5 (100-249); New Jersey, 19 (500-999); South—South Carolina, 1 (100-249); Georgia, 2 (100-249); Alabama, 1 (1-19).

## MISCELLANEOUS APPAREL AND ACCESSORIES

23E-9

Footnotes for Table 2—MC-23E

- S.I.C. 2385, Waterproof Outer Garments: New England—New Hampshire, 2 (20-99); Rhode Island, 2 (20-99); Connecticut, 3 (20-99); North Central—Indiana, 3 (500-999); Illinois, 10 (100-249); Minnesota, 1 (1-19); Iowa, 1 (1-19); Missouri, 1 (1-19); South—Delaware, 1 (500-999); Maryland, 1 (100-249); Virginia, 1 (100-249); North Carolina, 1 (1-19); Florida, 1 (1-19); Texas, 1 (20-99); West—Colorado, 2 (1-19); Washington, 3 (20-99); Oregon, 2 (20-99); California, 9 (20-99).
- S.I.C. 2385, Pt. A, Manufacturers: New England—New Hampshire, 1 (20-99); Rhode Island, 1 (20-99); Connecticut, 3 (20-99); All Other Divisions—Ohio, 6 (250-499); Indiana, 3 (500-999); Illinois, 9 (100-249); Michigan, 4 (250-499); Minnesota, 1 (1-19); Iowa, 1 (1-19); Missouri, 1 (1-19); Delaware, 1 (500-999); Maryland, 1 (100-249); Virginia, 1 (100-249); North Carolina, 1 (1-19); Georgia, 3 (250-499); Florida, 1 (1-19); Texas, 1 (20-99); Colorado, 2 (1-19); Washington, 3 (20-99); Oregon, 2 (20-99); California, 7 (20-99).
- S.I.C. 2385, Pt. B, Jobbers: All Other States—Massachusetts, 3 (20-99); New Jersey, 1 (1-19); Michigan, 1 (1-19); California, 1 (1-19).
- S.I.C. 2385, Pt. C, Contractors: All Other States—New Hampshire, 1 (1-19); Massachusetts, 20 (500-999); Rhode Island, 1 (20-99); New Jersey, 12 (250-499); Ohio, 1 (20-99); Illinois, 1 (1-19); Michigan, 1 (20-99); Georgia, 1 (100-249); California, 1 (1-19).
- S.I.C. 2386, Leather and Sheep-lined Clothing: New England—New Hampshire, 1 (1-19); Massachusetts, 18 (500-999); Connecticut, 4 (100-249); East North Central—Indiana, 1 (1-19); Illinois, 8 (100-249); Michigan, 2 (20-99); West North Central—Iowa, 1 (20-99); Missouri, 6 (100-249); South—Tennessee, 1 (20-99); Oklahoma, 3 (20-99); Texas, 1 (1-19); Mountain—Idaho, 1 (1-19); Colorado, 4 (20-99); New Mexico, 1 (20-99); Arizona, 3 (20-99); Pacific—Washington, 1 (1-19); Oregon, 2 (1-19); California, 27 (500-999).
- S.I.C. 2386, Pt. A, Manufacturers: East North Central—Indiana, 1 (1-19); Illinois, 8 (100-249); Michigan, 2 (20-99); West North Central—Iowa, 1 (20-99); Missouri, 6 (100-249); South—Tennessee, 1 (20-99); Oklahoma, 3 (20-99); Texas, 1 (1-19); All Other Divisions—New Hampshire, 1 (1-19); Massachusetts, 15 (500-999); Connecticut, 2 (100-249); Pennsylvania, 3 (250-499); Idaho, 1 (1-19); Colorado, 3 (20-99); Arizona, 3 (20-99); Washington, 1 (1-19); Oregon, 2 (1-19); California, 25 (500-999).
- S.I.C. 2386, Pt. B, Jobbers: Northeast—Massachusetts, 2 (1-19); New York, 8 (20-99).
- S.I.C. 2386, Pt. C, Contractors: All Other States—Massachusetts, 1 (20-99); Connecticut, 2 (20-99); New York, 9 (100-249); Colorado, 1 (1-19); California, 2 (100-249).
- S.I.C. 2387, Belts: New England—New Hampshire, 1 (1-19); Vermont, 1 (1-19); Rhode Island, 2 (20-99); North Central—Ohio, 3 (100-249); Indiana, 2 (1-19); Michigan, 2 (1-19); Wisconsin, 3 (100-249); Missouri, 3 (100-249); South Atlantic—Maryland, 4 (20-99); Virginia, 1 (1-19); North Carolina, 1 (1-19); Georgia, 1 (20-99); Florida, 2 (20-99); West South Central—Louisiana, 3 (1-19); Oklahoma, 2 (20-99); West—Colorado, 3 (20-99); New Mexico, 1 (1-19); Arizona, 1 (20-99); California, 35 (250-499).
- S.I.C. 2387, Pt. A, Manufacturers: New England—New Hampshire, 1 (1-19); Vermont, 1 (1-19); Rhode Island, 2 (20-99); New Jersey, 8 (250-499); Pennsylvania, 18 (500-999); North Central—Ohio, 3 (100-249); Indiana, 2 (1-19); Michigan, 2 (1-19); Wisconsin, 2 (20-99); Missouri, 4 (20-99); South and West—Maryland, 3 (1-19); Virginia, 1 (1-19); North Carolina, 1 (1-19); Georgia, 1 (20-99); Florida, 2 (20-99); Louisiana, 3 (1-19); Oklahoma, 2 (20-99); Texas, 14 (500-999); Colorado, 3 (20-99); New Mexico, 1 (1-19); Arizona, 1 (20-99); California, 28 (250-499).
- S.I.C. 2387, Pt. B, Jobbers: All States—Massachusetts, 2 (20-99); New York, 7 (20-99); Illinois, 1 (20-99).
- S.I.C. 2387, Pt. C, Contractors: Northeast and North Central—Massachusetts, 4 (100-249); New York, 64 (500-999); New Jersey, 2 (20-99); Pennsylvania, 7 (500-999); Illinois, 5 (20-99); Wisconsin, 1 (20-99); Missouri, 1 (20-99); South and West—Maryland, 1 (20-99); Texas, 5 (100-249); California, 7 (100-249).
- S.I.C. 2388, Handkerchiefs: Northeast—New Hampshire, 1 (20-99); Rhode Island, 2 (250-499); Pennsylvania, 3 (250-499); South and West—North Carolina, 3 (100-249); South Carolina, 2 (100-249); Georgia, 1 (20-99); Texas, 1 (1-19); California, 2 (1-19).
- S.I.C. 2388, Pt. A, Manufacturers: All Other States—Rhode Island, 2 (250-499); Pennsylvania, 1 (100-249); North Carolina, 3 (100-249); South Carolina, 2 (100-249); Georgia, 1 (20-99); California, 2 (1-19).
- S.I.C. 2388, Pt. B, Jobbers: Middle Atlantic—New York, 24 (500-999); New Jersey, 2 (20-99); Pennsylvania, 1 (100-249).
- S.I.C. 2388, Pt. C, Contractors: All States—New Hampshire, 1 (20-99); New York, 19 (250-499); New Jersey, 17 (500-999); Pennsylvania, 1 (1-19); Texas, 1 (1-19).
- S.I.C. 2389, Apparel, N.E.C.: New England—Massachusetts, 6 (100-249); Connecticut, 1 (100-249); Middle Atlantic—New Jersey, 9 (100-249); Pennsylvania, 13 (500-999); East North Central—Indiana, 1 (1-19); Michigan, 1 (20-99); Wisconsin, 3 (20-99); West North Central—Minnesota, 2 (1-19); Missouri, 1 (1-19); Nebraska, 1 (20-99); South and West—District of Columbia, 1 (1-19); South Carolina, 1 (1-19); Georgia, 1 (1-19); Florida, 1 (1-19); Alabama, 1 (1-19); Mississippi, 1 (1-19); Louisiana, 3 (20-99); Texas, 3 (20-99); New Mexico, 1 (1-19); Washington, 1 (20-99); California, 12 (100-249).

<sup>2</sup>Represents value of products made for all industries except Fabric dress gloves (S.I.C. 2381) and Fabric work gloves (S.I.C. 2382). For these industries, the figures represent value of shipments.

<sup>3</sup>Data for these industries include 9 establishments with 1,132 employees, \$10,677 thousand value of shipments and \$4,529 thousand value added by manufacture which are not included in the separate totals for "manufactures," "jobbers," or "contractors."

Note: Plant specialization data are not shown for each of these industries as a whole since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and might not be representative of the activity of the establishment as a whole.

<sup>1</sup>Data for these industries include 9 establishments with 1,132 employees, \$10,677 thousand value of shipments and \$4,529 thousand value added by manufacture which are not included in the separate totals for manufacturers, jobbers, or contractors.

<sup>2</sup>The specialization ratio compares the given industry's shipments of its primary products of its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>3</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>4</sup>Less than \$500 thousand.

<sup>5</sup>Less than 500 thousand kwh.

## MANUFACTURES--INDUSTRY STATISTICS

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MISCELLANEOUS APPAREL AND ACCESSORIES

23E-17

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries". Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

xxx Not applicable.

NA Not available.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>The 1947 reporting form requested 25% or more wool content; the effect of the change to 50% or more wool for 1954 is believed to be negligible.<sup>2</sup>Included in "Other dress and semi-dress gloves and mittens." Figures on dress and semi-dress gloves and mittens as reported by type were not considered reliable enough to be presented separately. A distribution by type has been presented for 1947 in the Facts for Industry Series M67D-08.<sup>3</sup>Seamless mittens, 50% or more wool included with "Seamless men's and boys' gloves, 50% or more wool content."<sup>4</sup>Quantities are somewhat understated since a number of contractors did not specify the products cut; the contract receipts for such cuttings amounted to: Industry 2384, \$138 thousand; Industry 2385, \$746 thousand; and Industry 2387, \$286 thousand.<sup>5</sup>The 1947 figures contain an unknown quantity and value for breakfast coats and children's robes which were reported as women's robes.<sup>6</sup>For 1947, girls', teen-age girls', and children's (sizes 2-16) raincoats and raincoats are included with "Women's, misses', and juniors' raincoats and raincoats."<sup>7</sup>Boys' sizes (codes 2386031 and 2386035) included with men's sizes (codes 2386011 and 2386015).<sup>8</sup>Leather coats (part of code 2386011) included with other leather and sheep-lined clothing (code 2386098) for 1947.<sup>9</sup>Boys' sizes (code 2386035) included with men's sizes (code 2386015).<sup>10</sup>Does not include belts made and sold as parts of garments.

## MISCELLANEOUS APPAREL AND ACCESSORIES

23E-21

Table 6B.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

Massachusetts.....	22,625			California.....	1,038

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 23841, Maine, Connecticut, Illinois, Missouri, Delaware, Alabama, and California; 23842, Mississippi; 23850, Delaware and Virginia; 23860, Rhode Island, Connecticut, Minnesota, and California; 23871, Massachusetts.

## MANUFACTURES--INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation.)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

## MISCELLANEOUS APPAREL AND ACCESSORIES

23E-23

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954—Continued

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)			
2387	BELTS--"MANUFACTURES"--Continued									
23872	Belts other than leather--"Manufacturers":									
Pt.A	All establishments specializing in product class.	161	4,021	10,505	3,598	6,415	8,007	16,889	14,063	30,953
	Establishments with:									
	90% or more specialization.....	117	2,681	7,066	2,416	4,216	5,397	11,198	9,701	20,900
	75-89% specialization.....	11	374	913	335	580	727	1,348	844	2,193
	50-74% specialization.....	29	822	2,138	720	1,386	1,586	3,816	3,071	6,887
	All other .....	4	143	387	127	232	297	525	446	972

Note: Plant specialization data are not shown for industries as a whole since specialization ratios for contractors were not computed. Such ratios would not be meaningful since they could relate to only a minor portion of the contractors' total activity, that is, production on own account from materials owned by them, and would not be representative of the activity of their establishments as a whole.

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry. Miscellaneous small statistical adjustments are also included.

## Miscellaneous Fabricated Textile Products

This report shows 1954 Census of Manufactures statistics for establishments primarily engaged in fabricating textile products (other than apparel) from purchased fabrics. These establishments are classified in the following nine industries:

Code	Title
2391	Curtains and Draperies
2392	Housefurnishings, Not Elsewhere Classified
2393	Textile Bags
2394	Canvas Products
2395	Tucking, Pleating, and Stitching
2396	Trimmings and Art Goods
2397	Schiffli-Machine Embroideries
2398	Embroideries, except Schiffli
2399	Textile Products, Not Elsewhere Classified

There is very little integration of prior production processes such as fabric weaving and yarn spinning in the individual establishments classified in Industry Group 239. Establishments weaving fabric and further processing the material into fabricated products such as sheets, towels, pillowcases and blankets are classified according to the principal type of broad-woven fabric made in the establishment:—in Industry 2213, Woolen and Worsted Fabrics; Industry 2233, Cotton Broad-Woven Fabrics; or Industry 2234, Rayon and Related Fabrics. The extent to which fabricated textile products are made in industries in Group 239 and other industries is shown in Table 5.

Some fabricated textile products are produced in establishments classified in retail or service industries and not included in the Census of Manufactures. The value of the products manufactured by these nonmanufacturing establishments was not obtained in the 1954 Census. Some examples of the types of products made by these establishments are curtains, draperies, bedspreads, furniture slipcovers, cushions, awnings, and automobile seat covers.

Establishments which bleached, dyed, printed or otherwise finished fabrics prior to cutting and fabricating are included in the applicable fabricating industry and not in Industries 2216—Dyeing and Finishing Wool Textiles, or 2261—Finishing Textiles, Except Wool.

### 2391—Curtains and Draperies

This industry comprises establishments primarily engaged in manufacturing curtains and draperies from purchased fabric. Establishments primarily engaged in manufacturing window curtains and draperies from plastics or fiber glass fabrics are also included in this industry.

Establishments primarily engaged in manufacturing lace curtains and draperies are classified in Industry 2292, Lace Goods; shower-bath curtains in Industry 2392, Housefurnishings, N.E.C.; and paper draperies in Industry 2699, Converted Paper Products, N.E.C.

For a detailed list of primary products of Industry 2391, refer to Table 6A, product codes 2391011 to 2391059.

The value of shipments of Industry 2391, Curtain and Draperies, in 1954 totaled \$173 million. This included shipments of primary products (curtains and draperies) valued at \$149 million, shipments of secondary products valued at \$10 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$14 million.

Industry 2391 shipments of curtains and draperies in 1954 represented 94 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization

ratio was 97 percent. Secondary products shipped by this industry in 1954 consisted of bedspreads and bed sets \$5 million, and miscellaneous fabricated textile products \$3 million.

Industry 2391 shipments of curtains and draperies in 1954 represented 89 percent of these products valued at \$111 million shipped by all industries. In 1947, this coverage ratio was 90 percent. The principal other industry shipping curtains and draperies in 1954 was Industry 2392, Housefurnishings, N.E.C. \$9 million.

### 2392—Housefurnishings, Not Elsewhere Classified (Full Standard Industrial Classification Title: Housefurnishings, except Curtains and Draperies)

This industry comprises establishments primarily engaged in manufacturing housefurnishings from purchased fabric. Important products of this industry include sheets, pillowcases, napkins, table cloths, comforters, blankets, bedspreads, pillows, laundry bags, mops and dusters, and slip covers. Other products included in this industry are chair covers; cushions (except spring, foam rubber, and carpet); garment bags, except paper; mattress protectors, except rubber; quilts; shower-bath curtains; towels and wash cloths.

Establishments primarily engaged in knitting fabrics and manufacturing knit towels and wash cloths are classified in Industry 2259, Knitting Mills, N.E.C. Establishments primarily producing the following items are classified elsewhere: lace bedspreads and table covers in Industry 2292, Lace Goods; spring cushions in Industry 2515, Mattresses and Bedsprings; paper wardrobe and garment bags in Industry 2661, Paper Bags; rubber mattress protectors and foam rubber pillows in Industry 3099, Rubber Industries, N.E.C.; electric bed coverings (including blankets, sheets, and comforters) in Industry 3621, Electrical Appliances; and curtains and draperies in Industry 2391, Curtains and Draperies.

Data for 1954 for this industry are not closely comparable to information shown for prior years. Some fabricating departments of textile mills producing cotton towels, sheets and pillowcases, which had been reported as separate establishments in 1947, were integrated with the weaving mill in 1954 and included in one report in Industry 2233 Cotton Broad-Woven Fabrics. Such fabricating departments accounted for more than 15 percent of the 1947 employment shown for the Housefurnishings, N.E.C. Industry. In addition a number of textile mills producing sheets and pillowcases in 1947, reported such products as gray cotton broad-woven fabrics, code 2233. This understatement, in addition to its effect on the product statistics, also raised the published 1947 coverage ratio for Industry 2392 above its true level.

For a detailed list of primary products of Industry 2392 refer to Table 6A, product codes 2392121 to 2392498.

The value of shipments and other receipts of Industry 2392, Housefurnishings, N.E.C., in 1954 totaled \$503 million. This included shipments of primary products (housefurnishings, n.e.c.) valued at \$434 million, shipments of secondary products valued at \$43 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$26 million.

Industry 2392 shipments of primary products (housefurnishings, n.e.c.) in 1954 represented 91 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 93 percent. Secondary products shipped by this industry in 1954 included curtains and draperies, except lace, \$9 million, tufted carpets and rugs, \$4 million, and fabricated textile products, n.e.c., \$7 million.

Industry 2392 shipments of primary products in 1954 represented 59 percent of these products valued at \$739 millions shipped by all industries. In 1947, this coverage ratio was 87 percent. This decline in coverage ratio is due to the change in reporting procedure for fabricating departments of textile mills and misreporting in 1947 as described above. The principal other industry shipping housefurnishings, n.e.c. in 1954 consisted of Industry 2233, Cotton Broad-Woven Fabrics, \$228 million.

#### 2393—Textile Bags

This industry comprises establishments primarily engaged in manufacturing cotton, burlap, canvas, and other textile bags from purchased fabric. Establishments primarily engaged in manufacturing textile laundry and wardrobe bags, are classified in Industry 2392, Housefurnishings, N.E.C.

Establishments primarily engaged in reconditioning textile bags in 1954 were excluded from manufacturing but reconditioning activities of manufacturing plants are included. In the 1947 Census, establishments solely engaged in reconditioning textile bags were also excluded from the scope of the manufacturing Census; however, there is some noncomparability with 1954 as plants shipping new and reconditioned textile bags excluded their costs and receipts for reconditioning.

For a detailed list of primary products of Industry 2393 refer to Table 6A, product codes 2393011 to 2393098.

The value of shipments of Industry 2393, Textile Bags, in 1954 totaled \$221 million. This included shipments of primary products (textile bags) valued at \$179 million, shipments of secondary products valued at \$34 million, and miscellaneous receipts of \$8 million. Receipts for merchandising (products bought and resold without further manufacture or processing) valued at \$33 million are excluded from the \$221 million value of shipments of Industry 2393. Data relating to these merchandising receipts are also excluded from the cost of materials and value added, but these activities are reflected in other detailed industry statistics, mainly employment and inventory.

Industry 2393 shipments of textile bags (primary products) in 1954 represented 84 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 93 percent. Secondary products shipped by this industry in 1954 consisted mainly of paper bags and paper shipping sacks, \$22 million, canvas products, \$3 million, and jute goods, \$2 million.

Industry 2393 shipments of textile bags in 1954 represented 85 percent of the textile bags valued at \$210 million shipped by all industries. In 1947, this coverage ratio was 98 percent. The principal other industry shipping textile bags in 1954 was Industry 2233, Cotton Broad-Woven Fabrics, \$14 million.

#### 2394—Canvas Products

This industry comprises establishments primarily engaged in manufacturing awnings, tents, sails, canvas covers, tarpaulins, and canopies from purchased canvas. Other canvas products included in this industry are industrial aprons and painters' drop cloths.

Excluded from this industry are establishments primarily engaged in manufacturing canvas bags, which are classified in Industry 2393, Textile Bags; rubber-soled canvas shoes, in Industry 3021, Rubber Footwear; and canvas boots, in Industry 3141, Footwear, Except Rubber.

For a detailed list of primary products of Industry 2394, refer to Table 6A, product codes 2394011 to 2394098.

The value of shipments of Industry 2394, Canvas Products, in 1954 totaled \$130 million. This included shipments of primary products (canvas products) valued at \$107 million, shipments of secondary products valued at \$13 million, and miscellaneous receipts (mainly repair work, installation work, and contract work on materials owned by others) of \$9 million.

Receipts for merchandising (products bought and resold without further manufacture or processing) valued at \$18 million

are excluded from the \$130 million value of shipments of Industry 2394. Data relating to these merchandising receipts are also excluded from the cost of materials and value added, but these activities are reflected in other detailed industry statistics, mainly employment and inventory.

Industry 2394 shipments of canvas products in 1954 represented 89 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 91 percent. Secondary products shipped by industry 2394 in 1954 consisted mainly of textile bags, \$3 million and housefurnishings \$2 million.

Industry 2394 shipments of canvas products in 1954 represented 86 percent of these products valued at \$124 million shipped by all manufacturing industries. In 1947, this coverage ratio was 93 percent. Industry 2233 Cotton Broad-Woven fabrics, and other industries in Industry Group 239, Miscellaneous Fabricated Textile Products, accounted for most of the remaining shipments of canvas products.

#### 2395—Tucking, Pleating, and Stitching (Full Standard Industrial Classification Title: Pleating, Stitching, and Tucking for the Trade)

This industry comprises establishments primarily engaged in pleating, stitching, and tucking for the trade. Other services for the trade performed by establishments in this industry include appliqueing, buttonhole making, hemstitching, ruffling, scalloping, and shirring. Establishments primarily engaged in performing similar services for individuals are classified in Service industries and are excluded from the Census of Manufactures. Establishments primarily engaged in manufacturing trimmings and art needlework are classified in Industry 2396, Schiffli-machine embroideries in Industry 2397, and embroideries, except Schiffli-machine, in Industry 2398.

The value of shipments and other receipts for Industry 2395 in 1954 totaled \$35 million. More than 99 percent of this total represents receipts for commission work on materials owned by others. A breakdown of such receipts by type of work is not available. However, a review of the reports indicates that almost all such receipts are for pleating, stitching, tucking, and similar services for the trade. Excluded from the \$35 million is the value of tucking, pleating and stitching performed as part of the manufacturing operations of plants producing finished products.

#### 2396—Trimmings and Art Goods (Full Standard Industrial Classification Title: Trimmings, Stamped Art Goods, and Art Needlework)

This industry comprises establishments primarily engaged in manufacturing trimmings for millinery and other uses, stamped art goods, and art needlework. Other products included in this industry are: bias binding; automobile and furniture trimmings; and women's and children's apparel findings.

Establishments primarily engaged in manufacturing narrow fabric bindings, ribbons, and tapes are classified in Industry 2241, Narrow Fabric Mills; men's hat linings and other hat trimmings in Industry 2326, Hat and Cap Materials. For a detailed list of primary products of Industry 2396, refer to Table 6A, product codes 2396011 to 2396098.

The value of shipments of Industry 2396, Trimmings and Art Goods, in 1954 totaled \$243 million. This included shipments of primary products (trimmings and art goods) valued at \$222 million, shipments of secondary products valued at \$7 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$14 million.

Industry 2396 shipments of primary products (trimmings and art goods) in 1954 represented 97 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 94 percent.

Industry 2396 shipments of trimmings and art goods in 1954 represented 83 percent of these products valued at \$267 million shipped by all industries. In 1947, this coverage ratio was 95 percent.

2397—Schiffli-Machine Embroideries

This industry comprises establishments primarily engaged in manufacturing Schiffli-machine embroideries and burnt-out laces. These products are made in part in "family plants," which do not employ production or other workers and are excluded from the Census of Manufactures.

The value of product shipments and other receipts of Industry 2397, Schiffli-Machine Embroideries, in 1954 totaled \$66 million. This included shipments of Schiffli-machine embroidery products valued at \$49 million, shipments of secondary products valued at \$1 million, and other receipts of \$16 million, primarily receipts for contract work on materials owned by others. The industry's total receipts for primary activities (\$49 million) thus represented 98 percent of its total receipts for all manufactured products \$50 million in 1954. In 1947, this specialization ratio was also 98 percent.

Industry 2397 shipments of Schiffli-machine embroideries in 1954 represented 99 percent of these products valued at \$50 million shipped by all industries. In 1947, this coverage ratio was 96 percent.

2398—Embroideries, Except Schiffli (Full Standard Industrial Classification Title: Embroideries, Except Schiffli-Machine)

This industry comprises establishments primarily engaged in manufacturing Swiss loom and other machine-made or hand-made embroideries, such as machine-made crocheted embroideries, and Bonnaz and Cornely products. Establishments primarily engaged in manufacturing Schiffli-machine embroideries are classified in Industry 2397, Schiffli-Machine Embroideries; hand-made crochet ware are classified in Industry 2399, Textile Products, N.E.C.

The value of shipments and other receipts of Industry 2398, Embroideries, Except Schiffli, in 1954 totaled \$56 million. This included shipments of primary products (embroideries, except Schiffli) valued at \$30 million, shipments of secondary products valued at \$1 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$25 million.

Industry 2398 shipments of primary products (embroideries, except Schiffli) in 1954 thus represented 98 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 97 percent.

Industry 2398 shipments of embroideries, except Schiffli, in 1954 represented 96 percent of these products valued at \$32 million shipped by all industries. In 1947, this coverage ratio was also 96 percent.

2399—Textile Products, Not Elsewhere Classified

This industry comprises establishments primarily engaged in manufacturing fabricated textile products, not elsewhere classified, such as automobile seat covers, banners, flags, and pennants from purchased fabric. Establishments primarily engaged in the sponging, shrinking, burling or mending of cloth for the trade, or in employing home workers for hand-knitting or hand-weaving of textile products are also included in this industry. Other textile products included in this industry are: textile badges and insignia; blackboard erasers; diapers; hand-made crochet-ware; powder puffs; hand-woven rugs; saddle cloths; and sleeping bags. Establishments primarily engaged in manufacturing machine-made crochet ware are classified in Industry 2398, Embroideries, Except Schiffli. For a detailed list of primary products of Industry 2399, refer to Table 6A, product codes 2399011 to 2399098.

The value of shipments of Industry 2399, Textile Products, N.E.C., in 1954 totaled \$201 million. This included shipments of primary products (fabricated textile products, n.e.c.) valued at \$155 million, shipments of secondary products valued at \$24 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$22 million.

Industry 2399 shipment of primary products (fabricated textile products, n.e.c.) in 1954 represented 87 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 88 percent. Housefurnishings, n.e.c. was one of the principal secondary products shipped by this industry in 1954, \$5 million.

Industry 2399 shipments of primary products in 1954 represented 77 percent of these products valued at \$201 million shipped by all industries. In 1947, this coverage ratio was 87 percent. Other industries shipping products primary to Industry 2399 consisted mainly of other industries of Industry Group 239, Miscellaneous Fabricated Textiles, \$10 million, and Industry 2233 Cotton Broad-Woven Fabrics \$7 million.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MANUFACTURES—INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments <sup>3</sup> (\$1,000)

See footnotes at end of table.

## MISCELLANEOUS FABRICATED TEXTILE PRODUCTS

23F-5

Table 1.--GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS--Continued  
(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments <sup>3</sup> (\$1,000)
		Number <sup>1</sup>	Payroll (\$1,000)	Number <sup>1</sup>	Wages (\$1,000)			
Textile products, n.e.c. (S.I.C. 2399):								
1954.....	1,104	18,006	52,167	15,280	37,314	87,272	113,923	201,198
1953 <sup>6</sup> .....	(NA)	21,801	60,602	18,836	45,260	104,972	123,506	228,478
1950 <sup>6</sup> .....	(NA)	20,741	48,582	17,592	34,780	80,185	111,163	191,348
1947.....	837	18,318	42,356	15,859	30,915	79,879	109,753	189,632
1939 <sup>4</sup> .....	372	(NA)	(NA)	6,911	6,376	18,847	17,802	36,649

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1929 and 1947-1954, value of shipments; for all other years, value of production. See Introduction "Value of Shipments."

<sup>4</sup>No comparable figures are available for prior years.

<sup>5</sup>Data for 1954 are not closely comparable to information shown for prior years. Some fabricating departments of textile mills which had been submitting separate reports discontinued this practice in 1954 and included the fabricating department in the report for the weaving mill. Such fabricating departments accounted for more than 15 percent of the 1954 employment shown for the Housefurnishings, n.e.c. industry.

<sup>6</sup>The figures for 1950-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>7</sup>For "Textile bags" cost of contract work is not included in the cost of materials figures for 1933 and prior years.

<sup>8</sup>In 1935-1939 the coverage for the "Canvas products industry" was limited to establishments with products valued at \$20,000 or more. The figures are therefore not sufficiently comparable with those for later years to be shown in this table.

<sup>9</sup>Figures for 1933 for "Schiffli-machine embroideries" include data for "Embroideries, except Schiffli-machine." No separate figures are available.

<sup>10</sup>"Schiffli-machine embroideries" and "Embroideries, except Schiffli-machine" were formerly part of the discontinued industry "Millinery lace goods, n.e.c." Separate figures prior to 1927 are therefore not available.

## MANUFACTURES--INDUSTRY STATISTICS

Table 2.--GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

<sup>1</sup> Withheld to avoid disclosing figures for individual companies.<sup>2</sup> General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2391, Curtains and Draperies: East North Central—Indiana, 7 (20-99); Wisconsin, 11 (20-99); West North Central—Minnesota, 4 (20-99); Iowa, 1 (1-19); Nebraska, 1 (1-19); Kansas, 2 (1-19); South—Delaware, 3 (1-19); Maryland, 2 (1-19); District of Columbia, 4 (1-19); Virginia, 1 (1-19); North Carolina, 5 (20-99); South Carolina, 2 (20-99); Georgia, 5 (100-249); Florida, 12 (20-99); East South Central—Kentucky, 1 (1-19); Tennessee, 1 (20-99); Alabama, 2 (1-19); Mississippi, 1 (1-19); West—Colorado, 3 (20-99); Arizona, 3 (1-19); Utah, 3 (1-19); Washington, 16 (100-249); Oregon, 5 (100-249).

S.I.C. 2392, House Furnishings, n.e.c.: New England—Maine, 1 (500-999); New Hampshire, 2 (20-99); Rhode Island, 5 (20-99); Connecticut, 11 (250-499); West North Central—Iowa, 1 (100-249); Kansas, 3 (20-99); South Atlantic—Delaware, 2 (100-249); District of Columbia, 5 (20-99); East South Central—Kentucky, 10 (500-999); Mississippi, 3 (20-99); West South Central—Arkansas, 2 (1-19); Louisiana, 5 (20-99); Oklahoma, 5 (20-99); Mountain—Colorado, 7 (100-249); Arizona, 1 (1-19); Utah, 1 (1-19); Pacific—Washington, 6 (20-99); Oregon, 6 (20-99).

S.I.C. 2393, Textile Bags: New England—Maine, 3 (20-99); Vermont, 2 (1-19); Rhode Island, 2 (20-99); Connecticut, 2 (20-99); East North Central—Michigan, 7 (20-99); West North Central—Iowa, 1 (100-249); Nebraska, 1 (250-499); Kansas, 3 (100-249); South Atlantic—Florida, 3 (20-99); East South Central—Kentucky, 2 (20-99); Alabama, 5 (100-249); Mississippi, 1 (20-99); West South Central—Arkansas, 1 (1-19); Louisiana, 7 (500-999); Oklahoma, 1 (1-19); Mountain—Idaho, 1 (1-19); Colorado, 2 (20-99); Utah, 1 (20-99); Pacific—Washington, 1 (100-249); Oregon, 5 (250-499).

S.I.C. 2394, Canvas Products: New England—Maine, 9 (20-99); New Hampshire, 1 (1-19); Vermont, 2 (1-19); Rhode Island, 8 (20-99); West North Central—South Dakota, 4 (1-19); Nebraska, 11 (20-99); Kansas, 21 (100-249); South Atlantic—Delaware, 3 (1-19); District of Columbia, 3 (20-99); West Virginia, 5 (100-249); South Carolina, 3 (1-19); East South Central—Kentucky, 9 (20-99); Alabama, 11 (20-99); Mississippi, 4 (100-249); Mountain—Montana, 2 (1-19); Idaho, 9 (20-99); Wyoming, 2 (1-19); Colorado, 10 (100-249); New Mexico, 1 (1-19); Arizona, 3 (1-19); Utah, 5 (20-99); Pacific—Oregon, 10 (20-99).

S.I.C. 2395, Tucking, Pleating, and Stitching: New England—New Hampshire, 3 (1-19); Vermont, 1 (20-99); Connecticut, 1 (20-99); East North Central—Ohio, 5 (20-99); West North Central—Minnesota, 3 (1-19); Missouri, 2 (20-99); Kansas, 1 (1-19); South and West—Maryland, 1 (1-19); Georgia, 2 (1-19); Florida, 3 (1-19); Tennessee, 1 (1-19); Texas, 4 (20-99); Colorado, 1 (1-19); Washington, 1 (1-19).

S.I.C. 2396, Trimmings and Art Goods: New England—Maine, 1 (1-19); New Hampshire, 1 (1-19); Rhode Island, 3 (1-19); Connecticut, 5 (100-249); East North Central—Indiana, 3 (100-249); Illinois, 32 (500-999); Wisconsin, 1 (1-19); West North Central—Minnesota, 2 (1-19); Missouri, 17 (500-999); South—Delaware, 1 (1-19); Maryland, 1 (1-19); Virginia, 2 (1-19); North Carolina, 1 (1-19); South Carolina, 3 (20-99); Georgia, 2 (1-19); Florida, 4 (20-99); Tennessee, 4 (20-99); Arkansas, 2 (1-19); West—Idaho, 1 (1-19); Utah, 1 (1-19); Washington, 4 (1-19).

S.I.C. 2397, Schiffli-machine Embroideries: New England—Massachusetts, 3 (20-99); Connecticut, 1 (1-19); North Central—Ohio, 3 (20-99); Illinois, 9 (100-249); Michigan, 1 (1-19); Wisconsin, 1 (1-19); Missouri, 2 (20-99); South and West—Maryland, 1 (1-19); Florida, 1 (20-99); California, 6 (20-99).

S.I.C. 2398, Embroideries, except Schiffli: New England—Massachusetts, 16 (100-249); Connecticut, 1 (1-19); North Central—Ohio, 12 (100-249); Indiana, 8 (1-19); Michigan, 12 (20-99); Wisconsin, 1 (1-19); Minnesota, 2 (1-19); Iowa, 2 (1-19); South—Maryland, 6 (100-249); District of Columbia, 1 (1-19); Virginia, 1 (1-19); West Virginia, 1 (1-19); Georgia, 1 (1-19); Florida, 5 (100-249); Kentucky, 1 (1-19); Mississippi, 1 (1-19); Louisiana, 2 (1-19); Oklahoma, 1 (1-19); Mountain—Colorado, 2 (1-19); New Mexico, 1 (1-19); Arizona, 2 (1-19); Pacific—Washington, 1 (1-19); Oregon, 1 (1-19); California, 54 (500-999).

S.I.C. 2399, Textile Products, n.e.c.: New England—Maine, 6 (20-99); Vermont, 1 (1-19); East North Central—Indiana, 13 (20-99); West North Central—Nebraska, 3 (20-99); Kansas, 5 (100-249); South Atlantic—Delaware, 2 (1-19); District of Columbia, 2 (1-19); Virginia, 8 (20-99); West Virginia, 2 (1-19); North Carolina, 7 (250-499); Florida, 15 (20-99); East South Central—Kentucky, 6 (20-99); Alabama, 12 (20-99); Mississippi, 5 (20-99); West South Central—Arkansas, 3 (1-19); Louisiana, 11 (20-99); Oklahoma, 2 (20-99); Mountain—Colorado, 7 (20-99); New Mexico, 5 (20-99); Arizona, 3 (1-19); Utah, 2 (1-19); Nevada, 1 (1-19).

## MANUFACTURES--INDUSTRY STATISTICS

Note: Detailed figures may not add to the totals because of independent rounding.

xxx Not applicable.

NA Not available.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%.

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>Less than \$500 thousand.

<sup>4</sup>Over 90%. See footnote on Table 5A.

<sup>5</sup>Less than 500 tons.

<sup>6</sup>Less than 500 barrels.

<sup>7</sup>Less than \$500.

## MANUFACTURES--INDUSTRY STATISTICS

Table 4.--SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>In 1947 a number of textile mills producing sheets and pillowcases reported such shipments as gray broad woven fabrics, code 2233. This resulted in an understatement of the total value of primary products made in all industries and primary products made in other industries. In addition, the change in reporting of fabricating departments of textile mills results in some non-comparability of the coverage ratios for 1954 and 1947 (see text for industry).

<sup>4</sup>The primary activity of this industry consists of services for the trade, data for which are included with miscellaneous receipts; specialization is over 90 percent.

<sup>5</sup>The value of tucking, pleating, and stitching done outside industry 2395 is not known; the coverage ratio therefore has not been calculated.

## MANUFACTURES--INDUSTRY STATISTICS

Table 5B.--INDUSTRY-PRODUCT ANALYSIS--VALUE OF SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading, the value of shipments divided between miscellaneous fabricated textile products, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry.)

Prod. class code	Class of products and miscellaneous receipts	Curtains and draperies (S.I.C. 2391)	House furnishings, n.e.c. (S.I.C. 2392)	Textile bags (S.I.C. 2393)	Canvas products (S.I.C. 2394)	Tucking, pleating, and stitching (S.I.C. 2395)	Trimings and art goods (S.I.C. 2396)	Schiffli-machine embroideries (S.I.C. 2397)	Embroideries, except Schiffli (S.I.C. 2398)	Textile products n.e.c. xxx Not applicable.

<sup>1</sup>Less than \$100 thousand.

<sup>2</sup>Product classes 23922 and 23923 are also primary to Industry 2233, Cotton Broad Woven Fabrics.

<sup>3</sup>Includes \$7,290 thousand shipped by Industry 3981, Brooms and Brushes.

<sup>4</sup>Includes \$7,533 thousand shipped by Industry 3842, Surgical Appliances and Supplies.

<sup>5</sup>Includes \$4,248 thousand of Tufted carpets and rugs, except wool (code 22731).

<sup>6</sup>Includes \$2,115 thousand of Jute goods (code 22971), \$3,421 thousand of paper specialty bags and liners (code 26612), and \$18,298 thousand of paper shipping sacks and multiwall bags (code 26614).

<sup>7</sup>Includes \$2,173 thousand of Parts and accessories for motor vehicles (code 37175).

<sup>8</sup>Represents resales for which cost of goods sold was not reported separately; this amount is not included in the "resales" item of Table 3.

<sup>9</sup>Included with "other receipts."

2399098	All other fabricated textile products.....	.....	xxx	70,169		
2399000	Fabricated textile products, n.e.c., not specified by kind.....	.....	xxx	<sup>3</sup> 25,400		

xxx Not applicable.

NA Not available.

<sup>1</sup>Data for 1947 are not comparable with 1954 information because a number of textile mills producing sheets and pillowcases in 1947 reported them as shipments of gray broad woven fabrics, code 2233.

<sup>2</sup>Data for 1954 for code 2392459 include foam rubber pillows not made in rubber plants.

<sup>3</sup>Approximately 25 percent of the value reported for fabricated textile products, n.e.c., not specified by kind represents seat covers produced by small establishments that did not report products in detail.

## MISCELLANEOUS FABRICATED TEXTILE PRODUCTS

23F-17

Table 6B.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954,  
AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.)

		Tennessee.....	2,151	Texas.....	17,522
				Mountain.....	2,320
				Pacific.....	27,663
				California.....	16,140

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed by the exact figures are withheld to avoid disclosure of individual company figures: 23921—Maine, Massachusetts, Tennessee, and Alabama; 23922—Maine, Massachusetts, New Jersey, Virginia, Georgia, Alabama, Arkansas, Oklahoma, and Texas; 23923—Illinois, Virginia, North Carolina, South Carolina, Tennessee, and Alabama; 23924—Iowa, and South Carolina; 23930—Massachusetts, Alabama, Louisiana, Colorado, Utah, Washington, and Oregon.

<sup>2</sup>Data for 1953 and prior years not comparable with 1954 information because a number of textile mills producing sheets and pillowcases during 1947-1953 reported them as shipments of grey broad woven fabrics, code 2233.

TABLE 7 NOT APPLICABLE TO THIS BULLETIN

## MANUFACTURES—INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

<sup>1</sup>This class includes data for establishments with less than 50% specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Major Group 24.—Lumber and Wood Products

This major group includes logging camps engaged in cutting timber and pulpwood, sawmills, veneer mills, lath mills, shingle mills, cooperage-stock mills, planing mills, and plywood mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store fixtures are

classified in Major Group 25, Furniture and fixtures; pianos, musical instruments, toys and playground equipment, and caskets and coffins in Major Group 39; miscellaneous manufactures. Additional wood products classified outside of this major group are specified in the description of Industry 2499 below. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in nonmanufacturing industries.

Table 1.—GENERAL STATISTICS FOR THE INDUSTRY GROUP: 1934 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Year <sup>1</sup>	Establishments, number	All employees <sup>2</sup>		Production workers			Value added by manufacture <sup>3</sup>	Capital expenditures, new	Horsepower of prime movers and electric motors <sup>4</sup>

1899.....	32,356	(NA)	(NA)	562,932		209,112	436,834		

NA Not available.

S Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>In addition to data for operating establishments, manufacturers' central administrative offices and auxiliary units reported 4,858 employees with a payroll of \$30,383 thousand in 1954. Similar data are shown for the years 1949-1953 in the Annual Survey of Manufactures volumes. Data for these units are not available for the years prior to 1949.

<sup>2</sup>The figures for 1939 through 1954 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>3</sup>Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1899-1933 cost of contract work was not subtracted from value of products in calculating value added by manufacture.

<sup>4</sup>Driven by purchased energy.

<sup>5</sup>The figures for 1949-1954 include loggers and sawmills (with one or more paid employees as reported to the Bureau of Old Age and Survivors Insurance). In 1954, the loggers accounted for 11.7 percent of the employment in this group, and it is estimated that sawmills and planing mills producing less than 200,000 board feet (excluded from 1947 coverage) accounted for less than two percent of the total employment for the group. A significant under coverage in the 1950 and 1949 sample for this major industry group is to be noted, especially in Industry 2411 (logging camps and logging contractors).

<sup>6</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufacturers. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard error associated with these estimates are published in the Annual Survey of Manufactures volumes for this period.

<sup>7</sup>The figures for 1937-1947 exclude data for logging contractors and independent logging camps not operating sawmills as well as establishments primarily engaged in manufacture of venetian blinds, which are included for these years in the series for the "Furniture and Fixtures" industries. Value added by manufacture for 1937, including data for these establishments and as a basis comparable with 1935 was \$758.3 million.

<sup>8</sup>The figures for 1899-1929 do not include data for establishments primarily engaged in manufacture of wood vehicle stock, which are included for these years in the series for the "Transportation Equipment" industries. Value added by manufacture for 1931, excluding data for these establishments and on a basis comparable with 1929, was \$523.8 million.

<sup>9</sup>The figures for 1899-1923 include data for establishments engaged in manufacture of rules made of metal and other materials as well as wood, whereas the figures for later years include data for establishments making wooden rules only.

<sup>10</sup>The figures for 1914 do not include data for establishments engaged in manufacture of lath and shingles. The figures for 1899-1909 include data for establishments primarily engaged in manufacture of windows and door screens, which are included for later years in the series for the "Furniture and Fixtures" industries. Value added by manufacture for 1914, including data for these establishments, was \$651.8 million.

## MANUFACTURES--INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS FOR INDUSTRY GROUPS BY REGIONS AND STATES: 1954 AND 1947

## MANUFACTURES--INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS FOR INDUSTRY GROUPS BY REGIONS AND STATES: 1954 AND 1947—Continued

(For explanation of column captions see Introduction)

Industry group, region, and State <sup>1</sup>	1954								1947	
	Number of establish- ments	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendi- tures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
		Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)				
Miscellaneous wood products (S.I.C. Group 249)—Con.										
Pacific.....	365	5,615	20,138	4,905	9,497	16,028	36,388	1,452	4,508	24,679
Washington.....	50	833	3,264	712	1,328	2,563	5,998	( <sup>3</sup> )	1,167	6,130
Oregon.....	60	1,142	4,089	999	1,869	3,195	7,271	( <sup>3</sup> )	1,112	5,921
California.....	255	3,639	12,785	3,193	6,300	10,269	23,118	993	2,229	12,628

NOTE: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>Each producing state not shown separately has been withheld either (a) to avoid disclosing figures for individual companies; or (b) because the state had less than 100 employees in the industry group. Such state figures are included, however, in the appropriate regional and United States totals.<sup>2</sup>1954 Census coverage of establishments in Major Industry Group 24, "Lumber and Wood Products," was not comparable with 1947 coverage. In 1947, Logging Camps and Contractors (Industry 2411) were not included in the Census; in addition, only Sawmills and Planing Mills (Industry 2421) that produced more than 200,000 board feet of lumber were included. On the other hand, for 1954, all loggers and sawmills (with 1 or more paid employees as reported to the Bureau of Old-Age and Survivors Insurance) were included in the Census. In 1954, the loggers accounted for 11.7 percent of the employment in Major Industry Group 24, "Lumber and Wood Products", and it is estimated that sawmills and planing mills producing less than 200,000 board feet accounted for less than 2 percent of the total employment for the group. Employment and value added by manufacture by states and regions for 1954 and 1947 for the Wood Products Group, excluding Logging Camps and Contractors (Industry 2411), are shown in Table 2A of this chapter.<sup>3</sup>Less than \$500 thousand.<sup>4</sup>This industry sub-group consists of a single four-digit industry. Detailed data by state are included in the four-digit industry tables.

## LUMBER AND WOOD PRODUCTS

24-7

Value.....do....	27,085	establishment.....do....	542

Note: Detailed figures may not add to totals because of independent rounding.

## Lumber and Timber Basic Products

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2411--	Logging Camps and Logging Contractors
2421--	Sawmills and Planing Mills
2422--	Veneer Mills
2423--	Shingle Mills
2424--	Cooperage Stock Mills
2425--	Excelsior Mills

A very high degree of specialization in the production of items classified as primary to these industries characterizes the manufacturing activity of plants in this group of industries. Moreover, only a small fraction of the total shipments of products primary to these industries is shipped by other industries. However, the shipment data exclude a significant amount of logging, veneer and cooperage stock produced by establishments classified in other industries which use the products as materials for further fabrication into other end products at the same location. For example, plywood plants (Industry 2432) are also engaged to a large extent in producing veneer. Also, but to a lesser degree, plants making wooden boxes (Industry Group 244) and furniture (Major Group 25) produce their own veneer and lumber, and cooperage plants (Industry 2445) make their own cooperage stock.

### 2411--Logging Camps and Logging Contractors

This industry comprises logging camps and logging contractors engaged in cutting timber and in producing logs, bolts, crotches, burls, stumps, pulpwood, poles, posts, hewn ties, mine timbers, forest-cut fuel wood, wood for chemical distillation, hewn or rough shaped lasts, shuttles, and similar blocks or blanks, and other rough, hewn or riven primary forest or wood raw materials. Independent contractors engaged in estimating, driving, booming, towing, or trucking timber, but who perform no cutting operations, are classified in non-manufacturing industries.

Logging and wood operations conducted in combination with sawmills, pulp mills, or other converting establishments, and not separately reported, are classified with the converting establishments: namely, with sawmills and planing mills in Industry 2421, with veneer mills in Industry 2422, with pulp mills in Industry 2611, or with charcoal and wood distillation plants in Industries 2861 and 2862. Establishments primarily engaged in the collection of bark, sap, gum and other forest byproducts are classified in nonmanufacturing industries.

Logging camps and logging contractors were excluded from the 1947 Census, therefore, no comparative data for 1954 are available.

Although no separate data were presented for Industry 2411 in 1947, logging operations are represented in the 1947 general statistics for Major Group 24 industries, to the extent that these operations were reported as performed in conjunction with sawmilling and other primary manufacturing of basic timber products. Shipments of logs, bolts, and pulpwood (products primary to Industry 2411) were reported by such integrated establishments as secondary products in 1947 (for example, the \$38 million logs shipped in 1947 by Industry 2421, Sawmills and Planing Mills).

In the 1954 Census, report forms were mailed to all establishments identified as loggers on BOASI records. Since this canvass included all establishments identified as loggers employing one or more workers and for whom a separate Social Security account was maintained, the only logging operations excluded were those conducted by farmers and other owner-operators. In 1954 as in 1947, logging operations carried on by sawmills and other primary converters as an integral part of their manufacturing activity were reported as part of the converting establishment. For a list of primary products of Industry 2411 in 1954, refer to Table 6A, product codes 2411011 to 2411098.

The value of shipments of Industry 2411, Logging Camps and Logging Contractors, in 1954 totaled \$733 million. This included shipments of primary products (logs, bolts, pulpwood, poles, and other rough, round or hewn wood) valued at \$525 million, shipments of secondary products valued at \$12 million, and miscellaneous receipts (mainly contract and custom logging) of \$196 million. Receipts for merchandising (products bought and sold without further processing) valued at \$41 million are excluded from the \$733 million shipments of Industry 2411. Data relating to these merchandising receipts are also excluded from the cost of materials and value added by manufacture but are included in other detailed industry statistics, mainly employment and inventory (see Table 3).

Industry 2411 shipments of logs, bolts, pulpwood, etc. (primary products) in 1954 represented 98 percent of its total product shipments (primary and secondary). Secondary products shipped by this industry in 1954 consisted mainly of rough lumber and sawed ties, \$9 million. The widespread use of fee-type and other contractual arrangements for the cutting of standing timber accounts for the relatively high ratio of miscellaneous receipts to total receipts for Industry 2411, (27 percent in 1954).

Industry 2411 shipments of primary products in 1954 represented 89 percent of these products, valued at \$591 million, shipped by all industries. The only other industry shipping any sizable volume of logs, bolts, pulpwood, etc., in 1954 was Industry 2421, Sawmills and Planing Mills, \$60 million. On the basis of logging output, the coverage of Industry 2411 is less than that for shipments because of the captive production of establishments consuming the logs in further fabricated products.

### 2421--Sawmills and Planing Mills (Full Standard Industrial Classification Title: Sawmills and Planing Mills, General)

This industry comprises establishments primarily engaged in sawing rough lumber and timbers from logs and bolts, or resawing cants, flitches, or lumber into smaller dimensions; planing mills combined with sawmills; and separately operated planing mills which are engaged primarily in producing surfaced lumber and standard workings or patterns of lumber. Industry 2421 also includes establishments primarily engaged in sawing lath, railroad ties, and box shook from logs or bolts, and establishments primarily engaged in the kiln-drying of lumber. Establishments primarily engaged in manufacturing box shook or boxes from purchased lumber are classified in Industry 2444, Wooden Boxes (Except Cigar Boxes); and sash, doors, window and door frames, and other fabricated millwork from purchased lumber in Industry 2431, Millwork Plants. Logging camps combined with sawmills, when not separately reported, are included in Industry 2421. In the 1954 Census, as in 1947, SIC Industry 2429, Special-Product Sawmills, Not Elsewhere Classified, is combined with Industry 2421. For a detailed list of primary products of Industry 2421, refer to Table 6A, product codes 2421111 to 2421859.

Special enumerating and reporting techniques were used for the lumber industry in 1954 to provide as complete coverage as possible. With BOASI records forming the basis for the mailing list, report forms were mailed to all sawmills which had a Social Security account. Because there are many thousands of portable mills in the East with no fixed address, a field canvass of sample area segments was made in 36 States to supplement the mail canvass. This area segment sample provided an estimate of lumber production and stocks for these small operators as well as for establishments classified in industries in which specific provision was not made on the Census form for reporting such data. Consequently, it is believed that the data presented for 1954 provide complete coverage of lumber production and stocks, and the 1954 production and stocks data can be considered to be comparable with 1947.

The 1954 report required from the smaller mills in the mail canvass provided only selected general statistics (employment, cost of materials, value of shipments, etc.). For mills with six or more employees, a more detailed report was obtained covering such additional items as man-hours, number of production workers and inventories by type-finished goods, etc. For 1947,

the reporting requirements were based on the size of mills as determined by the quantity of lumber produced: mills producing more than 1,000,000 feet were required to report the full set of detailed statistics; mills producing from 200,000 feet to 1,000,000 feet of lumber, board measure, filed only selected general statistics similar to the smaller mills in the mail canvass for 1954 and any mill producing less than 200,000 feet of lumber was asked to report only its production and stocks.

General statistics (employment, cost of materials, value of shipments, etc.) were obtained from approximately the same number of mills in 1954 as in 1947, with 19,778 establishments reporting such information in 1954 and 19,049 establishments in 1947. However, due to the different cut-off for inclusion of sawmills in the two Censuses, the establishment counts are not strictly comparable. Also, the comparability of the 1954 establishment size data shown in Table 4 with those published for 1947 is also apparently affected for the smaller size groupings.

The general statistics in Table 1 through 4 cannot be related directly to the lumber production information shown in Table 6C, since the latter table includes the production of all sawmills, i.e. for the more than 28,000 sawmills for which estimates were provided from the area sample as well as those for which reports were received in the mail canvass.

In 1954, species data were reported directly by sawmills on the forms mailed to all establishments maintaining a Social Security account. In those few cases where operators failed to provide a species breakdown, the reported total of lumber sawed was apportioned among the species according to the pattern reflected in existing Census records for the specific area involved. In the case of the small mills reached in the supplementary field canvass by area sampling, species distributions were obtained by the enumerator at the time of his visit. In 1947, species data were secured and reviewed by field enumerators from sawmills operated in all States other than the West; mills in the West reported their species detail by mail. For a number of small mills the enumerators estimated the species distribution on the basis of the best information available locally. Comparability of the species data as between 1947 and 1954 are not thought to be affected significantly by these changes in reporting and estimating techniques.

The value of shipments of Industry 2421 totaled \$3,247 million. This included shipments of primary products (lumber and other sawmill and planing mill products) valued at \$3,072 million, shipments of secondary products valued at \$87 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$88 million. Primary products consisted of sawmill and planing mill products, \$2,976 million; logs, \$60 million; and box shooks from own lumber, \$36 million.

Industry 2421 shipments of lumber and other sawmill and planing mill products (primary products) in 1954 represented 97 percent of its total product shipments (primary and secondary). There is no comparable specialization ratio for 1947. Secondary products shipped by Industry 2421 in 1954 consisted mainly of the following product classes: interior trim and moldings and door frames, \$7 million, and softwood plywood, \$7 million. The relatively large proportion of miscellaneous receipts in 1954 (3 percent of total receipts) is due mainly to contractual activities associated with sawmill and planing mill operations such as logging, custom-sawing of logs and lumber, and kiln-drying of lumber.

Industry 2421 shipments of primary products (including logs and box shook) in 1954 represented 81 percent of these products valued at \$3,777 million shipped by all industries. The coverage ratio for 1947 is not available, since the data were not retabulated to treat logs and box shook on a comparable basis. Production of sawmill and planing mill products, except logs and box shook, is scattered through many manufacturing industries (principally in Major Group 24, but no single industry accounted for a significant percentage. Excluding logs and box shook, Industry 2421 accounted for 98 percent of its primary products shipped by all industries. It accounted for 10 percent of the total logs shipped by all industries. In the case of box shook, which is considered primary to Industry 2421 and 2444, the shipments of box shook by Industry 2421 establishments in 1954 constituted 24 percent of all box shook shipments; establishments in Industry 2444 accounted for 73 percent of all box shook shipments in 1954. Other industries shipping sawmill and planing mill products consisted mainly of Industry 2431, Millwork Plants, \$17 million and Industry 2432, Plywood Plants, \$12 million.

#### 2422--Veneer Mills

This industry comprises establishments primarily engaged in producing all types and grades of veneer including technical, fancy, flat, plywood, and container types. Establishments primarily engaged in the production of veneer which is used in the same establishment for the manufacture of other end products are classified in the end product industries, such as Industry 2432 (Plywood Plants), Industry 2441 (Fruit and Vegetable Baskets), Industry 2444 (Wooden Boxes, Except Cigar Boxes), and Industry 2443 (Cigar Boxes). For a detailed list of primary products of Industry 2422, refer to Table 6A, product codes 2422111 to 2422231.

The value of shipments of Industry 2422 in 1954 totaled \$121 million. This included shipments of primary products (veneer) valued at \$110 million, shipments of secondary products valued at \$8 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$3 million.

Industry 2422 shipments of veneer in 1954 represented 93 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 92 percent. Secondary products shipped by Industry 2422 in 1954 consisted mainly of sawmill and planing mill products, \$3 million, and hardwood plywood, \$3 million.

Industry 2422 shipments of veneer in 1954 represented 88 percent of the veneer, valued at \$124 million, shipped by all industries. This coverage ratio in 1947 was 83 percent. Other industries shipping veneer in 1954 consisted almost entirely of Industry 2432, Plywood Plants, \$9 million, and Industry 2421, Sawmills and Planing Mills, \$5 million.

Veneer is produced in significant volume by establishments using it in the output of such products as plywood, boxes and baskets. This production does not appear in the product table for this group of industries, but some measure of its importance can be gained from Table 7 shown for the plywood and wooden container industries.

#### 2423--Shingle Mills

This industry comprises establishments primarily engaged in producing wood shingles, including shake operations. For a list of products of this industry, refer to Table 6A, product codes 2423011 to 2423051.

The value of shipments of Industry 2423 in 1954 totaled \$34 million. This included shipments of primary products (shingles and shakes) valued at \$32 million, shipments of secondary products valued at \$1 million, and a negligible amount of miscellaneous receipts.

Industry 2423 shipments of shingles and shakes in 1954 represented 97 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 100 percent.

Industry 2423 shipments of shingles and shakes in 1954 represented 90 percent of the shingles, valued at \$36 million, shipped by all industries. This coverage ratio in 1947 was 86 percent. Other industries shipping shingles and shakes in 1954 consisted mainly of Industry 2421, Sawmills and Planing Mills, \$2 million.

#### 2424--Cooperage Stock Mills

This industry comprises establishments primarily engaged in producing cooperage stock, including staves, heading, and hoops for tight or slack cooperage, whether produced by sawing or splitting. Establishments primarily engaged in manufacturing barrels and other coopered products from stock produced in the same establishment are classified in Industry 2445, Cooperage. For a detailed list of products of Industry 2424, refer to Table 6A, product codes 2424011 to 2424071.

Establishments which merely finish rough staves and headings received from affiliated stave and heading mills are also classified in Industry 2424. The resulting duplication in the value of shipments reported for this industry is slight and the general statistics for this industry are not believed to be affected to any significant extent.

The value of shipments of Industry 2424 in 1954 totaled \$26 million. This included shipments of primary products (cooperage stock) valued at \$25 million, shipments of secondary products valued at \$1 million, and a negligible amount of miscellaneous receipts.

Industry 2424 shipments of cooperage stock in 1954 represented 96 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was also 96 percent. Secondary products shipped by Industry 2424 in 1954 consisted mainly of rough lumber.

Industry 2424 shipments of cooperage stock in 1954 represented 93 percent of the cooperage stock, valued at \$27 million, shipped by all industries. This coverage ratio in 1947 was 92 percent. No other industry shipped a significant volume of cooperage stock in 1954.

#### 2425--Excelsior Mills

This industry comprises establishments primarily engaged in manufacturing excelsior, wood-wool, and excelsior pads and wrappers. For a list of products of this industry, refer to Table 6A, product codes 2425011 to 2425098.

Value of shipments of Industry 2425 in 1954 totaled \$12 million. This included shipments of primary products (excelsior and excelsior products) valued at \$10 million, shipments of secondary products valued at \$1 million, and miscellaneous receipts valued in excess of \$1 million. Miscellaneous receipts for this industry may be somewhat overstated. (See footnote 4 Table 5A.)

Industry 2425 shipments of excelsior and excelsior products in 1954 represented 96 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 100 percent.

Industry 2425 shipments of excelsior and excelsior products in 1954 represented 93 percent of the excelsior and excelsior products, valued at \$11 million, shipped by all industries. This coverage ratio in 1947 was 97 percent.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MANUFACTURES—INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. <sup>3</sup> (\$1,000)	Value of shipments <sup>4</sup> (\$1,000)

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>Figures for years prior to 1935 do not include cost of contract work.

<sup>4</sup>For 1929 and 1947-1954, value of shipments; for all other years, value of production. See Introduction, "Value of Shipments."

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>See text for Industry 2421 for explanation of differences in coverage for these years.

<sup>7</sup>Data for "Shingle mills" (Industry 2423) included with Industry 2421 for 1949-1953.

<sup>8</sup>No comparable figures are available for earlier years.

<sup>9</sup>Prior to 1909, "Excelsior mills" was combined with "Artificial leather."

## LUMBER AND TIMBER BASIC PRODUCTS

24A-5

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Industry, region, and State <sup>1</sup>	1954										1947

Note: Detailed figures may not add to the totals because of independent rounding.

NA Not available.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2411, Logging Camps and Contractors: New England—Massachusetts, 21 (20-99); Rhode Island, 5 (1-19); Connecticut, 12 (20-99); Middle Atlantic—New Jersey, 20 (20-99); East North Central—Indiana, 24 (20-99); Illinois, 19 (20-99); West North Central—Iowa, 11 (20-99); Missouri, 28 (20-99); South Dakota, 13 (20-99); Nebraska, 1 (20-99); Kansas, 11 (20-99); West South Central—Arkansas, 328 (2,042); Oklahoma, 15 (20-99); Mountain—Idaho, 234, (2,500-4,999); Wyoming, 19 (20-99); New Mexico, 18 (100-249); Arizona, 13 (100-249); Utah, 3 (1-19); Nevada, 3 (1-19).

S.I.C. 2421, Sawmills and Planing Mills: New England—Massachusetts, 127 (500-999); Rhode Island, 5 (20-99); Connecticut, 57 (250-499); West North Central—Minnesota, 249 (1,000-2,499); North Dakota, 4 (1-19); South Dakota, 30 (500-999); Nebraska, 8 (20-99); Kansas, 32 (100-249); South Atlantic—Delaware, 34 (250-499); District of Columbia, 2 (20-99); Mountain—Montana, 230 (2,500-4,999); Utah, 54 (250-499).

S.I.C. 2422, Veneer Mills: Northeast—New Hampshire, 1 (100-249); Pennsylvania, 3 (20-99); East North Central—Ohio, 1 (20-99); Illinois, 2 (100-249); Michigan, 3 (100-249); Wisconsin, 11 (500-999); West North Central—Minnesota, 1 (20-99); Iowa, 1 (1-19); Missouri, 2 (20-99); Kansas, 1 (1-19); South Atlantic—Maryland, 4 (20-99); West Virginia, 3 (100-249); Florida, 9 (250-499); West—Idaho, 1 (20-99); Washington, 9 (250-499).

S.I.C. 2423, Shingle Mills: Mountain—Montana, 1 (1-19); Idaho, 3 (20-99); California, 11 (20-99); All Other Divisions—Maine, 4 (1-19); New Jersey, 2 (1-19); Ohio, 1 (20-99); Michigan, 1 (1-19); Minnesota, 1 (1-19); North Carolina, 1 (1-19); Mississippi, 1 (1-19).

S.I.C. 2424, Cooperage Stock Mills: New England—Maine, 3 (1-19); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 3 (20-99); North Central—Ohio, 6 (20-99); Indiana, 3 (20-99); Illinois, 9 (100-249); Wisconsin, 1 (1-19); Iowa, 2 (1-19); Missouri, 29 (250-499); South Dakota, 1 (1-19); Kansas, 1 (1-19); South and West—Maryland, 4 (20-99); West Virginia, 9 (20-99); Georgia, 1 (1-19); Florida, 2 (1-19); Kentucky, 17 (100-249); Alabama, 10 (250-499); Mississippi, 8 (100-249); Arkansas, 30 (250-499); Texas, 1 (1-19); Oregon, 1 (20-99); California, 1 (1-19).

S.I.C. 2425, Excelsior Mills: All Other States—Maine, 1 (20-99); New Hampshire, 3 (20-99); Massachusetts, 2 (1-19); New York, 5 (20-99); Indiana, 2 (20-99); Michigan, 1 (100-249); Wisconsin, 3 (100-249); Missouri, 1 (1-19); Delaware, 1 (1-19); North Carolina, 5 (20-99); Georgia, 3 (100-249); Tennessee, 4 (20-99); Alabama, 1 (20-99); Arkansas, 3 (100-249); Texas, 2 (20-99); Arizona, 5 (20-99); Utah, 1 (1-19); Washington, 1 (20-99); Oregon, 4 (100-249); California, 8 (20-99).

## MANUFACTURES—INDUSTRY STATISTICS

Table 3.—DETAILED STATISTICS FOR THE UNITED STATES: 1954

New machinery and equipment.....do..	43,431	77,679	2,055	711	( <sup>3</sup> )	( <sup>3</sup> )
Expenditures for used plant and equipment.....do..	3,771	9,853	( <sup>3</sup> )	( <sup>3</sup> )	( <sup>3</sup> )	( <sup>3</sup> )
Horsepower rating of power equipment at end of 1954:						
Horsepower of prime movers and electric motors driven by purchased energy, total.....1,000 hp..	538	3,130	76	12	31	13
Engines, etc., driving electric generators.....do..	61	765	2	2	3	( <sup>4</sup> )
Engines, etc., not driving electric generators.....do..	454	822	11	3	15	4
Electric motors driven by purchased energy.....do..	23	1,543	63	7	13	9
Electric motors driven by energy generated at the establishment.....do..	1	446	2	( <sup>4</sup> )	...	...

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not available. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary product to its total shipments of all products. (The primary products are listed in Tables 5B and 6A.) <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishment classified in that industry. <sup>3</sup>Less than \$500 thousand. <sup>4</sup>Less than 500 hp.

NA Not available.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5A and 6A)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>In 1954 logs, bolts, etc. (product class 24110) and box shook (product class 24446) have been treated as primary products of Industry 2421 whereas in 1947 they were excluded as primary products of this industry. Therefore, no comparable primary product specialization and coverage ratios are available (see text for more complete explanation).

<sup>4</sup>These values are overstated to a limited degree resulting from the misclassification of a small number of establishments whose principal activity is contract work primary to other industries.

## MANUFACTURES--INDUSTRY STATISTICS

Table 5B.--INDUSTRY-PRODUCT ANALYSIS--SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

NA Not available.

<sup>1</sup>In addition to the logging products shipped, there was also \$204,567 thousand of receipts from contract and custom logging of timber owned by others reported by Industries 2411, "Logging Camps and Logging Contractors," (\$194,480 thousand) and 2421, "Sawmills and Planing Mills," (\$10,087 thousand).

<sup>2</sup>Quantity data not comparable. The unit of measure reported for 1947 was in thousands of square feet, surface measure.

<sup>3</sup>In addition, 41,000 tons of excelsior were produced and used as a material in plants manufacturing excelsior pads.

<sup>4</sup>Includes a small quantity of miscellaneous excelsior products not classifiable.

## MANUFACTURES—INDUSTRY STATISTICS

Table CB.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954,  
AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figures does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

				Louisiana.....	2,201

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 24211, Connecticut, Utah, and Nevada; 24212, Utah; 24213, New York, Ohio, Illinois, South Carolina, and Texas; 24223, New Hampshire and Michigan.

## MANUFACTURES--INDUSTRY STATISTICS

Table 6C.--LUMBER - NUMBER OF ACTIVE SAWMILLS AND PRODUCTION OF SOFTWOOD AND

(Includes data obtained by mail canvass of all sawmills with one or more paid employees as reported to the Bureau of Old Age and Survivors Insurance, which maintain no account with the Bureau of Old Age and Survivors Insurance. Hence all Eastern production figures, are subject to the sampling in the other tables in this Bulletin, but in addition incorporate the lumber production from an estimated 28,600 sawmills derived from the area therefore, it was necessary to distribute totals for such mills according to ratios of commercially available species in the area)

(Production in thousands)

Note: Sampling variations - The data shown above, for all Eastern States, are based in part on a representative sample of sawmills. Thus the number of sawmills and the production of lumber reported are estimates which may vary from the figures which would be obtained from a complete census. Sampling variations have been computed for all States and Divisions affected. These standard errors, expressed in percent, show that the chances are approximately two out of three: that the unstarred figures do not vary from the three figures by more than 5 percent; the one-starred figures do not vary by more than 10 percent; and the two-starred figures do not vary by more than 15 percent. Figures with standard errors of more than 15 percent have been suppressed and are indicated by an (S).

<sup>1</sup>South Dakota is included with the Mountain Division because its production is limited to Western species.

<sup>2</sup>Includes sycamore, walnut, chestnut, and hardwoods, not elsewhere classified.

xxx Not applicable.

NA Not applicable.

<sup>1</sup>Data not strictly comparable. In 1947, only sawmills producing 200 thousand board feet or more of lumber on an annual basis were included in the Census and in 1954 sawmills having one or more paid employees as reported to the Bureau of Old Age and Survivors Insurance were included.

## LUMBER AND TIMBER BASIC PRODUCTS

24A-21

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

24221	Hardwood veneer:									
	All establishments specializing in product class	196	10,506	26,460	9,665	19,240	21,058	42,291	39,014	81,306
	Establishments with:									
	90% or more specialization.....	164	7,907	19,115	7,297	14,249	15,326	30,789	28,330	59,119
	75-89% specialization.....	9	675	2,274	580	1,131	1,582	3,675	3,961	7,637
	50-74% specialization.....	23	1,923	5,070	1,787	3,859	4,149	7,827	6,722	14,549
24222	Softwood veneer:									
	All establishments specializing in product class	47	1,853	7,544	1,694	3,101	6,337	14,845	21,094	35,940

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

<sup>2</sup>These data reflect the activities of establishments specializing in the manufacture of box shok from lumber or logs, bolts and pulpwood but because they are also engaged in sawmilling, they are classified in the Industry 2421 "Sawmills and Planting Mills." (See text for fuller explanation.)

<sup>3</sup>Almost all of the activity in this product class is accounted for by establishments which specialize 90 percent or more in the manufacture of products in this product class.

# Millwork, Plywood, and Prefabricated Structural Wood Products

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2431--	Millwork Plants
2432--	Plywood Plants
2433--	Prefabricated Wood Products

Establishments are classified in these three industries on the basis of the final products shipped, irrespective of the degree of processing involved. Thus, completely integrated plants that produce their rough lumber or veneer and further process this material into millwork, plywood, etc., as well as plants buying the raw material or receiving it through interplant transfer from establishments under the same ownership, are included in these industries.

## 2431--Millwork Plants

This industry comprises establishments primarily engaged in manufacturing wood sash (including storm sash) windows, doors (including combination screen and storm doors), window and door frames, blinds, mantels, panel work, porch work, stairways, cabinet work to be built in, entrances, prefabricated tanks and vats, and similar fabricated millwork from purchased lumber. Planing mills primarily engaged in producing millwork are included in this industry, but planing mills primarily producing standard workings or patterns of lumber (dimension stock, surfaced lumber, ceiling, partitions, siding, matched and shiplapped lumber, and flooring), are classified in Industry 2421, Sawmills and Planing Mills. For a detailed list of primary products of Industry 2431, refer to Table 6A, product codes 2431111 to 2431698.

Establishments primarily engaged in the production of wood combination screen and storm doors, and wood combination screen and storm sash were classified in Industry 2651, Window and Door Screens, in the 1947 Census and 1949-1950 Annual Surveys of Manufactures; and in Industry 2431 in subsequent years. 1947 Census data relating to these establishments have been retabulated to provide comparability with the 1954 data presented for this industry.

In general, the establishments in Industry 2431 do not tend to produce an individual group of products but spread their production over a wide variety of millwork items. Reporting of product detail in the millwork industry often reflected the lack of supporting records to permit the breakdown of the individual products requested. The "undistributed" value (millwork products, not specified by kind), whether taken in the relation to the total of all millwork products or to the more important millwork items is, however, relatively small.

As in previous years, a report was required of a wholesale or retail yard that operated a sizeable millwork plant as a separate department for which separate book records were kept. However, where separate departmental records were not kept, the establishment was classified on the basis of its primary activity, i.e. Census of Business Industries 5211, Retail Lumber Yards; or Industry 5098, Wholesale Lumber and Construction Materials; or in Census of Manufactures Industry 2431, Millwork Plants. The value of millwork produced by wholesale and retail establishments as a secondary activity is relatively insignificant when compared either to the millwork total or to any of the more important millwork items.

The value of shipments of Industry 2431, Millwork Plants, in 1954 totaled \$873 million. This included shipments of primary products (millwork) valued at \$773 million, shipments of secondary products valued at \$90 million, and miscellaneous receipts of \$9 million.

Industry 2431 shipments of millwork (primary products) in 1954 represented 90 percent of its total product shipments (primary and secondary). In 1947, the primary product specialization ratio was also 90 percent. Secondary products shipped by this industry in 1954 consisted mainly of wood household kitchen furniture, \$20 million; window and door screens, \$17 million; dressed lumber, except flooring, \$10 million; nailed wood boxes and box shook, \$6 million; and hardwood plywood, \$6 million.

Industry 2431 shipments of millwork (primary products) in 1954 represented 91 percent of those products valued at \$846 million shipped by all industries. The corresponding coverage ratio in 1947 was 92 percent. Other industries shipping millwork consisted mainly of Industry 2421, Sawmills and Planing Mills, \$37 million; and Industry 2432, Plywood Plants, \$8 million.

## 2432--Plywood Plants

This industry comprises establishments primarily engaged in manufacturing commercial plywood, including technical and industrial grades, from veneer produced in the same establishment or from purchased veneer. Important products of this industry include hardwood plywood, interior and exterior types of softwood plywood, and nonwood face plywood and other plywood type products. Establishments producing plywood which is used in the same establishment in the manufacture of end products such as doors, boxes, and furniture are classified in Industry 2431, Millwork; Industry 2444, Wooden Boxes; Industry Group 251, Household Furniture, respectively. For a more detailed list of primary products of Industry 2432, refer to Table 6A, product codes 2432111 to 2432498.

The value of shipments of Industry 2432, Plywood Plants, in 1954 totaled \$515 million. This included shipments of primary products (plywood and plywood type products) valued at \$478 million, shipments of secondary products valued at \$34 million, and miscellaneous receipts of \$3 million.

Industry 2432 shipments of plywood and plywood type products (primary products) in 1954 represented 93 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was also 93 percent. Secondary products shipped by Industry 2432 in 1954 consisted mainly of wood doors and wood combination screen-storm doors, \$8 million; rough lumber, \$6 million; softwood veneer, \$6 million; dressed lumber, \$4 million; and hardwood veneer, \$3 million.

Industry 2432 shipments (including interplant transfers) of plywood and plywood type products (primary products) in 1954 represented 95 percent of those products valued at \$505 million shipped for sale or interplant transfer by all industries. The corresponding coverage ratio in 1947 was 96 percent. Other industries shipping plywood or plywood type products consisted mainly of Industry 2421, Sawmills and Planing Mills, \$12 million; Industry 2431, Millwork Plants, \$8 million; and Industry 2422, Veneer Mills, \$3 million.

2433--Prefabricated Wood Products (Full Standard Industrial Classification Title: Prefabricated Wooden Buildings and Structural Members)

This industry comprises establishments primarily engaged in manufacturing prefabricated wooden buildings, ready cut wood buildings or panels, or in producing laminated or fabricated trusses, arches and other structural members of lumber. For a more detailed list of primary products of this industry, refer to Table 6A, product codes 2433111 to 2433371.

Establishments primarily engaged in the installation rather than the manufacture of prefabricated building and equipment e.g., building contractors, erector-dealers, lumber and building materials distributors, etc., are excluded from the Census of Manufactures and are classified in Construction Industries.

The value of shipments of Industry 2433, Prefabricated Wood Products, in 1954 totaled \$224 million. This included shipments of primary products (prefabricated wood products) valued at \$217 million, shipments of secondary products valued at \$2 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$5 million.

Industry 2433 shipments of prefabricated wood products (primary products) in 1954 represented 99 percent of its total product shipments (primary and secondary). In 1947, the primary product specialization ratio was 93 percent. Secondary products shipped by this industry in 1954 consisted of small quantities

of wood doors, interior trim and other millwork, and dressed lumber. The tendency of this industry to concentrate on the building of assembled units and fabricated sections is clearly evident in the very high specialization ratio reported for 1954.

Industry 2433 shipments of prefabricated wood products (primary products) in 1954 represented 95 percent of those products valued at \$227 million shipped by all industries. The corresponding coverage ratio in 1947 was 96 percent. Other industries shipping prefabricated wood products consisted mainly of Industry 2421, Sawmills and Planing Mills, \$5 million; and Industry 2431, Millwork Plants, \$3 million.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

\* Revised

NA Not available.

<sup>1</sup>For the period 1949-1954 inclusive, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1947-1954, value of shipments; for 1939, value of production. See Introduction, "Value of Shipments."

<sup>4</sup>In this industry, which contains a large number of very small establishments, there is a possibility that some of the small establishments have been misclassified as to industry. This would not affect the statistics other than the number of establishments.

<sup>5</sup>The figures for 1949-1953 inclusive, represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>The figures for 1947, have been revised for comparability with the figures for 1951-1954 by including data for establishments primarily engaged in the manufacture of wood storm doors and storm sash. Value added by manufacture for 1947 on a basis comparable with 1939, 1949, and 1950, which have not been revised, was \$256.4 million.

<sup>7</sup>No comparable figures are available for earlier years.

## MILLWORK, PLYWOOD, AND PREFABRICATED STRUCTURAL WOOD PRODUCTS

24B-3

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2431, Millwork Plants: New England—Maine, 21 (250-499); New Hampshire, 27 (500-999); Vermont, 5 (20-99); Connecticut, 49 (250-499); West North Central—North Dakota, 2 (1-19); Nebraska, 22 (250-499); South Atlantic—Delaware, 5 (100-249); Maryland, 38 (500-999); West Virginia, 11 (20-99); North Carolina, 76 (1,000-2,499); South Carolina, 29 (250-499); Georgia, 56 (1,000-2,499); East South Central—Kentucky, 28 (1,000-2,499); Tennessee, 43 (500-999); West South Central—Arkansas, 23 (100-249); Oklahoma, 34 (500-999); Mountain—Montana, 13 (250-499); Idaho, 21 (20-99); Wyoming, 2 (1-19); Nevada, 9 (250-499).

S.I.C. 2432, Plywood Plants: New England—Maine, 4 (500-999); New Hampshire, 3 (250-499); Middle Atlantic—New York, 5 (500-999); New Jersey, 1 (1-19); Pennsylvania, 1 (100-249); North Central—Ohio, 3 (100-249); Illinois, 3 (100-249); Minnesota, 1 (20-99); Kansas, 1 (1-19); South Atlantic—Maryland, 1 (1-19); Virginia, 7 (250-499); West Virginia, 2 (100-249); East South Central—Kentucky, 2 (20-99); Alabama, 3 (250-499); Mississippi, 5 (500-999); West South Central—Louisiana, 2 (250-499); Texas, 2 (100-249).

S.I.C. 2433, Prefabricated Wood Products: New England—Maine, 3 (20-99); Connecticut, 2 (20-99); Middle Atlantic—New York, 15 (500-999); New Jersey, 4 (100-249); Pennsylvania, 11 (500-999); North Central—Ohio, 21 (1,011); Illinois, 16 (500-999); Minnesota, 9 (500-999); South Dakota, 2 (1-19); Nebraska, 2 (20-99); Kansas, 3 (100-249); South Atlantic—Maryland, 2 (20-99); District of Columbia, 1 (1-19); Virginia, 2 (250-499); North Carolina, 2 (20-99); South Carolina, 1 (1-19); Georgia, 2 (100-249); East South Central—Tennessee, 2 (20-99); Alabama, 1 (250-499); Mississippi, 1 (100-249); West South Central—Arkansas, 3 (20-99); Louisiana, 2 (100-249); Oklahoma, 1 (1-19); Texas, 6 (250-499); Mountain—Montana, 1 (1-19); Idaho, 2 (1-19); Nevada, 1 (1-19).

## MILLWORK, PLYWOOD, AND PREFABRICATED STRUCTURAL WOOD PRODUCTS

24B-5

Table 3.—DETAILED STATISTICS FOR THE UNITED STATES: 1954

New machinery and equipment.....do..	8,604	8,899	2,033
Expenditures for used plant and equipment.....do..	1,301	1,247	( <sup>6</sup> )
Horsepower rating of power equipment at end of 1954:			
Horsepower of prime movers and electric motors driven by purchased energy, total.....1,000 hp..	362	286	42
Engines, etc., driving electric generators.....do..	24	59	1
Engines, etc., not driving electric generators.....do..	10	32	15
Electric motors driven by purchased energy.....do..	328	195	26
Electric motors driven by energy generated at the establishment.....do..	23	38	( <sup>7</sup> )

Note: Detailed figures may not add to the totals because of independent rounding. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than 500 tons. <sup>4</sup>Less than \$5,000. <sup>5</sup>Less than 500 thousand kwh. <sup>6</sup>Less than \$500 thousand. <sup>7</sup>Less than 500 hp.

## MANUFACTURES—INDUSTRY STATISTICS

Table 4.--SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

Ind. code	Industry and item	Total, all establishments	Establishments with an average of—

Note: Detailed figures may not add to the totals because of independent rounding.

Table 5A.—INDUSTRY-PRODUCT ANALYSIS—SUMMARY OF INDUSTRY AND PRIMARY PRODUCT SHIPMENTS, SPECIALIZATION RATIOS AND COVERAGE RATIOS FOR THE UNITED STATES: 1954 AND 1947

Industry code	Industry and census year	Value of shipments					Value of primary products shipped			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product speciali- zation ratio <sup>1</sup>	Total (made in all industries)	Made in this industry	Made in other industries	Coverage ratio <sup>2</sup>
Col. B Col. B+C (Percent)	Col. G Col. F (Percent)									
(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)	(I)		
2431	Millwork plants.....1954...	873,007	773,400	30,446	9,161	90	846,413	773,400	73,013	91
	.....1947...	546,182	483,017	55,391	7,774	90	525,137	483,017	42,120	92
2432	Plywood plants.....1954...	515,023	477,908	34,189	2,926	93	504,725	477,908	26,817	95
	.....1947...	272,059	252,208	18,494	1,357	93	262,949	252,208	10,741	96
2433	Prefabricated wood products.....1954...	224,388	217,008	2,555	4,825	99	227,298	217,008	10,290	95
	.....1947...	103,311	95,271	6,750	1,290	93	99,106	95,271	3,835	96

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MILLWORK, PLYWOOD, AND PREFABRICATED STRUCTURAL WOOD PRODUCTS

24B-7

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading, the value of shipments divided between millwork, plywood, prefabricated structural wood products, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry)

Prod. class code	Class of products and miscellaneous receipts	Millwork plants (S.I.C. 2431)	Plywood plants (S.I.C. 2432)	Prefabricated wood products (S.I.C. 2433)	Sawmills and planing mills (S.I.C. 2421)	Other industries	All industries
	Total shipments and receipts of the industry.....	873,007	515,023	224,388	xxx	xxx	xxx
243	Millwork, plywood, and prefabricated structural wood products.....	783,905	486,469	218,149	55,056	34,857	1,578,436

2433371	Panels or sections for prefabricated buildings <sup>8</sup> .....	...do.....	33,790	3,601	(NA)	4,311

xxx Not applicable.

NA Not available.

<sup>7</sup>Includes \$42,180 thousand transferred from Industry 2561 (see text on Industry 2431).<sup>8</sup>Includes both panel type and flush type doors, reported as follows (all figures in thousands): Douglas-fir, quantity 7684, value 44,579; western pines, quantity 4550, value 32,483; other softwoods, quantity 1091, value 11,010; and hardwoods, quantity 853, value 12,304.<sup>9</sup>Includes all types of doors not listed ranging from large industrial doors to doors of very small dimensions.<sup>8</sup>Direct comparisons of 1954-1947 are not possible for this product line, since in 1954 shipments of cabinets to be combined with other units to form a built-in unit were treated as products primary to the Wood Household Furniture (Not Upholstered) Industry, product code 2511411.<sup>9</sup>10-15 percent estimated.<sup>7</sup>Largely accounted for by small establishments that were not asked to report a breakdown of total shipments.<sup>8</sup>Does not include the value of production of plywood made in consuming plants, e.g. those primarily engaged in the manufacture of doors, boxes and furniture (see text for definition of Industry 2432).<sup>9</sup>Does not include the shipments of establishments primarily engaged in the installation or sale of prefabricated dwellings or sections thereof; accordingly, prefabricated dwellings or sections shipped by building contractors, erector-dealers and distributors of lumber, millwork and other building materials are excluded from these totals.

## MANUFACTURES—INDUSTRY STATISTICS

Table 6B.--VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.)

		Mississippi.....	3,895	West South Central.....	5,405
				Pacific.....	5,414
				Washington.....	3,471
				Oregon.....	1,053

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 24311, Colorado; 24312, Montana, and Nevada; 24313, Delaware and Kentucky; 24315, Maine; 24321, Maine, New Hampshire, New York, Pennsylvania, and Texas; 24322, Idaho; 24332, Massachusetts, New Jersey, Pennsylvania, Kansas, Maryland, Virginia, West Virginia, South Carolina, Tennessee, Alabama, Mississippi, Louisiana, and Texas.

<sup>2</sup>Direct comparisons of 1954-1947 are not possible for this product line, since in 1954 shipments of cabinets to be combined with other units to form a built-in unit were treated as products primary to the Wood Household Furniture (Not Upholstered) Industry, product code 2511411.

<sup>3</sup>In addition to values shown by product class for Industry 2431 shipments of Millwork, not specified by kind, were reported in the value of \$63,475 thousand in 1947 and \$57,141 thousand in 1954.

D Figures withheld to avoid disclosing figures for individual companies. Production figures reported from the following states also are withheld to avoid disclosing figures for individual companies: Maine, New Hampshire, New York, New Jersey, Pennsylvania, Ohio, Illinois, Minnesota, Arkansas and Texas.

1 Includes less than 1,000 thousand square feet for which species not specified.

2 Includes a negligible quantity from West North Central, combined to avoid disclosing figures for individual companies.

3 Includes a negligible quantity reported as Technical and Type I.

4 Includes less than 10 percent reported as Type III.

5 Includes less than 10 percent reported as other Types, mainly Type III.

6 Includes less than 10 percent reported as Technical and Type I.

## MANUFACTURES—INDUSTRY STATISTICS

Table 6E.—LUMBER CORE HARDWOOD PLYWOOD (EXCEPT CONTAINER AND PACKAGING TYPE): PRODUCTION FOR SHIPMENT,  
BY FACE SPECIES, BY DIVISIONS AND SELECTED STATES, 1954  
(Includes market shipments and interplant transfers; generally does not include production for consumption in same plant)

(Thousands of square feet, surface measure)

Division and State	Total, all species and types <sup>1</sup>	Totals by species of face veneer, all types								
		Birch (domestic and imported)	Gum-sweet (red) and black (tupelo)	Maple (domestic and imported)	Oak	Walnut (domestic and imported)	Domestic woods not listed	Mahogany (Khaya and Swietenia)	Philippine woods	Imported woods not listed

(D) Figures withheld to avoid disclosing figures for individual companies; production figures reported from the following States also are withheld to avoid disclosing figures for individual companies: New Hampshire, Vermont, New Jersey, New York, Pennsylvania, Ohio, Michigan, Minnesota, West Virginia, Florida, Tennessee, Alabama and Mississippi.

<sup>1</sup>Lumber core hardwood plywood is predominantly Type II, moisture resistant.

<sup>2</sup>Includes negligible quantities reported from West North Central States.

Table 6F.—CONTAINER AND PACKAGING TYPE HARDWOOD PLYWOOD: PRODUCTION FOR SHIPMENT, BY GEOGRAPHIC DIVISIONS, 1954

(Includes market shipments and interplant transfers; generally does not include production for consumption in same plant.)

Division	Thousands of square feet, surface measure	Thousands of board feet
United States, total.....	101,755	30,834
New England.....	19,536	7,957
South Atlantic <sup>1</sup> .....	41,170	10,224
East South Central <sup>2</sup> .....	15,972	5,075
West South Central.....	25,077	7,578

Note: Production was reported from Maine, Vermont, Indiana, Georgia, Florida, Alabama, Mississippi, Arkansas, Louisiana and Texas, but State figures are withheld to avoid disclosure of operations of individual companies.

<sup>1</sup>Of the totals shown for this division, North Carolina accounted for 33,356 thousand square feet surface measure and 8,060 thousand board feet equivalent.

<sup>2</sup>Includes less than 2 percent reported from East North Central.

Table 6G.—SOFTWOOD PLYWOOD; PRODUCTION, BY SPECIES, TYPES, AND STATES: 1954

(Thousands of square feet, 3/8" basis)

State	Total, all species, all types	Douglas fir			Other softwoods (both types)		
		Total	Interior type	Exterior type	Total	Ponderosa pine	Other softwoods
United States, total.....	3,989,327	3,871,213	2,963,300	907,913	118,114	252,684	165,430
Washington and Idaho.....	1,434,153	1,381,189	1,015,611	365,578	52,964	12,407	40,557
Oregon.....	2,013,885	2,006,013	1,543,415	462,598	7,872	27,872	( <sup>2</sup> )
California.....	541,289	484,011	404,274	79,737	57,278	32,405	24,873

<sup>1</sup>Of this total 104,849 was reported as interior type and 13,265 as exterior type.

<sup>2</sup>Includes a negligible quantity of white pine, combined with ponderosa pine to avoid disclosing figures for an individual company; production reported as "Knotty pine" is also included in ponderosa pine, accounting for less than 15 percent of the total.

<sup>3</sup>Includes 26,713 of hemlock; 14,059 of Idaho white and of sugar pine; 10,153 of white fir, noble fir, and vertical grain fir; and 14,505 of redwood, spruce, larch and cedar (of which redwood and spruce accounted for over 95 percent).

D Data withheld to avoid disclosing the figures of individual companies. xxx Not applicable. NA Not available. <sup>1</sup>In 1947 the plywood industry reported consumption of 791,446 thousand feet, log scale, of veneer logs, bolts, and log flitches, purchased from non-affiliated establishments and transferred from affiliated establishments. <sup>2</sup>In 1947 the plywood industry reported consumption of 127,325 thousand feet, log scale, of veneer logs, bolts, and log flitches, produced by consuming establishments. <sup>3</sup>In 1947 the plywood industry reported total production of hardwood veneer in the amount of 2,107,094 thousand square feet, surface measure. <sup>4</sup>In 1947 the plywood industry reported production of Douglas fir veneer in the amount of 4,174,247 thousand square feet, surface measure, which represents production of between 500,000 thousand and 600,000 thousand square feet when converted to a 1" average thickness basis. In addition, the plywood industry reported production in 1947 of softwoods other than Douglas fir and woods not reported by kind in the amount of 359,272 thousand square feet, surface measure, which represents production of between 30,000 and 40,000 thousand square feet when converted to a 1" average thickness basis.

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Estab- lish- ments, number	All employees		Production workers			Value added by manufacture	Cost of materials, etc.	Value of shipments

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Wooden Containers

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2441--	Fruit and Vegetable Baskets
2442--	Rattan and Willow Ware
2443--	Cigar Boxes
2444--	Wooden Boxes
2445--	Cooperage

Establishments in this group specialize to a high degree in the production of those items which are primary to the industry in which they are classified. Moreover, with the exception of Industry 2441, Fruit and Vegetable Baskets, and Industry 2444, Wooden Boxes, the industries in this group account for better than 90 percent of the total value of their primary products shipped by all industries. Many of the establishments in Industries 2441 and 2444 produce their own logs and bolts as well as the lumber, veneer, or plywood consumed in the manufacture of baskets and boxes by the same establishment (see Table 7).

### 2441--Fruit and Vegetable Baskets

This industry comprises establishments primarily engaged in manufacturing till baskets, berry cups, climax baskets, round stave baskets, vegetable hampers, and splint or market baskets made primarily of veneer and splint for shipping and marketing fruits and vegetables. Establishments primarily engaged in manufacturing rattan and willow ware baskets other than fruit and vegetable baskets are classified in Industry 2442, Rattan and Willow Ware. For a detailed list of primary products of Industry 2441, refer to Table 6A, product codes 2441011 to 2441098.

The value of shipments of Industry 2441 in 1954 totaled \$31 million. This included shipments of primary products (fruit and vegetable baskets) valued at \$28 million, and shipments of secondary products valued at \$3 million. Miscellaneous receipts were negligible.

Industry 2441 shipments of fruit and vegetable baskets in 1954 represented 91 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was also 91 percent. Secondary products shipped by Industry 2441 in 1954 consisted mainly of wirebound boxes and box shoo for fruits and vegetables, \$2 million.

Industry 2441 shipments of fruit and vegetable baskets in 1954 represented 88 percent of the fruit and vegetable baskets, valued at \$32 million, shipped by all industries. This coverage ratio in 1947 was also 88 percent. Industry 2444, Wooden Boxes, is the principal other industry shipping fruit and vegetable baskets, \$3 million. Establishments in Industry 2441 produced 9 million feet, board measure, of rough lumber and 6 million square feet, 1" thickness basis, of veneer, 57 and 28 percent respectively of the total of these materials consumed in the fruit and vegetable baskets industry.

2442--Rattan and Willow Ware (Full Standard Industrial Classification Title: Rattan and Willow Ware, Except Furniture and Fruit and Vegetable Baskets)

This industry comprises establishments primarily engaged in manufacturing articles of rattan, reed, splint, veneer, and willow, such as laundry hampers, clothes baskets, market baskets, (except fruit and vegetable baskets--Industry 2441) and small articles such as trays, coasters, table pads, and willow bottle and demijohn covers. Establishments primarily engaged in manufacturing reed and rattan furniture are classified in Industry 2519, Household Furniture, Not Elsewhere Classified. For a detailed list of primary products of Industry 2442, refer to Table 6A, product codes 2442011 to 2442098.

The value of shipments of Industry 2442 in 1954 totaled \$11 million. This included shipments of primary products (rattan and willow ware) valued at \$10 million, and shipments of

secondary products valued at \$1 million. Miscellaneous receipts are negligible in this industry.

Industry 2442 shipments of rattan and willow ware in 1954 represented 91 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 89 percent.

Industry 2442 shipments of rattan and willow ware in 1954 represented 93 percent of the rattan and willow ware, valued at \$11 million, shipped by all industries. This coverage ratio in 1947 was also 93 percent.

### 2443--Cigar Boxes

This industry comprises establishments primarily engaged in manufacturing cigar boxes of wood, or partly of wood, in which cigars are packed for sale. Establishments primarily engaged in manufacturing paper cigar boxes are classified in Industry 2671, Paperboard Boxes.

The value of shipments of Industry 2443 in 1954 totaled \$8 million. This included shipments of primary products (cigar boxes) valued at \$8 million; shipments of secondary products are negligible in this industry.

Industry 2443 shipments of cigar boxes in 1954 represented 97 percent of its total product shipments (primary and secondary). In 1947 this primary product specialization ratio was 100 percent.

Industry 2443 shipments of cigar boxes in 1954 represented 94 percent of the cigar boxes, valued at \$8 million, shipped by all industries. This coverage ratio in 1947 was 85 percent. The principal other industry shipping cigar boxes is Industry 2671, Paperboard Boxes. The above data do not take into account any cigar boxes that may be produced by establishments in Cigars Industry 2121, for their own use.

2444--Wooden Boxes (Full Standard Industrial Classification Title: Wooden Boxes, Except Cigar Boxes)

This industry comprises establishments primarily engaged in manufacturing wooden boxes (nailed or wirebound, plain or fabric-covered), crates, cases, wooden shipping drums, and carrier trays. Establishments primarily engaged in manufacturing box shoo and wooden trunk slats from purchased lumber are also included in this industry, but establishments primarily engaged in manufacturing box shoo from logs or bolts are classified in Industry 2421, Sawmills and Planing Mills. Establishments primarily engaged in manufacturing fruit and vegetable baskets are classified in Industry 2441, cigar boxes in Industry 2443; and wooden outer burial boxes in Industry 3988, Morticians' Goods. Establishments primarily engaged in salvaging or reconditioning wooden boxes are excluded from manufacturing and classified in Trade Industries.

For a detailed list of primary products of Industry 2444, refer to Table 6A, product codes 2444111 to 2444698.

In this industry establishments were asked to report their shipments of completely assembled boxes and crates separately from their shipments of box shoo; box shoo was defined to include finished sections or panels. In addition, shipments of boxes and crates made from shoo produced at the establishment were to be reported separately from boxes and crates made from purchased shoo. These separate shipment data were requested in order to provide some indication of the amount of duplication that results when shoo are reported as shipped by one establishment and subsequently reported by the purchasing establishment which assembles them into boxes. Boxes and crates made in the consuming establishment are not included in any of the statistics for this industry.

Table 6A shows the total value of shipments of box shoo, including the shoo made by establishments classified in the

sawmill industry (Industry 2421), as well as the total value of shipments of assembled boxes and crates.

The value of shipments of Industry 2444 in 1954 totaled \$352 million. This included shipments of primary products (wooden boxes, except cigar boxes, and box shook) valued at \$324 million, shipments of secondary products, valued at \$25 million, and miscellaneous receipts of \$3 million.

Industry 2444 shipments of primary products represented 93 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 96 percent. Secondary products shipped by the industry in 1954 consisted mainly of dressed lumber, except flooring, \$4 million, millwork and related products, \$4 million; and miscellaneous turned and shaped wood products, \$4 million.

Industry 2444 shipments of primary products in 1954 represented 85 percent of these products, valued at \$381 million, shipped by all industries. This coverage ratio in 1947 was also 85 percent. In calculating these ratios, shipments of box shook produced from logs in establishments classified in Industry 2421, Sawmills, were treated as being primary to Industry 2444, thus understating the "coverage" of the wooden box industry in both years. If box shook made by sawmills and planing mills were excluded, the 1954 coverage ratio would be 94 percent.

The principal other manufacturing industry shipping wooden boxes and box shook in 1954 was Industry 2421, Sawmills and Planing Mills; its shipments of these products amounted to \$37 million. Of this total box shook accounted for \$35 million, 24 percent of the box shook shipped by all industries and wooden

boxes and crates, less than \$2 million. Box shook, and boxes and crates, made and consumed in the same establishment, are not included in the \$149 million, and \$232 million, value respectively of shipments reported for these products.

#### 2445--Cooperage

This industry comprises establishments primarily engaged in manufacturing barrels, kegs, tubs, hogsheads, pails, and other containers made of staves, except fruit and vegetable baskets (Industry 2441). Establishments primarily engaged in recoopering barrels and kegs are also included in Industry 2445, but establishments primarily engaged in manufacturing cooperage stock are classified in Industry 2424, Cooperage Stock Mills. Establishments primarily engaged in manufacturing tobacco hogsheads are classified in Industry 2444, (Wooden Boxes). For a detailed list of primary products of Industry 2445, refer to Table 6A product codes 2445111 to 2445241.

The value of shipments of Industry 2445 in 1954 totaled \$60 million. This included shipments of primary products (cooperage) valued at \$57 million, shipments of secondary products valued at \$2 million, and miscellaneous receipts of \$1 million.

Industry 2445 shipments of cooperage in 1954 represented 97 percent of its total product shipments (primary and secondary). In 1947 this primary product specialization ratio was 96 percent.

Industry 2445 shipments of cooperage in 1954 represented 99 percent of the cooperage valued at \$58 million, shipped by all industries. This coverage ratio in 1947 was 97 percent.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## WOODEN CONTAINERS

24C-3

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. <sup>3</sup> (\$1,000)	Value of shipments <sup>4</sup> (\$1,000)

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. (However, in the case of industry 2445 a different method was used for 1954: All employees represents the average of 12 monthly figures, and production workers was calculated by subtracting from the all employees total the average number of nonproduction employees for March, May, August and November). For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>Figures for years prior to 1935 do not include contract work.

<sup>4</sup>For 1929 and 1947-1954, value of shipments; for all other years, value of production. See Introduction, "Value of Shipments."

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>No comparable figures are available for earlier years.

<sup>7</sup>Rattan and willow ware, n.e.c. was formerly a part of the discontinued industry "Baskets and rattan and willow ware, not including furniture." Separate figures for earlier years are therefore not available.

## MANUFACTURES—INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Industry, region, and State <sup>1</sup>	1954											1947

Note: Detailed figures may not add to the totals because of independent rounding.

<sup>1</sup> D Withheld to avoid disclosing figures for individual companies.<sup>2</sup> General statistics for some producing States are not shown separately in the table (See INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954.

S.I.C. 2441, Fruit and Vegetable Baskets: New England—New Hampshire, 1 (1-10); Vermont, 1 (2-99); Massachusetts, 2 (2-99); Connecticut, 1 (1-19); Middle Atlantic—New York, 17 (250-499); Pennsylvania, 2 (1-19); North Central—Indiana, 2 (100-249); Wisconsin, 2 (1-19); Minnesota, 2 (1-19); Iowa, 2 (1-19); Nebraska, 1 (1-19); South Atlantic—Delaware, 1 (1-19); Maryland, 5 (100-249); South Carolina, 8 (100-249); Georgia, 5 (500-999); Florida, 3 (20-99); East South Central—Kentucky, 1 (1-19); Tennessee, 3 (100-249); Alabama, 5 (100-249); Mississippi, 3 (20-99); West South Central—Arkansas, 4 (500-999); Texas, 11 (500-999); West—Idaho, 1 (20-99); Colorado, 1 (1-19); California, 5 (100-249).

S.I.C. 2442, Rattan and Willow Ware, n.e.c.: New England—Maine, 1 (1-19); New Hampshire, 2 (20-99); Vermont, 1 (20-99); Massachusetts, 5 (20-99); Connecticut, 1 (20-99); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 6 (20-99); North Central—Ohio, 6 (20-99); Michigan, 1 (20-99); Wisconsin, 1 (1-19); Minnesota, 1 (1-19); South and West—Maryland, 2 (1-19); North Carolina, 4 (20-99); Georgia, 1 (1-19); Florida, 3 (1-19); Kentucky, 1 (1-19); Tennessee, 1 (20-99); Mississippi, 1 (1-19); California, 2 (1-19).

S.I.C. 2443, Cigar Boxes: Middle Atlantic—New York, 1 (1-19); New Jersey, 3 (100-249); North Central—Ohio, 1 (20-99); Indiana, 1 (1-19); Michigan, 1 (1-19); Wisconsin, 1 (1-19); Missouri, 1 (1-19); South—Maryland, 1 (1-19); North Carolina, 1 (1-19); South Carolina, 1 (20-99); Florida, 1 (100-249); Louisiana, 1 (1-19).

S.I.C. 2444, Wooden Boxes: New England—Vermont, 5 (250-499); Connecticut, 14 (250-499); West North Central—South Dakota, 2 (20-99); Nebraska, 6 (100-249); Kansas, 9 (100-249); South Atlantic—Delaware, 3 (20-99); West Virginia, 6 (100-249); East South Central—Kentucky, 1 (20-99); Tennessee, 16 (1-196); Louisiana, 16 (1,520, Oklahoma, 3 (20-99); West—Idaho, 7 (20-99); Colorado, 6 (250-499); New Mexico, 1 (1-19); Utah, 3 (20-99); Nevada, 1 (1-19).

S.I.C. 2445, Cooperage: New England—Maine, 13 (20-99); New Hampshire, 3 (100-249); Michigan, 5 (1-19); Wisconsin, 3 (20-99); West North Central—Minnesota, 4 (20-99); Iowa, 5 (20-99); Missouri, 6 (100-249); South Dakota, 1 (1-19); Nebraska, 1 (1-19); Kansas, 1 (1-19); South and West—West Virginia, 3 (1-19); Georgia, 1 (1-19); Florida, 1 (1-19); Kentucky, 4 (500-999); Tennessee, 5 (250-499); Alabama, 6 (20-99); Arkansas, 2 (100-249); Louisiana, 4 (20-99); Texas, 3 (1-19); Colorado, 1 (1-19); Washington, 2 (20-99); Oregon, 1 (20-99); California, 5 (20-99).

<sup>2</sup> Includes 654 employees and \$1,274 thousand in value added by manufacture for the South and West.

2445	Cooperage.....1954..	60,350	57,494	2,073	783	97	58,308	57,494	814	99
	1947..	106,379	99,222	4,662	2,495	96	101,981	99,222	2,759	97

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products (the primary products are listed in Table 6A; the first 4 digits of the product code represents the industry code to which the product is primary). <sup>2</sup>The coverage ratio measures the extent to which the products primary to the given industry are shipped by the industry.

## WOODEN CONTAINERS

24C-9

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading the value of shipments divided between wooden containers, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry)

Prod. class code		Fruit and vegetable baskets (S.I.C. 2441)	Rattan and willow ware (S.I.C. 2442)	Cigar boxes (S.I.C. 2443)	Wooden boxes (S.I.C. 2444)	Cooperage (S.I.C. 2445)	Sawmills and planing mills (S.I.C. 2421)	Other industries	All industries

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>Continuous and short stave baskets are assumed to have been included with other baskets (code 2441098) in 1947.<sup>2</sup>Data for 1947 include a small amount of fruit and vegetable shock. Data for 1954 do not include fruit and vegetable, meat, or poultry shock as none was reported.<sup>3</sup>Largely accounted for by small establishments that were not asked to report a breakdown of total shipments.<sup>4</sup>Includes barrels and kegs for beer, ale, spirits, and wine.

## MANUFACTURES--INDUSTRY STATISTICS

Table 6B.--VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

NOTE: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 24441, Kansas, South Carolina, Arizona, and Oregon; 24444, Iowa, Missouri, Virginia, South Carolina, Kentucky, Tennessee, Louisiana, Oregon, and California.

<sup>2</sup>Figures not available. In the years 1950-1953, nail and lock-corner boxes were classified according to end use; those for fruits and vegetables comprised one product class; those for industrial and other uses comprised another. Figures for the latter did not meet publication standards for the years 1950-1953. Figures for nail and lock-corner boxes for fruits and vegetables did not meet publication standards for 1953. Values for other years were: 1952, \$26,718; 1951, \$27,719; 1950, \$27,322.

<sup>3</sup>In addition to the value shown by product class for Industry 2444, Wooden Boxes, not specified by kind, in the value of \$28,580 thousand were reported for 1947 and \$14,573 thousand for 1954.

D Withheld to avoid disclosure

NA Not available.

<sup>1</sup>In 1947, establishments reported 25,741,000 board feet of lumber consumption. This total included lumber produced from logs and bolts and consumed at the same establishment as well as the lumber purchased and consumed at that establishment.

<sup>2</sup>1947 data were reported in terms of surface measure. In 1954 no quantity of veneer was reported as purchased by establishments classified by this industry.

<sup>3</sup>Less than \$100 thousand.

<sup>4</sup>Includes lumber produced from logs and bolts and consumed at the same establishment as well as lumber purchased and consumed at that establishment.

<sup>5</sup>Includes veneer produced from logs and bolts and consumed at the same establishment as well as veneer purchased and consumed at that establishment. The 1947 data also lack comparability on the basis of the unit measure used since in 1947 all veneer consumption was reported to terms of surface measure without conversion to a standard thickness.

<sup>6</sup>Includes plywood produced and consumed at the same establishment as well as plywood purchased and consumed at that establishment. The 1947 data were reported in terms of face area without conversion to a standard thickness.

<sup>7</sup>Consumption of lumber was reported separately as between hardwoods and softwoods, but the totals have been combined to avoid disclosure of the figures of individual companies. Hardwoods represented between 75 and 90 percent of these combined figures.

## WOODEN CONTAINERS

24C-15

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

<sup>1</sup>This class includes data for establishments with less than 50% specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Miscellaneous Wood Products

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2491—Wood Preserving	
2492—Lasts and Related Products	
2493—Mirror and Picture Frames	
2499—Wood Products, Not Elsewhere Classified	

### 2491—Wood Preserving

This industry comprises establishments primarily engaged in treating wood (sawed or planed in other establishments) with creosote or other preservatives to prevent decay and to protect against fire and insects. Establishments primarily engaged in manufacturing wood products which they may also treat with preservatives are not included in this industry.

In 1954, as in previous Census years, establishments in Industry 2491 reported, in addition to their receipts from sales and transfers of wood owned and treated by the establishment, their receipts for treating wood owned by other establishments. (Receipts in the latter category are shown in Table 5B.) However, in 1947, establishments in Industry 2491 had been instructed to include receipts for custom-treating in their product shipments and to arrive at a total "value of products shipped" by adding in the "estimated value of (such) wood before treatment." In order to determine the industry's value added by manufacture, these estimated values were also added to the cost of materials.

In recognition of the fact that estimates by Industry 2491 establishments of the value of wood owned by others, before treatment, could at best be approximated, a new method of reporting was adopted for the 1954 Census to secure more realistic estimates of the value of products shipped by the Wood Preserving Industry without sacrifice in the accuracy of Census estimates of the industry's value added by manufacture. In 1954 establishments in Industry 2491 were instructed to report, as product shipments, only their receipts from the sale and transfer of wood owned and treated by them; receipts for treating wood owned by others were to be reported as services performed on a custom basis. The effect of the change from 1947, in the statistics presented for Industry 2491, is to reduce the reported value of products shipped for a given level of economic activity, and to leave essentially unchanged the estimates of value added by manufacture. (See footnotes to Tables 1 and 5A, and for a restatement of product shipments on the new basis, see Table 6.)

The value of shipments of Industry 2491, Wood Preserving, in 1954 totaled \$190 million. This included shipments of primary products (shipments of wood owned and treated by the same establishment and receipts for treating wood owned by others) valued at \$181 million, shipments of secondary products valued at \$6 million, and miscellaneous receipts, \$3 million.

Industry 2491 shipments of primary products in 1954 represented 97 percent of its total shipments (primary and secondary). In 1947 this primary product specialization ratio was approximately the same.

Industry 2491 shipments of primary products in 1954 represented 99 percent of these products, valued at \$183 million, shipped by all manufacturing industries. This coverage ratio was approximately the same in 1947. The only other industry shipping any volume of treated wood products in 1954 was Industry 2421, Sawmills and Planing Mills, \$1 million.

### 2492—Lasts and Related Products

This industry comprises establishments primarily engaged in manufacturing lasts for boots and shoes, last sole patterns, shoe trees and stretchers, and display forms for boots and shoes, regardless of the material used. For a detailed list of primary products of Industry 2492, refer to Table 6, product codes 2492011 to 2492061.

The value of shipments of Industry 2492, Lasts and Related Products, in 1954 totaled \$12 million. This included shipments of primary products (lasts and related products) valued at nearly \$12 million; shipments of secondary products and miscellaneous receipts were negligible.

Industry 2492 shipments of lasts and related products in 1954 represented 99 percent of its total product shipments (primary and secondary). In 1947, this primary product ratio was approximately the same.

Industry 2492 shipments of lasts and related products in 1954 represented 95 percent of those products, valued at \$12 million, shipped by all industries. This coverage ratio was approximately the same in 1947.

### 2493—Mirror and Picture Frames (Full Standard Industrial Classification Title: Mirror Frames and Picture Frames)

This industry comprises establishments primarily engaged in manufacturing finished picture-frame moldings; in manufacturing frames for mirrors, pictures, photographs, and medallions; and in framing pictures for the trade.

Establishments primarily engaged in manufacturing mirror glass are classified in Industry 3231, Glass Products Made of Purchased Glass. Establishments primarily engaged in the framing of pictures to individual order are classified as non-manufacturing. For a detailed list of primary products of Industry 2493, refer to Table 6, product codes 2493011 to 2493051.

Some duplication occurs in reporting the value of products and cost of materials for this industry, since the value of finished moldings or frames is, in some cases, duplicated in the cost of materials and value of shipments reported by manufacturers of assembled framed pictures. The extent of such duplication cannot be determined on the basis of the information reported.

The value of shipments of Industry 2493, Mirror and Picture Frames, in 1954 totaled \$48 million. This included shipments of primary products (mirror and picture frames) valued at \$42 million, shipments of secondary products valued at \$5 million, and miscellaneous receipts of \$1 million.

Industry 2493 shipments of mirror and picture frames in 1954 represented 89 percent of its total product shipments (primary and secondary). In 1947, this primary products specialization ratio was also 89 percent. Secondary products shipped by Industry 2493 in 1954 consisted mainly of mirrors and other glass products made of purchased glass, \$2 million, and wood household furniture, except upholstered, \$2 million.

Industry 2493 shipments of mirror and picture frames in 1954 represented 93 percent of the mirror and picture frames valued at \$45 million, shipped by all manufacturing industries. This coverage ratio in 1947 was 92 percent. The balance of the production of mirror and picture frames is distributed over many manufacturing industries, principally those in Major Group 24, Lumber and Wood Products, and Major Group 25, Furniture and Fixtures, with no single industry accounting for a significant percentage. (As previously noted, the above data exclude the

production of mirror and picture frames to individual order by establishments in trade industries. The volume of such production is not known.)

#### 2499—Wood Products, Not Elsewhere Classified

This industry comprises establishments primarily engaged in turning and shaping wood and manufacturing miscellaneous wood products not elsewhere classified, such as wooden abacuses, bakers' wooden equipment, battery separators, carvings, clothespins, clothwinding reels, cross arms, dishes and other household and kitchen woodenware, dowels and dowel pins, flagpoles, wood flour, furniture turnings, wooden handles, garment hangers, ladders, letters, marquetry, oars, pegs, pencil slats, potato mashers, rolling pins, scaffolds, stepladders, tailors' pressing blocks, toilet seats, toothpicks, trays, inlaid veneer work, washboards (wooden and part wooden), wood pallets and skids, curtain stretchers, fences and gates, pump rods, rulers, signboards, and snow fence. For a list of the primary products of Industry 2499 on which detailed statistics have been reported in 1954, refer to Table 6, product codes 2499111 to 2499498.

The definition of Industry 2499 has been broadened significantly since 1947. In 1954, establishments primarily engaged in producing the following two important product items were transferred to Industry 2499 by the Bureau of the Budget in amendments to the Standard Industrial Classification: wood pallets and skids, including wood and metal combination (previously classified in Industry 3565, Industrial Trucks and Tractors) and snow fence (previously classified in Industry 2421, Sawmills and Planing Mills). Establishments primarily engaged in manufacturing textile machinery turnings and shapes (bobbins, spools, shuttles, picker sticks, etc.) formerly included in Industry 2499 are now classified in Industry 3552, Textile Machinery. Since the values of the products added to Industry 2499 were not reported separately in 1947, the 1947 data cannot be retabulated to reflect these changes. The statistics for Industry 2499 shown in Tables 1-5 are therefore not strictly comparable for 1954 and 1947.

Establishments primarily engaged in manufacturing the following turned and shaped wood products and miscellaneous wood products are classified outside Major Group 24:

<u>Product Description</u>	<u>Industry Classification</u>
Wood blocks for engravers	3555—Printing-Trades Machinery
Wood costume jewelry	3961—Costume Jewelry
Wood heels and heel blocks	3131—Footwear Cut Stock
Wood patterns, industrial	3594—Industrial Patterns and Molds
Wooden shoes	3141—Footwear, Except Rubber
Wooden toys, exc. dolls & children's vehicles	3941—Games and Toys, N.E.C.
Wooden wagons & other children's vehicles	3943—Children's Vehicles

The value of shipments of Industry 2499, Wood Products, N.E.C., in 1954 totaled \$330 million. This included shipments of primary products (wood products, n.e.c.) valued at \$298 million, shipments of secondary products valued at \$29 million, and miscellaneous receipts of \$3 million.

Industry 2499 shipments of primary products in 1954 represented 91 percent of its total product shipments (primary and secondary). In 1947 this primary product specialization ratio was 87 percent. Secondary products shipped by Industry 2499 in 1954 consisted mainly of rough and dressed lumber and hardwood dimension stock, \$5 million; wooden boxes, \$3 million; wood household furniture, except upholstered, \$2 million; millwork, \$2 million; games and toys, \$2 million; and plastic products, n.e.c., \$2 million.

Industry 2499 shipments of primary products (wood products, n.e.c.) in 1954 represented 87 percent of these products, valued at \$340 million, shipped by all industries. This coverage ratio in 1947 was 94 percent. Other industries shipping wood products, n.e.c., in 1954 consisted mainly of Industry 2421, Sawmills and Planing Mills, \$9 million; Industry 2444, Wooden Boxes (Except Cigar Boxes), \$5 million; Industry 2541, Partitions and Fixtures, \$5 million; and Industry 2511, Wood Household Furniture, Except Upholstered, \$4 million.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MISCELLANEOUS WOOD PRODUCTS

## MANUFACTURES--INDUSTRY STATISTICS

Table 1.--GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS--Continued

(For explanation of column captions see Introduction)

Industry and census year	Establish- ments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments <sup>3</sup> (\$1,000)
		Number <sup>1</sup>	Payroll (\$1,000)	Number <sup>1</sup>	Wages (\$1,000)			
Wood products, n.e.c. (S.I.C. 2499):								
1954.....	2,103	38,600	107,357	34,318	85,438	172,961	156,790	329,758
1953 <sup>4</sup> .....	(NA)	37,264	106,802	33,520	86,808	170,322	150,534	320,856
1952 <sup>5</sup> .....	(NA)	42,830	124,646	38,829	103,776	199,897	192,195	392,092
1951 <sup>6</sup> .....	(NA)	43,492	120,350	39,605	99,351	197,541	191,269	383,810
1950 <sup>5</sup> .....	(NA)	41,220	103,877	37,571	86,848	171,339	151,950	323,289
1949 <sup>5</sup> .....	(NA)	44,058	92,777	41,652	72,162	133,761	127,975	261,736
1947.....	1,813	43,523	92,831	39,771	78,454	144,135	132,940	277,075
1939 <sup>6</sup> .....	917	(NA)	(NA)	23,721	19,444	43,593	34,115	77,708

NA Not available.

<sup>1</sup>The number of "All employees" and the number of "production and related workers" were obtained as follows: For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1929 and 1947-1954, the figures represent value of shipments except for "Wood Preserving" where they represent value of receipts; for all other years, the figures represent value of production. (See Introduction, "Value of shipments.")

<sup>4</sup>For "Wood preserving," the statistics for cost of materials and value of products for 1954 are not comparable with those for 1927-1953, but they are comparable with those for 1899-1925. The differences occur because statistics for 1927-1953 included an estimated value of forest products treated but not owned by the reporting establishments, whereas in 1954 and in the 1899-1925 period the statistics include only the value of wood owned by the reporting establishments.

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>Figures for prior years are not sufficiently comparable to be shown in this table.

## MISCELLANEOUS WOOD PRODUCTS

Note: Detailed figures may not add to the totals because of independent rounding.

<sup>1</sup> D Withheld to avoid disclosing figures for individual companies.<sup>2</sup> General statistics for some producing States are not shown separately in the table (see Introduction "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2491, Wood Preserving: Northeast—New Hampshire, 1 (100-249); Massachusetts, 1 (1-19); Connecticut, 1 (1-19); Pennsylvania, 5 (100-249); East North Central—Illinois, 11 (250-499); Michigan, 1 (1-19); Wisconsin, 2 (20-99); West North Central—Iowa, 1 (20-99); South Dakota, 3 (20-99); South Atlantic—Delaware, 1 (20-99); Maryland, 3 (100-249); West Virginia, 3 (20-99); North Carolina, 13 (250-499); East South Central—Kentucky, 6 (250-499); Tennessee, 5 (100-249); Mountain—Idaho, 9 (100-249); Wyoming, 2 (100-249).

S.I.C. 2492, Laths and Related Products: Northeast—New Hampshire, 3 (20-99); Pennsylvania, 2 (1-19); East North Central—Ohio, 3 (100-249); Indiana, 1 (1-19); Illinois, 1 (1-19).

S.I.C. 2493, Mirror and Picture Frames: New England—Maine, 2 (1-19); New Hampshire, 1 (1-19); Massachusetts, 16 (250-499); Rhode Island, 2 (1-19); Connecticut, 3 (1-19); Middle Atlantic—Pennsylvania, 7 (20-99); East North Central—Ohio, 6 (20-99); Indiana, 4 (100-249); Michigan, 10 (100-249); Wisconsin, 5 (1-19); West North Central—Minnesota, 2 (1-19); Iowa, 1 (1-19); Missouri, 8 (20-99); Nebraska, 1 (1-19); South Atlantic—Maryland, 3 (20-99); District of Columbia, 2 (1-19); Virginia, 5 (20-99); West Virginia, 1 (1-19); North Carolina, 2 (1-19); South Carolina, 1 (1-19); Florida, 5 (1-19); East South Central—Kentucky, 3 (20-99); Tennessee, 2 (1-19); Alabama, 1 (1-19); Mississippi, 1 (100-249); West South Central—Oklahoma, 1 (1-19); Texas, 4 (1-19); Mountain—Colorado, 2 (1-19); New Mexico, 1 (1-19); Utah, 1 (1-19); Pacific—Washington, 3 (1-19); Oregon, 3 (20-99).

S.I.C. 2499, Wood Products, N.E.C.: New England—Maine, 105 (5,000-9,999); Rhode Island, 8 (20-99); West North Central—Minnesota, 29 (250-499); Iowa, 9 (100-249); South Dakota, 3 (1-19); Nebraska, 3 (250-499); Kansas, 3 (1-19); South Atlantic—Delaware, 1 (20-99); West Virginia, 14 (250-499); North Carolina, 6 (20-99); East South Central—Alabama, 28 (250-499); Mississippi, 23 (500-999); West South Central—Oklahoma, 11 (20-99); Texas, 59 (500-999); Mountain—Montana, 4 (20-99); Idaho, 3 (1-19); Colorado, 7 (20-99); Arizona, 3 (1-19); Utah, 2 (1-19); Pacific—Washington, 38 (250-499); Oregon, 49 (500-999).

## MISCELLANEOUS WOOD PRODUCTS

Note: Detailed figures may not add to the totals because of independent rounding.

xxx Not applicable. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than \$500 thousand. <sup>4</sup>Less than 500 tons.

<sup>5</sup>Less than 500 hp.

## MANUFACTURES--INDUSTRY STATISTICS

Table 4.--SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

(D) Withheld to avoid disclosing information for individual companies.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>See Table 1, footnote 4.

## MANUFACTURES--INDUSTRY STATISTICS

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

xxx Not applicable.

NA Not available.

<sup>1</sup>Finished molding for mirrors and pictures is included with other mirror and picture products.<sup>2</sup>Largely accounted for by small establishments that were not asked to report a breakdown of total shipments.<sup>3</sup>For this product class the 1954-1947 totals are not strictly comparable, since product reclassification has resulted in the transfer to Industry 2499 of several items—notably pallets and skids (product codes 2499461 through 2499467)—for which shipments were not reported separately in 1947, thus preventing any retabulation of the 1947 data to reflect such changes.<sup>4</sup>In 1947 wooden reels for wire and cable and toilet seats (regardless of materials used) were included with miscellaneous wooden goods and turnings, not reported elsewhere.<sup>5</sup>Includes a large variety of miscellaneous wood turnings and other wood products. The major items included are dowels and dowel pins, pencil slats, toothpicks, clothespins, pegs, spools, and wood flour.

## MANUFACTURES—INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Major Group 25.—Furniture and Fixtures

This major group includes establishments engaged in manufacturing household, office, public-building, professional, and restaurant furniture, office and store fixtures, and window and door screens and shades, and venetian blinds, regardless of the materials used. Establishments primarily engaged in manufacturing special furniture for use in beauty and barber shop

are classified in Industry 3991, Beauty and Barber-shop Equipment. Establishments primarily engaged in the production of millwork are classified in Industry 2431, and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.

Table 1.—GENERAL STATISTICS FOR THE INDUSTRY GROUP: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Year <sup>1</sup>	Establishments, number	All employees <sup>2</sup>		Production workers			Value added by manufacture <sup>3</sup>	Capital expenditures, new	Horsepower of prime movers and electric motors <sup>4</sup>

1899.....	2,614	(NA)	(NA)	98,414		40,298	82,259		

NA Not available.

<sup>1</sup>In addition to data for operating establishments, manufacturers' central administrative offices and auxiliary units reported 1,749 employees with a payroll of \$13,309 thousand in 1954. Similar data are shown for the years 1949-1953 in Annual Survey of Manufactures volumes. Data for these units are not available for the years prior to 1949.

<sup>2</sup>The figures for 1939 through 1954 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>3</sup>Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1899-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

<sup>4</sup>Driven by purchased energy.

<sup>5</sup>The figures for 1939-1954 include data for establishments primarily engaged in manufacture of metal partitions, classified for earlier years in the fabricated metal products industries. Value added by manufacture for 1939, excluding data for these establishments, was \$410.7 million.

<sup>6</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>7</sup>The figures for 1937 and later years include data for establishments primarily engaged in manufacture of venetian blinds, included for earlier years in the series for the lumber and products, except furniture industries. Value added by manufacture for 1937, excluding data for these establishments and therefore on a basis comparable with 1935, was \$417.7 million.

<sup>8</sup>The figures for 1899-1925 do not include data for establishments primarily engaged in manufacture of sewing machine cases, cabinets, and tables, classified for these years in the machinery (except electrical) industries.

<sup>9</sup>The figures for 1899-1909 do not include data for establishments primarily engaged in manufacture of window and door screens, included for these years in the series for the lumber and products, except furniture industries. Value added by manufacture for 1914, excluding data for these establishments and on a basis comparable with 1909, was \$169.4 million.

## MANUFACTURES—INDUSTRY STATISTICS

## FURNITURE AND FIXTURES

25-5

Table 2.—GENERAL STATISTICS FOR INDUSTRY GROUPS BY REGIONS AND STATES: 1954 AND 1947—Con.

(For explanation of column captions see Introduction)

Industry group, region, and State <sup>1</sup>	1954								1947	
	Number of establish- ments	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendi- tures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
		Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)				
Furniture and fix- tures, n.e.c. (S.I.C. Group 259)—Continued										
East North Central.....	34	1,043	3,930	878	1,792	2,878	6,719	( <sup>2</sup> )	1,386	7,034
Illinois.....	10	308	1,143	278	549	900	2,010	( <sup>2</sup> )	900	4,720
Michigan.....	10	127	513	101	208	341	1,046	( <sup>2</sup> )	191	892
Wisconsin.....	4	491	1,840	406	864	1,336	3,073	(D)	(D)	(D)
West North Central.....	24	909	3,548	738	1,425	2,559	4,254	( <sup>2</sup> )	750	3,306
Missouri.....	14	785	3,096	634	1,227	2,222	3,383	( <sup>2</sup> )	(D)	(D)
South Atlantic.....	10	210	670	174	304	455	1,202	( <sup>2</sup> )	312	805
East South Central.....	6	40	118	34	67	81	270	( <sup>2</sup> )	64	131
West South Central.....	16	237	818	171	382	569	1,550	( <sup>2</sup> )	104	645
West.....	41	413	1,803	354	685	1,354	2,417	(D)	424	2,277
California.....	32	314	1,310	273	524	1,046	1,746	( <sup>2</sup> )	(D)	(D)

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>Each producing state not shown separately has been withheld either (a) to avoid disclosing figures for individual companies; or (b) because the state had less than 100 employees in the industry group. Such State figures are included, however, in the appropriate regional and United States totals.<sup>2</sup>Less than \$500 thousand.<sup>3</sup>This industry sub-group consists of a single four-digit industry. Detailed data by state are included in the four-digit industry tables.

Note: Detailed figures may not add to totals because of independent rounding.

## Household Furniture

This report shows 1954 Census of Manufactures statistics for establishments primarily engaged in manufacturing household furniture classified into each of the following industries:

<u>Code</u>	<u>Title</u>
2511—Wood House Furniture, Not Upholstered	
2512—Upholstered Household Furniture	
2514—Metal Household Furniture	
2515—Mattresses and Bedsprings	
2519—Household Furniture, Not Elsewhere Classified	

Establishments primarily engaged in making furniture to order of individual household consumers or primarily engaged in renovating furniture or mattresses are classified in nonmanufacturing industries. Establishments primarily engaged in making furniture parts (except wood frames or headboards) are not included in this group of industries but are generally classified in Major Group 24, Lumber and Wood Products or Major Group 34, Fabricated Metal Products. For example, furniture turnings are included in Industry 2499, Wood Products, N.E.C., and furniture hardware including casters are included in Industry 3429, Hardware, N.E.C.

As a group, the industries included in this report specialize in the production of household furniture and account for practically all (95 percent) of the household furniture produced. Shipments of products, other than household furniture, by the household furniture industries are very small amounting to but 4 percent of the total shipments. However, specialization by individual industries in the production of those products belonging to the particular industry varies from a high of 94 percent for Industry 2511 and Industry 2512 to a low of 77 percent for Industry 2515.

**2511—Wood Furniture, Not Upholstered** (Full Standard Industrial Classification Title: Wood Household Furniture, Except Upholstered)

This industry comprises establishments primarily engaged in manufacturing wood household furniture commonly used in dwellings. This industry also includes wooden cases and cabinets for radios and sewing machines, kitchen cabinets, camp furniture, nursery furniture, headboards for hollywood beds, and smoking stands. Establishments primarily engaged in manufacturing upholstered furniture or wood frames for upholstered furniture are classified in Industry 2512, Household Furniture, Upholstered, and reed and rattan furniture in Industry 2519, Household Furniture, N.E.C. Plants primarily engaged in renovating or refinishing furniture are classified in trade industries and plants selling household furniture to household consumers through a retail store on the manufacturing premises, are included in retail trade. For a detailed list of primary products of industry 2511, refer to Table 6A, product codes 2511111 to 2511998.

The value of shipments of Industry 2511, Wood House Furniture, Not Upholstered, in 1954 totaled \$1,113 million. This included shipments of primary products (wood house furniture, not upholstered) valued at \$1,036 million, shipments of secondary products valued at \$72 million, and miscellaneous receipts of \$5 million.

Industry 2511 shipments of wood house furniture, not upholstered in 1954 represented 94 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was also 94 percent. Secondary products shipped by this industry in 1954 consisted mainly of upholstered wood household furniture, about \$28 million, and other household furniture, \$7 million.

Industry 2511 shipments of wood house furniture, not upholstered, in 1954 represented 93 percent of the wood house furniture, not upholstered, valued at \$1,113 million shipped by all industries. The comparable 1947 coverage ratio was 94 percent. Other industries shipping wood house furniture, not upholstered, consisted mainly of Industry 2431, Millwork Plants, \$22 million most of which was wood kitchen cabinet Industry 2512, and Household Furniture, Upholstered, \$19 million.

**2512—Household Furniture, Upholstered** (Full Standard Industrial Classification Title: Wood Household Furniture, Upholstered)

This industry comprises establishments primarily engaged in manufacturing upholstered furniture on wood frames, or manufacturing wood frames for upholstered furniture. Shops primarily engaged in reupholstering furniture, or upholstering frames to individual order are classified in nonmanufacturing industries. Establishments primarily engaged in manufacturing dual purpose sleep furniture, such as studio couches, convertible sofas, jackknife sofa beds, and chair beds, are classified in this industry regardless of the materials used in the frame. For a detailed list of primary products of Industry 2512, refer to Table 6A, product codes 2512111 to 2512611.

The S.I.C. definition for this industry has been amended by the Bureau of the Budget to include dual purpose sleep furniture in Industry 2512 rather than in Industry 2514. This is generally consistent with earlier Census practice and, therefore, the 1954 Census data are comparable with the earlier years.

The value of shipments of Industry 2512, Upholstered Household Furniture, in 1954 totaled \$633 million. This included shipments of primary products (household furniture, upholstered) valued at \$590 million, shipments of secondary products valued at \$39 million, and miscellaneous receipts of \$4 million.

Industry 2512 shipments of upholstered household furniture in 1954 represented 94 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 92 percent. Secondary products shipped by this industry in 1954 consisted mainly of wood household furniture, not upholstered \$18 million, mattresses and bedsprings, \$14 million.

Industry 2512 shipments of upholstered household furniture, in 1954 represented 85 percent of the upholstered household furniture, valued at \$690 million shipped by all industries. The comparable 1947 coverage ratio was 83 percent. Other industries shipping upholstered household furniture, consisted mainly of Industry 2515, Mattresses and Bedsprings, \$66 million, and Industry 2511, Wood House Furniture, Not Upholstered, \$29 million. Industry 2512 products produced in other furniture industries was mainly dual purpose sleep furniture of which 55 percent of the total of \$100 million was produced by plants primarily producing mattresses and bedsprings.

**2514—Metal House Furniture** (Full Standard Industrial Classification Title: Metal Household Furniture)

This industry comprises establishments primarily engaged in manufacturing metal household furniture of a type commonly used in dwellings, whether padded, upholstered, or plain. Establishments primarily engaged in manufacturing dual purpose furniture, such as studio couches, sofa beds, and chair-beds are classified in Industry 2512, Household Furniture, Upholstered, regardless of the materials used in the frame. For a detailed list of primary products of Industry 2514, refer to Table 6A, product codes 2514111 to 2514598.

The S.I.C. definition for this industry has been amended by the Bureau of the Budget to include dual purpose furniture in Industry 2512 rather than in Industry 2514. This is generally consistent with earlier Census practice and, therefore, the 1954 Census data are comparable with earlier years.

The value of shipments of Industry 2514, Metal House Furniture, Not Upholstered, in 1954 totaled \$403 million. This included shipments of primary products (metal house furniture, not upholstered) valued at \$344 million, shipments of secondary products valued at \$54 million, and miscellaneous receipts of \$5 million.

Industry 2514 shipments of metal house furniture, not upholstered in 1954 represented 87 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 83 percent. Secondary products shipped by this industry in 1954 consisted mainly of mattresses and bedsprings, \$4 million, and Public Building Furniture, \$4 million.

Industry 2514 shipments of metal house furniture, not upholstered, in 1954 represented 83 percent of the metal house furniture, not upholstered, valued at \$416 million shipped by all industries. The comparable 1947 coverage ratio was 73 percent. Other industries shipping metal house furniture, not upholstered, consisted mainly of Industry 3431, Metal Plumbing Fixtures and Fittings, Industry 3729, Aircraft Equipment N.E.C.; and Industry 2541, Partitions and Fixtures, whose total shipments of these products amounted to \$20 million.

#### 2515--Mattresses and Bedsprings

This industry comprises establishments primarily engaged in manufacturing mattresses (including foam-rubber and box-spring mattresses); assembled wire springs (fabric, coil, or box) for use on beds, couches, and cots; and spring cushions. Establishments primarily engaged in manufacturing individual wire springs are classified in Industry 3489; Wirework, N.E.C., padding and upholstery filling in Industry 2293, Padding and Upholstery Filling; quilted mattresses protectors in Industry 2392, Housefurnishings, N.E.C.; and, latex foam rubber mattress cores in Industry 3099, Rubber Industries, N.E.C. Establishments primarily engaged in repair, renovating, etc., mattresses and bedsprings are classified in service industries. For a detailed list of primary products of Industry 2515, refer to Table 6A, product codes 2515111 to 2515271.

Minor changes in the content of this industry have been made since 1947: (1) establishments primarily engaged in manufacturing hospital bedsprings formerly included in Industry 2532, Professional Furniture, are now included in this industry; and, (2) headboards for hollywood beds formerly included in this industry are now classified in Industry 2511, Wood House Furniture, Not Upholstered. These changes have a relatively insignificant effect on the comparability of the 1954 Census data with the data for earlier years.

The value of shipments of Industry 2515, Mattresses and Bedsprings, in 1954 totaled \$465 million. This included shipments of primary products (mattresses and bedsprings) valued at \$351 million, shipments of secondary products valued at \$108 million, and miscellaneous receipts of \$6 million.

Industry 2515 shipments of mattresses and bedsprings in 1954 represented 77 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 76 percent. Secondary products shipped by this industry in 1954 consisted mainly of dual purpose sleep furniture, \$55 million, and metal beds, cots, and other metal house furniture, \$10 million.

Industry 2515 shipments of mattresses and bedsprings in 1954 represented 91 percent of the mattresses and bedsprings valued at \$386 million shipped by all industries. The comparable 1947 coverage ratio was 93 percent. Other industries shipping mattresses and bedsprings consisted mainly of Industry 2512, Household Furniture, Upholstered, \$14 million, Industry 3099, Rubber Industries, N.E.C., over \$5 million and Industry 2514, Metal House Furniture, \$3 million.

#### 2519--Household Furniture, Not Elsewhere Classified

This industry comprises establishments primarily engaged in manufacturing reed, rattan, fiber, willow, and other wicker furniture, whether padded or plain; and those manufacturing other household furniture (except wood and metal), such as plastic radio, phonograph, and TV cabinets, and wood framed paperboard storage cabinets and wardrobes. For a detailed list of primary products of Industry 2519, refer to Table 6A, product codes 2519111 to 2519398.

The S.I.C. definition for this industry has been amended by the Bureau of the Budget to include all of former S.I.C. Industry 2513, Reed and Rattan Furniture. Earlier Census data have been retabulated and are comparable with the 1954 Census.

The value of shipments of Industry 2519, Household Furniture, N.E.C., in 1954 totaled \$16 million. This included shipments of primary products (household furniture, n.e.c.) valued at \$13 million, shipments of secondary products valued at \$2 million, and miscellaneous receipts of \$1 million.

Industry 2519 shipments of household furniture, n.e.c. in 1954 represented 86 percent of its total product shipments (primary and secondary). In 1947, the primary product specialization ratio was 83 percent.

Industry 2519 shipments of household furniture, n.e.c., in 1954 represented 59 percent of the household furniture, n.e.c., valued at \$22 million shipped by all industries. The 1947 comparable coverage ratio was 71 percent. Other industries shipping household furniture, n.e.c., consisted mainly of Industry 3971, Plastics Products, N.E.C., which shipped approximately \$7 million of plastic radio, phonograph and television cabinets.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## HOUSEHOLD FURNITURE

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>Figures prior to 1935 do not include cost of contract work.

<sup>4</sup>For 1929 and 1947-1954, value of shipments; for all other years, value of production. See Introduction, "Value of Shipments."

<sup>5</sup>In this industry, which contains a large number of very small establishments, there is a possibility that some of these small establishments have been misclassified as to industry. This would not affect the statistics other than the number of establishments.

<sup>6</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>7</sup>The figures for 1939 are not entirely comparable with earlier years. Value added by manufacture for 1939 on a basis comparable with 1937 was \$62.7 million for "Household furniture, upholstered." No comparable figures are available for "Wood house furniture, except upholstered," and "Metal house furniture, except upholstered" prior to 1939.

<sup>8</sup>Upholstered household furniture" was formerly a part of the discontinued classification "Furniture, including store and office fixtures." Separate figures are therefore not available prior to 1937.

<sup>9</sup>The figures for 1899-1925 include data for establishments engaged primarily in renovating mattresses.

<sup>10</sup>Reed and rattan furniture, reported as a separate industry (2513) in 1947, is now included in Industry 2519. The returns for 1947 have been retabulated to provide figures comparable for 1954. No comparable figures are available for prior years.

## MANUFACTURES—INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Industry, region, and State <sup>1</sup>	1954											1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (See INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2511, Wood Furniture, not Upholstered: West North Central—Minnesota, 30 (500-999); Iowa, 17 (500-999); North Dakota, 2 (20-99); South Dakota, 3 (20-99); Kansas, 4 (20-99); South Atlantic—Delaware, 1 (1-19); District of Columbia, 2 (1-19); Mountain—Montana, 5 (1-19); Idaho, 2 (1-19); Wyoming, 2 (1-19); Colorado, 23 (20-99); New Mexico, 6 (20-99); Nevada, 1 (1-19).

S.I.C. 2512, Upholstered Household Furniture: New England—Vermont, 5 (1-19); Rhode Island, 3 (20-99); West North Central—Nebraska, 11 (250-499); Kansas, 4 (20-99); Mountain—Idaho, 2 (1-19); Wyoming, 1 (1-19); Arizona, 3 (20-99); Nevada, 1 (1-19).

S.I.C. 2514, Metal Household Furniture: New England—New Hampshire, 1 (20-99); Massachusetts, 31 (500-999); Rhode Island, 2 (1-19); Connecticut, 10 (250-499); West North Central—Minnesota, 1 (1-19); Iowa, 2 (1-19); Nebraska, 1 (1-19); South Atlantic—Maryland, 14 (500-999); West Virginia, 1 (1-19); North Carolina, 10 (100-249); Georgia, 10 (500-999); East South Central—Alabama, 9 (100-249); Mississippi, 1 (100-249); West South Central—Arkansas, 2 (100-249); Louisiana, 2 (20-99); Texas, 16 (250-499); Mountain—Idaho, 1 (1-19); Colorado, 1 (1-19); New Mexico, 1 (1-19); Arizona, 2 (1-19); Pacific—Washington, 5 (100-249); Oregon, 1 (1-19).

S.I.C. 2515, Mattresses and Bed-springs: New England—New Hampshire, 3 (20-99); Vermont, 2 (1-19); Middle Atlantic—New York, 172 (2,500-4,999); Pennsylvania, 55 (1,000-2,499); North Central—Indiana, 20 (250-499); Illinois, 59 (3,564); Michigan, 36 (500-999); North Dakota, 1 (1-19); South Dakota, 2 (1-19); District of Columbia, 5 (100-249); West Virginia, 8 (100-249); Alabama, 19 (250-499); Mississippi, 6 (20-99); Arkansas, 12 (20-99); Mountain—Montana, 2 (1-19); Nevada, 2 (1-19); Pacific—Washington, 11 (100-249); Oregon, 8 (20-99).

S.I.C. 2519, Household Furniture, n.e.c.: New England—New Hampshire, 1 (1-19); Massachusetts, 3 (20-99); Connecticut, 1 (1-19); Middle Atlantic—New York, 18 (250-499); Pennsylvania, 1 (1-19); North Central—Indiana, 2 (1-19); Illinois, 5 (250-499); Michigan, 1 (1-19); Iowa, 1 (100-249); South Atlantic—Maryland, 1 (1-19); North Carolina, 2 (20-99); Georgia, 1 (1-19); Mississippi, 1 (1-19); Louisiana, 1 (20-99); Texas, 1 (1-19).

## HOUSEHOLD FURNITURE

25A-7

Table 3.—DETAILED STATISTICS FOR THE UNITED STATES: 1954

(For explanation of line captions see Introduction)

Item	Wood furniture, not upholstered (S.I.C. 2511) all estab- lishments	Upholstered wood furniture (S.I.C. 2512) all estab- lishments	Metal household furniture (S.I.C. 2514)

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not available. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than 500 tons. <sup>4</sup>Less than \$500. <sup>5</sup>Less than 500 thousand kwh. <sup>6</sup>Less than \$500 thousand. <sup>7</sup>Less than 500 hp.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## HOUSEHOLD FURNITURE

25A-11

Table 5B.—INDUSTRY-PRODUCT ANALYSIS--SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading, the value of shipments divided between household furniture, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry)

Prod. class code	Class of products and miscellaneous receipts	Wood furniture, not upholstered (S.I.C. 2511)	Upholstered household furniture (S.I.C. 2512)	Metal household furniture (S.I.C. 2514)	Mattresses and bedsprings (S.I.C. 2515)	Household furniture, n.e.c. (S.I.C. 2519)	Millwork plants (S.I.C. 2431)	Other industries	All industries

xxx Not applicable.

NA Not available.

<sup>1</sup>Includes suites (sofa, davenport, and one or more chairs) and sofas and davenports, except upholstered.<sup>2</sup>Shipments of wood dining room furniture in 1947 were reported as follows: Dining room suites, \$68,001,000; dining room sets (tables and chairs), \$21,995,000; tables sold separately, \$9,784,000; chairs sold separately, \$5,365,000; buffets and servers sold separately, \$4,809,000; and china and corner cabinets sold separately, \$2,614,000.<sup>3</sup>Direct comparisons of 1954-1947 data are not possible since shipments reported for this product line in 1947 were restricted to assembled cabinets and other cabinets (not to be built-in). In 1947, shipments of unassembled cabinets and cabinets to be combined with other units to form a built-in unit were treated as products primary to the Millwork Industry, code 2431411.<sup>4</sup>Shipments of wood bedroom furniture in 1947 were reported as follows: Bedroom suites, \$281,890,000; beds (excluding headboards and headboards beds), \$14,517,000; dressers, vanities and dressing tables, \$10,338,000; and chests of drawers, wardrobes, etc., \$15,864,000.<sup>5</sup>Shipments of headboards and headboard beds in 1947 were included with "Other bedding products, not specified by kind" (Industry 2515).<sup>6</sup>Shipments of infants' cradles and youth beds in 1947 were included with infants' cribs (code 2511611).<sup>7</sup>Largely accounted for by shipments of small establishments that were not asked to report a breakdown of their total shipments.<sup>8</sup>Includes a small amount of metal household upholstered furniture.<sup>9</sup>Represents shipments of suites valued at \$186,441,000, sofas, davenports, etc., sold as separate pieces valued at \$49,006,000, and chairs sold separately valued at \$81,503,000. In 1954, manufacturers were asked to report these items on the respective product lines, without regard to whether the items were actually sold in sets or as separate pieces.<sup>10</sup>Represents dining room chairs.<sup>11</sup>The data shown for these products are subject to some reporting discrepancies, inasmuch as evidence appears to indicate that the distinction between "convertible sofas" and "jackknife sofa beds" was not consistently drawn by manufacturers reporting shipments of these items.<sup>12</sup>Tubular metal and other metal table and chairs (not sold with a set) are included with metal kitchen furniture (product codes 2514251 and 71 - chairs, stools and tables).<sup>13</sup>Includes an indeterminate amount of metal bed frames.<sup>14</sup>Metal household upholstered furniture in 1947 was included with upholstered wood household furniture in Industry 2512.<sup>15</sup>Reed and rattan furniture was reported separately in 1947, as Industry 2513 (see text for Industry 2519).

Table 6B.--VALUE OF PRODUCT CLASSES AND SELECTED PRODUCTS SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes and products which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class and selected product, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes or products are listed in footnote 1.)

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes and products, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 25111, Mississippi, Kentucky, Virginia, and New York; 25112, Oklahoma, Mississippi, and Alabama; 25113, Oregon, Washington, Alabama, Tennessee, West Virginia, Maryland, and Missouri; 25115, Oregon and Washington; 25116, California, Texas, and New Hampshire; 25121, New Hampshire; 25122, Kansas and Wisconsin; 25123, Wisconsin; 25141, Missouri and Connecticut; 25142, California; 25145, Kentucky, Missouri, Wisconsin, Ohio, Connecticut, and California; 25151, Nebraska; 2511241, Oklahoma, Mississippi, Maryland, and Arkansas; 2514111, Texas, Tennessee, Georgia, Missouri, Michigan, Pennsylvania, Connecticut, Vermont, and North Carolina; 2514211, California, Mississippi, Maryland, Indiana, and New Jersey; 2515115, Nebraska, Iowa, Wisconsin, and Indiana; 2515211, Michigan and Maryland.

<sup>2</sup>The source of these figures is Facts for Industry M54A, Household Furniture and Bedding Products (sample survey). These estimates are subject to sampling errors as shown in the reports for the individual years; sampling errors are less than 10 percent for each product class except infants' and children's wood furniture, in which case the estimating error is 15 percent.

<sup>3</sup>In 1950 and 1951, the value of wood breakfast sets was included in the values shown for wood dining, junior dining, and dinette furniture (product class 25113).

<sup>4</sup>Direct comparisons of 1954-1947 data are not possible since shipments reported for this product line in 1947 were restricted to assembled cabinets and other cabinets (not to be built-in). In 1947, shipments of unassembled cabinets and cabinets to be combined with other units to form a built-in unit were treated as products primary to the Millwork Industry, code 2431411.

<sup>5</sup>The data shown for these product classes are subject to some reporting discrepancies inasmuch as evidence appears to indicate that the distinction between "convertible sofas" and "jackknife sofa beds" was not consistently drawn by manufacturers reporting shipments of these items. For years prior to 1953, only, the combined total for product classes 25122, 25123, 25124 (studio couches), and 25125 (chair beds) is available; in 1947 this combined total was \$59,323 thousand.

## HOUSEHOLD FURNITURE

25 A-21

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Office, Public-Building, and Professional Furniture

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

<u>Code</u>	<u>Title</u>
2521	—Wood Office Furniture
2522	—Metal Office Furniture
2531	—Public-Building Furniture
2532	—Professional Furniture
2541	—Partitions and Fixtures

Industries in this group generally do not have a very high specialization in the production of those products which are primary to the particular industry, but frequently produce products of other industries, particularly other furniture industries. This is particularly true of Industry 2531, Public Building Furniture; and Industry 2532, Professional Furniture. This is true also, but to a lesser extent, in the case of Industry 2521, Wood Office Furniture, and Industry 2522, Metal Office Furniture. Establishments primarily engaged in manufacturing household furniture are classified in Group 251, Household Furniture; restaurant furniture in Industry 2591, Restaurant Furniture; and factory and shop furniture in Industry 2599, Furniture, Not Elsewhere Classified.

### 2521—Wood Office Furniture

This industry comprises establishments primarily engaged in manufacturing wood office furniture, whether padded, upholstered, or plain. For a detailed list of primary products of Industry 2521, refer to Table 6A, product codes 2521111 to 2521498.

The value of shipments of Industry 2521, Wood Office Furniture, in 1954 totaled \$53 million. This included shipments of primary products (wood office furniture), valued at \$45 million, shipments of other products (secondary products) valued at \$7 million, and miscellaneous receipts of less than \$1 million.

Industry 2521 shipments of wood office furniture in 1954 represented 86 percent of its total product shipments (primary and secondary). In 1947, this primary product "specialization ratio" was 92 percent. Secondary products shipped by this industry in 1954 consisted mainly of public building furniture, \$2 million, and wood household furniture (both upholstered and non-upholstered), \$2 million.

Industry 2521 shipments of wood office furniture in 1954 represented 86 percent of those products valued at \$52 million shipped by all industries. In 1947, this "coverage ratio" was 80 percent. Other industries shipping wood office furniture consisted primarily of Industry 2531 in the amount of \$2 million and Industry 2532, \$2 million.

### 2522—Metal Office Furniture

This industry comprises establishments primarily engaged in manufacturing metal office furniture, whether padded, upholstered, or plain. Establishments primarily engaged in manufacturing safes and vaults are classified in Industry 3492, Safes and Vaults. For a detailed list of primary products of Industry 2522 refer to Table 6A, product codes 2522111 to 2522498.

The value of shipments of Industry 2522, Metal Office Furniture, in 1954 totaled \$203 million. This included shipments of primary products (metal office furniture) valued at \$168 million, shipments of other products (secondary products) valued at \$33 million, and miscellaneous receipts, \$2 million.

Industry 2522 shipments of metal office furniture (primary products) in 1954 represented 84 percent of its total product shipments (primary and secondary). In 1947, this primary product "specialization ratio" was 89 percent. Secondary products shipped by Industry 2522 in 1954 consisted mainly of partitions,

shelving, lockers and fixtures (Industry 2541) \$11 million, furniture hardware (Industry 3429), over \$5 million, aircraft parts (Industry 3729), \$4 million, and a variety of products classified in other furniture industries.

Industry 2522 shipments of metal office furniture (primary products) in 1954 represented 87 percent of those products valued at \$193 million shipped by all industries. In 1947, this "coverage ratio" was 92 percent. Other industries shipping metal office furniture consisted mainly of Industry 3572, Typewriters, over \$5 million; Industry 2532, Professional Furniture, \$3 million; Industry 2514, Metal Household Furniture, \$3 million; and Industry 2541, Partitions and Shelving, \$2 million.

### 2531—Public-Building and Related Furniture

This industry comprises establishments primarily engaged in manufacturing furniture for schools, theaters, assembly halls, churches, and libraries, and in manufacturing seats for public conveyances. Establishments primarily engaged in manufacturing stone furniture are classified in Industry 3281, Cut Stone and Stone Products, and concrete furniture in Industry 3271, Concrete Products. For a detailed list of primary products of Industry 2531 refer to Table 6A, product codes 2531011 to 2531098.

The value of shipments of Industry 2531, Public-Building and Related Furniture, in 1954 totaled \$160 million. This included shipments of primary products (public-building and related furniture), valued at \$130 million, shipments of other products (secondary products) valued at \$27 million, and miscellaneous receipts of \$3 million.

Industry 2531 shipments of public-building and related furniture (primary products) in 1954 represented 83 percent of its total product shipments (primary and secondary). In 1947, this primary product "specialization ratio" was 68 percent. Secondary products shipped by Industry 2531 in 1954 consisted mainly of aircraft parts valued at \$4 million, partitions and fixtures valued at \$3 million, public-building furniture valued at \$3 million, and professional furniture valued at \$3 million.

Industry 2531 shipments of public-building and related furniture (primary products) in 1954 represented 86 percent of those products valued at \$151 million shipped by all industries. In 1947, this "coverage ratio" was 80 percent. Other industries shipping public-building and related furniture consisted mainly of Industry 2514, Metal Household Furniture, \$4 million; Industry 3949, Sporting and Athletic Goods, over \$3 million; Industry 2541, \$3 million; Industry 2521, \$2 million; and Industry 2522, \$2 million.

### 2532—Professional Furniture

Industry 2532, Professional Furniture, comprises establishments primarily engaged in manufacturing furniture especially designed for laboratory, hospital, and other professional uses, such as laboratory work tables, operating tables, and hospital beds. For a detailed list of primary products of Industry 2532 refer to Table 6A, product codes 2532011 to 2532098.

In accordance with the Standard Industrial Classification, beauty and barber shop furniture are excluded from this industry, where they were classified in the 1947 Census, and are included with Industry 3991, Beauty and Barber Shop Equipment. To achieve comparability with the 1954 Census of Manufactures, 1947 data have been retabulated according to the 1954 classification of beauty and barber shop furniture.

In the 1947 Census, hospital bedsprings were classified in Industry 2532; for 1954, hospital bedsprings are included in Industry 2515, Mattresses and Bedsprings. There has been no revision of the 1947 data on this basis, however, since it is

believed that comparability of the data is not materially affected by this change in classification.

The value of shipments of Industry 2532, Professional Furniture in 1954, totaled \$65 million. This included shipments of primary products (professional furniture) valued at \$52 million, shipments of other products (secondary products) valued at \$12 million, and miscellaneous receipts of \$1 million.

Industry 2532 shipments of professional furniture (primary products) in 1954 represented 81 percent of its total product shipments (primary and secondary). In 1947 this primary products "specialization ratio" was 62 percent. Secondary products shipped by Industry 2532 in 1954 consisted mainly of metal office furniture, \$4 million, and cases, cabinets, counters and other fixtures \$2 million.

Industry 2532 shipments of professional furniture (primary products) in 1954 represented 68 percent of those products valued at \$76 million shipped by all industries. In 1947 this "coverage ratio" was 67 percent. Other industries shipping professional furniture consisted mainly of Industry 2515, Mattresses and Bedsprings, \$4 million; Industry 2531, Public-Building Furniture, \$3 million; Industry 3842, Surgical Apparatus and Supplies, \$3 million; Industry 3585, Refrigeration Machinery, \$2 million and Industry 2541, Partitions and Fixtures, \$2 million.

**2541—Partitions and Fixtures** (Full Standard Industrial Classification Title: Partitions, Shelving, Lockers, and Office and Store Fixtures.

Industry 2541, Partitions and Fixtures, comprises establishments primarily engaged in manufacturing from wood, metal, or other materials, prefabricated partitions, shelving, cabinets, show and display cases, office and store fixtures, and related fabricated products including bar fixtures, telephone booths, butchers' fixtures, lockers, display racks and stands, and store and lunch-room window-backs. Establishments primarily engaged in manufacturing refrigerated cabinets, show cases, and

display cases, are classified in Industry 3585, Refrigeration Machinery, and safes and vaults in Industry 3492, Safes and Vaults. For a detailed list of primary products of Industry 2541, refer to Table 6A, product codes 25411111 to 2541281.

The value of shipments of Industry 2541, Partitions and Fixtures in 1954, totaled \$397 million. This included shipments of primary products (partitions and fixtures), valued at \$343 million, shipments of other products (secondary products) valued at \$45 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$9 million.

Industry 2541 shipments of partitions and fixtures (primary products) in 1954 represented 88 percent of its total product shipments (primary and secondary). In 1947 this primary product "specialization ratio" of the industry was 88 percent. Secondary products shipped by Industry 2541 in 1954 consisted of a variety of miscellaneous items including office, public-building and professional furniture valued at \$7 million, metal kitchen furniture, over \$5 million, and computing and related machines, over \$5 million.

In Industry 2541 shipments of partitions and fixtures (primary products) in 1954 represented 87 percent of those products valued at \$395 million shipped by all industries. In 1947, this "coverage ratio" was 89 percent. Production of partitions and fixtures in other industries is distributed over a wide range of industries; the largest volume of such shipments was reported by Industry 2522, \$11 million, Industry 3585, Refrigeration Machinery, \$4 million; Industry 3463, Metal Stampings, \$3 million; and Industry 2531, \$3 million.

Within the industry, there is also a high degree of specialization in materials used by plants in Industry 2541; establishments producing wood partitions and fixtures, produce only negligible amounts of metal products and, similarly, wood products are rarely produced by plants producing metal partitions and fixtures. The quantity and value of materials consumed are shown in Table 7.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## OFFICE, PUBLIC-BUILDING, AND PROFESSIONAL FURNITURE

NA Not available. \*Revised.

<sup>1</sup>For the period 1949-1954 inclusive, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1947-1954, value of shipments for all other years, value of production. See Introduction, "Value of Shipments."

<sup>4</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>5</sup>The returns for 1939 have been retabulated on the basis of 1947 industry classification. However, the 1939 figures for "Wood office furniture," "Metal office furniture," and "Partitions and fixtures" are not entirely comparable with the 1947 figures because they include data for establishments primarily engaged in the manufacture of restaurant furniture. These establishments could not be specifically identified from the 1939 census returns. Separate figures are not available prior to 1939 for "Wood office furniture" and "Metal office furniture." For "Partitions and fixtures," value added for 1939, before retabulation and on a basis comparable with 1937, was \$40.2 million.

<sup>6</sup>"Public-building furniture," "Professional furniture," and "Partitions and fixtures" were formerly included in the discontinued classification "Furniture, including store and office fixtures." Separate figures for each are therefore not available for years prior to 1937.

<sup>7</sup>The figures for 1947, but not for other years, have been revised for comparability with 1954 by excluding data for establishments primarily engaged in the manufacture of beauty and barber shop equipment. Value added by manufacture for 1947 on a basis comparable with the other years was \$27.5 million.

Note: Detailed figures may not add to the totals, because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State: S.I.C. 2521, Wood Office Furniture: Northeast—Massachusetts, 1 (1-19); New Jersey, 1 (1-19); Pennsylvania, 9 (250-499); West North Central—Iowa, 1 (100-249); Missouri, 2 (1-19); Kansas, 1 (1-19); South—Tennessee, 1 (1-19); Mississippi, 1 (20-99); West—Colorado, 3 (1-19); California, 14 (100-249).

S.I.C. 2522, Metal Office Furniture: Northeast—Massachusetts, 2 (20-99); Connecticut, 1 (1-19); New Jersey, 6 (500-999); Pennsylvania, 13 (1,000-2,499); West North Central—Iowa, 3 (250-499); Missouri, 6 (250-499); Nebraska, 1 (20-99); Kansas, 1 (20-99); South—Virginia, 1 (250-499); South Carolina, 1 (20-99); Georgia, 1 (20-99); Kentucky, 1 (1-19); Tennessee, 3 (20-99); Mississippi, 1 (1-19); Oklahoma, 1 (1-19); Texas, 3 (20-99); Pacific—Washington, 1 (1-19); California, 15 (250-499).

S.I.C. 2531, Public Building Furniture: New England—New Hampshire, 2 (20-99); Vermont, 1 (20-99); Massachusetts, 10 (250-499); Connecticut, 4 (100-249); Middle Atlantic—New Jersey, 4 (100-249); Pennsylvania, 23 (500-999); East North Central—Indiana, 10 (250-499); Wisconsin, 16 (500-999); West North Central—Iowa, 2 (100-249); Missouri, 10 (250-499); Nebraska, 2 (1-19); Kansas, 3 (20-99); South—Maryland, 1 (1-19); Virginia, 3 (500-999); West Virginia, 3 (20-99); South Carolina, 1 (1-19); Georgia, 4 (100-249); Florida, 2 (100-249); Tennessee, 2 (20-99); Mississippi, 2 (20-99); Louisiana, 2 (20-99); Oklahoma, 6 (20-99); Texas, 17 (1,000-2,499); Mountain—Idaho, 1 (20-99); Colorado, 1 (1-19); Utah, 2 (20-99); Pacific—Washington, 3 (100-249); Oregon, 2 (1-19); California, 32 (500-999).

S.I.C. 2532, Professional Furniture: New England—Massachusetts, 4 (20-99); Rhode Island, 1 (1-19); Connecticut, 1 (1-19); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 6 (250-499); East North Central—Indiana, 9 (250-499); Wisconsin, 4 (1,056); West North Central—Iowa, 1 (1-19); Missouri, 7 (500-999); South—Maryland, 3 (1-19); Virginia, 1 (20-99); Georgia, 2 (20-99); Tennessee, 1 (1-19); Mississippi, 1 (1-19); Texas, 2 (20-99); Pacific—Oregon, 1 (1-19); California, 13 (100-249).

S.I.C. 2541, Partitions and Fixtures: New England—New Hampshire, 4 (250-499); Vermont, 3 (20-99); West North Central—North Dakota, 1 (1-19); South Dakota, 1 (1-19); Kansas, 7 (20-99); South Atlantic—Delaware, 2 (1-19); South Carolina, 6 (20-99); Mountain—Montana, 1 (1-19); Idaho, 1 (1-19); New Mexico, 3 (1-19).

<sup>2</sup>In 1947 the South and West together reported employment of 1,227 and value added of \$3,724 thousand.<sup>3</sup>In 1947 the South and Pacific together reported employment of 1,231 and value added of \$3,616 thousand.

Note: Detailed figures may not add to the totals because of independent rounding.   xxx Not applicable.   NA Not available.   <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Table 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)   <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>Less than \$500 thousand.<sup>4</sup>Less than 500 tons.<sup>5</sup>Less than 500 thousand kwh.<sup>6</sup>Less than 500 hp.

## MANUFACTURES—INDUSTRY STATISTICS

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## OFFICE, PUBLIC-BUILDING, AND PROFESSIONAL FURNITURE

25B-9

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading, the total value of shipments divided between (1) office, public building, and professional furniture, (2) other products, and (3) miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry)

Prod. class code	Class of products and miscellaneous receipts	Wood office furniture (S.I.C. 2521)	Metal office furniture (S.I.C. 2522)	Public building furniture (S.I.C. 2531)	Professional furniture (S.I.C. 2532)	Partitions and fixtures (S.I.C. 2541)	Other industries	All industries

NA Not available. xxx Not applicable.

<sup>1</sup>Includes clothing racks and costumers classified in Industry 2541 in 1954 (see product codes 2541271 and 2541275 for wood and metal, respectively).<sup>2</sup>Largely accounted for by small establishments that were not asked to report a breakdown of total shipments.<sup>3</sup>Does not include the "captive" production of manufacturers of motor vehicles and other transportation equipment.<sup>4</sup>Revised to exclude beauty and barber shop equipment classified in Industry 3991, and hospital bedsprings classified in Industry 2515, in 1954.<sup>5</sup>Represents \$20,830,000 of partitions and fixtures for which material was not specified and also cannot be distributed between codes 2541171 and 2541298.<sup>6</sup>Not reported as separate items in 1947; probably reported principally as counters 2541251 and 2541255.

## MANUFACTURES—INDUSTRY STATISTICS

Table 6B.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.)

		East South Central.....	1,366	California.....	24,564

NOTE: The figures shown for 1949 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 25223, Iowa, Virginia, California, and Wisconsin; 25310, Virginia; 25320, Pennsylvania; 25411, Tennessee and Virginia; 25412, Maine and New Hampshire.

<sup>2</sup>The figures for 1947, but not for other years, have been revised for comparability with 1954 by excluding shipments of Beauty Parlor and Barber Shop furniture. The value of product class 25320, Professional Furniture, for 1947, on a basis comparable with other years was \$44.6 million.

<sup>3</sup>In addition to the value shown by product class for Industry 2541, Partitions and Fixtures, shipments not specified by kind in the value of \$23,201,000 were reported.

NA Not available.

<sup>1</sup>For 1947, data on rough and dressed lumber were not requested separately.<sup>2</sup>Largely accounted for by small establishments which were not requested to furnish a breakdown of these materials.<sup>3</sup>Combined with "alloy steel, except machines," to avoid disclosing figures for individual companies.

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

## MANUFACTURES—INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954—Continued

Ind. or prod- uct class No.	Industry or product class by percent of specialization	Estab- lish- ments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)			
2541	PARTITIONS AND FIXTURES—Continued									
25411	Partitions, shelving, and lockers (metal or wood):									
	All establishments specializing in product class.	169	10,576	45,039	8,025	15,901	30,521	78,785	60,004	138,819
	Establishments with:									
	90% or more specialization.....	94	3,352	15,529	2,444	4,824	9,622	30,304	17,324	47,658
	75-89% specialization.....	23	3,265	13,124	2,208	4,401	7,585	22,296	17,197	39,494
	50-74% specialization.....	41	1,566	6,302	1,257	2,559	4,786	9,264	7,462	16,727
	Less than 50% specialization.....	11	2,391	10,083	2,116	4,115	8,526	16,919	18,020	34,939
25412	Cases, cabinets, counters, and other fixtures:									
	All establishments specializing in product class.	1,145	20,495	89,431	16,828	33,741	65,234	138,793	96,344	235,138
	Establishments with:									
	90% or more specialization.....	871	13,038	56,896	10,754	21,353	41,662	90,760	65,895	156,656
	75-89% specialization.....	98	3,544	15,325	2,921	6,080	11,183	22,973	13,540	36,512
	50-74% specialization.....	133	3,030	13,337	2,474	4,963	9,731	19,706	13,318	33,025
	Less than 50% specialization.....	43	882	3,872	678	1,344	2,657	5,353	3,591	8,944

<sup>1</sup>This class includes data for establishments with less than 50% specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Screens, Shades, and Miscellaneous Furniture

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2561--	Window and Door Screens
2562--	Window Shades
2563--	Venetian Blinds
2591--	Restaurant Furniture
2599--	Furniture and Fixtures, Not Elsewhere Classified

Plants primarily engaged in producing furniture or other products to individual order or for sale direct to household consumers through retail stores on the premises are excluded from the Census of Manufactures. Establishments primarily engaged in producing household, office, public-building and professional furniture are included in Groups 251-253 Household; Office; and Public and Professional Furniture; and beauty and barber shop furniture in Industry 3991, Beauty and Barber Shop Equipment.

The industries included in this industry group do not generally specialize to a high degree in the production of those items which are primary to the industry in which they are classified. A fairly significant amount of the output of each of these industries represents products primary to industries in other industry groups. This is particularly true of establishments in Industry 2561, Window and Door Screens, and Industry 2562, Window Shades, where a high percentage of total production is accounted for by products primary to other industries. The 1954 primary products specialization ratio for the industries shown in this report range from 85 percent for Industry 2562 and 2563 to 72 percent for Industry 2591. Except for Industry 2562, Window Shades, and Industry 2563, Venetian Blinds, the primary products of the industries in this group are also produced to a large extent by other industries, particularly the millwork industry and other furniture industries.

**2561--Window and Door Screens** (Full Standard Industrial Classification title: Window and Door Screens and Weatherstrip)

This industry comprises establishments primarily engaged in manufacturing window and door screens and weatherstrip, regardless of the materials used. Establishments primarily engaged in manufacturing wire screening are classified in Industry 3489, Wirework, Not Elsewhere Classified.

Storm (and combination screen and storm) sash and doors are classified in Industry 2431, Millwork Plants, or in Industry 3442, Metal Doors, Sash, and Trim. In the 1947 Census, such plants were classified in Industry 2561; however, the 1947 data shown in this report have been revised to reflect this change in classification. For a detailed list of primary products of Industry 2561, refer to Table 6A, product code 2561011 to 2561055.

The value of shipments of Industry 2561, Window and Door Screens, in 1954 totaled \$71 million. This included shipments of primary products (window and door screens and weatherstrip) valued at \$50 million; shipments of secondary products valued at \$18 million and miscellaneous receipts of \$2 million.

Industry 2561 shipments of window and door screens and weatherstrip (primary products) in 1954 represented 73 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 65. Secondary products shipped by Industry 2561 in 1954 consisted principally of millwork products; fabricated metal products such as builders' hardware; metal molding and trim and store fronts; and metal storm sash at a value of approximately \$2 million for each group of products.

Industry 2561 shipments of window and door screens and weatherstrip (primary products) in 1954 represented 64 percent of these products valued at \$78 million shipped by all in-

dustries. The comparable coverage ratio in 1947 was 61. In 1954, as in 1947, other manufacturing industries shipping screen doors and window screens consisted mainly of Industry 2431, Millwork, and Industry 3442, Metal Doors, Sash and Trim. In 1954 plants in Industry 2431 shipped \$17 million wood screen doors and window screens, and plants in Industry 3442, \$6 million metal screen doors and window screens.

### **2562--Window Shades**

This industry comprises establishments primarily engaged in manufacturing complete window shades, window-shade rollers and fittings, and curtain rods and fixtures, regardless of the materials used. Establishments primarily engaged in manufacturing metal awnings and canopies are classified in Industry 3444, Sheet-Metal Work.

The value of shipments of Industry 2562 (Window Shades) in 1954 totaled \$64 million. This included shipments of primary products (window shades and accessories) valued at \$54 million, shipments of secondary products valued at \$9 million, and miscellaneous receipts of \$1 million.

Industry 2562 shipments of window shades and accessories (primary products) in 1954 represented 85 percent of its total product shipments (primary and secondary). In 1947 this primary product specialization ratio was 73. Secondary products shipped by this industry in 1954 consisted mainly of pyroxylin-coated fabrics; and curtains and draperies excluding lace for a total value of \$6 million.

Industry 2562 shipments of window shades and accessories in 1954 represented 78 percent of these products valued at \$70 million shipped by all manufacturing industries. This coverage ratio was 79 percent in 1947. The most important other manufacturing industry shipping window shades and accessories in 1954 was Industry 2563, Venetian Blinds, at \$9 million.

### **2563--Venetian Blinds**

This industry comprises establishments primarily engaged in manufacturing venetian blinds, regardless of the materials used. Establishments primarily engaged in manufacturing porch shades (except canvas shades and awnings classified in Industry 2394, Canvas Products) are also included in this industry. For a detailed list of primary products of this industry, refer to Table 6A, product codes 2563111 to 2563281.

The value of shipments of Industry 2563 in 1954 totaled \$114 million. This included shipments of primary products (venetian blinds and porch shades) valued at \$95 million, shipments of secondary products valued at \$17 million, and miscellaneous receipts of \$2 million.

Industry 2563 shipments of venetian blinds, (primary products) in 1954 represented 85 percent of its total product shipments (primary and secondary). In 1947 this primary product specialization ratio was 96 percent. Secondary products shipped by this industry in 1954 consisted mainly of window shades and accessories, at \$9 million.

Industry 2563 shipments of venetian blinds, etc. (primary products) in 1954 represented 93 percent of these products valued at \$102 million shipped by all manufacturing industries. The percentage in 1947 was 92.

### **2591--Restaurant Furniture**

This industry comprises establishments primarily engaged in manufacturing furniture especially designed for use in restaurants. Industry 2591 was first shown as a separate classification in 1947, thus comparable figures for earlier years are not available. For a detailed list of primary products of this industry, refer to Table 6A, product codes 2591011 to 2591098.

The value of shipments of Industry 2591 in 1954 totaled \$37 million. This included shipments of primary product (restaurant furniture) valued at \$26 million, shipments of secondary products valued at \$10 million, and a negligible amount of miscellaneous receipts.

Industry 2591 shipments of restaurant furniture (primary products) in 1954 represented 72 percent of its total product shipments (primary and secondary). In 1947 this primary product specialization ratio was 87 percent. Secondary products in this industry in 1954 consisted of a variety of furniture products.

Industry 2591 shipments of restaurant furniture in 1954 represented 78 percent of these products valued at \$34 million shipped by all industries. The coverage ratio was 69 percent in 1947. Other furniture industries accounted for most of the balance of restaurant furniture shipments.

#### 2599—Furniture and Fixtures, Not Elsewhere Classified

Industry 2599 comprises establishments primarily engaged

in manufacturing furniture and fixtures which are not classified in any of the several furniture industries e.g., factory and shop furniture.

The value of shipments of Industry 2599 in 1954 totaled \$11 million. This included shipments of primary products (furniture and fixtures, not elsewhere classified) valued at \$9 million, shipments of secondary products valued at \$2 million, and a negligible amount of miscellaneous receipts.

Industry 2599 shipments of primary products (furniture and fixtures, not elsewhere classified) in 1954 represented 83 percent of its total product shipments (primary and secondary). In 1947 this primary product specialization ratio was 89 percent.

Industry 2599 shipments of primary products in 1954 represented 61 percent of these products valued at \$51 million shipped by all industries. This coverage ratio in 1947 was 51. Shipments by other industries of products primary to Industry 2599 are distributed over a wide range of the furniture industries (Major Group 25), with no single industry predominating.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## SCREENS, SHADES, AND MISCELLANEOUS FURNITURE

25C-3

\* Revised

NA Not available.

<sup>1</sup>For the years 1949 and 1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1954-1947 and 1929, value of shipments; for all other years, value of products made. See Introduction, "Value of Shipments."

<sup>4</sup>The 1947 figures have been revised for comparability with 1954 by excluding data for establishments primarily engaged in the manufacture of Storm Sash and Doors. See text on Industry. The figures for other years have not been revised and are therefore not shown.

<sup>5</sup>The figures for 1949 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>"Venetian blinds" was formerly a part of the discontinued classification "Planing-mill products, n.e.c." Separate figures are therefore not available for years prior to 1937.

<sup>7</sup>No comparable figures are available for years prior to 1947.

<sup>8</sup>In 1939, there were no establishments that could be classified in "Furniture and fixtures, n.e.c."

## MANUFACTURES—INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947

Engines, etc., not driving electric generators.....do...	( <sup>3</sup> )	...	( <sup>3</sup> )	1
Electric motors driven by purchased energy.....do...	9	2	2	...
Electric motors driven by energy generated at the estab- lishments.....do...	...	...	...	...

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not available. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than \$500 thousand. <sup>4</sup>Less than 500 tons. <sup>5</sup>Less than 500 hp.

## MANUFACTURES—INDUSTRY STATISTICS

Table 4.--SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

	1947...	26,192	22,451	3,502	239	87	32,738	22,451	10,287	69
2599	Furniture and fixtures, n.e.c.....1954...	11,075	9,037	1,874	164	83	14,688	9,037	5,651	61
	1947...	6,417	5,768	588	61	91	10,354	5,768	4,586	56

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MANUFACTURES--INDUSTRY STATISTICS

Table 5B.--INDUSTRY-PRODUCT ANALYSIS--SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

NA Not available.

<sup>1</sup>Largely accounted for by small establishments that were not asked to report a breakdown of total shipments.

<sup>2</sup>Represents parts of \$14,553 thousand of venetian, and other blinds, and shades, not specified by type.

## MANUFACTURES--INDUSTRY STATISTICS

Table 6B.--VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

NOTE: The figures shown for 1950 to 1952 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 25610, Virginia.

<sup>2</sup>Revised to exclude shipments of wood and metal doors and sash. See text on Industry 2561.

## MANUFACTURES—INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

	All other <sup>1</sup> .....	5	73	282	58	109	195	344	268	613

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Major Group 26.—Pulp, Paper, and Products

This major group includes the manufacture of pulp primarily from wood, and from rags and other fibers; the conversion of these pulps into paper or board; and the manufacture of paper and paperboard into converted products such as coated paper, paper bags, paperboard boxes, and envelopes. Certain

types of converted paper products are classified in other major groups, such as abrasive paper in Industry 3291, Abrasive Products, carbon paper in Industry 3955, Carbon Paper and Inked Ribbons, and photosensitized and blueprint paper in Industry 3861, Photographic Equipment.

Table 1.—GENERAL STATISTICS FOR THE INDUSTRY GROUP: 1954 AND EARLIER YEARS

(For explanation of column captions, see Introduction)

1899	1,895	99,784	43,713	93,512		35,393	89,706		

NA Not available.

<sup>1</sup>In addition to data for operating establishments, manufacturers' central administrative offices and auxiliary units reported 10,382 employees with a payroll of \$67,967 thousand in 1954. Similar data are shown for the years 1949-1953 in the Annual Survey of Manufactures volumes. Data for these units are not available for the years prior to 1949.

<sup>2</sup>The figures for 1939 through 1954 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>3</sup>Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1899-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

<sup>4</sup>Driven by purchased energy.

<sup>5</sup>The figures for 1939-1954 include, whereas those for earlier years exclude, data for establishments primarily engaged in manufacture of printed paper patterns and laminated, enameled, hard pressed, and insulating wall boards of vegetable fiber. Value added by manufacture for 1939, excluding data for these establishments, was \$869.9 million. The comparability of the 1947-1954 figures with those for earlier years is further affected by the inclusion of data for establishments primarily engaged in manufacture of tags, which were formerly classified in the printing and publishing group.

<sup>6</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period.

<sup>7</sup>The figures for 1937-1954 include, whereas those for earlier years exclude, data for establishments primarily engaged in manufacture of fiber products, fiber conduits, and molded pulp products. Value added by manufacture for 1937, excluding data for these establishments was \$852.7 million.

<sup>8</sup>The figures for 1931-1954 includes, whereas those for earlier years exclude, data for establishments primarily engaged in manufacture of papeteries. Value added by manufacture for 1931, excluding data for these establishments, was \$599.6 million.

## MANUFACTURES—INDUSTRY STATISTICS

# Pulp, Paper, and Paperboard

This report shows 1954 Census of Manufactures statistics for establishments classified into each of the following industries:

Code	Title
2611--	Pulp Mills
2612--	Paper and Paperboard Mills
2613--	Building Paper and Board Mills

There is a high degree of integration between the Pulp Industry, the Paper and Paperboard Industry, and the Building Paper and Building Board Industry. Pulp produced in the pulp mill becomes the material consumed at the Paper and Paperboard or Building Paper and Building Board Industries. However, there is no duplication occasioned by movement of products within the same industry.

In the three industries included in this report, there is a high degree of specialization in the production of the products of the particular industry with only a negligible amount of the products of these industries produced in other industries. This results from obtaining separate establishment reports for (1) pulp, (2) paper and paperboard, and (3) converted paper and board products activities in integrated operations in the 1954 Census of Manufactures. Hence, an integrated pulp, paper, or board and converting operation carried on at the same location is reported on three separate establishment reports, and included with the data in all general statistics tables for the appropriate industry.

In an effort to develop meaningful statistics, conferences were held with representatives of these industries to establish general guides for adjusting company data where separate departmental records in an integrated operation were not maintained.

Alternative methods of assigning values of interplant transfers were suggested in special instructions to the companies as follows:

"For the value of pulp, paper or board transferred to other establishments of your company, at this site or any other location, report an estimated value based upon market value minus costs of services not performed, such as transportation, drying, wrapping, etc., or if representative market values are not available, upon 'costs.' If 'costs' are used, the value should cover the cost of pulpwood, woodpulp, waste-paper, chemicals, other mill supplies, fuel, electric energy, and direct labor applicable to the operation, together with a reasonable proportion of the indirect labor costs, overhead costs and company profits or losses reasonably assignable to the producing establishment."

The 1954 Census experience indicates that company records often do not reflect detailed departmental operating data, and the assignment of "transfer" values on a uniform basis throughout industry was virtually impossible. Hence, it was necessary for a significant amount of the operating data to be prorated, more particularly in the transfer values assigned which affects both the value of shipments of the establishment transferring the products to the establishment further processing it within the company and the "Cost of Materials" data in the latter establishment. These adjustments were made after it was apparent by examining relationships on the basis of market values or costs of production, that the value added by manufacture would be credited disproportionately to the several departments involved. Where possible, assistance from the companies was obtained in making these adjustments, but to a significant degree, adjustments were made by Census based on average relationships for the industries affected. To the extent that such adjustments did not reflect actual relationships for such establishments the validity of the data would be affected.

Reconciliation of Census of Manufactures data cannot be made on an exact basis with other Government agencies, such as the Bureau of Labor Statistics and Bureau of Old Age Survivors Insurance, because of complete departmental reporting only to

Census on the pulp, paper, and board, and converting operations at integrated single locations.

Data on the consumption of the basic raw materials permit tracing the flow of materials through the several levels of operations. For the Pulp Mills (2611), Table 7A shows the consumption of the important species of pulpwood, and of chemicals; Table 7B shows pulpwood consumption by species of wood on a geographic basis, and Table 7C shows pulpwood consumption by pulping process. For the Paper and Paperboard (2612) and Building Paper and Board (2613) Industries, Table 7A shows the consumption of wood pulp as between own company produced and market (purchased); Table 7D shows the consumption of wood pulp, waste paper and other fibrous materials on a geographic basis; and Table 7E shows consumption of these materials by grade of wood pulp in the production of each major grade of paper and board.

## 2611--Pulp Mills

Industry 2611, Pulp Mills, comprises establishments primarily engaged in the manufacture of pulp made from pulpwood (including slabs, chips and mill wastes), and other fibrous materials such as linters, waste paper, straw, and rags.

All wood pulping operations are included in Industry 2611, Pulp Mills. However, pulp operations of establishments primarily making paper or board in a continuous process from waste paper, rags, straw, and other fibrous materials except pulpwood are not included in Industry 2611 but are included in the industry in which the paper or paperboard produced is classified (Industries 2612 or 2613).

Logging operations conducted as part of the pulp mill activity and not separately reported are included in this industry. Separately reported establishments, primarily engaged in cutting pulpwood, are classified in Industry 2411, Logging Camps and Logging Contractors. Operating data for pulpwood cutting by farmers or others as a part time activity are generally not included in any manufacturing industry. For a detailed list of primary products of Industry 2611 refer to Table 6A, product codes 2611111 to 2611971.

The value of shipments of Industry 2611, Pulp Mills, in 1954 totaled \$1,577 million. This included shipments of primary products (pulp and byproducts), valued at \$1,564 million, shipments of secondary products valued at \$12 million, and a negligible amount of miscellaneous receipts.

Industry 2611 shipments of primary products in 1954 represented 99 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was also 99 percent. Secondary products shipped by this industry in 1954 consisted mainly of inorganic chemicals, \$7 million.

Industry 2611 shipments of primary products in 1954 represented virtually all of these products valued at \$1,565 million shipped by all industries. This coverage ratio was also 100 percent in 1947.

2612--Paper and Paperboard Mills (Full Standard Industrial Classification Title: Paper and Paperboard Mills, Except Building-Paper and Building-Board Mills)

Industry 2612, Paper and Paperboard Mills, comprises establishments primarily engaged in manufacturing paper and paperboard, except building board and building paper, from woodpulp and other fibers. It also includes establishments reducing waste paper, linters, straw, and other non-wood fibers to pulp as part of a continuous process producing paper and paperboard. For a detailed list of products of Industry 2612 refer to Table 6A, product codes 2612111 to 2612971.

The value of shipments of Industry 2612, Paper and Paperboard Mills, in 1954 totaled \$3,793 million. This included shipments of primary products (paper and paperboard), valued at

\$3,758 million, shipments of secondary products valued at \$26 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$9 million.

Industry 2612 shipments of primary products in 1954 represented 99 percent of its total product shipments (primary and secondary). Secondary products shipped in this industry in 1954 consisted mainly of building paper and building board at \$8 million.

Industry 2612 shipments of primary products in 1954 represented virtually all of these products valued at \$3,770 million shipped by all industries. Other industries shipping paper and paperboard, consisted mainly of Industry 2613, building paper and building board mills.

For 1947, data for Industry 2612, Paper and Paperboard Mills, and Industry 2613, Building Paper and Board Mills, were combined and shown under the title "Paper and Board Mills." All data for 1947, except the primary product specialization ratio and the coverage ratio data have been retabulated on a comparable basis with 1954. It is believed that the 1947 ratios approximate those shown for these industries in 1954 and which appear in Table 5B.

2613--Building Paper and Board Mills (Full Standard Industrial Classification Title: Building-Paper and Building-Board Mills)

Industry 2613, Building Paper and Board Mills, comprises establishments primarily engaged in manufacturing building paper and building board, from woodpulp and other fibrous materials. It also includes establishments reducing waste paper, linters, straw, and other non-wood fibers to pulp as part of a continuous process producing building paper and building board. For a detailed list of products of this industry refer to Table 6A, product codes 2613111 to 2613265.

The value of shipments of Industry 2613, Building Paper and Board Mills, in 1954 totaled \$305 million. This included shipments of primary products (building paper and board), valued at \$298 million, shipments of secondary products valued at \$7 million, and a negligible amount of miscellaneous receipts.

Industry 2613 shipments of primary products in 1954 represented 98 percent of its total product shipments (primary and secondary). Secondary products shipped by this industry in 1954 consisted mainly of paper and paperboard.

Industry 2613 shipments of primary products in 1954 represented 97 percent of these products valued at \$308 million shipped by all industries.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS

NA Not Available.

<sup>1</sup>The number of "All employees" and the number of "production and related workers" were obtained as follows: For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>For 1947-1954, value of shipments; for all other years, value of production. See Introduction, "Value of Shipments."

<sup>4</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>5</sup>"Pulp mills" and "Paper and board mills" formerly constituted a single classification, "Paper and wood pulp." Separate figures are, therefore, not available for years prior to 1927.

<sup>6</sup>Industries 2612 and 2613 were treated as one industry in the 1947 Census. The 1947 data shown in this table for each of these industries were obtained by retabulating the 1947 returns. Similar retabulations were not made for the period 1949-1953. In order to show statistics for the entire period 1947-1954, industries 2612 and 2613 are also shown in combination.

<sup>7</sup>Data for earlier years not shown due to a lack of comparability caused by a change in method of reporting converting operations of these mills.

## MANUFACTURES—INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (See INTRODUCTION Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2611, Pulp Mills: New England--Maine, 20 (2,500-4,999); New Hampshire, 3 (1,420); Vermont, 2 (20-99); Massachusetts, 3 (100-249); Rhode Island, 1 (1-19); Connecticut, 1 (1-19); East North Central--Illinois, 6 (100-249); Michigan, 10 (500-999); West North Central--Minnesota, 9 (1,000-2,499); Iowa, 1 (20-99); South Atlantic--Maryland, 2 (250-499); Virginia, 9 (2,500-4,999); North Carolina, 6 (2,500-4,999); South Carolina, 4 (1,749); Georgia, 10 (2,500-4,999); Florida, 11 (4,341); West South Central--Arkansas, 2 (500-999); Louisiana, 9 (4,376); Texas, 4 (500-999); West--Idaho, 1 (100-249); California, 6 (500-999).

S.I.C. 2612, Paper and Paperboard Mills: Northeast--New Hampshire, 21 (2,415); Vermont, 9 (500-999); Connecticut, 20 (1,000-2,499); New Jersey, 33 (5,468); East North Central--Indiana, 13 (1,000-2,499); Michigan, 42 (5,000-9,999); West North Central--Iowa, 2 (250-499); Missouri, 1 (100-249); Kansas, 2 (250-499); South Atlantic--Maryland, 6 (1,860); South Carolina, 3 (1,837); East South Central--Tennessee, 8 (1,000-2,499); Alabama, 5 (1,000-2,499); Mississippi, 1 (1,000-2,499); West South Central--Arkansas, 2 (1,000-2,499); Oklahoma, 2 (100-249); West--Idaho, 1 (500-999); Colorado, 1 (20-99); Washington, 17 (2,500-4,999).

S.I.C. 2613, Building Paper and Board Mills: Northeast--Maine, 1 (100-249); Rhode Island, 1 (100-249); Connecticut, 1 (20-99); New Jersey, 8 (1,120); East North Central--Indiana, 2 (20-99); Illinois, 9 (500-999); West North Central--Minnesota, 4 (1,000-2,499); Iowa, 1 (100-249); Missouri, 4 (100-249); South Atlantic--Maryland, 1 (100-249); Virginia, 1 (250-499); North Carolina, 1 (20-99); Georgia, 2 (250-499); Florida, 3 (250-499); East South Central--Tennessee, 2 (20-99); Alabama, 2 (500-999); Mississippi, 4 (2,500-4,999); West South Central--Arkansas, 2 (20-99); Louisiana, 3 (2,752); Texas, 8 (250-499); Pacific--Washington, 3 (100-249); California, 8 (500-999).

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not available. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>Less than \$500 thousand.

## PULP, PAPER, AND PAPERBOARD

26A-7

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

NA Not available.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

<sup>3</sup>Industry 2612 and Industry 2613 were treated as one industry in the 1947 Census. The combined industry's primary product specialization ratio and coverage ratio were both 100 percent.

## MANUFACTURES—INDUSTRY STATISTICS

Table 5B.--INDUSTRY-PRODUCT ANALYSIS--SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

	Thousand sq. ft. 1/2" basis.....	41,045	40,855				
2613265	Other insulating board:						
2613X65	Short ton (2,000 lbs. air-dry).....	33,180	33,000	7,161 xxx			
	Thousand sq. ft. 1/2" basis.....	89,068	87,928				

xxx Not applicable.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

1The sum of interplant transfers and market shipments may not equal totals due to independent rounding and insignificant differences between reported detail and sum of the detail.

2The difference between total shipments and interplant transfers represents Commercial "Market Shipments".

3Gulfite and sulfate for chemical conversion, paper making and other uses.

4Interplant transfers and commercial (market) shipments are combined to avoid disclosing the operations of individual companies. In each instance the combination is made in the category in which all but an insignificant amount of the activity has been reported.

5Includes small production of a few integrated establishments classified in other industries which did not report their pulp and paper manufacturing activity separately.

6Includes value of a small quantity of miscellaneous pulp produced and shipped by establishments primarily engaged in the manufacture of paper and board.

7Includes alcohol not reported separately.

8Consists entirely of body stock for coating (code 2612135).

9Colored school paper is included with "other converting" (code 2612137).

10Includes other Bristol, except rag index and borus.

11Not available separately. The 1947 figures include data for code 2612445 and code 2612413, except for car liners and side rolls.

12Asphalting paper including creped or creping stock for asphaltting, other creping, twisting and spinning stock (17 lb. and up) and tyman are included with other converting paper.

13Includes Manila board.

14Patent coated (all types), clay coated and other machine coated board, includes other bending coated board by respective types.

15Data for code 2612745 have been included with code 2612778, for 1944.

16Panel board (code 2612921) and other paperboard (code 2612941) are included with other special paperboard stock (code 2612929).

17Data not exactly comparable since the information in 1947 was reported in total square footage.

18Corresponding 1947 data are not available on a comparable basis due to changes in detailed product classification.

## PULP, PAPER, AND PAPERBOARD

26A-19

Table 6B.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.)

1951 United States, total.....	127,317				

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosures of individual company figures: 26112, New Hampshire, Massachusetts, New York, Pennsylvania, Michigan, Minnesota, Washington, and Oregon, 26113, Maine, New York, and Minnesota; 26114, Maine, New York, Pennsylvania, Michigan, Wisconsin, Minnesota, Maryland, Virginia, Georgia, Florida, Tennessee, Alabama, Mississippi, Louisiana, Texas, Idaho, Oregon, and California; 26115, New Hampshire, New York, Michigan, Wisconsin, North Carolina, South Carolina, Alabama, Arkansas, Louisiana, Texas, and Oregon; 26117, Maine, Vermont, New York, Michigan, Virginia, Georgia, Tennessee, Alabama, Texas, Washington, and Oregon; 26118, New Hampshire, Ohio, Michigan, Minnesota, Maryland, South Carolina, Georgia, Florida, Tennessee, Mississippi, and Louisiana; 26121, Maine, Vermont, Michigan, Wisconsin, Tennessee, Alabama, Texas, Washington, and Oregon; 26122, New York, Pennsylvania, Ohio, Michigan, Maryland, Texas, Tennessee, and Oregon; 26123, New Hampshire, Connecticut, New York, New Jersey, Illinois, Minnesota, Delaware, Maryland, North Carolina, Tennessee, Louisiana, Texas, Washington, and Oregon; 26124, Maine, New Hampshire, Vermont, New Jersey, Pennsylvania, Illinois, Minnesota, Delaware, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Arkansas, Louisiana, Texas, Idaho, Oregon, and California; 26125, Maine, Connecticut, Ohio, Michigan, Delaware, North Carolina, Tennessee, Mississippi, Oregon, and California; 26126, New Hampshire, Massachusetts, Connecticut, New York, Pennsylvania, Minnesota, Iowa, Kansas, Delaware, Maryland, North Carolina, South Carolina, Tennessee, Louisiana, Texas, Colorado, and Oregon; 26127, Vermont, Massachusetts, Indiana, Minnesota, North Carolina, Florida, Tennessee, Alabama, Mississippi, Louisiana, Texas, Idaho, and Washington; 26128, Connecticut, Indiana, Wisconsin, Minnesota, Maryland, West Virginia, North Carolina, Georgia, Tennessee, and Alabama; 26129, Maine, Vermont, Illinois, Wisconsin, Missouri, Kansas, Virginia, South Carolina, Florida, Oklahoma, and Washington; 26131, Rhode Island, Indiana, Wisconsin, Minnesota, Missouri, Maryland, Georgia, Alabama, Louisiana, Oregon, and California; 26132, Maine, Rhode Island, New Jersey, Minnesota, Iowa, Virginia, Georgia, Florida, Alabama, Mississippi, Louisiana, Washington, and California.

<sup>2</sup>Only combined totals are available for previous years: 1953, 26122 and 26123, \$961,977; 1952, 26122 and 26123, \$936,687; 1951, 26122 and 26123, \$998,951; 1950, 26122 and 26123, \$790,930.

941270	Other fibrous materials (rag, straw, etc.).....	.....do.....	686,692	12,374			
970000	All other materials and components, containers, and supplies.....	.....	xxx	41,792			

xxx Not applicable. NA Not available. <sup>1</sup>Represents quantities reported by establishments classified in Industries 2611, 2612, and 2613.

Note: Pulpwood quantity data for 1954 and 1947 are not strictly comparable because the data for 1954 were requested on a roughwood basis and the totals for 1947 combined quantities on a roughwood and a peeled and rossed basis. For 1947, of the 19,345,311 cords reported in total, roughwood amounted to 16,891,955 cords.

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Establishments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)			
2611	PULP MILLS (entire industry).....	252	57,672	256,622	48,896	105,252	207,188	704,274	873,017	1,577,291
26112	Bleached sulfite wood pulp: All establishments specializing in product class. Establishments with:	35	8,852	39,887	7,550	16,134	32,490	89,209	141,788	230,997

NOTE: The following equipment with corresponding daily capacities has been reported idle at the end of 1954 and are not included in the data shown above: 3 sulfite digesters, daily capacity 42 tons; 10 sulfate digesters, daily capacity 235 tons; 13 soda digesters, daily capacity 145 tons; 2 semichemical digesters, daily capacity 60 tons; 8 grinders, daily capacity 86 tons; 3 defibrators, daily capacity 97 tons.

D Withheld to avoid disclosing figures for individual companies.

xxx Not applicable.

Practical maximum annual capacity is actual daily capacity multiplied by the maximum number of working days which each pulp mill reported that it could operate in a year under ideal manufacturing and marketing conditions.

## Converted Paper and Board Products

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2641	Paper Coating and Glazing
2651	Envelopes
2661	Paper Bags
2671	Paperboard Boxes
2674	Fiber Cans, Tubes, and Drums
2691	Die-Cut Paper and Board
2693	Wallpaper
2694	Pulp Goods, Pressed and Molded
2699	Paper and Board Products, Not Elsewhere Classified

There is a high degree of integration between Industry 2612, Paper and Paperboard, and the various paper and board converting industries. Paper or paperboard is manufactured and converted by the same company, either at the same location or at separate locations. For the 1954 Census of Manufactures, integrated operations are reported as in the 1947 Census and subsequent Annual Surveys on a departmentalized basis, i.e., the paper or paperboard manufacturing activities are reported separately from converting and each activity is treated as a separate establishment. Hence, the industry statistics shown in all tables for each converting industry exclude all operations data relating to paper and paperboard manufacture. Because company records are often not maintained departmentally, it was necessary to establish some general guides in developing the departmentalized reports. The following special instructions for alternate methods of assigning values to interplant transfers to the converting establishments and allocating costs between the primary and converting operations, were furnished to each company:

"For the value of paper or board transferred to other manufacturing establishments (converting departments) of your company, at this site or at any other location, report an estimated value based upon market value minus costs of services not performed such as transportation, wrapping, etc., or, if representative market values are not available, upon "costs." If "costs" are used the value should cover the cost of wood pulp, waste paper, chemicals, other paper mill supplies, fuel, electric energy, and direct labor applicable to the primary paper and board operations, together with a reasonable proportion of the total indirect labor costs, overhead costs, and company profits or losses reasonably assignable to this producing location."

The 1954 Census of Manufactures experience indicates that company records often do not reflect detailed operating data and that transfer values of paper and paperboard to the converting operation were not reported on a uniform basis. When it was apparent that the transfer values assigned to paper and paperboard transferred to the converting department were such that a disproportionate amount of the value added by manufacture would be credited to either the primary or converting department, adjustments were made to bring them more in line with industry averages. Where possible, assistance from the company was obtained in making these adjustments, but to a significant degree the adjustments were made by the Census Bureau based on average relationships for the industries affected. To the extent that such adjustments did not reflect actual relationships for such establishments, the validity of the data would be affected.

The paper and board converting industries consist of a homogeneous group of establishments specializing to a large extent in the output of products of their industries (Envelopes,

Industry 2651; Paper Bags, Industry 2661; etc.). The primary product specialization ratios of the paper and board converting industries' is their shipments of primary products to their shipments of all products, (primary and secondary); range from 85 to 100 percent (see Table 5A). In each of the Paper and Board Converting Industries the major portion of the secondary product shipments consists predominately of other converted paper or board products.

Table 7A summarizes the consumption of paper and paperboard by industry and Table 6A shows value of shipments of converted products and distinguishes paper and paperboard consumption as between company purchases and company's own manufacture.

It should be pointed out that in the following industry descriptions the word "purchased," when used to delineate the source of paper and board consumed in the manufacture of converted products, is to be construed as including interplant transfers, (from other establishments of the same company) as well as purchases in the open market.

### 2641—Paper Coating and Glazing

Industry 2641 comprises establishments primarily engaged in manufacturing coated and glazed paper from purchased paper. Important products of this industry include coated-book, waxed, wax-laminated, and gummed paper (including gummed-labels, and paper and cloth tape), waterproof wrapping paper, fly paper, cloth-lined paper, and pressure sensitive tapes (except surgical) with paper, cloth, or plastic backing. Establishments primarily engaged in manufacturing photographic and blueprint paper are classified in Industry 3861, Photographic Equipment; carbon paper, in Industry 3955, Carbon Paper and Inked Ribbons; and rubber tapes, including friction in Industry 3099, Rubber Industries, N.E.C. For a detailed list of primary products of Industry 2641, refer to Table 6A, product codes 2641111 to 2641598.

The value of shipments of Industry 2641 in 1954 totaled \$622 million. This included shipments of primary products (coated and glazed paper) valued at \$526 million, shipments of secondary products valued at \$92 million, and miscellaneous receipts of \$4 million.

Industry 2641 shipments of coated and glazed paper in 1954 represented 85 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 87 percent. Secondary products shipped by this Industry in 1954 consisted mainly of the following groups of products: non-metallic abrasives, other rubber products, recording tape valued in the aggregate at \$44 million; metal foil and leaf, \$10 million; specialty bags and liners, \$8 million; and commercial printing, letterpress and gravure, \$5 million.

Industry 2641 shipments of primary products (coated and glazed paper) in 1954 represented 86 percent of these products valued at \$610 million shipped by all industries. This coverage ratio was 92 percent in 1947. Industry 2699, Paper and Board Products, N.E.C., which shipped \$32 million, was the principal other industry shipping these products.

### 2651--Envelopes

Industry 2651 comprises establishments primarily engaged in manufacturing envelopes of any description from purchased paper and other materials. Establishments primarily engaged in manufacturing papeteries (boxed stationery) are classified in Industry 2699, Paper and Board Products, N.E.C.

The value of shipments of Industry 2651 in 1954 totaled \$195 million. This included shipments of primary products (envelopes) valued at \$181 million, secondary products valued at \$8 million, and miscellaneous receipts of \$6 million.

The value of envelope shipments of Industry 2651 in 1954 represented 96 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 92 percent. Secondary products shipped by this industry in 1954 consisted mainly of stationery, tablets, and related products valued at \$3 million.

Industry 2651 shipments of primary products (envelopes) in 1954 represented 92 percent of these products valued at \$197 million shipped by all industries. This coverage ratio was 95 percent in 1947. Industry 2699, Paper and Board Products, N.E.C., which shipped \$7 million, and Industry 2661, Paper Bags, which shipped \$5 million, were the principal other industries shipping these products.

#### 2661--Paper Bags

Industry 2661 comprises establishments primarily engaged in manufacturing paper bags from purchased paper and similar materials. Important products of this industry include kraft paper bags for groceries, paper shipping or heavy-duty paper sacks and multiwall bags for cement, flour, coal, etc., and glassine bags, cellophane bags, and miscellaneous merchandise bags. Establishments primarily engaged in manufacturing cotton or other textile bags from purchased fabrics are classified in Industry 2393, Textile Bags. For a detailed list of primary products of Industry 2661, see Table 6A, product codes 2661111 to 2661451.

The value of shipments of Industry 2661 in 1954 totaled \$23 million. This included shipments of primary products (paper bags) valued at \$561 million, shipments of secondary products valued at \$58 million, and miscellaneous receipts of \$4 million.

The value of paper bag shipments by Industry 2661 in 1954 represented 91 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 96 percent. Secondary products shipped by this industry in 1954 consisted mainly of wrapping products, except coated, oiled and waxed, valued at \$13 million, and \$26 million of the following product classes: gummed tape and paper, textile goods, n.e.c., textile bags, except laundry and wardrobe bags, lithographing, and metal foil and leaf.

Industry 2661 shipments of primary products (paper bags) in 1954 represented 88 percent of these products valued at \$635 million shipped by all industries. This coverage ratio was 86 percent in 1947. Industry 2393, Textile Bags, which shipped \$23 million; and Industry 2699, Paper and Board Products, N.E.C., which shipped \$20 million, were the principal other industries shipping these products.

#### 2671--Paperboard Boxes (Full Standard Industrial Classification Title: Paperboard Boxes, Folded, Set-Up and Corrugated)

Industry 2671 comprises establishments primarily engaged in manufacturing paperboard containers or boxes from purchased paperboard or fiber stock. Important products of this industry include folding boxes; setup boxes, corrugated and solid fiberboard boxes; decorated, lithographed, lacquered, and fancy covered paperboard boxes; cigarette and confectionery boxes, and vulcanized fiber boxes. Establishments primarily engaged in manufacturing sanitary food containers are classified in Industry 2699, Paper and Board Products, N.E.C. For a more detailed list of primary products of Industry 2671 refer to Table 6A product codes 2671111 to 2671411.

The value of shipments of Industry 2671 in 1954 totaled \$2,180 million. This included shipments of primary products (paperboard boxes) valued at \$2,071 million, shipments of secondary products valued at \$93 million, and miscellaneous receipts of \$16 million.

Paperboard box shipments of Industry 2671 in 1954 represented 96 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 97 percent. Secondary products shipped by this industry in 1954 consisted mainly of the following product classes: Other converted paper and paperboard products, \$24 million; sanitary food containers, \$22 million; oiled, waxed and wax laminated

paper, \$6 million; and commercial printing, letterpress and gravure, \$5 million.

Industry 2671 shipments of primary products (Paperboard Boxes) in 1954 represented 98 percent of these products valued at \$2,111 million shipped by all industries. This coverage ratio in 1947 was also 98 percent. Industry 2699, Paper and Board Products, N.E.C., which shipped \$20 million, and Industry 2751, Commercial Printing, which shipped \$4 million, were the principal other industries shipping these products.

#### 2674--Fiber Cans, Tubes, and Drums (Full Standard Industrial Classification Title: Fiber Cans, Tubes, Drums, and Similar Products)

Industry 2674 comprises establishments primarily engaged in manufacturing from purchased materials, fiber cans, cones, cores, mailing cases, ribbon-blocks, spools, tubes, drums, and similar products with or without metal ends. These products may be manufactured from purchased paperboard or vulcanized fiber. For a detailed list of primary products of Industry 2674, refer to Table 6A, product codes 2674111 to 2674351.

The value of shipments of Industry 2674 in 1954 totaled \$147 million. This included shipments of primary products (fiber cans, tubes, and drums) valued at \$142 million, shipments of secondary products valued at \$4 million, and miscellaneous receipts of \$1 million.

The value of fiber can, tube, and drum shipments of Industry 2674 in 1954 represented 97 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was also 97 percent. The total of \$4 million of secondary products shipped by this industry in 1954 consisted mainly of other paperboard containers.

Industry 2674 shipments of primary products (fiber cans, tubes and drums) in 1954 represented 87 percent of these products valued at \$162 million shipped by all industries. In 1947, this coverage ratio was 93 percent. Industry 3971, Plastics Products, N.E.C., which shipped \$7 million, was the principal other industry shipping these products.

#### 2691--Die-Cut Paper and Board (Full Standard Industrial Classification Title: Die-Cut Paper and Paperboard; and Cardboard)

Industry 2691 comprises establishments primarily engaged in die-cutting purchased paper and paperboard, and in manufacturing cardboard by laminating, lining, and surface-coating paperboard. Important products of this industry include paper bottle-caps and tops; index, Jacquard, library and other cut cards; cut-outs; photograph folders, mats, and mounts; stencil cards for addressing machines; cardboard panels and pasted chipboard and newsboard; and tabulating and time recording cards. Establishments primarily engaged in laminating building board or building paper from purchased paper or board are classified in Industry 2699, Paper and Board Products, N.E.C. For a more detailed list of primary products of Industry 2691 refer to Table 6A, product codes 2691111 to 2691300.

The value of shipments of Industry 2691 in 1954 totaled \$206 million. This included shipments of primary products (die-cut paper and paperboard) valued at \$176 million, shipments of secondary products valued at \$24 million, and miscellaneous receipts of \$6 million.

The value of die-cut paper and paperboard shipments by industry 2691 in 1954 represented 88 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 90 percent. Secondary products shipped by this industry in 1954 consisted mainly of the following product classes: oiled, waxed and wax-laminated paper; commercial printing, letterpress and gravure, in the aggregate at \$5 million; and coated and processed paper valued, at \$4 million.

Industry 2691 shipments of primary products (die-cut paper and board) in 1954 represented 82 percent of these products, valued at \$216 million, shipped by all industries. Industry 2699, Paper and Board Products, N.E.C., which shipped \$17 million, was the principal other industry shipping these products.

# 2693—Wallpaper

Industry 2693 comprises establishments primarily engaged in designing, printing and embossing paper for interior walls and ceilings. The paper stock used by this industry is called "hanging paper" and is produced by paper mills classified in Industry 2612. All kinds of wallpaper including machine, screen, and handprinted are included in this industry. For data on the primary products of Industry 2693, refer to Table 6A, product codes 2693011 and 2693051.

There is a high degree of primary product specialization in the Wallpaper Industry. Of the value of shipments of Industry 2693 in 1954 totaling \$40 million, wallpaper represented 99 percent. In 1947 this primary product specialization ratio was 98 percent.

In 1954 only a negligible amount of wallpaper shipments (less than \$1 million or 2 percent of the total) was reported by other industries. In 1947 this coverage ratio of Industry 2693 was 100 percent.

# 2694—Pulp Goods, Pressed and Molded

Industry 2694 comprises establishments primarily engaged in manufacturing, from purchased material, pressed or molded pulp goods, such as pulp plates and utensils, and papier-mache articles other than statuary and art goods (Industry 3298). Establishments primarily engaged in stamping plates and utensils from paper are classified in Industry 2699, Paper and Board Products, N.E.C. For a more detailed list of primary products of Industry 2694 refer to Table 6A, product codes 2694011 to 2694098.

The value of shipments of Industry 2694 in 1954 totaled \$42 million. This consisted almost entirely of pressed and molded pulp goods (primary products); secondary products and miscellaneous receipts were negligible.

The value of pressed and molded pulp goods shipments by Industry 2694 in 1954 represented 100 percent of its total product shipments (primary and secondary products). In 1954, this primary product specialization ratio was 95 percent. Industry 2694 accounted for 93 percent of pressed and molded pulp goods

valued at \$45 million shipped by all industries. In 1947, this coverage ratio was 86 percent.

# 2699—Paper and Board Products, N.E.C.

Industry 2699 comprises establishments primarily engaged in manufacturing from purchased paper, miscellaneous converted paper products, n.e.c., such as stationery, papeteries, crepe paper and crepe paper products, paper napkins, doilies, and towels, playing cards, drinking straws, sanitary food containers, printed and unprinted paper patterns, eggcase fillers, laminated building boards and papers, cups, plates, utensils, toilet paper, confetti, and paper novelties. For a more detailed list of primary products of Industry 2699, refer to Table 6A, product codes 2699111 to 2699681.

The value of shipments of Industry 2699 in 1954 totaled \$1,428 million. This included shipments of primary products, (paper and board products, n.e.c.) valued at \$1,277 million, shipments of secondary products valued at \$145 million, and miscellaneous receipts of \$6 million.

Industry 2699 shipments of paper and board products, n.e.c., in 1954 represented 90 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 86 percent. Secondary products shipped by Industry 2699 in 1954 consisted mainly of the following product classes: grocery and variety bags, paper; paper shipping sacks and multiwall bags; pulp goods, pressed or molded; sanitary napkins and tampons; and advertising novelties, valued in the aggregate at \$56 million; oiled, waxed and wax-laminated paper, \$22 million; folding paperboard boxes and cartons, \$19 million; miscellaneous die-cut products, \$9 million and envelopes excluding stationery, \$7 million.

Industry 2699 shipments of paper and board products, n.e.c., in 1954 represented 89 percent of these products valued at \$1,439 million shipped by all industries. This coverage ratio in 1947 was 86 percent. Industry 2671, Paperboard Boxes, which shipped \$55 million; and Industries 2661, Paper Bags, and 2614, Paper Coating and Glazing, which each shipped \$19 million, were the principal other industries shipping these products.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MANUFACTURES—INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup>	Cost of materials, etc. <sup>3</sup>	Value of shipments <sup>4</sup>
		Number <sup>1</sup>	Payroll (\$1,000)	Number <sup>1</sup>	Wages (\$1,000)			
Total for paper and board products industries:

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>Figures for years prior to 1935 do not include cost of contract work.

<sup>4</sup>For 1929 and 1947-1954, value of shipments: for all other years, value of production. See Introduction, "Value of Shipments."

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>6</sup>Data for 1939 do not include the converting operations of 213 paper and board products mills which were reported in combination with the primary mills. The general statistics for these operations were included in those for primary manufacture. Similar limitations apply generally to the data for earlier years. The figures for 1935 and prior years are further limited as to comparability with those for later years because (a) for 1899-1935, they exclude data for pulp goods, pressed and molded and printed and lithographed paper patterns, formerly classified in other industries, and (b) for 1933-1939, data for printed tags were excluded.

<sup>7</sup>In this industry, which contains a number of very small establishments, there is a possibility that some of these small establishments have been misclassified as to industry. This would not affect the statistics other than the number of establishments.

<sup>8</sup>The figures for Paper bags for 1935, and later years include data for certain establishments formerly classified in the discontinued industry "Stationery goods, n.e.c."

<sup>9</sup>The figures for "Paperboard boxes" for years prior to 1937 are not strictly comparable with those for 1937 and later years because they include data for fiber cans, tubes and drums which are shown as a separate industry classification for 1937-1954. Value added for 1937 on a basis comparable with 1935 was \$170.9 million.

<sup>10</sup>Data for "Fiber cans, tubes, and drums" are included in the figures for "Paperboard boxes" for years prior to 1937.

<sup>11</sup>The figures for 1947, but not for other years, have been revised for comparability with 1954 by including data for establishments primarily engaged in the manufacture of "laminated board; except laminated wallboard." Value added by manufacture for 1947 on a basis comparable with the other years was \$47.0 million.

<sup>12</sup>Die-cut paper and board" was formerly classified in the discontinued industries "Cardboard, not made in paper mills," "Card cutting and designing," and "Paper goods, n.e.c." Separate figures are, therefore, not available for years prior to 1937.

<sup>13</sup>"Pulp goods, pressed and molded" was formerly part of the discontinued industry "Synthetic-resin and molded and pressed pulp fabricated articles, n.e.c." Separate figures are, therefore, not available for years prior to 1937.

CONVERTED PAPER AND BOARD PRODUCTS

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2641, Paper Coating and Glazing: New England—Maine, 2 (100-249); New Hampshire, 1 (1,000-2,499); Vermont, 4 (250-499); Rhode Island, 8 (100-249); Connecticut, 9 (20-99); West North Central—Minnesota, 4 (5,844); Iowa, 1 (20-99); Missouri, 3 (250-499); Kansas, 1 (1-19); South—Delaware, 1 (20-99); Maryland, 2 (1-19); Virginia, 2 (100-249); North Carolina, 1 (1-19); South Carolina, 1 (20-99); Georgia, 2 (100-249); Florida, 2 (1-19); Tennessee, 1 (1-19); Alabama, 1 (20-99); Louisiana, 1 (20-99); Texas, 2 (20-99); Pacific—Washington, 1 (100-249); Oregon, 2 (20-99); California, 19 (1,000-2,499).

S.I.C. 2651, Envelopes: New England—New Hampshire, 1 (1-19); Massachusetts, 16 (1,940); Connecticut, 3 (500-999); East North Central—Indiana, 3 (250-499); Wisconsin, 3 (100-249); West North Central—Iowa, 2 (20-99); Nebraska, 3 (100-249); South Atlantic—District of Columbia, 1 (20-99); Virginia, 2 (250-499); West Virginia, 1 (20-99); Georgia, 4 (250-499); Florida, 2 (1-19); East South Central—Kentucky, 2 (20-99); Tennessee, 2 (20-99); Alabama, 1 (20-99); Mississippi, 1 (100-249); West—Colorado, 2 (100-249); Arizona, 1 (1-19); Washington, 2 (20-99); Oregon, 1 (100-249).

S.I.C. 2661, Paper Bags: New England—Maine, 2 (20-99); Vermont, 1 (20-99); Rhode Island, 1 (1-19); Connecticut, 1 (1-19); East North Central—Indiana, 7 (500-999); Wisconsin, 10 (250-499); West North Central—Iowa, 3 (500-999); Kansas, 1 (20-99); South Atlantic—Maryland, 4 (100-249); North Carolina, 4 (100-249); South Carolina, 2 (20-99); East South Central—Kentucky, 3 (250-499); Tennessee, 3 (100-249); West South Central—Oklahoma, 1 (1-19); Texas, 12 (500-999); West—Arizona, 1 (20-99); Washington, 8 (500-999); Oregon, 5 (250-499).

S.I.C. 2671, Paperboard Boxes: New England—Maine, 11 (250-499); Vermont, 1 (1-19); Rhode Island, 20 (500-999); West North Central—Minnesota, 22 (1,000-2,499); Missouri, 46 (4,003); South Dakota, 1 (1-19); Nebraska, 3 (100-249); South—Delaware, 2 (1-19); Maryland, 25 (3,462); District of Columbia, 3 (1-19); Virginia, 19 (1,000-2,499); South Carolina, 10 (500-999); Georgia, 20 (1,000-2,499); Florida, 16 (1,000-2,499); Kentucky, 12 (500-999); Tennessee, 25 (1,000-2,499); Oklahoma, 5 (250-499); Texas, 27 (2,500-4,999); West—Utah, 2 (100-249); Oregon, 5 (100-249).

S.I.C. 2674, Fiber Cans, Tubes, Drums, etc.: New England—Maine, 2 (1-19); New Hampshire, 1 (20-99); Rhode Island, 3 (250-499); West North Central—Minnesota, 2 (100-249); Missouri, 5 (500-999); Kansas, 1 (20-99); South—Delaware, 1 (100-249); Maryland, 3 (20-99); District of Columbia, 1 (100-249); Virginia, 1 (1-19); North Carolina, 5 (20-99); South Carolina, 3 (1,453); Georgia, 2 (100-249); Florida, 2 (100-249); Kentucky, 1 (1-19); Tennessee, 3 (250-499); Alabama, 1 (100-249); Mississippi, 1 (100-249); Louisiana, 1 (20-99); Texas, 1 (20-99); West—Colorado, 1 (1-19); Utah, 1 (1-19); Oregon, 2 (100-249).

S.I.C. 2691, Die-cut Paper and Board: New England—Vermont, 1 (1-19); Rhode Island, 4 (20-99); Connecticut, 3 (1-19); North Central—Illinois, 42 (1,000-2,499); Michigan, 20 (1,000-2,499); Minnesota, 3 (250-499); Iowa, 2 (20-99); Missouri, 9 (100-249); Nebraska, 1 (1-19); Kansas, 1 (1-19); South and West—Maryland, 3 (1-19); District of Columbia, 2 (250-499); Virginia, 2 (100-249); North Carolina, 3 (20-99); Florida, 2 (1-19); Alabama, 1 (1-19); Arkansas, 1 (1-19); Louisiana, 3 (100-249); Texas, 1 (1-19); Colorado, 2 (1-19); Washington, 2 (1-19); Oregon, 1 (1-19); California, 24 (500-999).

S.I.C. 2693, Wallpaper: New England—Massachusetts, 3 (100-249); Connecticut, 3 (20-99); Middle Atlantic—New York, 26 (1,071); New Jersey, 4 (20-99); Pennsylvania, 9 (500-999); North Central—Indiana, 2 (20-99); Michigan, 1 (1-19); Wisconsin, 1 (20-99); Missouri, 1 (20-99); Pacific—California, 4 (20-99).

S.I.C. 2694, Pulp Goods, Pressed and Molded: New England—Maine, 2 (500-999); New Hampshire, 1 (250-499); Massachusetts, 1 (250-499); Middle Atlantic—New York, 4 (500-999); Pennsylvania, 3 (20-99); North Central—Indiana, 3 (250-499); Illinois, 1 (100-249); Wisconsin, 4 (100-249); Missouri, 2 (20-99); South and West—Alabama, 1 (1-19); Texas, 1 (20-99); Washington, 1 (1-19); Oregon, 2 (1-19); California, 3 (20-99).

S.I.C. 2699, Paper and Board Products, N.E.C.: New England—Maine, 2 (250-499); New Hampshire, 14 (500-999); Vermont, 3 (500-999); West North Central—Minnesota, 15 (250-499); Iowa, 4 (100-249); Nebraska, 2 (20-99); Kansas, 6 (500-999); South Atlantic—Delaware, 1 (100-249); District of Columbia, 3 (20-99); Virginia, 5 (500-999); West Virginia, 1 (1-19); North Carolina, 6 (100-249); South Carolina, 3 (250-499); Florida, 10 (250-499); East South Central—Kentucky, 5 (20-99); Tennessee, 2 (100-249); West South Central—Arkansas, 3 (500-999); Louisiana, 3 (100-249); Oklahoma, 1 (1-19); West—Montana, 2 (1-19); Wyoming, 1 (1-19); Colorado, 3 (20-99); Washington, 10 (1,000-2,499); Oregon, 10 (500-999).

## MANUFACTURES—INDUSTRY STATISTICS

Table 3.—DETAILED STATISTICS FOR THE UNITED STATES: 1954

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not applicable. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than 500 tons. <sup>4</sup>Less than \$500 thousand. <sup>5</sup>Less than 500 hp.

## MANUFACTURES—INDUSTRY STATISTICS

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

NA Not available.

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MANUFACTURES—INDUSTRY STATISTICS

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. The first column shows the total value of shipments of the specified industry divided among: (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products) and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other Industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual compares are not thereby disclosed. The last column shows the total value of shipments of the primary products of the industry by all manufacturing industries)

xxx Not applicable.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>Establishments engaged in the manufacture of paper and paperboard products for their own consumption in the manufacture (e.g. packaging) of other products at the same location, were not requested to report the value of such products nor the consumption of paper and paperboard in their manufacture. Set-up paperboard boxes and paper bags are two of the more important products whose value and the quantity of paper and paperboard consumed are understated because of this factor.

<sup>2</sup>Unknown amount of pressure sensitive tape (code 26414) reported as gummed products (code 26415).

<sup>3</sup>Includes coated cellophane.

<sup>4</sup>Data not comparable because an unknown amount of butter, oleo, frozen food containers (codes 2699341 and 2699351) are included with folding boxes and cartons (code 2671211).

<sup>5</sup>Includes an unknown quantity and value of "screen grounds" which are ultimately used as a raw material by manufacturers of screen and handprinted wallpaper.

<sup>6</sup>Excludes an unknown amount of decorated and undecorated novelties.

<sup>7</sup>Includes unknown amounts of shade paper, blinds, and window decorations.

## MANUFACTURES--INDUSTRY STATISTICS

Table 6B.--VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954, AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1)

California.....	3,598	Texas.....	4,560	California.....	12,731

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 26411, Maine, Massachusetts, New York, Ohio, Wisconsin, and Minnesota; 26412, New Hampshire, Vermont, Connecticut, Indiana, Illinois, Minnesota, Missouri, Virginia, Georgia, Alabama, Texas, Washington, Oregon, and California; 26413, New Hampshire, Vermont, New Jersey, Pennsylvania, Wisconsin, Florida, Oregon, and California; 26414, New York, New Jersey, Pennsylvania, Ohio, Wisconsin, and Minnesota; 26415, New Hampshire, Rhode Island, Ohio, and Illinois; 26611, Massachusetts, New Jersey, Pennsylvania, Ohio, Missouri, Virginia, Georgia, Kentucky, Alabama, Washington, Oregon, and California; 26612, Indiana, Michigan, Minnesota, Iowa, Georgia, and Tennessee; 26614, Vermont, Massachusetts, Indiana, Minnesota, Nebraska, Kansas, West Virginia, Florida, Alabama, and Illinois; 26711, Maine, Connecticut, Iowa, Nebraska, Delaware, Kentucky, Alabama, Mississippi, Arkansas, Oklahoma, Colorado, Utah, and Oregon; 26712, Iowa, Florida, Kentucky, Alabama, Colorado, and Georgia; 26741, Rhode Island, Connecticut, District of Columbia, South Carolina, Georgia, Florida, Tennessee, Louisiana, and Oregon; 26912, Ohio, Indiana, Iowa, Kansas, District of Columbia, and California; 26991, New Hampshire, Massachusetts, Ohio, Michigan, Missouri, Virginia, Georgia, Tennessee, Alabama, Texas, Washington, and Oregon; 26992, Vermont, Massachusetts, Rhode Island, Michigan, Missouri, Virginia, North Carolina, Kentucky, Alabama, Arkansas, and Washington; 26993, Vermont, Rhode Island, Connecticut, Ohio, Indiana, Wisconsin, Minnesota, Iowa, Missouri, Nebraska, Kansas, North Carolina, South Carolina, Florida, Tennessee, Arkansas, Louisiana, Washington, and Oregon; 26994, Maine, Connecticut, New Jersey, Pennsylvania, Ohio, Michigan, Delaware, Tennessee, Washington, and Oregon; 26995, Vermont, Massachusetts, New Jersey, Pennsylvania, Indiana, Maryland, and California; 26996, New Hampshire, North Carolina, Mississippi, Louisiana, and Texas.

<sup>2</sup>Includes an unknown amount of pressure sensitive tape (product class 26414).

<sup>3</sup>Data not strictly comparable because an unknown amount of butter, oleo, frozen food containers are included in product class 26712 for 1953 and earlier years and in product class 26993 in 1954.

<sup>4</sup>Represents South and West Region.

xxx Not applicable. D Withheld to avoid disclosing figures for individual companies. NA Not available. <sup>1</sup>Including the consumption of materials produced by integrated primary paper and board mills at the same location. <sup>2</sup>Consumption data were separately requested for both "Coarse" and "Special Industrial" paper. An analysis of reports indicates that the distinction between the two grades was not clearly drawn, therefore the tonnages have been combined. It is believed that about 95% of this total constitutes "Coarse" paper. <sup>3</sup>Detail items have not been presented separately because of their relative unimportance to the industry's total consumption of paper and board. <sup>4</sup>Consumption data were separately requested for "Groundwood (uncoated)", "Paper-machine-coated", "Book (uncoated)", "Fine", and "Coarse Paper". An analysis of reports indicates that the distinction between the five grades was not clearly drawn in certain industries, therefore the tonnages have been combined. <sup>5</sup>Does not include small amounts of "Absorbent Paper" reported separately but now included in material code 261221 "Special Industrial" paper. <sup>6</sup>Less than \$100 thousand.

CONVERTED PAPER AND BOARD PRODUCTS

26B-25

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Estab- lish- ments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Major Group 27.—Printing and Publishing

This major group includes establishments engaged in printing by one or more of the common processes, such as letterpress, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as bookbinding, typesetting, engraving, photoengraving, and

electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in Service Industries, and textile printing and finishing in Major Group 22.

NA Not available.

<sup>1</sup>In addition to data for operating establishments, manufacturers' central administrative offices and auxiliary units reported 6,088 employees with a payroll of \$33,778 in 1954. Similar data are shown for the years 1949-1953 in the Annual Survey of Manufactures volumes.

<sup>2</sup>The figures for 1939 through 1954 include data for employees of Printing and Publishing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>3</sup>Value of products and receipts less cost of materials, supplies, fuel, electricity, and contract work. For 1909-1933 cost of contract work was subtracted from value at products in calculating value added by manufacture only for the industries in which it was significant. For 1899 and 1904, cost of contract work was not subtracted from value of products for any industries. Value added by manufacture for 1909, calculated by the method used for 1899 and 1904, was \$553.5 million.

<sup>4</sup>Driven by purchased energy.

<sup>5</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard error associated with these estimates are published in the Annual Survey of Manufactures volumes for this period.

<sup>6</sup>The figures for 1899-1939 include data for establishments primarily engaged in the manufacture of tags, which are classified in 1947-1954 in the pulp, paper and products industries.

<sup>7</sup>The figures for 1899-1937 include data for establishments primarily engaged in the manufacture of paper patterns, which are included for later years in the series for the pulp, paper and products industries.

<sup>8</sup>Establishments engaged solely in music publishing were not canvassed in 1933.

## MANUFACTURES—INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS FOR INDUSTRY GROUPS BY REGIONS AND STATES: 1954 AND 1947  
(For explanation of column captions see introduction)

Industry group, region, and State	1954								1947	
	Number of establish- ments	All employees		Production workers			Value added by manu- facture (\$1,000)	Capital expendi- tures, new (\$1,000)	All employees, number	Value added by manu- facture (\$1,000)
		Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

NOTE: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>Less than \$500 thousand.<sup>2</sup>This industry sub-group consists of a single four-digit industry. Detailed data by State are included in the four-digit industry tables.<sup>3</sup>Each producing state not shown separately has been withheld either (a) to avoid disclosing figures for individual companies; or (b) because the state had less than 100 employees in the industry group. Such state figures are included, however, in the appropriate divisional and United States totals.

# Newspapers, Periodicals, Books, and Miscellaneous Publishing

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

<u>Code</u>	<u>Title</u>
2711—Newspapers	
2721—Periodicals	
2731—Books; Publishing and Printing	
2732—Book Printing	
2741—Miscellaneous Publishing	

As in previous Censuses, publishing, printing and allied activities, other than those performed in Government-owned and operated establishments, are included as manufacturing activities. Establishments engaged in publishing newspapers, and establishments primarily engaged in publishing periodicals, books, and miscellaneous publications (including those primarily engaged in book printing) are assigned to one of the five separately described industries below. As noted in the Introduction, this report does not incorporate any data reported by religious, social, charitable, educational, and other non-profit organizations whose employees are not covered under the Social Security system. News syndicates are classified in service industries and their activities are included in the Census of Business.

The term "publisher" is used to designate the person or organization by whom or in whose name newspapers, periodicals, and other publications are listed. In order to provide the fullest possible coverage of the publishing field in the Census of Manufactures, a separate report was requested from each publishing establishment, whether or not any printing was done at the publishing location. All establishments engaged in the publishing of one or more newspapers are classified as newspaper publishers, without regard to the ratio of receipts from other activities (e.g., job printing) to their total receipts.

Publishers of newspapers and periodicals were asked to report separately for each of their publications, where possible, information on circulation and dollar receipts by frequency of issue as well as by type of revenue. The more common frequencies of issue were listed on the report forms supplied to all newspapers, and a classification guide was sent to publishers of periodicals to provide uniform designation of periodicals by type of issue. Newspaper and periodical publishers were required to break their total revenues into two-parts—receipts from subscriptions and sales, and receipts from advertising; "total revenue" was defined as net after deducting advertising agency commissions, cash discounts, newsstand, carrier, and wholesalers' commissions, and other similar items.

For 1954, detailed product statistics at the national level for the five industries included in this report are presented in a single table (Table 6A). In the 1947 publication, separate tables or sets of tables were used to show comparable data on dollar receipts, circulation, and number of copies sold. The general operating statistics shown in Tables 1 through 4 and Table 8, and the distribution of total receipts by broad classes of activities provided in Tables 5A and 5B are comparable to those presented in 1947 publications. For both censuses, the data on number of employees for newspaper and periodical publishing do not include newsboys or carrier boys.

## 2711—Newspapers

This industry comprises establishments engaged in publishing newspapers, or in publishing and printing newspapers. These establishments carry on the various operations necessary for issuing newspapers, including the gathering of news, and the preparation of editorials and advertisements, but may or may not perform their own printing. Job printing is frequently carried on by establishments engaged in publishing and printing

newspapers, but even though the job printing may be of major importance, such establishments are included in this industry.

Establishments not engaged in publishing newspapers but which print or lithograph newspapers for publishers, are classified in Industry 2751, Commercial Printing, or Industry 2761, Lithographing. News syndicates are classified in service industries. Establishments primarily engaged in publishing shopping news are classified in Industry 2741, Miscellaneous Publishing. For a detailed list of the types of receipts classified as primary to this industry, refer to Table 6A, product codes 2711101 to 2711298.

For the purposes of the Census of Manufactures, the term "newspaper" has been treated, in 1954 as in 1947, as including those publications issued at regular frequencies which contain news of interest to the general public. Publications so qualifying are usually printed on newsprint by letterpress process and range in frequency of issue from "around the clock" to weekly, with rare instances of lesser frequency.

Publications have been classified as periodicals (Industry 2721) rather than as newspapers if their news and editorial presentations do not appear to be directed to the public at large. Among the types of publications sometimes considered newspapers, but treated in the Census as periodicals, are the following: trade journals; house organs; local church or school papers and like publications with very limited or specialized news treatment. Generally, publications issued by nonprofit organizations, (educational, religious, charitable, labor, business, professional, etc.), are classified as periodicals.

Two report forms were used to canvass this industry. Form MC-27A was used to collect data in detail from the larger establishments, whereas Form MC-27C was used generally to collect a minimum of information from establishments employing fewer than six employees. In accordance with the general Census of Manufactures rules, no data were tabulated from establishments operated entirely by the owner or owners without employees.

Since these requisites do not necessarily conform with classification tests applied elsewhere, the data presented in such tables as 6A through 6E and in Tables 7A and 7B may not agree with other published data for the newspaper industry. Differences are most noticeable in the detailed classification of dollar receipts and average circulation by frequency of issue. For example, the data shown for daily, semi-weekly, etc., newspapers do not include trade, business and like papers dealing with specialized news and subject matter (classified in this report with periodicals, Industry 2721), where other data may treat such publications as newspapers.

Total receipts of Industry 2711 in 1954 amounted to \$3,091 million. This included receipts from primary activities (newspaper publishing) valued at \$2,926 million, receipts from secondary activities valued at \$152 million, and miscellaneous receipts of \$12 million. In 1954, newspaper subscriptions and sales accounted for 29 percent of the industry's total newspaper publishing receipts, excluding receipts not specified by kind, with net advertising receipts accounting for the balance of 71 percent. The corresponding ratios in 1947 were 33 percent and 67 percent respectively.

Industry 2711 receipts from newspaper publishing in 1954 represented 95 percent of its total receipts (primary and secondary). In 1947, this primary activity specialization ratio was 94 percent. Receipts from secondary activities of Industry 2711 in 1954 consisted mainly of commercial job printing (letterpress and gravure), \$90 million; periodical publishing, \$18 million; book and pamphlet printing, \$17 million; miscellaneous publish-

ing, \$9 million; lithographing (including offset printing), \$7 million; and photograving, \$5 million.

Industry 2711 receipts from newspaper publishing in 1954 represented 100 percent of the newspaper publishing receipts, valued at \$2926 million, reported by all industries. This coverage ratio in 1947 was also 100 percent.

#### 2721—Periodicals

This industry comprises establishments primarily engaged in publishing periodicals, or in preparing, publishing, and printing periodicals. These establishments carry on the various operations necessary for issuing periodicals, but may or may not perform their own printing. Establishments not engaged in publishing periodicals, but which print or lithograph periodicals for publishers, are classified in Industry 2751, Commercial Printing, or 2761, Lithographing, depending on the primary printing process employed. For a detailed list of the types of receipts classified as primary to Industry 2721, refer to Table 6A, product codes 2721111 to 2721298.

Data on the periodical publishing activities of non-profit organizations (religious, educational, social, charitable, etc.) have been included to the extent that the employees of such organizations were covered under the Social Security system.

For the distinction between newspapers and periodicals which has been applied in classifying establishments for the Census of Manufactures, see the foregoing statements under Industry 2711, Newspapers. To provide uniform classification of periodicals by type, 28 types of periodical codes (see Table 6F) were included with the report forms mailed to all periodical publishers employing one or more persons.

Total receipts of Industry 2721 in 1954 amounted to \$1441 million. This included receipts from primary activities (periodical publishing) valued at \$1364 million, receipts from secondary activities valued at \$74 million, and miscellaneous receipts of \$3 million. In 1954 receipts from periodical subscriptions and sales accounted for 38 percent of the industry's total periodical publishing receipts excluding receipts not specified by kind, with net advertising receipts accounting for the balance of 62 percent. The corresponding ratios in 1947 were 40 percent and 60 percent, respectively.

Industry 2721 receipts from periodical publishing in 1954 represented 95 percent of its total receipts (primary and secondary). In 1947, this primary activity specialization ratio was 94 percent. Secondary activities of Industry 2721 in 1954 consisted mainly of book and pamphlet publishing, \$51 million; commercial job printing (letterpress and gravure), \$9 million; and miscellaneous publishing, \$7 million.

Industry 2721 receipts from periodical publishing in 1954 represented 97 percent of the receipts from periodical publishing, valued at \$1413 million, reported by all industries. This coverage ratio in 1947 was 98 percent. Other industries reporting receipts from periodical publishing in 1954 consisted mainly of Industry 2711, Newspapers, \$18 million; Industry 2731, Books, Publishing and Printing, \$11 million; and Industry 2741, Miscellaneous Publishing, \$6 million.

**2731—Books; Publishing and Printing** (Full Standard Industrial Classification Title: Books; Publishing, Publishing and Printing)

This industry comprises establishments primarily engaged in publishing only, or in publishing and printing, books and pamphlets. Establishments primarily engaged in printing, or in printing and binding (but not publishing) books and pamphlets are classified in Industry 2732, Book Printing. Establishments primarily engaged in binding books published or printed in the same establishment are classified in this industry, but establishments primarily engaged in binding books printed elsewhere are classified in Industry 2781, Bookbinding.

Industry 2731 also includes data on book publishing activities obtained from non-profit organizations whose employees are covered under the Social Security system and were able to report their book publishing operations as a separate establishment.

For a detailed list of the type of receipts classified as primary to Industry 2731, refer to Table 6A, product codes 2731011 to 2731081.

The data presented in Tables 6A and 6G for number of books sold represent the total number of books sold (shipped and billed) by publishers during 1954, without regard to whether these books were actually published or printed in 1954. The value figures shown in these tables and in Table 9 are net publishers' receipts after deducting cash discounts, returns and allowances; i.e., they represent net sales.

"Books" are considered to include all collections of 64 or more pages bound by any method, and all hardbound collections, irrespective of the number of pages. (The designation "hardbound" describes books which are bound with paper over board, cloth over board, and artificial or genuine leather.) "Pamphlets" are defined to mean any collection to be offered for sale of at least 8 but less than 64 paperbound pages. The distinction observed between original editions and reprint editions can be summarized as follows: "original editions" include books published by the publisher who first converts a manuscript into published form, whereas "reprint editions" include books published by a publisher who, by arrangement with the original publisher, republishes a book.

Total receipts of Industry 2731 in 1954 amounted to \$665 million. This included receipts from primary activities (book and pamphlet publishing) valued at \$596 million, secondary activities valued at \$59 million, and miscellaneous receipts of \$10 million.

Industry 2731 receipts from book and pamphlet publishing in 1954 represented 91 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specialization ratio was 92 percent. Secondary activities of Industry 2731 in 1954 consisted mainly of book and pamphlet printing and bookbinding, \$14 million; miscellaneous publishing, \$14 million; and periodical publishing, \$11 million.

Industry 2731 receipts from book and pamphlet publishing in 1954 represented 90 percent of the receipts from book and pamphlet publishing, valued at \$665 million, reported by all industries. This coverage ratio in 1947 was 93 percent. Other industries reporting receipts from book and pamphlet publishing in 1954 consisted mainly of Industry 2721, Periodicals, \$51 million; Industry 2741, Miscellaneous Publishing, \$8 million; and Industry 2751, Commercial Printing, \$3 million.

#### 2732—Book Printing

This industry comprises establishments primarily engaged in printing only or in printing and binding books and pamphlets, but not engaged in publishing. Establishments primarily engaged in publishing, or in publishing and printing books and pamphlets are classified in Industry 2731. Establishments engaged in both printing and binding books, but primarily binding books printed elsewhere are classified in Industry 2781. For a detailed list of the types of receipts classified as primary to Industry 2732, refer to Table 6A, product codes 2732000 to 2732053.

Establishments classified in Industry 2732 are identical in character to some establishments primarily engaged in commercial printing (Industry 2751) and in lithographing (Industry 2761). The distinction is that all the establishments classified in Industry 2732 derive the greater part of their revenue from printing books and pamphlets, while such operations are secondary activities for establishments classified in Industries 2751 and 2761.

Total receipts of industry 2732 in 1954 amounted to \$221 million. This included receipts from primary activities (book printing) valued at \$169 million, receipts from secondary activities valued at \$52 million, and miscellaneous receipts valued at \$1 million.

Industry 2732 receipts from book printing in 1954 represented 76 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specialization ratio was 77 percent. Secondary activities of Industry 2732 in 1954 consisted mainly of commercial job printing (letterpress and

gravure), except books, \$23 million; lithographing, \$15 million; binding of books printed elsewhere, \$5 million; and typesetting, \$4 million.

Industry 2732 receipts from book printing in 1954 represented 55 percent of the receipts from book printing, valued at \$305 million, reported by all industries. This coverage ratio in 1947 was 44 percent. Other industries reporting receipts from book printing in 1954 consisted mainly of Industry 2751, Commercial Printing, \$72 million; Industry 2761, Lithographing, \$26 million; Industry 2711, Newspapers, \$17 million; and Industry 2731, Books: Publishing and Printing, \$14 million. Excluded from the \$305 million is the value of books published and printed in the same establishment and classified in Industry 2731, Books: Publishing and Printing.

#### 2741—Miscellaneous Publishing

This industry comprises establishments primarily engaged in publishing such products as maps, atlases, sheet music, directories, almanacs; catalogs; globe covers; racing forms; and shopping news or engaged in miscellaneous publishing activities, not elsewhere classified, whether or not engaged in printing. Establishments primarily engaged in printing such products and not engaged in publishing are classified in Industry 2751, Commercial Printing, or Industry 2761, Lithographing, depending on the primary printing process employed. Establishments primarily engaged in publishing greeting cards are classified in Industry 2771, Greeting Cards.

Establishments primarily engaged in offering financial, credit, or other business services and which may publish directories as part of this service are not included in this industry but are classified as service industries (Census of Business). For a

detailed list of the types of publications classified as primary to Industry 2741, refer to Table 6A, product codes 2741010 to 2741098.

Total receipts of Industry 2741 in 1954 amounted to \$231 million. This included receipts from primary activities (miscellaneous publishing) valued at \$190 million, receipts from secondary activities valued at \$32 million, and miscellaneous receipts valued at \$9 million.

Industry 2741 receipts from miscellaneous publishing in 1954 represented 85 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specialization ratio was 93 percent. The lower primary specialization ratio in 1954 reflects in large part the increased diversification of publishing and printing activities that has occurred in this industry since 1947. Secondary activities of this industry in 1954 consisted mainly of commercial printing (letterpress and gravure), \$13 million; periodical publishing, \$6 million; book and pamphlet publishing, \$7 million; and lithographing, \$4 million.

Industry 2741 receipts from miscellaneous publishing in 1954 represented 82 percent of the receipts from miscellaneous publishing, valued at \$231 million reported by all industries. This coverage ratio in 1947 was 78 percent. Except for Industry 2751, Commercial Printing, with receipts for miscellaneous publishing amounting to \$4 million, virtually all of the miscellaneous publishing activity conducted in other industries was performed by the publishing industries covered in this report. (Industry 2731, Books: Publishing and Printing, \$14 million; Industry 2711, Newspapers, \$9 million; and Industry 2721, Periodicals, \$7 million.)

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MANUFACTURES—INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Industry and census year	Establishments, number	All employees		Production workers		Value added by manufacture <sup>2</sup> (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (receipts) <sup>3</sup> (\$1,000)
		Number <sup>1</sup>	Payroll (\$1,000)	Number <sup>1</sup>	Wages (\$1,000)

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products and receipts less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>See Introduction, "Value of Shipments."

<sup>4</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>5</sup>The figures for 1939 are not entirely comparable with those for earlier years. Value added by manufacture for 1939 on a basis comparable with earlier years was \$677.7 million.

<sup>6</sup>Does not include cost of contract work.

<sup>7</sup>Comparable figures are not available for earlier years.

<sup>8</sup>The "Miscellaneous publishing" industry classification was established for the first time in the 1947 Census. The figures for 1939 were derived by reclassifying 1939 Census reports. Insufficient 1939 data and the difficulties involved in reclassifying these reports account for the apparent understatement of the 1939 figures.

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947  
(For explanation of column captions see Introduction)

Horsepower of prime movers and electric motors driven by purchased energy, total.....1,000 hp..	420	45	10	25	9	5	2
Engines, etc., driving electric generators...do....	7	10	( <sup>4</sup> )	1	1	...	...
Engines, etc., not driving electric generators.....do....	4	1	( <sup>4</sup> )	( <sup>4</sup> )	...	...	...
Electric motors driven by purchased energy...do....	409	34	10	24	8	5	2

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not available. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than \$500 thousand. <sup>4</sup>Less than 500 hp.

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MANUFACTURES--INDUSTRY STATISTICS

Table 5B.--INDUSTRY-PRODUCT ANALYSIS-SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows, for the industry listed in the column heading, the value of shipments divided among publishing receipts, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry)

<sup>1</sup>Includes \$4,438 thousand in receipts received by the Industry 2751, Commercial Printing.

<sup>2</sup>Includes \$4,598 thousand in receipts received by Industry 2751, Commercial Printing.

<sup>3</sup>Less than \$100 thousand.

<sup>4</sup>Includes \$2,636 thousand shipped by Industry 2751, Commercial Printing.

<sup>5</sup>Includes shipments of specified amounts (in thousands of dollars) by the following industries: \$72,438 by Industry 2751, Commercial Printing; \$26,472 by Industry 2761, Lithographing.

<sup>6</sup>Includes \$4,123 thousand shipped by Industry 2751, Commercial Printing.

<sup>7</sup>Commercial printing receipts are considered primary activities for newspaper publishers. For the purpose of classifying establishments (see text for the S.I.C. definition of Industry 2711). However, for the purpose of calculating coverage and specialization ratios for this industry, such receipts are treated as secondary activities (see Table 5A).

<sup>8</sup>Includes \$5,334 thousand of photoengraving (product class 27930).

<sup>9</sup>Composed largely of other converted paper and paper board products (product class 26996).

<sup>10</sup>Composed largely of other converted paper and paper board products (product class 26996) greeting cards, publishing (product class 27711) bookbinding (product class 27810) and games and toys, except dolls and children's vehicles (product class 39410).

<sup>11</sup>Includes \$4,677 thousand of bookbinding (product class 27810) and \$4,421 thousand of typesetting, machine and hand (product class 27910).

xxx Not applicable.

D Withheld to avoid disclosing figures for individual companies.

NA Not available.

<sup>1</sup>Data for 1954 and 1947 for these subtotals and the seven-digit product codes listed below may not be exactly comparable because some newspapers may have been reported on a combined frequency basis in one year and on separate frequency basis in the other; however, it is believed that most newspapers reported on the same basis for both years.

<sup>2</sup>Combination of morning, evening, and Sunday or a combination of two frequencies not specified in existing product codes.

<sup>3</sup>"Other" includes "Tri-weekly" and "Semi-weekly."

<sup>4</sup>Detailed figures may not add exactly to the totals, owing to small differences in the reporting of individual establishments that could not be reconciled. These differences are not considered significant for the categories so affected, either in terms of their effect on the number of copies sold or on the dollar receipts reported. The "Books, total" excludes sales of "books, not further classified" (product code 2731061).

<sup>5</sup>Excludes a small amount of books reported by establishments that were unable to report a breakdown of their receipts as between books and pamphlets (see product codes 2731000 and 2731099).

<sup>6</sup>High School books are included with Elementary books. Separate figures were not collected in 1947.

<sup>7</sup>In 1947 Hymnals and General Religious Books (including Prayerbooks) were reported on a single product line.

<sup>8</sup>The 1947 receipts from "Other books" (product codes 2731051 and 2731055) included book club sales and mail order sales as well as sale of books (except toy books), not further classified. In 1954, receipts from book club sales and mail order sales are shown by type or category of book; this change in classification affects particularly the 1954-1947 comparison in the adult trade book category (product codes 2731041 and 2731043).

<sup>9</sup>Since these books are frequently sold direct to the consumers, some publishers reported their receipts on a retail basis; hence, aggregate receipts for this type of book are a combination of wholesale and retail values but do represent total receipts at the publishing plant level. Also, as books in this category are typically sold on an installment plan basis, the values reported here (actual receipts during the year) may not agree with publishers' sales for the same reporting period.

<sup>10</sup>Includes an indeterminable portion, believed to be small, of receipts from other subscription books.

<sup>11</sup>Represents receipts reported on short form MC-27C by small establishments that were not asked to provide a breakdown of receipts by type of edition or binding.

<sup>12</sup>Largely accounted for by small establishments that were not able to report a breakdown of their total receipts.

<sup>13</sup>Books, printed only" includes "Pamphlets, printed only."

<sup>14</sup>"Books, printed and bound" includes "Pamphlets, printed and bound."

<sup>15</sup>Represents receipts reported on short form MC-27C by small establishments that were not asked to provide a breakdown by type of publication.

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 27111, Delaware, and South Carolina; 27212, Alabama, Kentucky, Kansas, and Nebraska.

<sup>1</sup>Varies from total receipts for industry shown in tables 1, 2, 3 and 5 by the amount of secondary products, misc. receipts, etc.<sup>2</sup>Includes \$26,623,000 receipts not distributed between "Subscriptions and sales" and "Advertising."<sup>3</sup>Includes \$18,979,000 receipts not distributed between "Subscriptions and sales" and "Advertising."<sup>4</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period.

<sup>1</sup>Receipts from Books and Pamphlets publishing were reported for all states except Delaware, Mississippi and Wyoming; states not shown reported receipts of less than \$500 thousand from book publishing. In the case of Kansas, more than \$500 thousand receipts were reported from book publishing, but the actual amount has been withheld to avoid disclosure of individual company figures.

<sup>2</sup>Excludes \$11,774 thousand reported by small establishments that were not able to segregate their publishing receipts as between books and pamphlets.

<sup>1</sup>The classification "Newspaper Publisher" does not include publishers of supplements prepared for issuance and sale by publishers of Sunday newspapers. Publishers of such supplements and their newsprint consumption are reported in Industry 2721, Periodicals (See text).

<sup>2</sup>In addition 86,150 tons of newsprint was reported by newspaper publishers as purchased and consumed by printers in printing their publications.

<sup>3</sup>The 1947 total includes not only the newsprint reported by newspaper publishers as purchased and consumed, or purchased by newspaper publishers and consumed by printers in the printing of their publications, but also the newsprint purchased by printers for use in printing publications of newspaper publishers. (See Table 7B for comparable totals by States.)

## Paper definitions:

Newsprint includes standard and superstandard newsprint in rolls and sheets.

Uncoated Groundwood Paper includes "A" and "B" printing, catalog, directory, rotogravure, and all other uncoated groundwood paper.

Uncoated Book Paper includes machine finish, English finish, antique, bulking, eggshell, supercalendered, offset, label and wrapper paper, poster, and all other uncoated book paper.

Uncoated Fine Paper includes bond, writing, ledger, manifold, bristol (except bogus), cover, text, and all other uncoated fine paper.

Coated Paper includes all paper machine-coated and off-the-machine (conversion) coated printing paper.

<sup>1</sup>The classification "Newspaper Publisher" does not include publishers of supplements prepared for issuance and sale by publishers of Sunday newspapers. Publishers of such supplements and their newsprint consumption are reported in Industry 2721, Periodicals (see text for more complete explanation).

<sup>2</sup>As in 1954, these figures include not only the newsprint purchased by newspaper publishers for use in printing their publications but also the newsprint purchased by printers for use in printing publications of newspaper publishers.

## MANUFACTURES--INDUSTRY STATISTICS

Table 8.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation.)

Ind. or prod- uct class No.	Industry or product class by percent of specialization	Estab- lish- ments, number	All employees		Production workers			Value added by manufacture (\$1,000)	Cost of materials, etc. (\$1,000)	Value of shipments (\$1,000)
			Number	Payroll (\$1,000)	Number	Man-hours (1,000)	Wages (\$1,000)

	50-74% specialization.....	74	1,864	7,615	1,029	1,800	4,050	18,372	8,921	27,294
	All other <sup>1</sup> .....	24	2,766	12,050	978	2,044	3,817	22,724	11,079	33,802

<sup>1</sup>This class includes data for establishments with less than 50% specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

<sup>2</sup>These data reflect the activities of establishments specializing in commercial or job printing but because they are also engaged in newspaper publishing, they are classified in Industry 2711, "Newspapers." (See text for fuller explanation.)

Table 9.—RECEIPTS FROM SALES OF SELECTED PRODUCTS, BY CLASS OF CUSTOMER; 1954

Class of customer	Receipts											
	All books	Type of book										
		Texts and workbooks (Codes 2731011, -18)		Religious (Codes 2731021, -23, -25, -27, -29)		Technical, scientific and professional (Codes 2731031, -35)		Trade (Codes 2731041, -43, -45, -47)		Encyclopedia and other (Codes 2731048, -49, -51, -55, -61)		
		Receipts (\$1,000)	Percent of total	Receipts (\$1,000)	Percent of total	Receipts (\$1,000)	Percent of total	Receipts (\$1,000)	Percent of total	Receipts (\$1,000)	Percent of total

D Withheld to avoid disclosing figures for individual companies.

2 Less than 0.05 percent.

XXX Not applicable.

<sup>1</sup>Includes about \$18 million of receipts reported by certain small establishments that were not asked to report a breakdown of their total receipts by type of book.<sup>2</sup>Believed to include a significant volume of "mail order sales" and "subscription sales (door-to-door)" reported by publishers whose records did not permit them to report their sales to individual consumers in the detail requested. The types of books which appear most affected by the loss of detail in sales to this class of customer are in the technical, scientific, and professional category.

## Commercial Printing; Lithographing; Greeting Cards; Bookbinding; and Related Industries

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2751--	Commercial Printing
2761--	Lithographing
2771--	Greeting Cards
2781--	Bookbinding
2782--	Blankbooks and Paper Ruling
2783--	Loose-Leaf Binders and Devices
2789--	Miscellaneous Bookbinding Work

Two types of reporting forms were used to canvass these industries. A special short form MC-27C was used to collect a minimum of information from establishments employing fewer than six persons, while the basic form MC-27B was used to collect more detailed data from the larger establishments. Information reported on both of these forms has been combined in this report. Separate data on the more detailed information reported for the larger establishments are shown in Table 3.

### 2751--Commercial Printing

This industry comprises establishments primarily engaged in commercial or job printing. It includes general printing shops as well as shops specializing in printing newspapers and periodicals for others, and those which specialize in gravure, roto-gravure, and rotary photogravure printing; establishments primarily engaged in making gravure plates for others and those which print by screen processes (except decalcomanias classified in Industry 2761, and textile printing in Industry 2261). In addition to printing on paper, Industry 2751 includes establishments primarily engaged in printing on wood (e.g. pencils), on metal, plastics, etc. Letterpress, gravure, and screen process printing are the principal processes employed by establishments classified in Industry 2751.

Establishments primarily engaged in printing books (without publishing) are classified in Industry 2732, Book Printing; greeting cards in Industry 2771; printing from lithographic plates in Industry 2761, Lithographing; and embossing on books in Industry 2789, Miscellaneous Bookbinding Work, but those establishments primarily engaged in embossing on paper are classified in Industry 2751. For a detailed list of primary activities of Industry 2751, refer to Table 6A, product codes 2751011 to 2751085.

Many of the plants in Industry 2751 are combination letterpress-lithographing plants and therefore are similar in character to the combination plants classified in Industry 2761, Lithographing. The classification of these combination plants was determined by the individual establishment's major source of revenue, thus combination plants which reported the letterpress process as their major process (based on value of printing material produced) are classified in this industry and all plants reporting lithography as their major process are classified in Industry 2761, Lithographing.

The statistics for Industry 2751 include data reported by printing departments of establishments primarily engaged in other manufacturing or non-manufacturing activities, where book records were available to provide for a separate report from the printing department.

Total receipts of Industry 2751 in 1954 amounted to \$2,202 million. This included receipts from primary activities (commercial printing) valued at \$1,863 million, receipts from secondary activities valued at \$329 million, and miscellaneous receipts of \$10 million.

Industry 2751 receipts from commercial printing in 1954 represented 85 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specializa-

tion ratio was 86 percent. Secondary activities of Industry 2751 in 1954 consisted mainly of lithographing, \$156 million; book and pamphlet printing and bookbinding, \$72 million; greeting card publishing and printing, \$9 million; blankbook making, \$9 million; periodical publishing and printing, \$9 million; and numerous related activities, including such printing trade services as engraving, plate printing, typesetting, and photo-engraving, \$12 million.

Industry 2751 receipts from commercial printing in 1954 represented 86 percent of the commercial printing receipts, valued at \$2,157 million, reported by all industries. This coverage ratio in 1947 was also 86 percent. Other industries reporting receipts from commercial printing consisted mainly of Industry 2761, Lithographing, \$109 million; Industry 2711, Newspapers, \$90 million; Industry 2732, Book Printing, \$23 million; Industry 2741, Miscellaneous Publishing, \$13 million; Industry 2721, Periodicals, \$9 million; and Industry 2782, Blankbooks and Paper Ruling, \$8 million.

Table 6C provides a distribution of receipts, for 1954 and 1947, of the principal products printed by the letterpress process for which detailed product information was collected.

### 2761--Lithographing

This industry comprises establishments primarily engaged in preparing lithographic stones or metal lithographic plates, and in printing from such media. Establishments primarily engaged in making lithographic plates for others and those which print decalcomanias (by all processes) are also included in Industry 2761. The greater part of the work in this industry is performed on a job or custom basis, but in some cases lithographed calendars, business forms, maps, posters, decalcomanias, etc., are made for sale. Offset printing, photo-offset printing, and photolithography are also included in this industry. Establishments primarily engaged in lithographing books and pamphlets (without publishing) are classified in Industry 2732, Book Printing, and greeting cards in Industry 2771, Greeting Cards. (See Industry 2751, Commercial Printing, for explanation of method used in classifying combination letterpress and lithographing plants.) For a detailed list of primary activities of Industry 2761, refer to Table 6A, product codes 2761011 to 2761081.

Total receipts of Industry 2761 in 1954 amounted to \$963 million. This included receipts from primary activities (lithographing) valued at \$791 million, receipts from secondary activities valued at \$168 million, and miscellaneous receipts of \$4 million.

Industry 2761 receipts from lithographing in 1954 represented 82 percent of its total receipts (primary and secondary). In 1947, this primary activity specialization ratio was 77 percent. Secondary activities of Industry 2761 in 1954 consisted mainly of commercial printing (letterpress, gravure and screen processes), \$109 million; greeting card printing, \$6 million; and miscellaneous other related activities, including bookbinding, \$4 million, and services to the printing trade, \$4 million.

Industry 2761 receipts from lithographing in 1954 represented 79 percent of the receipts from lithographing reported by all industries, valued at \$999 million. This coverage ratio in 1947 was 77 percent. Other industries reporting receipts from lithographing in 1954 consisted mainly of Industry 2751, Commercial Printing, \$156 million; Industry 2732, Book Printing, \$15 million; Industry 2711, Newspapers, \$7 million; Industry 2741, Miscellaneous Publishing, \$4 million; and Industry 2771, Greeting Cards, \$4 million.

Table 6D provides a distribution of receipts by states, for 1954 and 1947, of the principal products printed by the lithographic process for which detailed product information was collected.

2771--Greeting Cards

This industry comprises establishments primarily engaged in designing only, manufacturing only, or designing and manufacturing greeting cards for all occasions. These products may be printed, lithographed, etched, or otherwise processed. For a detailed list of primary products and activities of Industry 2771, refer to Table 6A, product codes 2771111 to 2771281.

Total receipts of Industry 2771 in 1954 amounted to \$209 million. This included primary activities (publishers' sales and receipts from printing greeting cards for others) valued at \$195 million, receipts from secondary activities valued at \$14 million, and a negligible amount of miscellaneous receipts.

Industry 2771 receipts from publishing and printing greeting cards in 1954 represented 93 percent of its total receipts (primary and secondary). In 1947, this primary product specialization ratio was 92 percent. Secondary activities of Industry 2771 in 1954 consisted mainly of gift wrapping paper, \$4 million; lithographing, \$4 million; miscellaneous publishing, \$3 million; and commercial printing (letterpress and gravure), \$2 million.

Industry 2771 receipts from publishing and printing greeting cards in 1954 represented 89 percent of the receipts from publishing and printing greeting cards, valued at \$218 million, reported by all industries. This coverage ratio in 1947 was 87 percent. Other industries reporting receipts from publishing and printing greeting cards in 1954 consisted mainly of Industry 2751, Commercial Printing, \$9 million, and Industry 2761, Lithographing, \$8 million.

2781--Bookbinding

This industry comprises establishments primarily engaged in edition, trade, job, and library bookbinding. Establishments primarily engaged in binding books printed elsewhere are classified in this industry, but those primarily binding books printed in the same establishment are classified in Group 273, Books. For a detailed list of primary activities of Industry 2781, refer to Table 6A, product codes 2781011 to 2781071.

Total receipts of Industry 2781 in 1954 amounted to \$112 million. This included receipts from primary activities (bookbinding) valued at \$101 million, receipts from secondary activities valued at \$9 million, and miscellaneous receipts of about \$1 million.

Industry 2781 receipts from bookbinding in 1954 represented 91 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specialization ratio was 84 percent. Secondary activities of Industry 2781 in 1954 consisted mainly of loose-leaf binders and bindery services, except bookbinding, \$3 million; book and pamphlet printing, \$2 million; and blankbook making, \$2 million.

Industry 2781 receipts from bookbinding in 1954 represented 86 percent of the receipts, valued at \$117 million, reported by all industries for binding books printed elsewhere. This coverage ratio in 1947 was 87 percent. Other industries reporting receipts for binding books printed elsewhere in 1954 consisted mainly of Industry 2732, Book Printing, \$5 million; Industry 2761, Lithographing, \$4 million; and Industry 2751, Commercial Printing, \$3 million.

The above data for bookbinding receipts do not include the value of bookbinding activity of establishments binding books printed in the same establishment (see text for Industries 2731 and 2732).

2782--Blankbooks and Paper Ruling (Full Standard Industrial Classification Title: Blankbook making and Paper Ruling)

This industry comprises establishments primarily engaged in manufacturing blankbooks such as ledgers, account books, and composition books; receipt pads; check books; inventory and similar blankbooks; albums; sales books; and scrapbooks (including leather bound); and in ruling paper. Establishments primarily engaged in manufacturing loose-leaf notebooks and loose-leaf notebook forms are classified in Industry 2783, Loose-Leaf Binders and Devices. For a detailed list of the primary activities of Industry 2782, refer to Table 6A, product codes 2782011 to 2782061.

Total receipts of Industry 2782 in 1954 amounted to \$79 million. This included receipts from primary activities (blankbooks and paper ruling) valued at \$60 million, receipts from secondary activities valued at \$19 million, and a negligible amount of miscellaneous receipts.

Industry 2782 receipts from blankbooks and paper ruling in 1954 represented 76 percent of its total receipts from primary and secondary activities. In 1947, this primary product specialization ratio was 85 percent. The decline in its primary product specialization ratio since 1947 reflects, for the most part, the increasing overlap between the products made by Industry 2782 (e.g., sales books) and printed products such as business forms which are classified in Industries 2751 and 2761 according to the printing process employed. Secondary activities of Industry 2782 in 1954 consisted mainly of business forms and other letterpress commercial printing, \$8 million; lithographing (chiefly business forms) \$4 million; manufacture of loose-leaf notebooks and fillers \$2 million; and notebooks and other converted paper products, not elsewhere classified, \$2 million.

Industry 2782 receipts from blankbooks and paper ruling in 1954 represented 66 percent of the receipts from blankbooks and paper ruling, valued at \$92 million, reported by all industries. This coverage ratio in 1947 was 67 percent. Other industries reporting receipts from blankbooks and paper ruling in 1954 consisted mainly of Industry 2751, Commercial Printing, \$9 million; Industry 2783, Loose-Leaf Binders and Devices, \$8 million; and Industry 2761, Lithographing, \$3 million.

2783--Loose-Leaf Binders and Devices (Full Standard Industrial Classification Title: Library and Loose-Leaf Binder Manufacturing)

This industry comprises establishments primarily engaged in manufacturing loose-leaf devices, library binders, and loose-leaf forms and fillers, including loose-leaf notebooks. For a detailed list of the primary products of Industry 2783, refer to Table 6A, product codes 2783011 to 2783051.

Total shipments of Industry 2783 in 1954 amounted to \$79 million. This included shipments of primary products (loose-leaf binders and devices) valued at \$58 million, receipts from secondary activities valued at \$20 million, and miscellaneous receipts of \$1 million.

Industry 2783 shipments of loose-leaf binders and devices in 1954 represented 74 percent of its total receipts (primary and secondary). In 1947, this primary product specialization ratio was 75 percent. Secondary activities of Industry 2783 in 1954 consisted mainly of blankbook making and paper ruling, \$8 million; and stationery, tablets and related products \$3 million.

Industry 2783 receipts from loose-leaf binders and devices in 1954 represented 82 percent of the loose-leaf binders and devices, valued at \$70 million, shipped by all industries. This coverage ratio in 1947 was 83 percent. Other industries shipping loose-leaf binders and devices in 1954 consisted mainly of Industry 2751, Commercial Printing, \$4 million; and Industry 2782, Blankbook and Paper Ruling, \$2 million.

2789--Miscellaneous Bookbinding Work (Full Standard Industrial Classification Title: Miscellaneous Work Related to Bookbinding)

This industry comprises establishments primarily engaged in book or paper bronzing, gilding, and edging; map and sample mounting; beveling, deckling, embossing of books (except embossing on paper, classified in Industry 2751, Commercial Printing), gold stamping, indexing of books, and paper cutting (except die-cutting Industry 2691, Die-cut Paper and Board); and other services related to bookbinding.

Total receipts of Industry 2789 in 1954 amounted to \$22 million. This included receipts from primary activities (miscellaneous bookbinding work) valued at \$19 million, and receipts from secondary activities valued at \$3 million, and a negligible amount of miscellaneous receipts.

Industry 2789 receipts from miscellaneous bookbinding work in 1954 represented 84 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specialization ratio was 87 percent. Secondary activities amounting to

\$3 million, consisted of loose-leaf binders and a variety of printing services.

Industry 2789 receipts from miscellaneous bookbinding work in 1954 represented 83 percent of the receipts from miscellaneous

bookbinding work, valued at \$22 million, reported by all industries. This coverage ratio in 1947 was 79 percent. Other industries reporting receipts from miscellaneous bookbinding work consisted mainly of Industry 2781, Bookbinding, \$1 million; and Industry 2782, Blankbooks and Paper Ruling \$1 million.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## MANUFACTURES--INDUSTRY STATISTICS

Table 1.—GENERAL STATISTICS FOR THE UNITED STATES: 1954 AND EARLIER YEARS  
(For explanation of column captions see Introduction)

Industry and census year	Establish- ments, number	All employees		Production workers		Value added by manufacture <sup>2</sup>	Cost of materials, etc.	Value of shipments <sup>3</sup> (Receipts)

NA Not available.

<sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October).

<sup>2</sup>Value of products and receipts less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture."

<sup>3</sup>See Introduction, "Value of Shipments."

<sup>4</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table.

<sup>5</sup>The figures for 1939 are not entirely comparable with those for earlier years. Value added by manufacture for 1939 on a basis comparable with earlier years was \$96.7 million for "Lithographing" and \$72.2 million for the combined industries "Bookbinding," "Blankbook making and paper ruling," "Library and loose-leaf binders," and "Miscellaneous bookbinding work." No comparable figures are available for "Commercial printing" prior to 1939.

<sup>6</sup>The figures prior to 1937 are not entirely comparable with those for later years because the earlier year figures include data for some establishments primarily engaged in printing greeting cards and in lithographing of books and pamphlets for publishers, no longer classified in this industry. Value added for 1937, including data for these establishments and on a basis comparable with earlier years, was \$83.4 million.

<sup>7</sup>In 1931 some of the establishments in the discontinued industry, "Labels and tags" were transferred to "Lithographing." The figures for prior years are therefore not comparable and are not shown in this table.

<sup>8</sup>"Greeting cards" was formerly a part of the discontinued classification, "Printing and publishing, book, music and job," "Engraving, steel copper-plate, and wood, and plate printing," and "Lithographing." Separate figures are, therefore, not available prior to 1937.

<sup>9</sup>"Bookbinding," "Blankbook making and paper ruling," "Looseleaf binders and devices," and "Miscellaneous bookbinding work" formerly constituted a single classification. The separate industry figures shown for 1939-1954 have been combined in order that statistics can be shown for the entire period 1899-1954.

## MANUFACTURES—INDUSTRY STATISTICS

Table 2.—GENERAL STATISTICS BY REGIONS AND STATES: 1954 AND 1947

Note: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2751, Commercial Printing: Mountain—Wyoming, 10 (20-99); Nevada, 8 (20-99).

S.I.C. 2761, Lithographing: New England—Maine, 5 (20-99); New Hampshire, 6 (20-99); Vermont, 3 (1-19); West North Central—North Dakota, 1 (1-19); South Dakota, 1 (1-19); Nebraska, 26 (250-499); South Atlantic—Delaware, 3 (100-249); South Carolina, 7 (20-99); East South Central—Mississippi, 6 (20-99); West South Central—Arkansas, 9 (20-99); Louisiana, 9 (20-99); Mountain—Montana, 2 (1-19); Idaho, 7 (20-99); Wyoming, 2 (1-19); New Mexico, 7 (1-19); Arizona, 7 (20-99).

S.I.C. 2771, Greeting Cards: New England—Maine, 3 (1-19); New Hampshire, 3 (500-999); Vermont, 5 (100-249); Rhode Island, 3 (100-249); Connecticut, 2 (100-249); North Central—Indiana, 3 (1-19); Michigan, 3 (1-19); Wisconsin, 3 (20-99); Minnesota, 6 (100-249); Iowa, 4 (20-99); Missouri, 5 (2,205); Kansas, 5 (1,000-2,499); South—Maryland, 1 (20-99); District of Columbia, 1 (1-19); South Carolina, 1 (1-19); Georgia, 1 (1-19); Florida, 5 (1-19); Kentucky, 1 (20-99); Arkansas, 1 (1-19); Louisiana, 2 (1-19); Texas, 3 (1-19); Mountain—Colorado, 3 (20-99); New Mexico, 1 (1-19); Pacific—Oregon, 2 (1-19); California, 27 (500-999).

S.I.C. 2781, Bookbinding: New England—Maine, 4 (1-19); New Hampshire, 2 (1-19); Rhode Island, 2 (1-19); West North Central—Minnesota, 9 (20-99); Iowa, 3 (20-99); Nebraska, 4 (1-19); Kansas, 3 (20-99); South Atlantic—Delaware, 2 (20-99); Virginia, 4 (20-99); West Virginia, 1 (1-19); North Carolina, 4 (100-249); South Carolina, 1 (1-19); Georgia, 4 (20-99); Florida, 4 (20-99); East South Central—Tennessee, 3 (20-99); Alabama, 6 (1-19); Mississippi, 2 (1-19); West South Central—Arkansas, 1 (1-19); Louisiana, 3 (20-99); Oklahoma, 4 (20-99); Texas, 15 (250-499); Mountain—Idaho, 1 (1-19); Colorado, 8 (20-99); New Mexico, 1 (1-19); Arizona, 2 (1-19); Utah, 4 (20-99); Pacific—Washington, 9 (20-99); Oregon, 4 (20-99).

S.I.C. 2782, Blankbooks and Paper Ruling: New England—Maine, 1 (1-19); Massachusetts, 27 (500-999); Rhode Island, 2 (1-19); Connecticut, 3 (100-249); East North Central—Indiana, 2 (1-19); Wisconsin, 4 (250-499); West North Central—Minnesota, 8 (20-99); Iowa, 3 (1-19); Missouri, 12 (100-249); South Dakota, 1 (20-99); Nebraska, 2 (1-19); Kansas, 3 (100-249); South—Maryland, 5 (250-499); Virginia, 4 (20-99); North Carolina, 2 (1-19); South Carolina, 3 (1-19); Georgia, 3 (1-19); Florida, 6 (1-19); Tennessee, 1 (1-19); Alabama, 5 (20-99); Mississippi, 1 (1-19); Louisiana, 2 (20-99); Oklahoma, 1 (1-19); Texas, 9 (250-499); West—Colorado, 2 (1-19); Arizona, 2 (1-19); Washington, 1 (1-19); Oregon, 3 (20-99).

S.I.C. 2783, Loose-leaf Binders and Devices: New England—Maine, 1 (1-19); New Hampshire, 1 (100-249); Massachusetts, 4 (1,188); Connecticut, 2 (1-19); Middle Atlantic—New Jersey, 5 (500-999); Pennsylvania, 6 (100-249); East North Central—Indiana, 4 (100-249); Wisconsin, 6 (250-499); West North Central—Minnesota, 4 (20-99); Iowa, 3 (20-99); Nebraska, 1 (1-19); Kansas, 1 (20-99); South—District of Columbia, 1 (1-19); Georgia, 1 (1-19); Florida, 2 (1-19); Tennessee, 1 (1-19); Alabama, 1 (20-99); Louisiana, 1 (1-19); Texas, 3 (1-19); Pacific—Washington, 1 (1-19); Oregon, 1 (1-19); California, 13 (500-999).

S.I.C. 2789, Miscellaneous Bookbinding Work: New England—Massachusetts, 14 (100-249); Connecticut, 2 (20-99); Middle Atlantic—New Jersey, 6 (20-99); Pennsylvania, 8 (20-99); East North Central—Ohio, 4 (20-99); Indiana, 2 (20-99); Michigan, 5 (1-19); Wisconsin, 2 (1-19); West North Central—Minnesota, 2 (1-19); Iowa, 1 (1-19); Missouri, 6 (20-99); South—Maryland, 2 (20-99); District of Columbia, 2 (20-99); Virginia, 1 (1-19); West Virginia, 1 (1-19); North Carolina, 1 (1-19); Florida, 1 (1-19); Alabama, 1 (1-19); Mississippi, 1 (1-19); Louisiana, 4 (1-19); Oklahoma, 1 (1-19); Texas, 2 (20-99); West—Colorado, 1 (1-19); Oregon, 1 (1-19); California, 18 (250-499).

## MANUFACTURES--INDUSTRY STATISTICS

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. NA Not available. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which to total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than \$500 thousand. <sup>4</sup>Less than \$5 thousand. <sup>5</sup>Less than 500 thousand kwh. <sup>6</sup>Less than 500 hp.

Table 4.--SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.)

<sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

## MANUFACTURES--INDUSTRY STATISTICS

Table 5B.--INDUSTRY-PRODUCT ANALYSIS--SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading, the value of shipments divided between printing and related products, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry)

Prod. class code	Class of products and miscellaneous receipts	Com- mercial printing (S.I.C. 2751)	Litho- graphing (S.I.C. 2761)	Greeting cards (S.I.C. 2771)	Book- binding (S.I.C. 2781)	Blank- books and paper ruling (S.I.C. 2782)	Loose- leaf binders and devices (S.I.C. 2783)	Miscel- laneous book- binding work (S.I.C. 2789)	Book printing (S.I.C. 2732)	Other indus- tries	All indus- tries

xxx Not applicable.

D Withheld to avoid disclosing figures of individual companies.

<sup>1</sup>Establishments classified in Industry 2711, Newspaper accounted for \$89,685 thousand of this amount; other industries reporting a substantial dollar volume of such receipts include Industry 2721, Periodicals, \$8,652 thousand, Industry 2741, Miscellaneous Publishing, \$12,797 thousand, Industry 2641, Paper Coating and Glazing, \$5,199 thousand, and Industry 2671, Paperboard Boxes, \$5,028 thousand.

<sup>2</sup>Of this amount, Industry 2711, Newspapers accounted for \$6,834 thousand, and Industry 2741, Miscellaneous Publishing for \$4,178 thousand.

<sup>3</sup>Less than \$100 thousand.

<sup>4</sup>Of this figure, 72 percent consists of the following product classes: 26612, Specialty bags and liners; 31720, Leather billfolds, wallets, and keycases; 34970, Metal foil and leaf; 39711, Molded plastic products; 39993, Other miscellaneous fabricated products.

## MANUFACTURES--INDUSTRY STATISTICS

Table 6A--VALUE OF RECEIPTS REPORTED BY ALL MANUFACTURING ESTABLISHMENTS, FOR THE UNITED STATES: 1954 AND 1947--Continued

Product code	Product	Value of receipts (\$1,000)	
		1954	1947
2781---	Bookbinding, total.....	117,382	109,904
2781011	Edition binding (hard bound).....	46,666	65,528
2781031	Pamphlet binding.....	32,011	21,806
2781051	Library binding (including "job" and rebinding).....	16,160	13,647
2781071	Mechanical binding (wire, plastic, etc.).....	7,776	8,923
2781000	Bookbinding, not reported by kind.....	14,769	...
2782---	Blankbooks and paper ruling, total.....	91,524	75,800
	Blankbooks:		
2782011	Ledgers and account books.....	6,848	11,144
2782021	Sales books.....	26,865	22,743
2782031	Albums and scrapbooks.....	16,800	12,531
2782051	Miscellaneous blankbooks, including diaries, memo books, check books, appointment books, etc.....	30,767	21,810
2782061	Paper ruling.....	4,679	5,544
2782000	Blankbooks (not reported by kind) and paper ruling, not reported separately.....	5,565	2,028
2783---	Loose-leaf binders and devices, total.....	70,456	52,041
2783011	Loose-leaf forms and fillers (printed only).....	17,804	18,853
2783051	Loose-leaf binders, including library.....	45,813	31,779
2783000	Loose-leaf devices, binders, forms, and fillers, not reported separately.....	6,839	1,409
2783099			
2789---	Miscellaneous bookbinding work, total.....	22,384	18,692
2789011	Bindery services, including embossing, indexing, edging, bronzing, gilding; maps and sample mounting; sample and color cards, etc.....	22,384	18,692

<sup>1</sup>For 1954, small values by the gravure process were reported but were combined with the letterpress process to avoid disclosure. The following products are affected: code numbers 2751015, 2751023, 2751025, 2751027, and 2751031. For 1947, codes 2751017 and 2761051 included a small amount of gravure process and code 2751031 included a small amount of engraving.

<sup>2</sup>Codes 2751033 and 2751073 have been combined to avoid disclosure.

<sup>3</sup>Not available separately. Receipts for printing for Federal, State, county, municipal, etc. governmental units and for codes 2751010, 2751040, 2751079, 2751098 and 2751000 have been combined and shown in code 2751039.

<sup>4</sup>Largely accounted for by small establishments which were not asked to report a breakdown of these printing receipts by kind of product; in the case of decalcominas, these establishments were not asked to specify the type of process employed (product code 2761050).

<sup>5</sup>Not available separately. Combined with code 2761039 which in 1947 also included printing for Federal, state, county, municipal, etc. governmental units.

<sup>6</sup>Codes 2761051 and 2761057 have been combined to avoid disclosure.

<sup>7</sup>Number of greeting cards sold in 1954: Christmas cards, 2,054 million; other greeting cards, 1,911 million. In 1947, a total of 2,990 million greeting card was sold.

<sup>8</sup>Codes 2771271 and 2771281 combined to avoid disclosure.

## COMMERCIAL PRINTING; LITHOGRAPHING; GREETING CARDS; BOOKBINDING AND RELATED INDUSTRIES

27B-17

Table 6B.—VALUE OF PRODUCT CLASSES SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, BY DIVISIONS AND STATES FOR 1954,  
AND UNITED STATES TOTALS FOR EARLIER YEARS

(In thousands of dollars. Statistics are shown for selected product classes which are economically significant and production of which is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (Table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.)

California.....	3,499				

Note: The figures shown for 1950 to 1953 are sample estimates obtained from the Annual Survey of Manufactures for those years. Since the estimates are based on a sample they are subject to sampling variability, that is, they are not the same as figures which would have been obtained if complete censuses had been taken for those years. Measures of the sampling variability (standard errors) of the estimated total value of shipments of each product class are shown in the Annual Survey of Manufactures publications. Also shown are the standard errors of the relative change in shipments between some consecutive Annual Survey years which are the more significant measures when the series is studied for trend.

<sup>1</sup>For the specified product classes, shipments of over \$1 million were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 27711, New Hampshire, Vermont, Rhode Island, Connecticut, Indiana, Wisconsin, Minnesota, Missouri, and Kansas; 27820, Connecticut, Indiana, Michigan, Nebraska, Kansas, and Maryland; 27830, Massachusetts, New Jersey, Pennsylvania, Ohio, and Indiana.

Note: The sum of the detail by States adds to the total shown for geographic divisions only in those instances where figures appear for all States located in the division. States not shown did not report as much as one million dollar receipts in 1954 for any of these selected products.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>Less than one million dollar receipts reported.

<sup>2</sup>More than one million dollar receipts were reported but actual figures withheld to avoid disclosing data for individual companies.

xxx Not applicable.

<sup>1</sup>An analysis of reports indicated that the distinction between these grades was not clearly drawn; hence tonnages and costs are shown for combinations of the specified grades.<sup>2</sup>The distinction was not clearly drawn in reporting consumption of paper by grades as between "for publications" and "for other products", hence all of the tonnages are shown under "for publications" since only a small amount would be consumed in the printing of other than greeting cards.<sup>3</sup>Combined to avoid disclosing figures for individual companies.

## Paper Definitions:

Newsprint includes standard and superstandard newsprint in rolls and sheets.Uncoated Groundwood Paper includes "A" and "B" printing, catalog, directory, rotogravure, and all other uncoated groundwood paper.Uncoated Book Paper includes machine finish, English finish, antique, bulking, eggshell, supercalendered, offset, label and wrapper paper, poster, and all other uncoated book paper.Uncoated Fine Paper includes bond, writing, ledger, manifold, bristol (except bogus), cover, text, and all other uncoated fine paper.Coated Paper includes all paper machine-coated and off-the-machine (conversion) coated printing paper.

Table 2.—GENERAL STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY INDUSTRY SPECIALIZATION AND PRIMARY PRODUCT CLASS SPECIALIZATION, FOR THE UNITED STATES: 1954

(This table presents selected statistics for establishments classified according to their degree of specialization in products primary to the industry. The establishments are classified in two ways: (1) by industry specialization—the degree of specialization in all primary products of the industry; and (2) by product-class specialization—the degree of specialization in the largest product class of the establishment. The degree of "industry specialization" for an establishment represents the ratio of its primary product shipments to its total product shipments, primary and secondary. The degree of "product-class specialization" for an establishment represents the ratio of its largest product class shipments to its total product shipments, primary and secondary. Data are not shown for some industries, product classes, and specialization ranges for a variety of reasons, consequently, detailed figures frequently do not add to the totals. See Introduction for detailed explanation)

Ind. or product class No.	Industry or product class by percent of specialization	Estab- lish- ments, number	All employees		Production workers			Value added by manufacture	Cost of materials, etc.	Value of shipments

<sup>1</sup>This class includes data for establishments with less than 50 percent specialization in the primary products of the industry and establishments engaged exclusively in contract work defined in the industry. Miscellaneous small statistical adjustments are also included.

## Service Industries for the Printing Trade

This report shows 1954 Census of Manufactures statistics for establishments classified in each of the following industries:

Code	Title
2791--	Typesetting
2792--	Engraving and Plate Printing
2793--	Photoengraving
2794--	Electrotyping and Stereotyping

Two types of reporting forms were used to canvass these industries. A special short form was used to collect a minimum of information from establishments employing fewer than six persons, while the basic long form was used to collect more detailed data from the larger establishments. Information reported on both of these forms has been combined in this report. Separate data for the larger establishments are shown in Table 3. Establishments in this group of industries perform services for the printing trades and do not generally engage in printing. On the other hand, many of these services, such as typesetting, photoengraving, electrotyping and stereotyping are also performed to an appreciable extent as an integral part of the operations of establishments primarily printing newspapers, periodicals, books and other materials. These establishments are classified in other industries and no separate measures of their captive operations have been collected. It should therefore be carefully noted that data for Industries 2791 to 2794 may account for only a portion of the aggregate of typesetting, photoengraving, and other services for the printing industries by manufacturing establishments.

### 2791--Typesetting

This industry comprises establishments primarily engaged in machine and hand typesetting for the trade, and in advertising typography. For a list of the primary activities of Industry 2791, refer to Table 6A, product codes 2791011 to 2791051.

Total receipts of Industry 2791 in 1954 amounted to \$121 million. This included receipts from primary activities (typesetting) valued at \$114 million, receipts from secondary activities valued at \$7 million, and a negligible amount of miscellaneous receipts.

Industry 2791 receipts from typesetting in 1954 represented 94 percent of its total receipts (primary and secondary). In 1947, this primary activity specialization ratio was also 94 percent. Secondary activities of Industry 2791 in 1954 consisted mainly of letterpress commercial printing, \$3 million, and electrotyping and stereotyping, \$1 million.

Industry 2791 receipts from typesetting in 1954 represented 87 percent of receipts from typesetting for the trade, valued at \$132 million, reported by all industries. This coverage ratio in 1947 was also 87 percent. Other industries reporting receipts from typesetting for the trade in 1954 consisted mainly of Industry 2732, Book Printing, \$4 million; Industry 2751, Commercial Printing, \$4 million; Industry 2794, Electrotyping and Stereotyping, \$4 million; and Industry 2711, Newspapers, \$2 million. These data do not cover captive typesetting operations of printing establishments classified in other industries.

### 2792--Engraving and Plate Printing

This industry comprises establishments primarily engaged in engraving and etching steel and copper plates; in using these plates to print stationery, visiting and other cards, invitations, announcements, security certificates, maps, etc.; and in making wood cuts for use in printing illustrations, posters, etc. Establishments primarily engaged in engraving on textile printing rollers and those engraving or etching on rubber printing plates are also classified in Industry 2792. Engraving for purposes other than printing is classified in Industry 3467, Engraving on Metal.

Total receipts of Industry 2792 in 1954 amounted to \$60 million. This included receipts from primary activities (engraving and plate printing) valued at \$55 million, receipts from secondary activities valued at \$4 million, and miscellaneous receipts valued at \$1 million.

Industry 2792 receipts from engraving and plate printing in 1954 represented 93 percent of its total receipts (primary and secondary). In 1947, this primary activity specialization ratio was 92 percent. Secondary activities of Industry 2792 in 1954 consisted mainly of commercial printing, \$2 million, and lithographing, \$1 million.

Industry 2792 receipts from engraving and plate printing in 1954 represented 79 percent of receipts from engraving and plate printing, valued at \$70 million, reported by all industries. This coverage ratio in 1947 was 80 percent. Other industries reporting receipts from engraving and plate printing in 1954 consisted mainly of Industry 2751, Commercial Printing, \$6 million; Industry 2761, Lithographing, \$2 million; and Industry 3911, Jewelry (Precious Metal), \$2 million.

### 2793--Photoengraving

This industry comprises establishments primarily engaged in preparing photoengraved plates (halftones and line-cuts). These establishments do not, as a rule, print from the plates which they make, but prepare them for use by others.

Total receipts of Industry 2793 in 1954 amounted to \$173 million. This included receipts from primary activities (photoengraving) valued at \$164 million, receipts from secondary activities valued at \$8 million, and miscellaneous receipts of \$1 million.

Industry 2793 receipts from photoengraving in 1954 represented 95 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specialization ratio was 96 percent. Secondary activities of Industry 2793 in 1954 consisted mainly of electrotyping and stereotyping \$3 million, and lithographing \$2 million.

Industry 2793 receipts from photoengraving in 1954 represented 93 percent of the receipts from photoengraving for the trade, valued at \$176 million, reported by all industries. This coverage ratio in 1947 was 95 percent. Other industries reporting receipts from photoengraving for the trade in 1954 consisted mainly of Industry 2711, Newspapers, \$5 million, Industry 2794, Electrotyping and Stereotyping, \$2 million, and Industry 2751, Commercial Printing, \$2 million. These data do not cover captive photoengraving operations of printing establishments classified in other industries.

### 2794--Electrotyping and Stereotyping

This industry comprises establishments primarily engaged in preparing electrotypes and stereotype plates. These establishments do not, as a rule, print from the plates which they make, but prepare them for use by others. For a detailed list of primary activities of Industry 2794, refer to Table 6A, product codes 2794011 to 2794051.

Total receipts of Industry 2794 in 1954 amounted to \$86 million. This included receipts from primary activities (electrotyping and stereotyping) valued at \$75 million, receipts from secondary activities valued at \$10 million, and miscellaneous receipts of \$1 million.

Industry 2794 receipts from electrotyping and stereotyping in 1954 represented 89 percent of its total receipts from primary and secondary activities. In 1947, this primary activity specialization ratio was 92 percent. Secondary activities of Industry 2794

in 1954 consisted principally of typesetting, \$4 million, and photoengraving, \$2 million.

Industry 2794 receipts from electrotyping and stereotyping in 1954 represented 89 percent of electrotyping and stereotyping for the trade, valued at \$84 million, reported by all industries. This

coverage ratio in 1947 was 87 percent. Other industries reporting receipts from electrotyping and stereotyping in 1954 consisted principally of Industry 2793, Photoengraving, \$3 million; and Industry 2751, Commercial Printing, \$2 million. These data do not cover captive electrotyping and stereotyping operations of printing establishments classified in other industries.

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products, and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (Tables 1-4) with product statistics (Table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in Table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry made as secondary products by establishments classified in other industries.

## SERVICE INDUSTRIES FOR THE PRINTING TRADE

27C-3

NA Not available. <sup>1</sup>For the period 1949-1954, figures are based on employment for the payroll periods ended nearest the 15th of March, May, August and November. For 1947, they represent the average of 12 monthly figures. For earlier years, the production worker average was calculated as in 1947, but the figure for all employees represents the sum of the annual average number of production workers and the number of nonproduction workers reported for one payroll period (usually in October). <sup>2</sup>Value of products (receipts) less cost of materials, supplies, fuel, electric energy and contract work. See Introduction, "Value Added by Manufacture." <sup>3</sup>Cost of contract work is not included in the figures for "Typesetting" and "Engraving and plate printing" for 1899-1933 and for "Electrotyping and stereotyping" for 1927 and 1929. <sup>4</sup>Prior to 1939, "Typesetting" was part of the discontinued industry "Printing and publishing, book, music, and job." <sup>5</sup>No comparable figures are available prior to 1909. <sup>6</sup>The figures for 1937 and later years exclude data for establishments primarily engaged in engraving and plate printing of greeting cards and, therefore, are not entirely comparable with the figures for earlier years which include data for these establishments. Value added for 1937 on a basis comparable with earlier years was \$21.3 million. <sup>7</sup>The figures for 1951-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. Estimates with a standard error in excess of 15 percent generally have been omitted from this table. <sup>8</sup>The figures for "Photengraving" prior to 1937 are not sufficiently comparable with those for later years to be shown in this table because they include data for establishments primarily engaged in gravure, rotogravure, and rotary photogravure work.

## MANUFACTURES—INDUSTRY STATISTICS

Note: Detailed figures may not add to the totals because of independent rounding.

<sup>1</sup> D Withheld to avoid disclosing figures for individual companies.<sup>2</sup> General statistics for some producing States are not shown separately in the table (see INTRODUCTION "Confidentiality of Data for Individual Companies"). Such States are shown below with the number of establishments in each State for 1954 and, in parentheses, the number of employees or the employment-size range for that State for 1954:

S.I.C. 2791, Typesetting: New England—Maine, 4 (20-99); New Hampshire, 2 (20-99); Vermont, 1 (1-19); Rhode Island, 6 (20-99); Connecticut, 19 (250-499); West North Central—Iowa, 9 (20-99); Nebraska, 4 (20-99); Kansas, 5 (1-19); South Atlantic—Delaware, 2 (1-19); Virginia, 7 (20-99); North Carolina, 7 (2-99); South Carolina, 1 (1-19); Florida, 11 (20-99); East South Central—Kentucky, 7 (20-99); Tennessee, 10 (100-249); Alabama, 1 (1-19); Mississippi, 1 (1-19); West South Central—Louisiana, 10 (20-99); Oklahoma, 8 (20-99); Mountain—Colorado, 8 (20-99); New Mexico, 1 (1-19); Arizona, 3 (20-99); Utah, 1 (1-19); Pacific—Washington, 11 (20-99); Oregon, 9 (20-99).

S.I.C. 2792, Engraving and Plate Printing: New England—New Hampshire, 2 (1-19); Vermont, 1 (1-19); East North Central—Wisconsin, 14 (20-99); West North Central—Minnesota, 7 (20-99); South Dakota, 1 (1-19); Nebraska, 2 (1-19); Kansas, 4 (1-19); South Atlantic—Maryland, 5 (20-99); District of Columbia, 8 (20-99); Virginia, 6 (20-99); West Virginia, 1 (1-19); Georgia, 3 (20-99); Florida, 10 (20-99); East South Central—Tennessee, 5 (20-99); West South Central—Arkansas, 2 (1-19); Louisiana, 7 (20-99); Oklahoma, 2 (20-99); Mountain—Montana, 2 (1-19); New Mexico, 1 (1-19); Arizona, 2 (1-19); Utah, 2 (1-19); Pacific—Washington, 6 (20-99); Oregon, 3 (20-99).

S.I.C. 2793, Photoengraving: New England—Maine, 4 (20-99); New Hampshire, 5 (20-99); West North Central—North Dakota, 2 (1-19); South Dakota, 1 (1-19); Nebraska, 5 (20-99); Kansas, 7 (20-99); South Atlantic—Delaware, 2 (20-99); West Virginia, 4 (20-99); South Carolina, 5 (20-99); Florida, 10 (20-99); East South Central—Kentucky, 8 (20-99); Alabama, 5 (20-99); Mississippi, 1 (1-19); West South Central—Arkansas, 3 (20-99); Louisiana, 6 (20-99); Oklahoma, 9 (20-99); Mountain—Montana, 2 (1-19); Idaho, 3 (1-19); Colorado, 12 (20-99); New Mexico, 2 (1-19); Arizona, 5 (20-99); Utah, 5 (20-99); Nevada, 2 (1-19); Pacific—Oregon, 7 (20-99).

S.I.C. 2794, Electrotyping and Stereotyping: New England—Maine, 1 (1-19); New Hampshire, 1 (20-99); Connecticut, 3 (100-249); Middle Atlantic—New Jersey, 5 (20-99); West North Central—Iowa, 3 (20-99); Nebraska, 2 (1-19); South Atlantic—Maryland, 3 (20-99); District of Columbia, 4 (20-99); Virginia, 2 (20-99); Georgia, 1 (20-99); Florida, 3 (1-19); East South Central—Tennessee, 4 (100-249); Alabama, 1 (1-19); West South Central—Louisiana, 2 (1-19); Oklahoma, 2 (1-19); Texas, 4 (20-99); Mountain—Colorado, 2 (1-19); Utah, 1 (1-19); Pacific—Washington, 3 (1-19); Oregon, 2 (20-99).

## SERVICE INDUSTRIES FOR THE PRINTING TRADE

27C-7

Table 3.--DETAILED STATISTICS FOR THE UNITED STATES: 1954  
(For explanation of line captions see Introduction)

Item	Typesetting (S.I.C. 2791) all estab- lishments	Engraving and plate printing (S.I.C. 2792) all estab- lishments	Photoen- graving (S.I.C. 2793) all estab- lishments	Electrotyping and stereotyping (S.I.C. 2794)	
				All estab- lishments	Establishments with 90% or more primary product specialization
Primary product specialization ratio <sup>1</sup> .....	94	93	95	89	xxx

New structures and additions to plant.....do..	( <sup>4</sup> )	( <sup>4</sup> )	( <sup>4</sup> )	( <sup>4</sup> )	( <sup>4</sup> )
New machinery and equipment.....do..	3,858	1,367	3,620	1,732	1,042
Expenditures for used plant and equipment.....do..	( <sup>4</sup> )	( <sup>4</sup> )	( <sup>4</sup> )	( <sup>4</sup> )	( <sup>4</sup> )

Note: Detailed figures may not add to the totals because of independent rounding. xxx Not applicable. <sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) Columns containing totals for establishments with 90% or more primary product specialization are shown only for those industries having a primary product specialization of less than 90%. <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry. <sup>3</sup>Less than 500 thousand kwh. <sup>4</sup>Less than 500 hp.

Table 4.—SELECTED STATISTICS FOR MANUFACTURING ESTABLISHMENTS, CLASSIFIED BY EMPLOYMENT SIZE, FOR THE UNITED STATES: 1954

(Value figures in thousands of dollars. For explanation of line captions see Introduction. Data which cannot be shown without disclosing information for individual companies have been combined with figures for other size classes. A (D) appears in the column where the figure has been omitted and the combined figure is underlined and shown in the size-class to the left)

Ind. code	Industry and item	Total, all estab- lish- ments	Establishments with an average of—									
			1-4 em- ployees	5-9 em- ployees	10-19 em- ployees	20-49 em- ployees	50-99 em- ployees	100-249 employees	250-499 employees	500-999 employees	1,000- 2,499 employees	2,500 employees and over

<sup>1</sup>The specialization ratio compares the given industry's shipments of its primary products to its total shipments of all products. (The primary products are listed in Tables 5B and 6A; the first 4-digits of the product code represent the industry code to which the product is primary.) <sup>2</sup>The coverage ratio measures the extent to which the total shipments of products primary to the given industry are shipped by establishments classified in that industry.

Table 5B.—INDUSTRY-PRODUCT ANALYSIS—SHIPMENTS BY PRODUCT CLASS AND INDUSTRY, FOR THE UNITED STATES: 1954

(In thousands of dollars. Each column shows for the industry listed in the column heading, the value of shipments divided between printing services, other products, and miscellaneous receipts. Each figure represents the amount of the product class shown at the left shipped by the industry listed at the top of the column. The first four digits of the product class codes at the left represent the codes of the industries to which they are primary. All other product classes in a column represent products secondary to the specified industry)

Prod. class code	Class of products and miscellaneous receipts	Type-setting (S.I.C. 2791)	Engraving and plate printing (S.I.C. 2792)	Photoengraving (S.I.C. 2793)	Electrotyping and stereotyping (S.I.C. 2794)	News-papers (S.I.C. 2711)	Book printing (S.I.C. 2732)	Commercial printing (S.I.C. 2751)	Other industries	All industries
	Total value of receipts of the industry	121,390	60,084	173,040	85,894	xxx	xxx	xxx	xxx	xxx
279	Printing services.....	115,724	55,918	168,076	81,854	8,728	5,843	13,971	12,984	463,098
27910	Typesetting, machine and hand.....	114,327	110	611	3,803	1,812	4,421	4,378	2,673	132,135
27920	Engraving and plate printing.....	433	55,330	812	718	941	223	5,601	6,340	70,398

<sup>1</sup>Less than \$100 thousand.

Table 6.—QUANTITY AND VALUE OF PRODUCTS SHIPPED BY ALL MANUFACTURING ESTABLISHMENTS, FOR THE UNITED STATES: 1954 AND 1947

Product code	Product	Value of products (receipts) (\$1,000)	
		1954	1947
2791---	Typesetting, total.....	132,135	81,034
2791011	Trade typesetting.....	71,517	56,055
2791051	Advertising typography.....	35,704	24,979
2791000	Typesetting, not specified by kind <sup>1</sup> .....	24,914	...
2792---	Engraving and plate printing, total.....	70,398	51,735
2792051	Engraving (steel and copperplate, rubber wood), and plate printing, not elsewhere reported.....	70,398	251,735
2793011	Photoengraving plates made for others (flat and cylindrical).....	176,126	133,438
2794---	Electrotyping and stereotyping, total.....	84,439	60,911
2794011	Electrotyping (service to printing trades).....	57,318	45,779
2794031	Stereotyping (service to printing trades).....	7,833	6,858
2794051	Matrixes made for others.....	14,589	8,274
2794000	Electrotyping, stereotyping, and matrixes made for others, not reported separately <sup>1</sup> .....	4,699	...

<sup>1</sup>Largely accounted for by small establishments that were not asked to report a breakdown of their total receipts.

<sup>2</sup>Includes \$2,398 thousand of engraving textile printing rollers.

## Major Group 28.—Chemicals and Products

The major group includes establishments producing basic chemicals, and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three classes of products: (1) basic chemicals such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture such as synthetic fibers, plastics materials, crude animal and vegetable oils, dry colors, and pigments; and (3) finished chemical products to be used for ultimate consumption such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries such as paints, fertilizers, and explosives. The mining of natural rock salt and the recovery of sodium, potassium and boron compounds from natural salts are classified in Mining Industries. Establishments primarily engaged in manufacturing non-ferrous metals and high percentage ferro-alloys are classified in Major Group 33, Primary Metal Industries; silicon carbide, in Industry 3291, Abrasive Products; baking powder, other leavening compounds, and starches in Major Group 20, Food and Kindred Products; and embalming fluids and artists' colors in Major Group 39, Miscellaneous Manufactures. Establishments primarily engaged in packaging, repacking and bottling of purchased chemicals and allied products are classified in Trade Industries.

The industrial classification system provides for separate groupings of plants manufacturing by chemical process products which are essentially (a) raw materials for other industries, and (b) finished consumption goods such as drug preparations, paint, soap, fertilizers, formulated insecticides or cosmetics. While these distinctions may be made for a host of chemical products, they are by no means definitive in the case of a number of such products and of the plants producing them. When such problems arose the decisions made were primarily based upon the following criteria:

- (a) Whether the product produced is a compound or a mixture and/or formulation. In the former case, the product is considered to be a basic chemical while mixtures and formulations have the characteristic of finished consumer goods;
- (b) Whether the plant is engaged in activities which result in a product chemically different from the raw materials it uses (prime producers) or whether the resultant product is merely a modified form or grade of the chemical purchased. For example, distinctions are made between plants producing high strength hydrogen peroxide (prime producer) and those making a weak strength product from purchased, high strength material; or between plants whose products are shipped to chemical processors and those whose activity is devoted to the preparation of packaged products, destined primarily for household or consumer use.

The classification system not only draws a line of demarcation between chemical processing industries and chemical consuming industries, but also requires in a few areas, that distinctions be made among the latter industries. For example, the industry classification system specifies that plants producing soap or a soap product from fatty acids be considered as prime soap producers and classified in Industry 2841, Soap and Glycerin, while plants engaged in producing the same soap product from a purchased soap (soap converters) be classified in Industry 2842, Cleaning and Polishing Preparations. A similar type of distinction is made between fertilizer plants (Industries 2871 and 2872).

Reference should be made to the "Introduction" for a description of the conditions under which plants performing some manufacturing may be classified in "Business" or "Mining." In 1954, for example, all plants producing potash salts from mined ores, regardless of process used, are classified in mining, whereas plants producing salt (sodium chloride) by evaporation are classified in manufacturing and those mining natural rock, in mining. While measures of the volume of merchandising activity (sale of goods bought and resold without further processing) are available (see Table 3) there are none indicating the volume of manufacturing performed by chemical plants classified in Wholesale or Retail Trade. However, the amount is believed to be relatively significant in such fields as Cleaning and Polishing Preparations (Industry 2842), Fertilizers, (Industry Group 287) and Agricultural Insecticides and Fungicides, (Industry 2897).

On the other hand, the classification system in the basic organic and inorganic chemical industries does not require, except for medicinal grades, that distinctions be made between plants manufacturing fine and heavy (i.e., large tonnage, low price per unit of weight) chemicals. The latter include such products as the common acids, alkalies, benzene, ethanol and methanol, which are produced in large quantities at low unit cost and under conditions of large scale production and continuous operation. In contrast, fine chemicals, including medicinal or those sold for laboratory use or for testing or analytical purposes, are produced in "batch lots," with small scale operational techniques giving primary consideration to purity or grade of product and only secondarily to cost.

The rapid and dynamic growth of the chemical industry not only has its effects upon the adequacy of the classification system but also upon the composition of the compiled data. As late as 1939, the classification system called for the compilation of statistics for such chemical industries as bluing and writing ink, and plants manufacturing agricultural insecticides and fungicides were grouped with household chemical compounds or specialties. Since then, newer industries such as Synthetic Fibers (2825), Synthetic (Chemical) Rubbers (2824), and Plastics (2823) have come into being and have expanded rapidly. The growth of chemical consuming industries has also led to an expanding output of basic organic and inorganic chemicals. Older industries, too, such as Pharmaceutical Preparations (2834) have shown marked strides since 1947 as a result of the expanding production of new products such as the antibiotics. On the other hand, the increasing output of synthetic organic detergents has been accompanied by declines in soap sales, and the older wood chemical industries (286) are continuing to decline and be adversely affected by the production of identical products synthetically.

Geographically, the rates of increase in the chemical industries have been larger in the South Central and Pacific Regions than elsewhere. This movement is largely caused by the current growth in "petrochemicals" and by the presence of other key chemical raw materials such as salt, lime, and sulfur. The influence of labor rates as a factor in this regional development is of negligible importance since the chemical producing industries and many of the chemical processing industries are characterized by high capital investment per worker. Despite this rapid growth in the regions named above, approximately half of the total value added by manufacture by plants classified in this major group is contributed by those located in the Middle Atlantic and East North Central States.

In recent years the Federal Government has expanded its operations in the chemical industries. Following the S.I.C. recommendations, Census data for 1954 include information for all Government-owned and privately operated facilities. The 1947 statistics, however, are not directly comparable due to the differences in "coverage" as indicated below:

Facility	Census of Manufactures	
	1954	1947
Government-owned and operated		
Tennessee Valley Authority.....	Excluded	Included
Other plants.....	Excluded	Excluded
Government-owned and privately operated		
Rubber Reserve Corporation.....	Included	Included
Other plants.....	Included	Excluded

From the viewpoint of coverage, the statistics for 1939 are directly comparable with those for 1947. On the other hand, the 1949-1953 Annual Survey of Manufactures data approximate the plant coverage indicated for the 1954 Census of Manufactures.

A further characteristic of the chemical industries is their emphasis upon research. The cost of such research, its effect upon high obsolescence of capital and quality and type of product produced are reflected by the high ratio of value added to value of shipments. The employment data for these industries only partially include these research personnel, including supporting workers, since separate reports for such activities were secured and classified as auxiliary facilities when (a) the geographical location of the laboratory differed from the manufacturing plants, or (b) when the laboratory, located at the same site as a manufacturing plant, was of significant size and could be reported as a separate unit from the manufacturing plant.

The statistics for each of the industries included in this major group reflect the economic characteristics of the particular industry. However, the following general observations regarding these data should be noted:

- (1) A sizeable proportion of some basic inorganic and organic chemicals is produced in plants which utilize at the same location these products in the preparation of other products. The appropriate sections of the industry text contain a discussion of captive output whenever it is a significant factor. The basis for securing separate reports concerning such "captive" activities is explained under "Introduction" (See Definition of Establishment). For many plants producing basic organic and inorganic chemicals and consuming these in the manufacture of explosives, plastics, rayon, soap, pulp, glass, petroleum, or other products, no separate reports were obtained for these "captive" departments. Data for such "captive" production are not shown separately but are included in the industrial statistics for the industry in which the final products of the plant are classified.
- (2) Many of the individual industries in Major Group 28, particularly those in industries 2819 and 2829, include a heterogeneous group of products. For example, products of the Inorganic Chemical Industry (2819) range from items with national dollar sales totaling less than \$10,000 to others totaling more than \$100,000,000; from chemicals which are highly strategic to others whose principal use is clearly non-strategic; from products which are manufactured by one or two companies to items which are sold under highly competitive conditions; and from products requiring simple and standard techniques involving little capital equipment to those requiring highly trained staffs and large expenditures of capital. As a result, the industry aggregates are composed of data for plants differing widely in size and many other characteristics.

(3) Many chemical products are produced commercially by two or more different processes. Therefore, an analysis of the Census of Manufactures data should, take into consideration the fact that material and labor relationships may vary significantly from plant to plant depending upon the process used, even for those producing the same chemical item.

(4) Particularly in the chemical producing industries, products may be manufactured as a co-product (i.e., the process results in two or more products of approximately equal commercial value), or as a byproduct. Dependent upon market conditions byproducts may be treated as waste materials rather than as commercial items. For example, crude salt cake and Glauber's salt (crude salt cake refined to the point where the material contains 10 parts water of crystallization and is represented by the formula  $\text{Na}_2\text{SO}_4 \cdot 10\text{H}_2\text{O}$ ) occur naturally, may be produced as a co-product in the manufacture of hydrochloric acid from salt, or may be produced as a byproduct in the manufacture of viscose rayon, sodium dichromate, phenol, and other chemicals. Some rayon plants, for varying economic reasons, do not carry on operations to make their waste product into commercial grades of Glauber's salt. In addition, Glauber's salt, may be made from purchased crude salt or from one's own material. Other plants may continue the refining operations of crude salt cake to a point where no water of crystallization occurs and thus manufacture anhydrous refined sodium sulfate. Plant-by-plant differences of this type are characterized by variations in processing, labor requirements and material needs, and results in significant variations in input and output ratios.

(5) A slight modification in the physical or chemical form of basic chemical or allied products often results in changing the classification of products. For example, an increasing proportion of plants appear to be modifying ("up grading") their basic chemicals and selling them as insecticidal preparations, chemical specialties, or cleaning and polishing preparations, rather than limiting their activity to sale of basic inorganic or organic chemicals.

(6) In the basic chemical processing industries, plants within the same industry classification are frequently the principal customers for other plants classified in the industry. The supplier and user relationship is of two types—that between plants of the same company ownership and that between plants of different company ownership. The published data at times provide some measures of these relationships. For example, measures of the shipments included in the first category (interplant transfers) may be derived from the statistics shown in Table 6A, Quantity and Value of Products (the difference between total shipments and commercial shipments). This measure as well as that relating to commercial shipments, however, do not provide all the information needed to determine the overstatement in the total value of finished products shipped by the industry. For many industries, and particularly for the more important products, approximate measures of the overstatement may also be computed from the data appearing in Table 7, Materials Consumed.

(7) The data appearing in Table 6A, Quantity and Value of Products are limited to the products defined as primary to the specified industry. For example, the statistics for nitrogen compounds shown for Industry 2819 relate only to synthetic inorganic compounds, whereas information for synthetic organic nitrogen compounds appear in the chapters relating to Industrial Organic Chemicals Industry (2829); byproduct nitrogen, (ammonium sulfate), in the Byproduct Coke Industry (2931); natural organic fertilizer tankage and bone meal, in the Grease and Tallow Industry (2886) and other organic nitrogenous fertilizer materials in the Vegetable Oil Mill Industries (288).

## CHEMICALS AND PRODUCTS

28-3

Table 1.—GENERAL STATISTICS FOR THE INDUSTRY GROUP: 1954 AND EARLIER YEARS

(For explanation of column captions see Introduction)

Year <sup>1</sup>	Establish- ments, number	All employees <sup>2</sup>		Production workers			Value added by manufacture <sup>3</sup>	Capital expendi- tures, new	Horsepower of prime movers and electric motors <sup>4</sup>

NA Not available.

<sup>1</sup>In addition to data for operating establishments, manufacturers' central administrative offices and auxiliary units reported 62,561 employees with a payroll of \$406,280 thousand in 1954. Similar data are shown for the years 1949-1953 in the Annual Survey of Manufactures volumes. Data for these units are not available for the years prior to 1949.

<sup>2</sup>The figures for 1939 through 1954 include data for employees of manufacturing establishments who are engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>3</sup>Value of products less cost of materials, supplies, fuel, electricity, and contract work. For 1899-1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture.

<sup>4</sup>Driven by purchased energy.

<sup>5</sup>The figures for 1949-1954 include data for Government-owned plants operated by private firms for the account of the Federal Government. See text above for further explanation.

<sup>6</sup>The figures for 1949-1953 represent estimates derived from a representative sample of manufacturing establishments canvassed in the Annual Survey of Manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period.

<sup>7</sup>The figures prior to 1939 include data for establishments primarily engaged in manufacture of electrometallurgical products, included from 1939 in the "Primary metal" industries. Value added by manufacture for 1939, including data for these establishments and on a basis comparable with earlier years, was \$1,837.5 million.

<sup>8</sup>The figures for 1899-1935 but not for later years, include data for establishments primarily engaged in mining of rock salt or in smelting and refining of aluminum. Value added by manufacture for 1937, including data for these establishments and on a basis comparable with 1935, was \$1,759.1 million.

<sup>9</sup>The figures for 1899-1935, but not for later years, include data for woods employees of the Gum naval stores industry. Woods employees in 1937 (for which data are not included in the figures) were reported as follows: Production and related workers, 30,880 and wages \$8.6 million.

<sup>10</sup>The figures for 1899-1931 do not include data for establishments primarily engaged in manufacture of ethyl alcohol, included for these years in the figures for the "Food and kindred products" industries.

<sup>11</sup>The figures for 1899-1927 include data for establishments other than petroleum refineries engaged in the manufacture of lubricating oils, which are included for later years in the series for the petroleum and coal products industries.

<sup>12</sup>The figures for 1899-1925 include data for establishments primarily engaged in manufacturing of vegetable cooking oils, included for later years in the series for the food and kindred products industries.

<sup>13</sup>The figures for 1899-1923, but not for later years, include data for certain establishments primarily engaged in manufacture of rubber cement. Value added by manufacture for 1925, including data for these establishments and on a basis comparable with 1923, was \$1,321.2 million.

<sup>14</sup>The figures for 1899 only include data for establishments primarily engaged in manufacture of candles. Value added by manufacture for 1904, including data for these establishments and on a basis comparable with 1899, was \$287.2 million.

## MANUFACTURES--INDUSTRY STATISTICS

Table 2.--GENERAL STATISTICS FOR INDUSTRY GROUPS BY REGIONS AND STATES: 1954 AND 1947  
(For explanation of column captions see Introduction)

NOTE: Detailed figures may not add to the totals because of independent rounding.

D Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>Each producing state not shown separately has been withheld either (a) to avoid disclosing figures for individual companies; or (b) because the State had less than 100 employees in the industry group. Such state figures are included, however, in the appropriate regional and United States totals.<sup>2</sup>The 1954 figures include data for government-owned privately operated plants whereas the 1947 data exclude this information but include figures for the Tennessee Valley Authority.<sup>3</sup>Less than \$500 thousand.

## MANUFACTURES—INDUSTRY STATISTICS

Table 3.--DETAILED STATISTICS FOR THE INDUSTRY GROUP: 1954

(For explanation of line captions see Introduction)

## Industrial Inorganic Chemicals

This report shows 1954 Census of Manufactures statistics for establishments classified into each of the following industries:

Code	Title
2811--Sulfuric Acid	
2812--Alkalies and Chlorine	
2819--Industrial Inorganic Chemicals, Not Elsewhere Classified	

Establishments primarily engaged in manufacturing inorganic paint pigments are classified in the Inorganic Color Pigments Industry 2852; inorganic insecticide preparations in the Insecticides and Fungicides Industry 2897; medicinal grades of inorganic chemicals in the Medicinal Chemicals Industry 2833; and compressed and liquefied gases in Industry 2896.

### 2811--Sulfuric Acid

This industry comprises establishments primarily engaged in producing sulfuric acid by the contact or chamber process. Thus the industry, as defined, excludes activities relating to recovered sulfuric acid except those involving the fortifying (strengthening) of spent acid by the addition of sulfur trioxide. Recovery and reuse of acid by such methods, as hydrolysis and evaporation, (concentration) or mixing of weak and strong acids are generally carried on in connection with other manufacturing activities and thus no separate Census of Manufactures reports were received and only fragmentary statistics relating to spent acid have been compiled. The product detail compiled for this chemical appears in Table 6A product codes 2811111 to 2811451.

The value of shipments of Industry 2811, Sulfuric Acid in 1954 totaled \$139 million. This included shipments of sulfuric acid (primary products) valued at \$107 million, shipments of other products (secondary products) valued at \$31 million, and miscellaneous receipts of \$1 million.

Industry 2811 shipments of sulfuric acid in 1954 represented 78 percent of its total product shipments (primary and secondary). Secondary products shipped by this industry in 1954 consisted mainly of inorganic chemicals \$21 million; and miscellaneous chemical products totaling \$10 million.

Industry 2811 shipments of sulfuric acid (primary products) in 1954 represented 66 percent of the sulfuric acid shipped for sale or interplant transfer by all industries valued at \$66 million. Other industries shipping sulfuric acid for sale or for interplant transfer consisted mainly of Industry 2819, Inorganic Chemicals, \$22 million; Industry 2871, Fertilizers, \$7 million; Industry 2829, Organic Chemicals, N.E.C., \$5 million; and Industry 3333, Primary Zinc, \$8 million.

The figure 66 percent is known as the "coverage ratio," that is, it measures the extent to which all shipments of primary products of an industry are "covered" by plants classified in that industry, as distinguished from secondary producers elsewhere. Based on quantities produced, establishments classified in Industry 2811 manufactured 41 percent of the United States total of approximately 14 million short tons (100% H<sub>2</sub>SO<sub>4</sub>) of sulfuric acid, a large proportion of which is consumed in the manufacture of other chemicals by producing plants. The comparable 1947 percentage based on the production of approximately 11 million short tons is 37 percent.

The statistics for this industry appearing in the 1947 Census of Manufactures and Annual Survey of Manufactures Volumes were not shown separately, but were included with the data for Industrial Inorganic Chemicals, N.E.C. (S.I.C. No. 2819). Selected 1947 data have been retabulated for comparability with 1954 statistics.

The combination of low bulk value and high transportation cost of sulfuric acid cause sulfuric acid plants to be widely scattered and many to be integrated with operations involving the utilization of the acid. The statistics for Industry 2811 shown in Tables 1 through 4 in this report apply only to those plants for which separate reports were available, while data for "captive" plants are included in the statistics of the industry in which the final products of the plant are classified, such as "Explosive" Industry (S.N.C. No. 2826), or Fertilizer Industry (S.I.C. No. 2871). Of the 180 plants producing sulfuric acid in 1947 and of the 205 in 1954, reports classified in this industry were filed by 43 and 47 plants, respectively. Based upon the industrial classification of establishments producing sulfuric acid, the distribution for 1947 and 1954 is shown below.

QUANTITIES OF SULFURIC ACID PRODUCED BY INDUSTRIAL CLASSIFICATION OF ESTABLISHMENT: 1954 AND 1947  
(Figures in 1,000 short tons of 100% H<sub>2</sub>SO<sub>4</sub>)

Code	Title	1947		1954	
		Total production <sup>1</sup>	Produced and consumed in producing plant	Total production <sup>1</sup>	Produced and consumed in producing plant

(D) Data withheld to avoid disclosing figures for individual companies.

<sup>1</sup>The difference between total production and amount produced and consumed closely approximates commercial sales and transfers to other plants of the company.

Due to demands for stronger acid, economies in transportation and for other reasons, the number of plants utilizing the contact process to produce sulfuric acid has increased and the number employing the chamber process has declined. At only 10 locations in 1947 and at only 8 in 1954 were both processes employed in the same establishment. Since acid may be strengthened in contact units by the addition of sulfur trioxide, statistics relating to the input of this acid have also been compiled in order to measure the output of virgin acid. In addition to the statistics appearing in Table 6A, Quantity and Value of Products, data relating to the number of plants, by process, for 1954 and 1947 are as follows:

PROCESS	1954	1947
By chamber process only.....	77	85
By contact process only.....	120	85
By both chamber and contact.....	8	10
Fortifiers of spent acid.....	21	25

The principal material consumed in manufacturing sulfuric acid is sulfur dioxide secured from sulfur bearing materials such as sulfur, pyrites, waste gases from smelters, hydrogen sulfide, and in recent years from sludge (spent sulfuric acid). The statistics for these materials shown in Table 7A include quantities of sulfur, pyrites, and sludge burnt either in the production of contact or chamber acid.

Monthly data showing the production and stocks of sulfuric acid by process and for grades (oleum and other than oleum) appear in the Census publication Facts for Industry Series M19A, Inorganic Chemicals and Gases. Supplementary information showing the quantities of sulfuric acid produced as a by-product of copper, zinc, and lead plants is compiled and published by the Bureau of Mines, U.S. Department of Interior. The reporting concepts for production in all of these series are identical and the figures represent primary production by the oxidation of sulfur or sulfur bearing materials, including sludge.

#### 2812--Alkalies and Chlorine

This industry comprises establishments primarily engaged in manufacturing sodium hydroxide (caustic soda), potassium hydroxide (caustic potash), soda ash, potassium carbonate, sodium bicarbonate, sal soda, and chlorine. Establishments primarily engaged in manufacturing ammonium compounds or alkali metals are classified in Industry 2819, Industrial Inorganic Chemicals, N.E.C.; and plants primarily engaged in mining natural potassium, or sodium alkalies are classified in SIC Industry 1474, Potash, Soda And Borate Minerals, a non-manufacturing industry. For a detailed list of products primary to this industry, refer to Table 6A, product codes 2812111 to 3812481.

The value of shipments of Industry 2812, Alkalies and Chlorine in 1954 totaled \$400 million. This included shipments of alkalies and chlorine (primary products) valued at about \$305 million, shipments of other products (secondary products) valued at \$94 million and miscellaneous receipts of \$1 million.

Industry 2812 shipments of alkalies and chlorine in 1954 represented 76 percent of its total product shipments (primary and secondary). In 1947, this primary product specialization ratio was 81 percent. This change of 5 percent reflects the increase in shipments of organic chemicals by establishments primarily producing alkalies and chlorine. Secondary products shipped by Industry 2812 in 1954 consisted mainly of miscellaneous acyclic chemicals, \$25 million; intermediates, \$4 million; pesticides and other organic agricultural chemicals, \$4 million; industrial inorganic chemicals, \$20 million; and other products, which either require chlorine or alkalies in their preparation, such as chlorine bleaching compounds or cleaning preparations, or are recovered as by-product operations, such as carbon dioxide, totaling \$36 million.

Industry 2812 shipments (including interplant transfers) of chlorine and alkalies (primary products) in 1954 represented 84 percent of those products valued at \$363 million produced for sale or interplant transfer by all industries. This coverage ratio in 1947 was 85 percent. The remaining 16 percent in 1954 was shipped almost entirely by plants either in the inorganic or organic chemical industries, n.e.c., (S.I.C. No. 2819 and 2829). However, 94 percent of the total shipments (including interplant transfers) of soda ash is accounted for by plants classified in

Industry 2812, whereas the percentage for chlorine is less than 80 percent.

Eighty-two (82) percent of the total 1954 estimated production value of alkalies and chlorine (including captive production) are produced by Industry 2812; 13 percent by Industries 2822 and 2829, Organic Chemicals, 2 percent in Industry 2611, Pulp Mills, and the remainder in other industries.

The "heavy chemicals," chlorine and sodium alkalies, are utilized in the manufacture or treatment of paper and pulp products as well as in the production of chemicals, soaps, rayon or textiles, or refining of vegetable oil and petroleum and, therefore, a considerable proportion of the total produced is used captively. As indicated in the table below only about two thirds of the total caustic soda and 55 percent of the total chlorine are produced in establishments classified in Industry 2812. (For consumption data see Table 7 Series.)

Marketwise, quantities are also "captive held" since the above products are shipped to other plants of the same company classified in other industries. A measure of the quantities so shipped may be derived by subtracting from the totals the amount sold commercially, the statistics for which appear separately in Table 6A.

When using the Census of Manufactures data for state, regional, or United States totals, the following developments should also be noted:

(1) Most manufacturers of sodium carbonate (soda ash) also produce caustic, chlorine, and sodium bicarbonate.

(2) Declines in sodium hydroxide (caustic soda) output by the lime soda process have been accompanied by a reduction in the number of plants utilizing this process. In 1939 and in 1947, nine plants employed the lime soda process whereas in 1954 only seven plants reported the production of this chemical by this process. During the 1940's, the output of lime soda caustic represented about 19 percent of the total supply, while the quantities produced in 1954 account for only 15 percent of the total.

(3) When producing caustic soda by the electrolytic process, chlorine occurs as a co-product. With a growing market for this product, manufacturers of caustic soda by this process may have a competitive advantage over other sodium alkali producers in those general areas involving acid neutralization. The current output of sodium carbonate (soda ash) thus has not been expanding, despite its entrenched use in glass and alumina manufacture, and reached its all-time high in 1951 when about 5 million tons (58% Na<sub>2</sub>O basis) was produced.

(4) Chlorine production has doubled since 1947 and 1954 output is about six times the 1939 quantity of 514,401 short tons. This increase is partly due to expansion of existing facilities as evidenced by the fact that the 1939 data are based on reports received from 32 plants; the 1947 data, from 47; and the 1954 data, from 53 plants. Furthermore, an increasing amount of this gas is being liquified as indicated by tonnage increases from 644 thousand tons for 1947, to 1,585 thousand tons for 1954, which figures represent about 45% and 55%, respectively, of the 1947 and 1954 totals.

(5) To satisfy the growing demand for chlorine or chlorine derivatives in plastics (vinyl chloride), synthetic fibers, refrigerants, propellants, solvents, paint removers, insecticides and herbicides, (BBC, DDT, and toxaphene) as well as many other chlorinated hydrocarbons for antiknock additives, anti-freeze and other uses, molten salt is being electrolyzed, making chlorine with sodium rather than caustic as a co-product. Greater utilization of by-product hydrochloric acid (see below), which at one time represented a serious waste disposal problem, is also being evidenced. Some measures of the effect of these developments are provided by data appearing in Table 6A, showing the quantities produced by process.

Data concerning the industry's major material inputs--limestone and salt--were not compiled by the Census Bureau. Such information may be derived from statistics appearing in the Minerals Yearbook, published by the Bureau of Mines, U.S. Department of Interior. These data, however, may not be directly compared with the statistics for "cost of materials" because of the factors regarding plant classification in the Census of Manufactures data as described above. In addition, establishments classified in this industry were requested in 1954 to report separately the amount and cost of coal, coke and petroleum gases used as a fuel and as a raw material. As a result, the fuel

## QUANTITIES OF CAUSTIC SODA AND CHLORINE PRODUCED BY INDUSTRIAL CLASSIFICATION OF ESTABLISHMENT 1954 AND 1947

Code	Title	Caustic soda (Quantity in short tons of 58% Na <sub>2</sub> O)		Chlorine (Quantity in short tons)	
		1947	1954	1947	1954
	TOTAL.....	2,103,150	3,409,754	1,443,219	2,903,723
2812	Alkalies and chlorine.....	1,425,106	2,162,178	662,714	1,602,511
2611	Pulp mills.....	68,616	91,947	68,090	84,969
2822-29	Organic chemicals.....	609,428	944,916	633,457	973,716
xxx	Other industries.....		210,713	78,353	242,527

statistics appearing in Table 3 are not directly comparable with the data for 1947, since such distinctions were not made in the latter census.

Monthly data showing production, shipments, stocks, and consumption at producing plants for chlorine and the principal sodium alkalies appear in Facts for Industry Series M19A, Inorganic Chemicals and Gases. Monthly production and stock data for caustic potash are also published in this release. The reporting concepts for all of these series are identical and the slight variations in the figures, which do exist, result from minor reporting differences.

2819--Inorganic Chemicals, N.E.C. (Full Standard Industrial Classification Title: Industrial Inorganic Chemicals, Not Elsewhere Classified)

This industry comprises establishments primarily engaged in manufacturing industrial inorganic chemicals which are not elsewhere classified. Important products of this industry include inorganic acids such as boric, hydrochloric, hydrofluoric, nitric, and phosphoric; inorganic salts of sodium, potassium, aluminum, calcium, chromium, magnesium, mercury, nickel, silver, and tin; inorganic compounds such as alums, calcium carbide, sodium silicate, ammonium compounds, and anhydrous ammonia; and elemental bromine and iodine. Establishments primarily engaged in manufacturing sulfuric acid are also classified in this industry. Establishments primarily engaged in manufacturing inorganic paint pigments are classified in Industry 2852, Inorganic Color Pigments Industry, and medicinal grades of inorganic chemicals in Industry 2833 Medicinal Chemicals. Establishments primarily engaged in mining, milling or otherwise preparing natural potassium, boron or sodium compounds (other than common salt) are not classified in manufacturing industries but instead are included in Mining Industry 1474, Potash, Soda and Borate Minerals. For a detailed list of primary products of Industry 2819, refer to Table 6A, product codes 2819111 to 2819798.

In the 1947 Census and subsequent Annual Surveys, data for Industry 2811, Sulfuric Acid, were merged with Industry 2819. Separate data for these two industries are shown for 1954 and selected 1947 statistics have been retabulated for comparability with the 1954 Census.

The 1954 statistics include information for Government-owned plants operated by private firms for the account of the Federal Government but exclude the activities of Government-owned and/or operated plants. The 1947 statistics, however, exclude information for both these groups of plants except for the Tennessee Valley Authority plants. Since the capital expenditures made by these Government-owned-privately operated plants are paid for by current billings to the United States, these amounts are excluded from the statistics shown in Tables 1, 2, and 3, which represent expenditures for privately owned facilities. In addition, establishments classified in this industry were requested in 1954 to report separately the amount and cost of coal, coke and gas used as a fuel and as a raw material. As a result, the fuel statistics appearing in Table 3 are not directly comparable with the data for 1947 since such distinctions were not made in the latter census.

The value of shipments of Industry 2819 in 1954 totaled \$1,859 million. This included shipments of inorganic chemicals, n.e.c. valued at \$1,126 million, shipments of other products (secondary products) valued at \$164 million, and miscellaneous receipts (mainly from the operation of Government-owned plants) of \$569 million.

Receipts for merchandising (products bought and resold without further manufacture or processing) valued at \$36 million are excluded from the \$1,859 million value of shipments of Industry 2819. Data relating to these merchandising receipts are also excluded from the cost of materials and value added by manufacture, but these activities are reflected in other detailed industry statistics, mainly employment and inventory.

Industry 2819 shipments of inorganic chemicals, n.e.c. in 1954 represent 87 percent of its total product shipments (primary and secondary). Secondary products shipped by Industry 2819 consisted mainly of synthetic organic chemicals \$28 million; insecticides and fungicides \$6 million; sulfuric acid, \$22 million; alkalies and chlorine, \$16 million; electrometallurgical products, \$10 million; and chemical specialties, \$14 million.

Industry 2819 shipments of industrial chemicals (primary products) for sale or interplant transfer in 1954 represent 78 percent of these products valued at \$1,439 million by all industries. The coverage ratio varies significantly for the primary product classes of Industry 2819, e.g., synthetic ammonia, nitric acids, except nitric and sulfuric, 83 percent; aluminum compounds, 94 percent; potassium and sodium compounds, 75 percent; reagent and high purity grades, 87 percent; and other inorganic chemicals, n.e.c., 72 percent.

As indicated in the textual material for Chemicals and Allied Products (Major Group 28), a significant amount of inorganic chemicals are produced and frequently also consumed in the same establishment manufacturing organic chemicals or other chemical products. While some measures of the dispersion of inorganic chemical production are provided by the statistics appearing in Table 7B, Consumption of Selected Inorganic Chemicals, Quantities Produced and Consumed, by Industry Classification of Producing Establishments, this point may be further illustrated by the data shown below:

SODIUM SULFATE: PRODUCTION AND NUMBER OF PLANTS,  
BY PROCESSES, 1954(Net Tons of 100% Na<sub>2</sub>SO<sub>4</sub>)<sup>1</sup>

Process	Number of Establishments	Production
Total.....	52	928,129
Mannheim (including Hargreaves)..	13	281,804
Viscose rayon.....	18	250,182
Sodium dichromate.....	7	78,276
Natural.....	4	
Phenol, boric acid, formic acid, lithium sulfate, and other.....	10	317,867

<sup>1</sup> Includes Glauber's salt converted to 100% Na<sub>2</sub>SO<sub>4</sub>.

The production figures appearing in Table 6A, Quantity and Value of Products, represent primary manufacture of the various chemicals in the United States including quantities produced for further processing in the same plant, for intra-company transfer, and for sale to other companies. Thus, when two or more physical forms of a specific chemical are shown in Table 8, the production data include quantities which have been used to prepare other physical forms of the same chemical. In some cases, data are included for materials produced "in process" as an intermediate

to the end product, and, as indicated in the footnotes, include figures for TVA plants and those classified in the Mineral industries. These "non-manufacturing" establishments shipped \$84 million of inorganic chemicals in 1954.

While this industry is also characterized by constant research for new products, new processes, and finding markets for products which have been considered waste products, the material-product relationship for the industry has not generally changed significantly since 1947. The inorganic chemicals industry also provides its own best customers, and the quantities of specific inorganic chemicals consumed by establishments classified in this industry as well as in others are shown in the Table 7 Series. The statistics appearing in Table 7A are limited by the fact that respondents were not requested to furnish data if the amount of the specified chemical purchased totaled less than \$5,000. The consumption information reported for the inorganic and organic chemicals industries (Groups 281 and 282) include materials used in producing other physical modifications of the same chemicals. Data shown in Tables 7B and 7C have been adjusted to exclude quantities so used.
